Mr. ROSTENKOWSKI (during the reading). Mr. Speaker, I ask unanimous consent that the House amendment to the Senate amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The SPEAKER pro tempore. Is there objection to the first request of the gentleman from Illinois?

Mr. DUNCAN of Tennessee. Mr. Speaker, reserving the right to object—and I shall not object—I do so to ask the gentleman from Illinois (Mr. ROSTENKOWSKI) to explain these amendments.

Mr. ROSTENKOWSKI. If the gentleman will yield, Mr. Speaker, as Members know, H.R. 8423, the medicare renal disease bill, was passed by the House on September 12, 1977, and approved by the Senate, with minor amendments, on April 10, 1978. The amendments made by the Senate are essentially technical and drafting changes designed to clarify congressional intent. Thus, the Senate has included amendments to clarify the legislation with respect to patient representation on renal disease network councils and the responsibilities of membership on network organizations.

The Senate-approved bill also includes two minor technical amendments to certain other provisions of the Social Security Act. One amendment would extend to October 1, 1978, the effective date for the implementation of a provision of present law relating to medicare reimbursement for the services of physicians in teaching hospitals. The purpose of this amendment is to provide a brief additional period of time for the Secretary to issue implementing regulations. The second amendment corrects several technical defects in the medicare/medicaid antifraud legislation enacted by the Congress last year. As my distinguished colleague, Chairman ROGERS, will indicate in his statement, the Interstate and Foreign Commerce Committee has no objections to this amendment.

One additional amendment included in the bill as approved by the Senate relates to the statement of congressional intent with respect to the appropriate use of treatment modalities. Here also, the difference is essentially one of language rather than substance. As members will recall, the House bill expressed the intent that optimum use be made of self-dialysis settings and transplantation for suitable patients. Although sharing the House's objective on this point, some concern was expressed about the terminology in the House bill which suggested that a majority of new patients should be referred to these modalities. I believe there is merit in the Senate's contention that this legislation should not attempt to specify any particular proportion. However, I believe that revision of the questionable terminology in the House bill is preferable to the removal of the provision in its entirety. Since there is general agreement on the desirability of including a statement of intent to encourage optimum use, I believe a House amendment which reflects the desired expression of intent, without specifying any proportion of patients, will be acceptable to the Senate and will help considerably to advance the purpose of this legislation.

I, therefore, urge passage of the bill as amended by the Senate with a further amendment by the House that includes a statement of congressional intent to encourage the optimum use of home dialysis and transplantation. This amendment would clarify the intent of both bodies to assure that the network organizations responsible for pursuing this objective do so in accordance with good medical practice and regulations designed to prevent conflicts of interest with respect to the appropriateness, nature, or site of patient care.

Mr. Speaker, I respectfully urge all Members to support the bill as amended. It is my firm conviction that this legislation will significantly improve and strengthen the medicare renal disease program by first improving patient access to alternative treatment methods; second, eliminating financial disincentives to the use of home dialysis; third, providing for the use of a more cost-effective prospective reimbursement method; and fourth, strengthening peer review responsibility for assuring medically proper and efficient delivery of services. Moreover, these improvements will produce cost savings. Both the administration and the Congressional Budget Office estimate substantial annual savings can be expected to result from the enactment of this legislation.

Mr. Speaker, no one disputes the enormous value of the renal disease program. It has made the fruits of medical

research and technology available to thousands of people who might otherwise have been forced to forgo them—at the price of life itself. We are in a position now to improve that program, both in the protection it provides and in the greater degree of cost-effectiveness it can achieve. I urge the House's approval.

Mr. DUNCAN of Tennessee. Mr. Speaker, I would like, first of all, to express my agreement with the remarks of our able subcommittee chairman, and to express my support for H.R. 8423, as amended.

When the House passed this legislation last September, I stated my belief that H.R. 8423 would be an extremely valuable addition to our health legislation; that it is vital for Congress to act to strengthen the end stage renal disease program and make it more cost effective. Today, particularly in view of the continuing escalation of health care costs, I am convinced that my statement still holds true.

H.R. 8423 undoubtedly will provide greater patient access to transplantation and self-care dialysis. Moreover, the savings that will be generated as a result of the use of target reimbursement rates and other incentive methods may be substantial. In this regard, I hope and expect that the Secretary will insure, through regulations, that the quality of care delivered to patients in noninstitutional settings will remain at a high level, and that no facilities will economize at the expense of quality of patient care.

I believe that the language which our subcommittee chairman has suggested, as a responsive house amendment to the bill passed by the Senate, will provide certain modifications to the bill passed by the House that are desirable. For example, the bill as amended would provide for encouraging the optimum use of self-dialysis settings and transplantation, consistent with sound medical practice, thereby clarifying and improving the previous House-passed language.

In conclusion, Mr. Speaker, the passage of H.R. 8423 as amended may be expected to accomplish a great deal for patients in need of renal dialysis and, at the same time, to generate substantial cost savings for all of our taxpayers. I, therefore, urge my colleagues to support this important legislation.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

Mrs. FENWICK. Mr. Speaker, I reserve the right to object to ask a question.

I am very much concerned about renal dialysis and the treatments needed for those lifesaving procedures. I wonder if there is any way in this bill to include nonprofit installations. Many homes are too small for the machinery, and it is often not practical to have it there. The cost in the hospital is tremendous, and in light of that fact certain nonprofit installations have been set up where these renal dialysis machines are installed, and where the family is instructed in giving the treatment to the patient.

I wondered if this bill would cover and allow for recognition of such nonprofit installations.

Mr. ROSTENKOWSKI. If the gentlewoman will yield, under the provisions of this legislation we are encouraging the use of less expensive forms of dialysis, the thing the gentlewoman is concerned about, and it is in the provisions of this legislation.

Mrs. FENWICK. I thank the gentleman, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

Mr. PICKLE. Mr. Speaker, reserving the right to object, I want to commend the gentleman from Illinois, first, for the measure before us.

Renal disease is one of the most agonizing, as well as debilitating, diseases we have. We have learned a great deal about it throughout the country. One of the most agonizing aspects of it is the high cost of the processes, as well as the physical hardship involved.

Having served on the investigation subcommittee previously, we have looked into the problem of how we can reduce these costs, and how we can make the services more easily available. But, no matter what we can do about costs, they remain terribly expensive.

Mr. Speaker, I made this reservation of objection to point out to the Members that there is an institution in Austin, Tex., the Austin Diagnostic Clinic, which is running a series of tests on a new approach to renal dialysis treatment. They have found that by providing home treatment, they can effectively make these treatments and almost cut the cost of treatment in half.

It is a little early to know about this peritoneal process and how the individual can treat himself at home, but we believe we are very close to making a public announcement of achievement. This process has been appearing in some of the national medical magazines.

I simply want to remind the Members we are getting closer to finding better treatment at less expensive cost, and, if so, then we will have done a great service to the American people. Meanwhile the committee deserves our thanks for bringing forth this excellent piece of legislation.

The SPEAKER pro tempore. Is there objection to the first request of the gentleman from Illinois (Mr. ROSTENKOWSKI)?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill H.R. 8423, just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

PROVIDING FOR CONSIDERATION OF H.R. 9400, CIVIL RIGHTS OF INSTITUTIONALIZED PERSONS

Mr. PEPPER. Mr. Speaker, by direction of the Committee on Rules I call up House Resolution 1150 and ask for its immediate considerations.

The Clerk read the resolution, as follows:

H. RES. 1150

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 9400) to authorize actions for redress in cases involving deprivations of rights of institutionalized persons secured or protected by the Constitution or laws of the United States. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on the Judiciary, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on the Judiciary now printed in the bill as an original bill for the purpose of amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. The gentleman from Florida (Mr. PEPPER) is recognized for 1 hour.

Mr. PEPPER. Mr. Speaker, I yield 30 minutes to the able gentleman from California (Mr. DEL CLAWSON), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 1150 provides for the consideration of H.R. 9400 which concerns the civil rights of institutionalized persons. This is an open rule providing 1 hour of general debate to be divided and controlled in the customary manner, and it makes the committee amendment in the nature of a substitute in order to be considered as an original bill for the purpose of amendment. The rule also provides for a motion to recommit with or without instructions.

Mr. Speaker, H.R. 9400 is very important legislation, as it expressly authorizes the Attorney General of the United States to initiate or intervene in civil actions in order to redress patterns of deprivation of civil rights of institutionalized persons, including institutionalized children, prisoners, persons being cared for in our mental health institutions, and the elderly. This legislation clarifies the standing of the United States when there is no underlying Federal statute specifically authorizing intervention by the Attorney General, but it does not change existing law governing the conduct of institutions covered by the bill. I commend my distinguished colleague from Wisconsin, Mr. KASTEN-

MEIER, for his efforts in bringing this bill to the floor.

On numerous occasions in my capacity as chairman of the House Select Committee on Aging, I have been shocked to be advised of gross, inhumane treatment encountered by residents of nursing homes and other State-operated institutions. Our committee has uncovered countless instances in which the rights of patients are infringed, where persons are involuntarily committed or released from institutions without provisions for care, or where such persons live in fear that complaints about inadequate care or attempts to seek better care would inevitably lead to further hardship. Unfortunately, these circumstances have been allowed to persist in many cases because of lack of authority, direction, or will to redress the grievances. This legislation is a strong step toward meeting these problems.

Although our basic civil rights are insured by the bill of rights as an inalienable condition of U.S. citizenship, and by the patients' rights provisions within medicaid and medicare regulations, the protection of these rights has been woefully inadequate. The only remedy at present is a total cutoff of Federal reimbursement—which the Federal Government has been reluctant to undertake if such action would force a home to close.

For these reasons, I was pleased to join Congressman COHEN last year in the introduction of legislation designed to provide for the development and enforcement of standards relating to patient rights, while also permitting patients to become involved in decisions within the institution that affect their own health. I am happy to report that we have been assured of hearings on our legislation at the earliest possible time.

Mr. Speaker, I welcome both these upcoming hearings and the enactment of H.R. 9400. I respectfully urge the adoption of House Resolution 1150 so that we may move to the consideration of this bill.

Mr. DEL CLAWSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 1150 provides for the consideration of H.R. 9400 which authorizes action on behalf of the civil rights of institutionalized persons. This is an open rule providing 1 hour of general debate with the time equally divided between the chairman and ranking minority member of the Committee on the Judiciary. The committee substitute will be considered as an original bill for the purpose of amendment. After consideration of the bill under the 5-minute rule, any Member may demand a separate vote on any amendment in the House which was adopted in the Committee of the Whole. Finally, one motion to recommit with or without instructions is included in the resolution.

H.R. 9400 gives the Attorney General legal standing to initiate or intervene in civil actions when there is reason to believe that a State-controlled institution such as a mental hospital, prison, nursing home, or juvenile facility may be regularly depriving institutionalized persons of their rights. Further, the Department of Justice is directed to develop standards for the certification of the States' grievance resolution procedures. This authority has been questioned by some and may be an unnecessary and undesirable extension.

Mr. Speaker, the rule has no known opposition to my knowledge, and has been stated as no waivers and is an open rule.

Mr. Speaker, I yield such time as he may consume to the gentleman from Ohio (Mr. KINDNESS).

Mr. KINDNESS. I thank the gentleman for yielding.

Mr. Speaker, I would draw to the attention of the House, first, that I have the greatest respect, admiration, and felicity for the august Committee on the Judiciary of the House of Representatives, but it certainly does report its share of bills that ought never to see the light of day, at least in the form in which they are reported, and this is one of them. Admittedly and decidedly, there is not in the report of the committee any more than one set of dissenting views. I forget exactly what the time factor was, but it was one of the inconvenient times when, frankly, some of us on the Committee on the Judiciary did not give enough attention to what could be done by way of providing additional clarification for the other Members of the House. We should have, and I certainly accept the blame along with others for not having submitted additional dissenting views or supplemental views about H.R. 9400.

There was a good bit of debate and consideration in the committee on what is wrong with this bill, and one of the things that was stated in the debate in the full Committee on the Judiciary about this bill was that it was not intended to reach every nursing home. If the Members have had the opportunity to look at the bill, they will see from the definition of "institution" that it does include every nursing home, every institution that provides skilled nursing, intermediate, or long-term care, or custodial or residential care if they are under a contract with the State or local governmental unit.

What we are concerned with in particular in this case is what is this matter of being under a contract, or, to put it another way, what constitutes a contract. We know that a medicare or medicaid patient, a welfare patient, in a nursing home is there under a contractual relationship between that nursing home and either the State or county or local governmental, unit that is administering that part of the welfare system. We know that there is a contractual relationship.

In the committee it was argued strongly that, no, we are not talking about taking in everything like that, and in the report of the committee which was subsequently prepared, of course, it states:

Similarly, if an institution, as defined under paragraph (B) provides services in whole or in part on behalf of or pursuant to a contractual agreement which creates a legal relationship with a state or political subdivision, it is the intent of the committee that action within such institutions which deprive persons of rights be reachable by an Attorney General suit.

That is, it fits under this bill, and it gives the Attorney General of the United States standing to sue a nursing home in your community, if it is technically within a contractual relationship with either a State or local governmental unit. That is one of the things about this bill that needs further consideration. I think it needed further attention in the committee, but I believe the will of the committee was to report a bill that may, indeed, get the Attorney General of the United States into the business of running every nursing home in this country, far beyond the scope of what was really argued in the committee as being the purpose of this bill, but certainly within the scope of what is possible to be interpreted out of this bill and its exact language at this time. There will be amendments offered under the 5-minute rule to attempt to correct that problem.

There are some other things wrong with the bill. It could have the Attorney General of the United States running the jails and prisons of every State and local governmental unit throughout this country, theoretically, if it were to be pressed that far. If the authority given the Attorney General by this bill becomes law, it could go that far. Where are they going to get the personnel and the ability to deal with such problems, and does the Deparment of Justice belong in such a function to begin with?

I suggest we could save ourselves a whole lot of time by defeating this rule and letting the bill either be considered further or in another form by the Committee on the Judiciary, or let it seek its place of respite somewhere between Rules and the House floor.

Mr. WIGGINS. Mr. Speaker, will the gentleman yield?

Mr. KINDNESS. I yield to the gentleman from California.

Mr. WIGGINS. I thank the gentleman for yielding.

The gentleman correctly observed that there is only one dissenting view in the committee report, and that troubles me as well as the gentleman from Ohio. But I am not nearly as troubled by the dissenting view as I am by the majority statement in the committee report.

I do not know the facts. I will invite the majority to tell me what the truth is, but I believe this committee report was not written by any member of the committee, nor by any staff member of the committee.

I suspect that the committee report was written entirely by the Department of Justice and it construes the powers accorded to the Department of Justice in the broadest possible language in a way to serve purposes contrary to the debate which occurred in the committee. I am very troubled by the sweeping language in the committee report.

Mr. KASTENMEIER. Mr. Speaker, will the gentleman yield?

Mr. KINDNESS. I yield to the gentleman from Wisconsin.

Mr. KASTENMEIER. Mr. Speaker, so far what the gentleman from California suggested is not true. I wish to disassociate myself with the implication suggested, as well as the rather twisted remarks, I might say, from the gentleman from Ohio characterizing this bill.

Mr. WIGGINS. Do I understand that I am correct in my belief that the report was written by the Department of Justice?

Mr. Speaker, if the gentleman will yield further, is my statement correct?

Mr. KASTENMEIER. No part was written by the Department of Justice. It was written in its entirety by the committee members and staff.

Mr. WIGGINS. I am comforted to hear that, but I have information to the contrary.

Mr. KASTENMEIER. If the gentleman will yield, I would be interested in the gentleman's sources of information.

Mr. WIGGINS. Mr. Speaker, if the gentleman will yield furthur, I would be happy to amplify my statement as soon as I check out my sources. I am surprised by the statement of the gentleman and I will check it thoroughly.

Mr. KINDNESS. Mr. Speaker, I would add that the language contained in the report in various places, particularly in the paragraph concluding at the top of page 23, speaks entirely opposite to the way in which the debate went in the full committee. Whoever wrote the report certainly was not reflecting the way I observed what went on in the Committee on the Judiciary in that particular regard. I think it is regrettable that the Committee on Rules comes here without the benefit of this controversy having been presented to the Committee on Rules and for that I apologize and for doing it on the time of the Committee on Rules, in effect; and I certainly offer my apologies that the need arises to do it in this particular manner; but I think the House is entitled to the warning that this report, at least in some particulars, reflects very poorly or not at all what occurred by way of interpretation and by way of legislative history in the Judiciary Committee.

● Mr. CORRADA. Mr. Speaker, I rise in support of H.R. 9400.

This is a much needed piece of legislation. It will clarify the status of the Attorney General to intervene in or initiate actions involving the constitutional rights of institutionalized persons. As the committee stated in their report it will give "standing" to the Attorney General to sue in these kind of cases.

It appears that in the absence of specific legislation authorizing suits by the Attorney General, the Justice Department would be unable to initiate suit for redress in cases involving the constitutional rights of institutionalized persons. Presently the Justice Department is able to file "amicus curiae" brief or assume the role of plaintiff intervenor in cases brought by private plaintiff to protect the rights of the institutionalized. They have been doing so since 1971 in a large number of cases. But, this is a limited role. The public interest of this Nation demand and will be best served if the resources of the Department are used more fully and effectively in this type of cases.

The prevailing conditions in the institutions and the difficulties, some inmates may have in bringing suit by themselves, compels Congress to correct this situation by making available to those in need the experience and resources of the Justice Department.

It is my opinion that the argument that this bill is an unconstitutional infringement of State's rights and that it violates the principle of federalism lacks merit. Congress does have and must exercise the power to enact this kind of legislation. Furthermore, I do not believe that the Justice Department suits against States would lessen the confidence that is needed for an effective partnership between the State and the Federal Government.

It has been a commitment of Congress to take care of institutionalized citizens and billions of dollars in Federal funds have been provided to this effect. The State and local governments bear primary responsibility for the day-to-day operations of their institutions. But, it is the Federal Government's responsibility to correct any situation in which constitutional rights have been violated. There is a uniform agreement that thousands continue to be deprived of their most basic human rights. Consequently, an active role by the Justice Department will act as a deterrent to these violations and will encourage the States to take corrective measures.

I support this measure and I urge you to vote in favor of its approval.●

Mr. DEL CLAWSON. Mr. Speaker, I have no further requests for time. I reserve the balance of my time.

Mr. PEPPER. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. KINDNESS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 320, nays 20, not voting 94, as follows:

Mr. Le Fante with Mr. Findley.
Mrs. Boggs with Mr. Burleson of Texas.
Mr. Gammage with Mr. Andrews of North Carolina.
Mr. Howard with Mr. Frey.
Mr. Brademas with Mr. Cohen.
Mr. Carney with Mr. Gephardt.
Mr. Corman with Mr. Marks.
Mr. Davis with Mrs. Heckler.
Mr. Dodd with Mr. Jenkins.
Mr. Eilberg with Mr. Dellums.
Mr. Fountain with Mr. Bonker.
Mr. Ireland with Mr. Burke of Florida.
Mr. Conyers with Mr. Krueger.
Mr. Breckinridge with Mr. Gilman.
Mr. Kazen with Mr. Cavanaugh.
Mr. Minish with Mr. Hillis.
Mr. Mollohan with Mr. Armstrong.
Mr. Fish with Mr. Horton.
Mr. Shipley with Mr. Buchanan.
Mr. Nix with Mr. Goldwater.
Mr. Moss with Mr. Don H. Clausen.
Mr. Nolan with Mr. Jones of North Carolina.
Mr. Meeds with Mr. Whitley.
Mr. Heftel with Mr. Mann.
Mr. Gudger with Mr. Goodling.
Mr. Garcia with Mr. Lujan.
Mr. Fraser with Mr. Cochran of Mississippi.
Mr. Bellenson with Mr. Lehman.
Mr. Baldus with Mr. Hyde.
Mr. Ambro with Mr. Lent.
Mr. John Burton with Mr. Wolff.
Mr. Dicks with Mr. Weiss.
Mr. Diggs with Mr. Ruppe.
Mr. Eckhardt with Mr. Runnels.
Mr. Bowen with Mr. Roncalio.
Mrs. Burke of California with Mr. Quie.
Ms. Oakar with Mr. Leggett.
Mr. Charles H. Wilson of California with Mrs. Pettis.
Mr. White with Mr. Pressler.
Mr. Weaver with Mr. Wampler.
Mr. Waxman with Mr. Solarz.
Mr. Stump with Mr. Teague.
Mr. Thornton with Mr. Thone.
Mr. Tucker with Mr. Stockman.
Mr. Rodino with Mr. Pursell.

Mr. GONZALEZ changed his vote from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

CONFERENCE REPORT ON H.R. 6782, EMERGENCY AGRICULTURAL ACT OF 1978

Mr. FOLEY submitted the following conference report and statement on the bill (H.R. 6782) to permit marketing orders to include provisions concerning marketing promotion, including paid advertisement, of raisins and distribution among handlers of the pro rata costs of such promotion":

CONFERENCE REPORT (H. REPT. NO. 95-1103)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 6782) to permit marketing orders to include provisions concerning marketing promotion, including paid advertisement, of raisins and distribution among handlers of the pro rata costs of such promotion, having met, after full and free conference, have agreed to recommend and do recommend to other respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate to the text of the bill and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

That this Act may be cited as the "Emergency Agricultural Act of 1978".

TITLE I—PRICE SUPPORT FOR PRODUCERS OF WHEAT, FEED GRAINS, AND UPLAND COTTON

SEC. 101. Section 1001 of the Food and Agriculture Act of 1977 is amended by inserting "(a)" after the section designation and adding a new subsection (b) as follows:

"(b) Notwithstanding any other provision of law, whenever a set-aside is in effect for one or more of the 1978 through 1981 crops of wheat, feed grains, and upland cotton, the Secretary may increase the established price for any such commodity by the amount the Secretary determines appropriate to compensate producers for participation in such set-aside. In determining the amount of any such increase, the Secretary shall take into account changes in the cost of production resulting from participation in the set-aside involved. If the established price is increased for any commodity for which a set-aside is in effect, the Secretary may increase the established price for any other commodity in such amount as the Secretary determines necessary for effective operation of the program. The Secretary shall adjust any increase in the established price to reflect, in whole or in part, any land diversion payments for the crop for which an increase is determined.".

SEC. 102. Effective only with respect to the 1978 through 1981 crops of upland cotton, section 103(f) of the Agricultural Act of 1949 is amended by striking out the first sentence of paragraph (1) and inserting in lieu thereof the following: "The Secretary shall, upon presentation of warehouse receipts reflecting accrued storage charges of not more than sixty days, make available for the 1978 through 1981 crops of upland cotton to cooperators nonrecourse loans for a term of ten months from the first day of the month in which the loan is made at such level as will reflect for Strict Low Middling one and one-sixteenth inch upland cotton (micronaire 3.5 through 4.9) at average location in the United States the smaller of (i) 85 percent of the average price (weighted by market and month) of such quality of cotton as quoted in the designated United States spot markets during three years of the five-year period ending July 31 in the year in which the loan level is announced, excluding the year in which the average price was the highest and the year in which the average price was the lowest in such period, or (ii) 90 percent of the average, for the fifteen-week period beginning July 1 of the year in which the loan level is announced, of the five lowest priced growths of the growths quoted for Strict Middling one and one-sixteenth inch cotton C.I.F. Northern Europe (adjusted downward by the average difference during the period April 15 through October 15 of the year in which the loan is announced between such average Northern Europe price quotation of such quality of cotton and the market quotations in the designated United States spot markets for Strict Low Middling one and one-sixteenth inch cotton (micronaire 3.5 through 4.9)); *Provided*, That in no event shall such loan level be less than 48 cents per pound. If for any crop the average Northern Europe price determined under clause (ii) of the first sentence of this paragraph is less than the average United States spot market price determined under clause (i) of the first sentence of this paragraph, the Secretary may, notwithstanding the foregoing provisions of this paragraph, increase the loan level to such level as the Secretary may deem appropriate, not in excess of the average United States spot market price determined under clause (i) of the first sentence of this paragraph.".

SEC. 103. Sections 101 and 102 of this title shall become effective October 1, 1978, and any producers who, prior to such date, receive loans and payments on the 1978 crop of the commodity as computed under the Agricultural Act of 1949, as amended by the Food and Agricultural Act of 1949, as amended by the Food and Agricultural Act of 1977, may elect after September 30, 1978, to receive loans and payments as computed under this title.

TITLE II—AGRICULTURAL COMMODITIES UTILIZATION PROGRAM

SEC. 201. Title I of the Agricultural Act of 1949 is amended by adding at the end thereof a new section 112 as follows:

"AGRICULTURAL COMMODITIES UTILIZATION PROGRAM

"SEC. 112. Notwithstanding any other provision of this Act—

"(a) The Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of the acreage set aside or diverted from the production of a commodity for any crop year under this title to be devoted to the production of any commodity (other than the commodities for which acreage is being set-aside or diverted) for conversion into industrial hydrocarbons and blending with gasoline or other fossil fuels for use as motor or industrial fuel, if the Secretary determines that such production is desirable in order to provide an adequate supply of commodities for such purpose, is not likely to increase the cost of the price support programs, and will not adversely affect farm income.

"(b)(1) During any year in which there is no set-aside or diversion of acreage under this title, the Secretary may formulate and administer a program for the production, subject to such terms and conditions as the Secretary may prescribe, of commodities for conversion into industrial hydrocarbons and blending with gasoline or other fossil fuels for use as motor or industrial fuel, if the Secretary determines that such production is desirable in order to provide an adequate supply of commodities for such purpose, is not likely to increase the cost of the price support programs, and will not adversely affect farm income. Under the program, producers of wheat, feed grains, upland cotton, and rice shall be paid incentive payments to devote a portion of their acreage to the production of commodities for conversion into industrial hydrocarbons and blending with gasoline or other fossil fuels for use as motor or industrial fuel.

"(2) The payments under this subsection shall be at such rate or rates as the Secretary determines to be fair and reasonable, taking into consideration the participation necessary to ensure an adequate supply of the agricultural commodities for conversion into industrial hydrocarbons and blending with gasoline or other fossil fuels for use as motor or industrial fuels.

"(3) The Secretary may issue such regulations as the Secretary deems necessary to carry out the provisions of this subsection.

"(4) There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this subsection.

"(5) The provisions of this subsection shall become effective October 1, 1978.".

TITLE III—INCREASE IN THE BORROWING AUTHORITY OF THE COMMODITY CREDIT CORPORATION

SEC. 301. (a) Section 4(i) of the Commodity Credit Corporation Charter Act (15 U.S.C. 714b(i)) is amended by striking out "$14,500,000,000" and inserting in lieu thereof "$25,000,000,000".

(b) Section 4 of the Act of March 8, 1938 (15 U.S.C. 713a–4), is amended by striking out "$14,500,000,000" and inserting in lieu thereof "$25,000,000,000".

(c) The increase in the borrowing authority of the Commodity Credit Corporation made by this section shall be effective only to the extent provided in appropriation Acts.

(d) The provisions of this section shall become effective October 1, 1978.

TITLE IV—RAISIN MARKETING ORDERS

SEC. 401. (a) Effective October 1, 1978, section 8c(6)(I) of the Agricultural Adjustment Act, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, is amended by—

(1) inserting "raisins," after "apples,"; and

(2) inserting "raisins," after "with respect to almonds".

(b) Within a period of sixty days following the second anniversary of the implementation of this section, the Secretary of Agriculture shall submit to the Committee on Agriculture of the House of Representatives and to the Committee on Agriculture, Nutrition, and Forestry of the Senate a report that shall describe in detail how this section has been implemented including, but not limited to, information as to the issuance or amendment of any affected order, the annual amount of assessments collected, in the aggregate and by size and class of handler, the manner in which such assessments were collected, the amount of direct expenditures credited against the pro rata expense assessment obligations of each handler, and the purpose to which such assessments and such direct expenditures of each such handler were devoted.

And the Senate agrees to the same.

That the House recede from its disagreement to the amendment of the Senate to the title of the bill and agree to the same with an amendment as follows:

In lieu of the amendment of the Senate, amend the title to read as follows: "An Act to provide emergency assistance to producers of wheat, feed grains, and upland cotton, and for other purposes."

And the Senate agree to the same.

JOINT EXPLORATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the further conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 6782) to permit marketing orders to include provisions concerning marketing promotion, including paid advertisement, of raisins and distribution among handlers of the pro rata costs of such promotion, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report.

The Senate amendment struck out all of the House bill after the enacting clause and inserted a substitute text. The committee of conference recommends a substitute for both the House bill and the Senate amendment.

Except for clarifying, clerical, and necessary conforming changes, the differences between the two Houses and the adjustments made in the committee of conference are noted below.

(1) RAISIN MARKETING ORDERS

Except for technical and conforming changes, title VI of the *Senate* amendment is identical to the text of the *House bill.*

The *Conference* substitute adopts the *House* provision with the technical and conforming changes made by the *Senate* amendment.

(2) SHORT TITLE

The first section of the *Senate* amendment provides that the bill may be cited as the "Emergency Agricultural Act of 1978".

The *House* bill contains no comparable provision.

The *Conference* substitute adopts the *Senate* provision.

(3) ADDITIONAL SET-ASIDE PROGRAMS FOR THE 1978 CROPS OF WHEAT, FEED GRAINS, UPLAND COTTON, AND SOYBEANS

Title I of the *Senate* amendment requires the Secretary of Agriculture to formulate additional set-aside programs for the 1978 crop year under which producers electing to participate would be paid for diverting cropland from the production of wheat, feed grains (corn, grain sorghums, and barley); upland cotton, and soybeans. The additional set-aside programs authorized by title I include provisions under which—

(a) The program must be designed with payment rates to achieve a level of participation that will result in an average market price of not less than (i) $3.50 per bushel in the case of wheat; (ii) $2.50 per bushel in the case of corn (and an equivalent price for grain sorghums and barley); (iii) 60 cents per pound in the case of upland cotton; and (iv) $6.00 per bushel in the case of soybeans;

(b) Payments would be made to producers on a farm who—in addition to making any required set-aside of acreage for the commodity under existing law, and to the extent prescribed by the Secretary—elect to set aside and devote to approved conservation uses an acreage of cropland on the farm in accordance with contracts entered into by the Secretary with the producers.

(c) The payments for a farm would be at such rate or rates as the Secretary determines to be fair and reasonable, taking into consideration the productivity of the acreage to be set aside under the program, the extent of the cropland to be set aside under the program, and (in the case of wheat, feed grains, and upland cotton) the total acreage of cropland set aside from the production of the commodity;

(d) The total acreage of additional cropland set aside from the production of the commodity would be the amount necessary to adjust the total national acreage of the commodity to desirable goals, as determined by the Secretary. However, the rates of diversion payment must be established by the Secretary at such level as will, together with the Secretary's exercise of his authority under any other program authorized by law, achieve the purposes of the additional set-aside programs and assure the total additional set-aside of not less than 31 million acres of cropland (15 million acres for wheat, 10 million acres for feed grains, 3 million acres for upland cotton, and 3 million acres for soybeans);

(e) The Secretary must limit the total acreage to be set aside under the program in any county or local community so as not to affect adversely the economy of the county or local community;

(f) Producers may devote the additional set-aside acreage to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary after consultation with wildlife agencies. The Secretary may pay an appropriate share of the cost of the wildlife food plots and habitats and an additional payment if the producer agrees to permit, without other compensation, access to the general public to all or a portion of the farm (as the Secretary may prescribe) for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations;

(g) As a condition of eligibility for participating in the program for wheat, feed grains, or upland cotton, producers must set aside any acreage of cropland required to be set aside for the respective commodity under other provisions of law;

(h) The Secretary must provide adequate safeguards to protect the interests of tenants and sharecroppers;

(i) The payment limitation provisions of the Food and Agriculture Act of 1977 would not be applicable to the program;

(j) Producers desiring to participate in the program must file a contract to do so by a date established by the Secretary. The contract may be modified or terminated by the mutual agreement of the Secretary and the producer, if the Secretary determines it necessary due to an emergency created by drought or other disaster, or in order to prevent or alleviate a shortage in the supply of agricultural commodities;

(k) Fifty percent of any payment to producers for setting aside cropland under the additional set-aside program would be made in advance of determination of performance;

(l) The Secretary may make partial payments to producers who do not comply fully with the terms and conditions of the programs;

(m) The Secretary may issue such regulations as he determines necessary to carry out the provisions of the programs. With regard to acreage planted to the commodity for which payment is made, the Secretary is to administer the program in such a manner as to permit the use of the additional set-aside acreage for haying, grazing, clipping, or wildlife food plots and habitat. However, no producer may devote any acreage set aside under the program to the production of Irish potatoes; and

(n) The Secretary shall carry out the program through the Commodity Credit Corporation.

The *House* bill contains no comparable provisions.

The *Conference* substitute deletes the *Senate* provisions. The *Conferees* note that the concept of voluntary paid set-aside programs contained in the *Senate* amendment has been adopted as part of recently-announced administration initiatives under the Food and Agriculture Act of 1977 (which are described in a Department of Agriculture Issue Briefing Paper dated April 3, 1978, and set forth below). Under those initiatives, there will be paid diversion programs for feed grains and cotton.

Producers who participate in the feed grain set-aside program may divert additional acreage equal to 10 percent of the acres planted to the crops in 1978 and receive a payment of 20 cents per bushel for corn (or 12 cents per bushel for grain sorghums or barley) on the normal production from the planted acres. In order to receive diversion payments on corn, barley, or grain sorghums, the producers' 1978 plantings cannot exceed their 1977 plantings or the normal crop acreage for the farm, and the diverted acreage must be devoted to an approved conservation use.

Producers may divert acreage equal to 10 percent of the acres planted to upland cotton in 1978 and receive a payment of 2 cents per pound on the normal production from the planted acres. In order to receive a diversion payment, the producers' 1978 upland cotton plantings (plus the diverted cotton acreage) cannot exceed their 1977 plantings, and the diverted acreage must be devoted to an approved conservation use.

Producers in the paid diversion programs would receive one-half of their payments at the time of signup.

The text of the Department of Agriculture's April 3, 1978, briefing paper on the administration initiatives reads as follows:

Issue briefing paper—U.S. Department of Agriculture

Date: April 3, 1978.

Title: New Features of Federal Farm Programs.

Background

The world has harvested two consecutive large crops. U.S. farmers have harvested three.

Declining commodity prices and farm incomes in 1977 were the result of large worldwide supplies of grains, oilseeds, and fibers and an increasingly large proportion of stocks accumulated in the United States. Liquidation of the domestic cattle herd because of unprofitable feeding and poor pasture conditions caused by drought also took their toll.

Realized net farm income in 1977 declined to $20 billion—in real terms, equivalent to 1971. The result of this overall situation was severe cash-flow and debt-repayment problems for many farmers. The severity of these problems varied greatly by commodity and by region of the country.

Realized net farm income for the first half of 1978 is at an annual rate of $23 billion, or about $3 billion higher than last year. Foreign demand for the major crops points to a record volume of agricultural exports in the current marketing year.

Recent Market Developments

Most commodity prices have shown appreciable increases in recent months from earlier lows:

Wheat at Kansas City from $2.30 last June to $3.20 now;

Corn at Chicago from the fall low of $1.80 to $2.43;

Cotton at Memphis from 48 cents at the turn of the year to 56 cents;

Soybeans at Chicago from $5.50 in October to near $7.00;

Rice from $6.87 at mid-year to $11.40 in February;

Choice steers at Omaha from $37 last spring to over $50; and

Hogs from $36 last April to $48 now.

Even though commodity prices have shown these increases because of the farmer-held reserve, improved export markets (particularly for oilseeds), increased livestock returns, and some improvement in general economic conditions, some farmers still are experiencing severe problems.

Administration Initiatives

On March 29, 1978, the Vice President and the Secretary of Agriculture announced nine major actions with the objectives of dealing with these problems, further strengthening farm income, and continuing the steady growth in agriculture:

1. To ensure better crop prices and thwart runaway food price inflation caused by the weather, the farmer-owned reserve is being expanded and the terms liberalized. Grain placed in reserve will not be subject to interest charges after the first year. The reserve programs will be used to remove excess 1978-crop production.

2. To take excess 1977-crop corn and grain sorghum off the market, both crops can be put into the reserve program starting May 1.

3 To ensure that the United States can meet its food aid commitments in times of short supply and to support market prices, the government will purchase wheat in the market to build an emergency reserve of 220 million bushels, including wheat accumulated from CCC loan forfeitures.

4. To adjust wheat production downward, producers who participate in the 20 percent set-aside may graze out their wheat or harvest hay on up to 40 percent or 50 acres (whichever is larger) of the total acreage of barley, corn, grain sorghum, upland cotton, and wheat intended for harvest in 1978, and receive a payment of 50 cents a bushel or the wheat deficiency payment rate, whichever is higher.

5. To bring feed grain production in line with potential demand, producers who participate in the feed grain set-aside may divert additional acreage equal to 10 percent of acres planted to the crop and receive a payment of 20 cents per bushel for corn or 12 cents per bushel for sorghum or barley on the normal production from planted acres.

6. To adjust cotton production down, producers may divert acreage equal to 10 percent of the acres planted in return for a payment of 2 cents per pound on the normal production from the planted acres.

7. To balance soybean loans with competing crops, the loan for 1978-crop soybeans is being established at $4.50 a bushel, up $1.00 per bushel over the 1977 loan.

8. To compensate for increases in costs, loan and target prices for 1978-crop rice will be increased, according to law. Preliminary data indicate a loan of $6.40 per cwt. and a target price of $8.53 per cwt. There will not be a set-aside program for the 1978 crop.

9. To improve credit access for farmers and ranchers with serious debt-repayment problems, we are urging the Congress to pass our proposals for an Economic Emergency Loan Program.

Impact of Initiatives

The reserve gives producers the opportunity to hold their crops off the market at low cost to await higher market prices, protect consumers and livestock producers against severe price increases in the event of a poor harvest, and ensure our credibility as a reliable supplier of farm products.

The diversion and grazing payments will:

Provide additional economic incentives for participation in the farm programs;

Give immediate cash assistance and potentially provide crop producers a $3–$4 billion increase in net returns;

Strengthen market prices by bringing supplies into better balance with demand; and

Conserve energy and natural resources, while providing an accessible land reserve for use when needed.

Grazing and Hay Program

Section 1004 of the Food and Agriculture Act of 1977 authorizes the Secretary to administer a special wheat acreage grazing and hay program.

A producer who decides to participate must designate the specific acreage on the farm that is to be used for grazing or hay (cut immature for green crop, hay or silage). Acreage included in this program must be in addition to set-aside acres and be within the normal crop acres of the farm.

The payment rate will be at least 50 cents a bushel or the deficiency payment rate, whichever is greater. The total payment will be determined by multiplying the established farm wheat yield, times the number of acres in the program, times the payment rate.

Producers will receive a 25 cent per bushel payment at signup.

This initiative is expected to result in an additional 1 to 1.5 million acres being grazed or hayed, with a 30–50 million bushel reduction in 1978 production from current estimates.

Wheat prices will likely be slightly higher (3–5 cents) and net budget outlays will be slightly lower because of a reduction in deficiency payments and loan and inventory outlays.

Feed Grain Diversion Program

Section 502 of the Food and Agriculture Act of 1977 authorizes the Secretary to make land diversion payments to producers to adjust the national acreage of feed grains to desirable goals.

The 10 percent voluntary land diversion program for feed grains is in addition to the 10 percent set-aside for feed grains.

To receive diversion payments, producers' 1978 plantings cannot exceed 1977 plantings for each of the crops, or exceed the normal crop acres for the farm. The diverted land must also be put into an approved conservation use.

The payment rates for the voluntary diversion of feed grains are: 20 cents per bushel for corn and 12 cents per bushel for barley and grain sorghum. The payment will be determined by multiplying the payment rate, times the established crop yields for the farm, times the 1978 acres planted for harvest.

At signup, producers will receive an advance payment of 10 cents per bushel for corn or 6 cents per bushel for sorghum or barley.

Estimates are that 10 million acres will be placed in set-aside or land diversion. Approximately 7 million acres will be corn, 1.5 to 2 million acres will be grain sorghum, and 1 to 1.5 million acres will be barley. Six of the 10 million acres will be in set-aside; four will be in land diversion.

The impact of this diversion program will be to reduce feed grains by 5 to 7 million acres from current estimates with a 4–6 million acre reduction in corn and a 1 to 2 million acre reduction in soybeans.

Feed grain stocks are expected to be reduced about 335 to 450 million bushels (corn equivalent) over current estimates. Diversion payments for this program will likely total about $625 million: $540 million for corn, $50 million for grain sorghum, and $35 million for barley.

Corn prices for 1978 are expected to strengthen 15–25 cents a bushel from current estimates, with increases to other feed grains in relation to corn.

Net government outlays are expected to be minimal because of a reduction in deficiency payments and loans and inventory outlays.

Cotton Diversion Program

Section 602 of the Food and Agriculture Act of 1977 authorizes the Secretary to implement a paid diversion program for 1978-crop upland cotton.

Participants would divert cropland equal to 10 percent of the 1978 planted cotton acreage and also limit 1978 cotton plantings to not more than 1977 cotton plantings.[1] The payment will be determined by multiplying the 2 cents per pound rate times the farm yield times the cotton acreage planted for harvest. Producers will receive a 1 cent per pound advance at signup.

The impact of this program will be for planted acreage to be reduced 500,000 to 1 million acres from current estimates with no diversion.

Farm prices will likely increase about 3 cents per pound, and net returns would be increased $50–$60 million. Consumer prices of goods made from cotton will be slightly higher as a result of the slightly higher cotton prices. For example, the price of a $15 cotton shirt would go up about 9 cents.

Diversion payments will likely total $100 million, and be offset by a reduction in deficiency payments and loan and inventory costs.

Examples of Payments

For wheat:

Assumptions: A farmer has 1,000 acres of wheat planted and decides to graze out 400 acres. The farmer's normal crop acreage (NCA) is 1,500 acres. The farm yield on wheat is 30 bushels per acre.

Example:	*Acres*
Harvest for grain	600
Grazed out	400
Required set-aside (20 percent × acres planted for 1978 harvest)	120
Balance to other NCA crops	380
Total	1,500

The payment for the 400 acres grazed out is: 30 × 50 cents per bushel = $15 × 400 = $6,000.

For feed grains:

Assumptions: A farmer has a normal crop acreage (NCA) of 400 acres. He decides to plant 100 acres of corn this year. His 1977 planted corn acreage was 105 acres. His farm yield for corn is 100 bushels per acre.

Remember that 1978 planted acreage cannot exceed 1977 planted acreage in order to obtain the diversion payment.[1]

Example:	*Acres*
Corn planting intentions for 1978	100
Required set-aside (10 percent)	10
Voluntary diversion (10 percent)	10
Acreage that can be planted to other crops	280
Total	400

The payment in this example is: 20 cents per bushel × 100 (acre yield) × 100 acres = $2,000.

For cotton:

Assumption: A farmer has a normal crop acreage (NCA) of 500 acres. He is planting 100 acres of cotton this year. His 1977 planted cotton acreage was 100 acres. His farm yield for cotton is 500 pounds per acre.

Remember that 1978 planted acreage cannot exceed 1977 planted acreage in order to obtain the diversion payment[1]

Example:	*Acres*
Cotton planting intentions for 1978	100
Required set-aside	0
Voluntary diversion (10 percent)	10
Acreage that can be planted to other crops	390
Total	500

The payment in this example is: 2 cents per pound × 500 (acre yield) × 100 acres = $1,000.

News—U.S. Department of Agriculture

1978 Upland Cotton Program Voluntary Acreage Diversion Provision Revised

WASHINGTON, April 6.—Secretary of Agriculture Bob Bergland today announced a change in the 1978 upland cotton voluntary diversion program which provides that participants' 1978 cotton planted acreage plus diverted cotton acreage may not exceed their 1977 acreage planted to cotton. The program had allowed a producer's 1978 cotton plantings to be equal to 1977 cotton plantings.

To be eligible for program benefits, the producer must divert an acreage of cropland equal to 10 percent of the 1978 planted acreage for harvest cannot exceed the 1977 planted acreage.

Secretary Bergland said the action was taken in order to better assure a reduction in 1978 cotton plantings. With the diversion, U.S. Department of Agriculture officials expect about 12 million acres to be planted to upland cotton.

Eligible persons will be paid 2 cents per pound times the farm payment yield times the cotton acreage planted for harvest. Producers will receive 1 cent per pound advance at signup.

(4) WHEAT LOAN RATE

(a) Title I of the *Senate* amendment increases the minimum loan rate for the 1978 crop of wheat to $2.85 per bushel (previously announced at $2.25; it will be $2.35 if the average market price during the 1977 marketing year is more than 105 percent of the loan level of $2.25).

(b) Title II of the *Senate* amendment (which may be cited as the "Flexible Parity Act of 1978") also increases the minimum loan rate for the 1978 crop of wheat to $2.85 per bushel.

The *House* bill contains no comparable provision.

The *Conference* substitute deletes the *Senate* provisions.

(5) FEED GRAIN LOAN RATES

(a) Title I of the *Senate* amendment increases the minimum loan rate for the 1978 crop of corn to $2.25 per bushel (now $2.00).

(b) Title II of the *Senate* amendment increases the minimum loan rate for the 1978 crop of corn to $2.40 per bushel.

The *House* bill contains no comparable provision.

The *Conference* substitute deletes the *Senate* provisions.

(6) UPLAND COTTON LOAN RATE

(a) Title I of the *Senate* amendment increases the minimum loan rate for the 1978 crop of upland cotton to 50 cents per pound (now 44 cents).

(b) Title II of the *Senate* amendment also increases the minimum loan rate for the 1978 crop of upland cotton to 50 cents per pound.

The *House* bill contains no comparable provision.

The *Conference* substitute changes the formula in existing law for computing the loan rate for upland cotton and provides that the loan rate would in no event be less than 48 cents per pound for each of the 1978 through 1981 crops. With respect to the change in the formula, the *Conference* substitute provides that the loan rate would be determined by a computation of 85 percent of the U.S. spot market averages (as provided under existing law), using three out of the last five years, dropping the highest and lowest years. The Northern European price quotation would be determined by measuring a fifteen-week period, July 1 through October 15, rather than the current two-week period, October 1 through October 15. When the domestic spot market computation is smaller than the Northern European computation, the domestic spot market computation would be the announced loan level. However, when the Northern European average is the lower of the two, the Secretary of Agriculture would have the option of adjusting the loan rate upward not to exceed the domestic spot market computation.

(7) TARGET PRICES FOR WHEAT, FEED GRAINS, AND UPLAND COTTON

(a) *Wheat*

(i) Title I of the *Senate* amendment increases the target price for the 1978 crop of wheat to $3.55 per bushel (now $3.00; it will be $3.05 if the 1978 crop of wheat is 1.8 billion bushels or less).

(ii) Title II of the *Senate* amendment provides different graduated target prices for the 1978 crop of wheat based on the amount of acreage a producer voluntarily sets aside as follows:

Percent of set-aside:	*Target price*
20	$3.00
25	3.25
30	3.50
35	4.00
40	4.25
45	4.50
50	5.04

(b) *Feed grains*

(i) Title I of the *Senate* amendment increases the target price for the 1978 crop of corn to $2.50 per bushel (now $2.10).

(ii) Title II of the *Senate* amendment provides different graduated target prices for the 1978 crop of corn based on the amount of acreage a producer voluntarily sets aside as follows:

Percent of set-aside:	*Target price*
10	$2.10
20	2.25
25	2.45
30	2.65
35	2.85
40	3.05
45	3.25
50	3.45

(c) *Upland cotton*

(i) Title I of the *Senate* amendment increases the target price for the 1978 crop of upland cotton to 70 cents per pound (now 52 cents).

(ii) Title II of the *Senate* amendment provides for different graduated target prices for the 1978 crop of upland cotton based on the amount of acreage a producer voluntarily sets aside from production as follows:

Percent of set-aside:	*Target price*
20	$0.54
25	.59
30	.64
35	.69
40	.74
45	.79
50	.84

The *House* bill contains no comparable provisions.

The *Conference* substitute provides that—whenever a set-aside is in effect for any of the 1978 through 1981 crops of wheat, feed grains, and upland cotton—the Secretary may increase the target price for any such commodity by such amount as the Secretary determines appropriate to compensate producers for participation in the set-aside. In determining any increase, the Secretary must

[1] See the change made in this provision described in Department of Agriculture Press Release dated April 6, 1978, which is set forth below. (The Department of Agriculture has announced that feed grain and cotton acreage will be considered as having been planted for harvest in 1977 if a producer was prevented from planting the acreage because of drought, flood, or other natural disaster or other condition beyond his control.)

[1] See previous footnote.

take into account changes in the cost of production resulting from participation in that set-aside. If the target price is increased for any commodity for which a set-aside is in effect, the Secretary may also increase the target price for any other commodity in such amount as the Secretary determines necessary. The Secretary must adjust any increase in the target price to reflect, in whole or in part, any land diversion payments for the crop for which an increase is determined.

The *Conferees* understand that the administration intends to use the discretionary authority in the *Conference* substitute to increase the target price for the 1978 crop of wheat to $3.40 per bushel. (Any increased target price made under the new authority would not carry over and, therefore, would not be applicable for future years' crops as a base for adjusting for changes in the average adjusted cost of production under the Agricultural Act of 1949.)

The *Conference* substitute provides that the increase in the loan level for upland cotton and the authority to increase the target prices for wheat, feed grains, and upland cotton (described in this item and item (6) of this statement) will become effective October 1, 1978. However, any producers who receive loans and payments on the 1978 crop of any of the commodities prior to October 1, 1978 (computed in accordance with existing law), may elect after September 30, 1978, to receive loans and payments as computed under the *Conference* substitute.

The *Conferees* wish to clarify the requirement in existing law that acreage set aside from the production of wheat, feed grains, and upland cotton be devoted to conserving uses. It was noted by the *Conferees* that overflow river bottom land cannot be easily established in cover crops and that Johnson grass control in some situations calls for summer fallow practices. In these situations, the enforcement of the conserving practices requirement of law would be inappropriate.

The Department of Agriculture notes that the Food and Agriculture Act of 1977 provides that "the set-aside acreage shall be devoted to conservation uses, in accordance with regulations issued by the Secretary, which will assure protection of such acreage from weeds and wind and water erosion", and that Departmental regulations provide that set-aside acreage must be devoted to approved cover crops.

However, the regulations further provide that State ASC committees may recommend, subject to approval by the Deputy Administrator of the Agricultural Stabilization and Conservation Service, other cover or practices that will effectively protect the set-aside acreage from wind and water erosion. (The Deputy Administrator's office does not approve alternative practices unless the State ASC committee recommends them.)

The State ASC committees have in the past recommended, with the concurrence of the State conservationists, numerous alternative practices that may be performed on set-aside acreage. Approval has been given to varied practices recommended by State ASC committees that accomplish the conservation objective and resolve problems peculiar to certain areas of a State.

(8) GRAZING AND HAYING UNDER THE 1978 SET-ASIDE PROGRAMS

(a) Title I of the *Senate* amendment provides that—with respect to the required set-aside of wheat acreage under existing law—the Secretary must permit the production of hay thereon in any area where a natural disaster or other condition beyond the control of the producer has depleted stocks of feed in order that the stocks may be replenished.

(b) Title II of the *Senate* amendment requires that the Secretary permit grazing and hay production on acreage set aside under the 1978 set-aside programs for wheat, feed grains, and upland cotton. (NOTE: Title I of the *Senate* amendment requires that the Secretary administer the additional set-aside programs in such manner as to permit the use of the additional set-aside acreage for haying, grazing, clipping, or wildlife food plots and habitat.)

The *House* bill contains no comparable provision.

The *Conference* substitute deletes the *Senate* provisions.

(9) NORMAL TILLAGE OPERATIONS ON 1978 WHEAT SET-ASIDE ACREAGE

Title II of the *Senate* amendment requires that the Secretary permit normal tillage practices on land set aside under the 1978 wheat set-aside program as if such acreage had not been set aside.

The *House* bill contains no comparable provision.

The *Conference* substitute deletes the *Senate* provision.

(10) AGRICULTURAL COMMODITIES UTILIZATION PROGRAM

(a) Title I of the *Senate* amendment authorizes the Secretary of Agriculture to permit the production on set-aside or diverted acreage of commodities to be converted into gasohol.

(b) Title I also authorizes the Secretary to provide incentive payments to producers to set aside a portion of their acreage for the production of commodities to be converted into gasohol when no set-aside or land diversion program is in effect. The incentive payments would be at the level necessary to obtain sufficient participation in the program to ensure an adequate supply of agricultural commodities for gasohol manufacture. Appropriations would be required to carry out the program. (No producer may participate in the incentive program unless he agrees to produce for gasohol purposes a quantity of the commodity equal to not less than 15 percent of the farm acreage allotment or farm base acreage for such commodity.)

The *House* bill contains no comparable provision.

The *Conference* substitute provides that the Secretary of Agriculture may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of the acreage set aside or diverted from the production of a commodity for any crop year to be devoted to the production of any commodity (other than the commodities for which acreage is being set aside or diverted) for conversion into gasohol *if* the Secretary determines that such production is desirable in order to provide an adequate supply of commodities for such purpose, is not likely to increase the cost of the price support programs, and will not adversely affect farm income.

The *Conference* substitute provides, effective October 1, 1978, that the Secretary—during any years in which there is no set-aside or diversion of acreage—may make incentive payments to producers who, subject to such terms and conditions as the Secretary may prescribe, devote a portion of their acreage to the production of commodities to be converted into gasohol *if* the Secretary determines that such production is desirable in order to provide an adequate supply of commodities for such purpose, is not likely to increase the cost of the price support programs, and will not adversely affect farm income.

The *Conference* substitute provides that the payments are to be at such rate or rates as the Secretary determines to be fair and reasonable, taking into consideration the participation necessary to ensure an adequate supply of the agricultural commodities for gasohol manufacture. Appropriations would be required to implement the program.

(11) EXTENDED LOAN PROGRAM TRIGGER PRICES

Title III of the *Senate* amendment changes—for a one-year period beginning on the date of enactment of the bill—the release prices under the producer storage program for wheat and feed grains.

(a) The price at which producers may redeem commodities under the producer storage program is changed from a price not less than 140 percent nor more than 160 percent of the then current price support level for wheat or such appropriate level for feed grains, as determined by the Secretary of Agriculture, to a price determined by the Secretary not less than the current parity price for the commodity.

(b) The price at which the Secretary may require producers to repay loans is changed from not less than 175 percent of the then current level of price support for wheat, or such appropriate level as the Secretary determines for feed grains, to not less than 105 percent of the current parity price for the commodity involved.

The *House* bill contains no comparable provision.

The *Conference* substitute deletes the *Senate* provision.

(12) PRICES AT WHICH COMMODITY CREDIT CORPORATION STOCKS MAY BE RELEASED

Title III of the *Senate* amendment also changes—for a one-year period beginning on the date of enactment of the bill—the minimum price level at which the Commodity Credit Corporation may sell any of its grain stocks.

(a) The minimum price level at which the Commodity Credit Corporation may sell any of its stocks of wheat or feed grains when the producer storage program is in effect is changed from 150 percent of the then current level of price support to the parity price for such commmodity.

(b) The minimum price level at which the Commodity Credit Corporation may sell any of its stocks of wheat, corn, grain sorghum, barley, oats, and rye is increased from 115 percent of the current national average loan rate for the commodity to the current parity price for the commodity involved. (This minimum price level applies to wheat and feed grains when the producer storage program for the respective commodity is not in effect.)

The *House* bill contains no comparable provision.

The *Conference* substitute deletes the *Senate* provision.

(13) INCREASE IN THE BORROWING AUTHORITY OF THE COMMODITY CREDIT CORPORATION

Title IV of the *Senate* amendment increases the borrowing authority of the Commodity Credit Corporation from $14.5 billion to $25 billion, effective October 1, 1978. The increase would be effective only to the extent provided in appropriation Acts.

The *House* bill contains no comparable provision.

The *Conference* substitute adopts the *Senate* provision.

(14) FARMERS HOME ADMINISTRATION REAL ESTATE AND OPERATING LOANS—ELIGIBILITY AND LOAN LIMITS

Title V of the *Senate* amendment—

(a) expands eligibility for farm real estate and operating loans under the Consolidated Farm and Rural Development Act to include family farm corporations and partnerships;

(b) increases the lending limits for such loans (i) from $50,000 in the case of farm operating loans to $100,000 for loans insured by the Secretary of Agriculture, and $200,000 for loans guaranteed by the Secretary, and (ii) from $100,000 in the case of farm real estate loans to $200,000 for loans insured

by the Secretary, and to $300,000 for loans guaranteed by the Secretary;

(c) with respect to farm real estate loans, deletes the current total real estate indebtedness limitation of $225,000 and authorizes the Secretary to establish limitations for such loans on an annual basis; and

(d) for both farm real estate and operating loans, deletes the provision requiring that the county committee certify the maximum amount of loan that may be made.

The *House* bill contains no comparable provision.

The *Conference* substitute deletes the *Senate* provision.

The *Conferees* note that both the House Committee on Agriculture and the Senate Committee on Agriculture, Nutrition, and Forestry have reported other bills containing provisions almost identical to the *Senate* provision. (The House passed its bill on April 24, 1978.)

(15) MEAT IMPORT LABELING

Title VII of the *Senate* amendment requires that imported meat and meat food products be labeled as being "imported" or "imported in part", as the case may be, except when the country of origin is specified on the container or package. Any person, other than the ultimate consumer, who divides imported meat or meat food products into pieces or breaks a package or container containing imported meat or meat food products must label each piece, or its package or container, as "imported" or "imported in part", except when the country of origin is specified on the package or container. A product that results from a blend of imported and domestic meat may be labeled "contains imported meat".

The Secretary of Agriculture would assess fees on imported meat and meat food products to cover the costs of the labeling requirement. States that carry out mandatory meat inspection programs would be reimbursed for expenses incurred in enforcing the labeling requirement.

Any exporter that fails to pay an assessment will have its export privilege revoked.

Title VII would become effective 180 days after its enactment.

The *House* bill contains no comparable provision.

The *Conference* substitute deletes the Senate provision.

(16) COMMODITY LOANS

Title VIII of the *Senate* amendment requires the Secretary of Agriculture to guarantee loans made by commercial lending institutions to producers of nonperishable "specified" commodities for which a loan program is authorized. The amount of any guaranteed loan cannot exceed an amount determined by multiplying the quantity of the commodity by the loan level established for the commodity for the year involved. The term of the loan would be that agreed upon by the lender and the producer-borrower, but not in excess of 36 months. The interest rate could not exceed the commercial rate in the area.

Title VIII also authorizes the Secretary to make direct loans through the facilities of the Commodity Credit Corporation, in amounts not less than the amounts prescribed for guaranteed loans and at the same rates of interest. There would be no maximum term specified for direct loans.

The Secretary would be required, whenever practicable, to use the loan guarantee program in providing an initial loan to any commodity producer.

No loan could be made by the Secretary to a producer of a commodity unless the producer had satisfied any prior loan on that commodity that had been guaranteed by the Secretary or unless the proceeds of the loan were to be used to satisfy the prior loan.

Both direct and guaranteed loans would be nonrecourse and would require no security other than the commodity involved. The Secretary could adjust the loan level for any "specified" commodity on the basis of the grade, type, staple, or quality of the commodity.

The Secretary would be required to establish mandatory release prices at which specified percentages of the quantity of the commodity under loan must be released for sale. Release prices would be established prior to the start of the marketing year for each commodity and would be established as percentages of the loan level for the commodity, plus carrying charges.

The Secretary could call the loans on any commodity if the Secretary determined that the domestic and foreign market for that commodity were unstable because insufficient quantities of that commodity were being offered for sale, but only when the market price equaled or exceeded the release price for the commodity. Loans would be called chronologically, oldest to newest. Loans could not be called if that action would cause the price of the commodity to fall below the then current loan level. No new loan, nor renewal or extension of an existing loan, could be made on a quantity of a commodity if that quantity of a commodity had been ordered released or the loan had been called.

The *House* bill contains no comparable provision.

The *Conference* substitute deletes the *Senate* provision.

(17) TITLE OF THE BILL

The title of the *House* bill is "An Act to permit marketing orders to include provisions concerning marketing promotion, including paid advertisement, of raisins and distribution among handlers of the pro rata costs of such promotion."

The *Senate* amendment changes the title to "An Act to provide emergency assistance to producers of wheat, feed grains, upland cotton, and soybeans, and for other purposes."

The *Conference* substitute provides that the bill may be cited as "An Act to provide emergency assistance to producers of wheat, feed grains, and upland cotton, and for other purposes."

PERSONAL EXPLANATION

Mr. MIKVA. Mr. Speaker, I was unavoidably absent from the House for the votes on the three suspension matters on May 1, 1978. Had I been present, I would have voted "aye" on H.R. 11657, "aye" on H.R. 10392, and "aye" on House Joint Resolution 816.

CIVIL RIGHTS OF INSTITUTIONALIZED PERSONS

Mr. KASTENMEIER. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 9400) to authorize actions for redress in cases involving deprivations of rights of institutionalized persons secured or protected by the Constitution or laws of the United States.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Wisconsin (Mr. KASTENMEIER).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 9400, with Mr. OBERSTAR in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Wisconsin (Mr. KASTENMEIER) will be recognized for 30 minutes, and the gentleman from Illinois (Mr. RAILSBACK) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Wisconsin (Mr. KASTENMEIER).

Mr. KASTENMEIER. Mr. Chairman, I yield myself 8 minutes.

Mr. Chairman, I am very pleased to bring before the House today a bill which has earned the strong bipartisan support of the Committee on the Judiciary as well as the Attorney General and the Secretary of Health, Education, and Welfare.

H.R. 9400 is legislation which grants limited authority to the Attorney General of the United States to initiate or intervene in civil suits in Federal court to protect the rights of institutionalized children, the elderly, the chronically ill or handicapped, the mentally impaired, and prisoners. Under this bill the Attorney General is permitted to take such action only if he believes that a rights deprivation is part of a pattern or practice of denial, only if he believes that the suit is of general public importance and only after proper notice and consultation with appropriate State officials. He would be permitted to seek only equitable relief and not money damages. This legislation is necessary because a circuit court has held that without specific statutory authority the Attorney General does not have power to initiate such suits.

In explaining this legislation this afternoon, I would like to suggest first, that we as a Congress have only just begun to address the needs and rights of institutionalized persons. Second, that those needs and rights are great and have, in some cases, been ignored to a degree which has created chronic, even tragic conditions in some of this Nation's institutions. And, third, that this legislation endorses a very modest Federal role to help secure basic decency in the quality of life for over 1 million institutionalized citizens; a role which will not be costly, a role which has been

tested in the past and which should be encouraged in the future.

As we look at our own efforts, we recognize that Congress has only just begun to shoulder its share of responsibility for protecting the basic rights and needs of institutionalized citizens and this legislation should be considered as part of that beginning effort. In recent years Congress has enacted the Developmental Disabilities Act, the Education of All Children Act, the Juvenile Justice Act, and the Parole Commission and Reorganization Act. Each of these has affected or served as models for the operation of State institutions. And we have been slowly willing to authorize increased moneys for improved institutional conditions. I strongly support these efforts. But, the Committee on the Judiciary in reporting this bill by a voice vote without objection recognizes that we have not met our entire obligation in this area.

Indeed, Congress has followed the lead of the courts, and such courageous Federal judges as Frank Johnson of Alabama have been much more willing to recognize the rights of institutionalized Americans. Finally, Congress has responded much more quickly to less urgent needs and rights of those with more political muscle. This uniquely vulnerable class of citizens is also uniquely powerless and I ask you to support this legislation, in part, as a statement that Congress cares and recognizes a responsibility in this area.

The needs and rights which this legislation would help protect are very basic, indeed, and without attempting to delineate even a small portion of the denial of those rights which has taken place, it may be helpful to Members if I place this legislation in perspective by discussing some of just what we are trying to correct.

The conditions documented in the first major institutional conditions suit, Wyatt against Stickney in 1971 and subsequent suits dispel any doubt as to the existence, severity, or scope of institutional abuse. In Wyatt, the record revealed that Alabama's mental hospitals were severely overcrowded and understaffed. Retarded persons were tied to their beds at night in the absence of sufficient staff to care for them. One patient was regularly confined in a straitjacket for 9 years, as a result of which she lost the use of both arms. The less than 50 cents per patient per day spent on food resulted in a diet described by the court as "coming closer to punishment by starvation than nutrition." The court ultimately characterized conditions at the State hospital for the mentally retarded as "conducive only to the deterioration and debilitation of the residents . . . and substandard to the point of endangering (their) health and lives."

The conditions documented in Wyatt are certainly not unique to Alabama facilities. In a suit challenging the adequacy of care at New York's Willowbrook State School for the Mentally Retarded, the trial record revealed equally appalling conditions. Evidence was produced of massive overdrugging of retarded children by staff and physical abuse of weaker residents by stronger ones. In the absence of adequate supervision, children suffered broken teeth, loss of an eye, and loss of part of an ear bitten off by another resident. In an 8-month period, the 5,000 resident facility reported over 1,300 incidents of patient injury or assault or patient fights. Unsanitary conditions led to 100 percent of the residents contracting hepatitis within 6 months of their admission. The trial court characterized conditions at Willowbrook as "shocking, inhumane, and hazardous to the health, safety, and sanity of the residents."

Gary W. against Stewart was a 1976 suit which successfully challenged Louisiana's practice of sending hundreds of retarded, disturbed, neglected, abandoned, and otherwise dependent children to out-of-State residential placements, where conditions of care and treatment were often inadequate. The suit revealed that children were physically abused, handcuffed, beaten, chained, tied up, kept in cages, and overdrugged with psychotropic medication.

Justice Department assisted litigation challenging conditions of confinement in prisons and jails revealed that conditions in correctional facilities across the Nation were, if possible, worse than those in mental institutions.

In a suit attacking conditions in the prisons of Oklahoma's State penitentiary system, the court found that facilities designed to accommodate 2,400 inmates housed 4,600. Inmates were compelled to sleep in garages and stairwells. Groups of four men were regularly confined in 6- by 6-foot cells with no ventilation, no hot water, and sewage leaks. Over a 3-year period, one facility reported 40 stabbings, 44 serious beatings, and 19 violent deaths. Kitchen and food storage areas were found to be infested with mice, rats, and vermin, and firefightng capabilities were deemed nonexistent. The court ultimately concluded that conditions in the prisons constituted "an immediate and intolerable threat to the safety and security of inmates, prison personnel, and the State."

A similar conclusion was reached by a trial court evaluating evidence in a suit brought with the assistance of the Justice Department against Mississippi State penitentiary at Parchman. Dead rats surround the barracks, broken windows were stuffed with rags to keep out the cold and rain, exposed wiring posed a constant threat of fire, and open sewage contributed to the spread of contagious disease. In one camp, 80 men shared 3 wash basins, which consisted of oil drums cut in half. Milk of magnesia was forcibly administered to inmates as a disciplinary measure; cattle prods were used to keep inmates standing or moving. In a 6- by 6-foot cell with no light, toilet, sink, bed or mattress, inmates were confined naked for up to 3 days, without hygenic materials, heat, or adequate food. The court characterized the prison as "unfit for human habitation under any modern concept of decency."

The conditions cited above do not begin to exhaust the range of institutional abuses brought to light by Justice Department assisted litigation. They do, however, constitute a representative sampling of the practices documented in dozens of decisions issued by courts in virtually every part of the country.

I do not cite these cases to shock my colleagues, but rather to show you that behind the brick walls of an unfortunate number of this Nation's institutions the denial of basic decency is all too often the daily fare for thousands of Americans. As Assistant Attorney General Drew Days testified before the committee:

> The experience of the Department of Justice through its involvement in this litigation has shown that the basic Constitutional rights of institutionalized persons are being violated on such a systematic and widespread basis to warrant the attention of the Federal Government.

H.R. 9400 would authorize that "attention" in the form of permission for the Attorney General to enter into litigation on behalf of the United States to seek full enjoyment of the rights of institutionalized persons. The committee believes that the experience and skill of the Department of Justice lawyers and investigators should continue to be utilized in a cautious, regularized way in this important area.

This grant of standing to sue or to intervene in suit is conditioned by several specific statutory provisions.

First, the Attorney General would have to have reasonable cause to believe that a denial of rights is taking place pursuant to a pattern or practice of State action. The term "pattern or practice" is used in several existing civil rights laws and means an illegal activity which is more than an isolated or accidental, or peculiar event, more than an accidental departure from otherwise lawful practice. So he is empowered to pursue only systematic, widespread denial of rights.

Second, the Attorney General must believe that the suit raises issues of "general public importance" and "will materially further the vindication of rights." Clearly, only important substantive suits are authorized by this legislation.

Third, the Attorney General must notify the Governor and attorney general of the State or the chief officers of the locality of his intention to sue and provide these officials with the alleged facts in considerable detail.

Fourth, the Attorney General must assist the officials through consultation in which he must provide recommended remedies and notice of any available Federal assistance to help correct the institutional problems.

Lastly, prior to suit the Attorney General must be satisfied that the officials have had a reasonable time to develop a plan to correct the deprivations and have not done so.

Recognizing the importance of good Federal-State relations, H.R. 9400 requires the Attorney General of the United States to personally certify to the court that these requirements have been met and to personally sign any complaint filed under this act.

It is the almost unanimous view of the committee that these requirements make H.R. 9400 a reasonable bill which will insure that the rights of institutionalized persons may be protected in a manner that does not offend or jeopardize the legitimate prerogatives of the States. This is also the view of many respected national organizations which have endorsed H.R. 9400, including the American Bar Association, the National Mental Health Association, the National Association for Retarded Citizens, the Epilepsy Foundation of America, the United Cerebral Palsy Association, the National Senior Citizens Law Center, the American Civil Liberties Union, the American Association of Retired Persons, the National Council of Senior Citizens, the Childrens Defense Fund, the National Coalition for Children's Justice, and dozens of local, county, and statewide organizations.

This legislation is opposed by the National Association of (State) Attorneys General. Frankly, I believe that their opposition is a rather parochial one. Their offices will most likely be called upon to act as defense counsel in such suits as may be brought under H.R. 9400. In a very real sense, their reaction is that of a corporation counsel concerned for his client. Indeed, according to a Library of Congress study, most of the State attorneys general are not specifically authorized by statute to protect the rights of institutionalized persons. Only the State of New Jersey has created an officer with these specific responsibilities. The holder of that office, the public advocate of New Jersey has enthusiastically endorsed H.R. 9400 in testimony before the committee.

However, the committee has studied the recommendations of the State attorneys general and incorporated many of them into the text and report of the bill. Frankly, I believe their visible opposition has lessened considerably because of the ability of the committee to draft a bill which we believe the States can live with.

A secondary purpose of H.R. 9400, one which is strongly endorsed by the States, is an optional provision which will permit the continuance of cases brought in Federal court by State prisoners in order to require exhaustion of certified grievance procedures. This provision will not only help the clogged Federal court dockets, but will free the States of the burden of defending themselves in court against many individual prisoner complaints and will provide prisoners with a speedier, more appropriate forum for the resolution of their complaints. This provision is based on the quite successful California Youth Authority System which the subcommittee studied. As Attorney General Bell stated in a recent letter to the committee members in support of H.R. 9400:

> This provision will encourage but not require, States and political subdivisions to seek certification of their grievance mechanisms. If states avail themselves of this opportunity, the result should be a significant improvement in prison operation and relief of prisoner litigation caseloads in federal courts.

This provision was proposed by the distinguished ranking minority member of the subcommittee, Mr. RAILSBACK, and I congratulate him for his fine efforts on this bill.

In conclusion Mr. Chairman, H.R. 9400 is a modest, indeed, perhaps too modest, effort to provide a tool in the continuing effort to protect a group of citizens who are uniquely unable to protect their own rights without outside assistance. I urge my colleagues to support this legislation and to consider whether we cannot do more in this crucial area.

Mr. RAILSBACK. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I would like to begin by commending the subcommittee chairman, the gentleman from Wisconsin (Mr. KASTENMEIER), who I think did a very fine job with a very difficult issue. I believe that my interest in this particular legislation dates back to the occasion of a series of visits with the members of our subcommittee to a number of penalty institutions both Federal penitentiaries, State penitentiaries, as well as county and other local jails.

It is my belief that the conditions that we saw firsthand would have shocked the most callous prosecutor. The most difficult realization for me to accept was the fact that we could not do a great deal to correct the situation. To build new institutions with trained personnel would cost literally billions of dollars. To the most experienced, the institutions in this country were no more than human warehouses, in some cases, primarily for the young, the poor, the uneducated, the blacks, the old people who were emotionally disabled, and emotionally sick. We know that there are approximately 1 million persons who reside in these institutions. H.R. 9400 will not create a whole new panoply of rights for the institutionalized. It creates no rights for anyone, nor would it change existing practice of the Department of Justice. I think that particular point needs to be made, because the Department of Justice in the past has filed as an intervenor, or in some cases as a plaintiff and in some cases as an invited amicus. For years the Department has been selectively suing certain State officials for the conditions of their particular institutions.

As the subcommittee chairman pointed out, recently their standing to sue in the name of the United States has been challenged. The district court and the fourth circuit court of appeals have held that without specific statutory authorization, the Department of Justice has no standing to file suit against State officials, so to date the Department has been bringing suits in this area, and no one had suggested that they had gone berserk or crazy, suing State officials all over the country. Presently the Department of Justice has a staff of approximately 39 persons, including but not limited to professional personnel, working in this important area. The Department's authority was until recently much broader than that contained in H.R. 9400.

In H.R. 9400 there must be a State action; there must be a pattern and practice of violations; it must be a case of general public importance; and there must be notification and a period of attempting to negotiate with the State.

Another positive feature of the bill—and I think again that this is most important because it was not in the original bill—is that there is a concern expressed about State prisoners' petitions filed in Federal court under 42 U.S.C. 1983, and the fact is that the Federal courts have literally been swamped with those primarily prisoner petitions.

H.R. 9400 would encourage States to develop meaningful grievance procedures by requiring the U.S. Attorney General to promulgate minimum standards relating to the development of an effective system for the resolution of prisoners' grievances. The State would have the option as to whether and how to have their system certified by the Attorney General. Once a State's system has been certified, a Federal judge may require that a State inmate use that system. Ninety-five percent of the petitions filed under section 1983 have been found to be frivolous and are dismissed because they do not rise to the level of a constitutional rights violation. But they are complaints that are very important to that particular inmate, and a meaningful State grievance procedure would have been a lot more helpful, in my opinion, to that prisoner than a full-blown lawsuit under section 1983.

In 1974 the Federal Bureau of Prisons initiated a grievance procedure for Federal prisoners. In the very first year of operation 40 percent of the grievances filed were resolved in favor of the inmates.

Mr. Chairman, I might just mention that some members of our subcommittee and the staff of our subcommittee visited the so-called Nellis School which is part of the California youth corrections system south of Los Angeles. I had a chance to attend that meeting and to actually visit with some of the inmates that served as members of the grievance committees with line staffers of that particular facility. There was a great deal of hostility at the very beginning and the staffers did not want to have inmates serving on any kind of grievance system or grievance committee, but they have found and I had a chance to visit with the professional line staffers, they have found that they have been able to relieve some of the frustration. They have been able to very informally settle many of the grievances, many of the disputes, and I am inclined to think it has been a very good thing for that institution.

I sincerely believe it would be good, not only for that youth correctional authority, but for the adult authority, which interestingly does not have any similar authority.

In conclusion, Mr. Chairman, I would like to point out that this legislation, as was mentioned, was originally recommended by Attorney General Levi, sup-

ported by the Ford administration and now is very strongly supported by the present administration.

I think there have been some improvements made on this particular bill.

I urge my colleagues to support its passage.

Mr. KASTENMEIER. Mr. Chairman, I yield 3 minutes to the gentleman from Texas (Mr. BROOKS).

Mr. BROOKS. Mr. Chairman, I rise in support of H.R. 9400, as reported favorably by the Committee on the Judiciary. Unfortunately, the committee chairman, the gentleman from New Jersey (Mr. RODINO), who is a strong supporter of this legislation, is unable to be here today. He has asked me to express his belief that H.R. 9400 is a significant step in this Nation's effort to protect the rights guaranteed under the Constitution and laws of the United States, since H.R. 9400 protects the rights of an especially vulnerable and inarticulate group—institutionalized children, the elderly, mentally impaired, and chronically ill persons, and prisoners.

The gentleman from New Jersey (Mr. RODINO) has received numerous letters of support for this legislation, which was requested by the Justice Department and has been endorsed by the Secretary of the Department of Health, Education, and Welfare. Secretary Califano has stated in a letter to the gentleman from New Jersey (Mr. RODINO) that—

> The legislation is necessary and desirable to establish a definitive point at which the Attorney General can intercede on behalf of institutionalized persons whose rights may not otherwise be protected.[1]

One of the prime supporters of H.R. 9400 and a witness at the hearings is the public advocate of the State of New Jersey, Mr. Stanley C. Van Ness. The department of the public advocate is the State agency entrusted with protecting institutionalized persons. Mr. Van Ness has emphasized that H.R. 9400 is structured "to insure that the States and localities have ample opportunity to put their own house in order, and that they will be given appropriate advice and assistance from Washington for doing so."[2] This public official has assured the committee that H.R. 9400 will make the United States "a partner with the States * * * in guaranteeing constitutional rights."[3] Although Mr. Van Ness' correspondence is in the hearing record, the gentleman from New Jersey (Mr. RODINO) has asked me to insert it on the floor, since it is an important commentary by a State official.

In conclusion, I urge you to pass H.R. 9400, since the Committee on the Judiciary and its chairman have given it careful consideration and a strong vote of approval.

The material referred to follows:

[2] Letter from New Jersey Public Advocate Stanley C. Van Ness to Hon. Peter C. Rodino, dated October 17, 1977. Hearings on H.R. 2439 and 5791, p. 441.

[3] *Id.*

OCTOBER 17, 1977

Re: H.R. 9400.

Hon. PETER W. RODINO,
Chairman, Committee on the Judiciary, House of Representatives Washington, D.C.

DEAR CHAIRMAN RODINO: I have learned that the Committee on the Judiciary will shortly consider the referenced bill which has been unanimously approved by the Subcommittee on Courts, Civil Liberties and the Administration of Justice. H.R. 9400 is a meaningfully improved version of H.R. 2439 and H.R. 5791, which I supported in testimony before the Subcommittee in May. I wish to be noted as strongly supporting this very important legislation when it is considered by the full Committee.

As you are aware, the Public Advocate Department performs a function in New Jersey similar to that which the Justice Department would perform under H.R. 9400, if it becomes law. We are entrusted with protecting the rights of persons who are confined in mental hospitals, nursing homes and other health care facilities, prisons and jails. We are thus uniquely experienced in both the need for legislation of this type, and the problems involved in carrying out such a mandate. I believe that this bill deals intelligently with both sides of that concern.

The most important principles of our federal system will be substantially advanced by the enactment of this legislation. It provides that, when necessary, the national government and the federal courts will act to insure that the rights of all citizens granted by the Constitution are respected. However, it does this in such a way as to insure that the states and localities have ample opportunity to put their own house in order, and that they will be given appropriate advice and assistance from Washington for doing so. It thus means that the United States will be a partner with the states, not an oppressive superior, in guaranteeing constitutional rights. Only where the locality is unwilling to act will litigation be used as a last resort. This practice is in accord with that which the Public Advocate Department, a state agency, has used when dealing with county and municipal governments, with great success and minimal friction.

In the particularly sensitive area of jails and prisons, H.R. 9400 will promote the development of meaningful grievance procedures, so that most conflicts can be satisfactorily resolved before they spill outside the prison walls, or result in violence. Our experience in responding to prisoners' grievances in New Jersey convinces us that most of them would not develop if there were an internal mechanism to which the inmate could turn. We have often stepped in to heated situations for the sole purpose of putting the prison administration and the inmates into meaningful communication, and thereby to resolve the substantive issues themselves. Further, through the device of declaring assess to the federal courts by inmates in institutions where such procedures exist, this bill both encourages the states to develop them and the inmates to use them, while also removing some of the workload of the federal courts.

Through you as Chairman, I urge all of the members of the Committee on the Judiciary, to support H.R. 9400 and report it favorably to the full House.

Respectfully,

STANLEY C. VAN NESS,
Public Advocate.

Mr. RAILSBACK. Mr. Chairman, I yield 2 minutes to the gentleman from Illinois (Mr. MCCLORY).

Mr. MCCLORY. Mr. Chairman, I want to commend the chairman of the subcommittee the gentleman from Wisconsin (Mr. KASTENMEIER) and the ranking minority Member, my colleague, the gentleman from Illinois (Mr. RAILSBACK), and to commend the Committee on the Judiciary generally for the important legislation which is being worked on and reported by the commttee and brought to the floor of this House. In connection with this and other legislation there are differences of opinion. I do not want to question that and I do not want to question the rights of any or all of us to have disagreements with regard to important issues embodied in measures which emanate from the Judiciary Committee.

But at the same time I do want to call to the attention of this Chamber the importance of the legislative work which is being done by the committee and particularly by the members of the subcommittee who hear the witnesses and produce the evidence in support of and the expressions of opposition to the various pieces of legislation. In this case it seems to me important testimony has been presented which in my opinion strongly supports the favorable action by this Chamber in support of this measure.

Mr. Chairman, I rise in support of H.R. 9400. This legislation was reported by the Committee on the Judiciary with a strong bipartisan endorsement. Its primary purpose is to permit the Attorney General of the United States to initiate or intervene in civil suits to protect the rights of institutionalized children, the elderly, the mentally impaired and prisoners, for example, to give the U.S. Attorney General standing in the Federal courts.

Under this bill the Attorney General is permitted to take such action only if he believes that such right deprivation is part of a pattern or practice of denial, only if he believes that the suit is of general public importance, and only after proper notice and consultation with the appropriate State official. No standing is created by this legislation to pursue purely private conduct no matter how discriminating or wrongful.

In the past, Congress has not hesitated to give the Attorney General statutory authority to engage in litigation to secure citizens' basic constitutional rights where evidence has shown a widespread denial of such rights. In seeking to remedy discrimination in voting, public accommodations, employment and housing we have authorized the Attorney General to commence litigation to correct a pattern or practice of unlawful conduct. The authority proposed in H.R. 9400 is neither novel in concept nor unprecedented in use.

It is important to point out, Mr. Chairman, that this legislation imposes no new obligations on State or local governments or their officials. The scope of their responsibilities to obey Federal constitutional proscriptions is neither enlarged nor contracted under H.R. 9400. The bill has no effect, one way or the other, on existing rights, privileges, and immunities. The only purpose of the measure is to give the Attorney General the authority in those cases where a pattern

and practice has developed of systematic violations of the rights of institutionalized persons. I urge my colleagues to support the passage of this legislation.

Mr. KASTENMEIER. Mr. Chairman, I yield 3 minutes to the gentlewoman from Texas (Miss JORDAN).

Miss JORDAN. Mr. Chairman, the development of Federal law and constitutional doctrine guaranteeing certain basic rights to institutionalized persons has done little to overcome their inherent inability to secure enforcement of those rights. For a variety of reasons, the institutionalized are uniquely unable to protect their rights without outside assistance.

First, the nature of institutionalization is that many persons are unaware of their rights, largely because of the isolation frequently associated with institutions. Many confined persons are juveniles, mentally retarded, or otherwise unable to appreciate fully the range of their legal rights.

Second, the inability of many institutionalized persons to appreciate their legal rights is compounded by the physical, and frequently emotional, isolation to which they are subjected or in which they live. Historically, mental and penal institutions have been located far from urban centers, inaccessible to friends, relatives, lawyers, and others who might assist in insuring protection of institutionalized persons' rights. Few lawyers can afford the time and expense of traveling long distances to interview institutionalized clients; for obvious reasons the institutionalized themselves are unable to seek outside help.

A third factor impairing the ability of the institutionalized to secure protection of their rights is a lack of money. Most institutionalized persons are poor; many are indigent; none possesses the resources necessary to finance litigation challenging systematic, institutionwide abuse. The cost of hiring experts to investigate, document, evaluate, and present testimony on the adequacy of institutional conditions is beyond the means of the most affluent institutionalized individuals.

In light of the enormous resources required to mount and sustain protracted litigation necessary to secure institutionwide relief, it is not surprising that virtually every major suit dealing with the rights of the mentally disabled has been brought with the assistance of the Justice Department. It is equally noteworthy that despite the demonstrated ability of prisoners to file petitions challenging the constitutionality of their confinement, few, if any, suits securing widespread relief from unconstitutional prison conditions have been brought without the assistance of outside sources, most notably the Justice Department.

Finally, a less obvious but no less powerful force tending to inhibit institutionalized persons from asserting their legal rights is their fear of retaliation. Completely dependent on their institutional environments, residents are particularly susceptible to intimidation and frequently afraid to voice their grievances. Parents and caring relatives of institutionalized individuals may be equally inhibited.

These four factors compel the conclusion that institutionalized persons cannot be expected to redress systematic deprivations of their basic rights without assistance. They must rely on legal services programs, public interest advocacy groups, the private bar, and governmental agencies to protect their rights. Because of the resources available to the Department of Justice, it is appropriate to call upon them to help improve the plight of the institutionalized.

The resources of the legal services and privately funded, public interest bars are are woefully inadequate to represent the needs of the Nation's institutionalized population. By its own estimate, the Legal Services Corporation's funding is insufficient to permit its attorneys to provide minimally adequate legel representation to the nearly 29 million people with low incomes below the poverty line. The difficulties involved in communicating with the mentally ill and retarded, the hardships associated with commuting long distances to confer with clients in remote locations, and the disproportionately large costs of bringing any suit challenging the adequacy of institutional care, make residents of institutions even less likely than other eligible recipients to receive the assistance of Legal Services attorneys.

The resources of nonprofit privately funded public interest groups are equally scant. The mental health law project, the Nation's major public interest group in the field of mental health law, employs only six attorneys in the entire country. The national prison project, the largest organization engaged in prisoners' rights litigation, has a staff of seven attorneys. Of the 92 public interest law centers listed in a recent national study, only 6 had practices devoted principally to children's issues, and only a small portion of the resources of those 6 were devoted to institutionalized children. Of the 57 private firms or lawyers identified as specializing in public interest work, only 6 spent more than 10 percent of their time on issues affecting the mentally impaired.

Even when the public interest law firms attempt to represent the institutionalized, they are hampered by shortages of money and manpower. Many public interest projects are funded on a yearly basis, thus inhibiting managing attorneys from taking on litigation destined to extend over a considerable period of time. In addition, the turnover rate among public interest lawyers is high; most change employment within 2 or 3 years, further hindering efforts to sustain protracted litigation.

These limitations of resources, manpower, and continuity among publicly funded legal services and privately funded public interest advocacy groups, leave no doubt that institutionalized persons must look elsewhere for legal representation. In the absence of a massive and unlikely infusion of funds to provide legal services to the institutionalized, the vindication of their rights will continue to depend on the participation and resources of the Justice Department.

Mr. RAILSBACK. Mr. Chairman, I yield 5 minutes to the gentleman from Virginia (Mr. BUTLER).

Mr. BUTLER. Mr. Chairman, I rise in support of H.R. 9400. I believe every Member of this body is well aware of the conditions that exist in our nursing homes and in our mental and penal institutions throughout the country. Some institutions do an outstanding job and perform a valuable service to humanity. Many institutions leave something to be desired. But there are still others that are absolutely outrageous and unacceptable. This legislation would only address itself to this latter category and then only if such facility is owned, operated, or managed by or on behalf of or pursuant to a contract with any State or political subdivision of a State. This language is intended to very much limit the application of this legislation. This language was contained in an amendment which I offered and which was adopted by the full Judiciary Committee. In other words, there can be a private nursing home out there which may be the worst of the country, but if it is not operated by or on behalf of the State this legislation cannot be invoked to correct the situation.

All nursing homes are in some way licensed by the State. This is not what constitutes a contract for the purpose of this legislation. That is to say, a State license, State money, State regulation, tax exemptions or Federal money would not singularly or collectively be adequate involvement with the State to trigger this legislation. In *Jackson* v. *Metropolitan Edison Company* (419 U.S. 345, 1974) the Supreme Court said:

> Doctors, optometrists, lawyers, Metropolitan and Nebbia's upstate New York grocery selling a quart of milk are all in regulated businesses, providing arguably essential goods and services, affected with a public interest. We do not believe that such a status converts their every action, absent more, into that of the state.

However a State arrangement whereby it contracts with a private institution to care for persons committed to the care of the State would be covered. Unfortunately, the report (95–1058) is not clear on this point, but I am sure my subcommittee chairman is in full agreement with me on these points.

In addition, I would like to draw to the attention of my subcommittee chairman an error in our report on page 24, footnote "56b" where it says that the Judiciary Committee intends that courts not follow "the dual standard adopted by some courts." Neither the subcommittee nor the full Judiciary Committee, ever considered that issue and if there is any intent of the Judiciary Committee, it is to leave present case law on this issue where it is.

Mr. RAILSBACK. Mr. Chairman, will the gentleman yield?

Mr. BUTLER. I yield to the gentleman from Illinois.

Mr. RAILSBACK. I thank the gentleman for yielding.

Mr. Chairman, I simply want to agree with that particular remark. I think I

sat in on every hearing, and I do not ever remember that particular reference coming up.

Mr. BUTLER. I thank the gentleman.

Mr. Chairman, it is well settled case law that courts do use what is called a "dual standard" when trying to determine whether State action is available. A lesser degree of State involvement is needed to meet a State action requirement in cases alleging racial discrimination than in those claiming denial of other constitutional rights (*Taylor* v. *Consolidated Edison Co. of New York*, Inc., 552 F2d 29, 2d Cir. 1977). This footnote should be deleted.

Section 5 of H.R. 9400 provides that the Attorney General promulgate minimum standards relating to the development and implementation of an effective system for the resolution of grievances of persons confined in prisons. These standards may be adopted by the State if that State so chooses. Section 5 provides guidelines within which these standards are to be drawn. It is my intention, Mr. Chairman, to offer at the proper time an amendment which would require the Attorney General to submit standards which he has drafted to the Congress. Such standards shall take effect 30 days after submitted unless either House of the Congress adopts a resolution of disapproval.

I believe these standards are very important and that the Congress should be made fully aware of such standards and be in a position to do something about them if we disapprove. I believe the Congress has this responsibility and should exercise it before such standards go into effect. We generally do not hear about mistakes until they begin to have an effect on people and often times this is too late.

Mr. KASTENMEIER. Mr. Chairman, I yield 3 minutes to the gentleman from New York (Mr. BIAGGI).

Mr. BIAGGI. Mr. Chairman, I find myself in somewhat of a paradoxical situation with respect to H.R. 9400. While I am supportive of its provisions, I have some concern about the possible consequences. But I am especially disturbed over one omission in the bill; namely, the promotion of these same civil rights protections for those dedicated to enforcing our laws.

It is my intention to offer an amendment to H.R. 9400 in the form of my bill, H.R. 181, which would establish a bill of rights for all law enforcement officers.

As a 23-year veteran of the New York City Police Department, as a legislator and as a citizen, I must raise the issue. Why are we placing the civil rights of prisoners above those of law enforcement officers? Why does this bill perpetuate the practice of selective morality?

Let me discuss what I support in this bill The need for specific legislative authority for the Attorney General to intervene in cases where individuals in mental institutions and nursing home facilities have had their rights systematically violated, is long overdue. The fact is, in 1971, as an attorney on a pro bono basis, I went to court in a week-long trial on behalf of a Ms. Adrienne Rinelli, a young woman in a Willowbrook mental institution, who had been deprived of her rights. The case was decided in Ms. Rinelli's favor and from it emerged a renewed effort by the State of New York to provide better conditions for its institutionalized persons.

I was familiar with the issues then, and still am now. I am aware of the primarily State and local responsibilities in promoting and guaranteeing these rights. Yet, it has been shown on too many occasions, that States and localities are not exercising their responsibilities as advocates. Federal intervention has been needed but oftentimes thwarted by the courts. This legislation provides the necessary statutory authority for the Attorney General to intervene in these cases.

I do take issue with the bill in that it rightly promotes the civil rights of incarcerated persons without even giving a mention to the civil rights of those persons employed in law enforcement. It may come as a surprise to many here that law enforcement officers oftentimes find they have no civil rights when subject to interdepartmental investigations of their actions.

Briefly, my amendment would have set out a nine-point bill of rights for law enforcement officers with the objective of fostering their civil rights:

First. Law enforcement personnel would have the right to participate in political activities while off duty and out of uniform.

Second. Law enforcement officers under investigation must be notified from the outset the nature of the complaint, all complainants as well as those who will be present during the interrogation, and their legal rights including right to counsel.

Third. All interrogations must be conducted in a reasonable manner and while being conducted no threats of disciplinary action shall be made.

Fourth. The complete interrogation proceeding must be recorded.

Fifth. A law enforcement officer must be notified and given reasons for any punitive action taken against him prior to the effective date of such action.

Sixth. Law enforcement officers have the right to bring civil suits against all those who violate their rights under the bill of rights.

Seventh. No law enforcement officer shall be required to disclose information on personal finances as a basis for promotion.

Eighth. Adequate representation of law enforcement personnel must be provided whenever a police complaint review board is established.

Ninth. A law enforcement officers grievance commission shall be established to investigate all allegations of violations of civil rights emanating under the bill of rights.

There are some similarities to what is being proposed today—this bill proposes that within 180 days, the Attorney General promulgate minimum standards for grievance procedures for those covered under the bill. My bill would mandate the establishment of a Law Enforcement Officers Grievance Commission to investigate all alleged violations of the civil rights of law enforcement officers. My bill would also permit law enforcement personnel to file civil suits.

In many respects, H.R. 9400 goes beyond the parameters of my bill. H.R. 9400 enlists the powerful assistance of the Attorney General in bringing suits to promote the civil rights of institutionalized persons. I do not even seek that much. My bill would give States the primary responsibility of developing bills of rights for law enforcement personnel as part of their State plans for LEAA funds. The only Federal involvement would be in withholding these funds if the State did not provide for such a bill of rights in their plan.

At the hearings which were held on my bill in 1973, and again later when I offered my bill of rights as an amendment to the LEAA authorization legislation in 1976, the argument kept being raised—is this a proper area of Federal concern? I think this same issue can be raised with respect to H.R. 9400. Even the committee report addresses this issue. It states that the protection of the rights of institutionalized persons "is primarily the responsibility of the persons who operate the institutions." Yet, because it is "a matter of grave concern to the United States," we have this legislation before us. The civil rights of law enforcement officers should be of equal concern to the United States. Similarly, remedial legislation should be enacted.

One element of H.R. 9400 which I find especially ironic is the concern for promoting the civil rights of all incarcerated individuals as well as juveniles. What about correction officers? What about their rights? Are they not just as important? Are they not violated as often? How can we expect the law enforcement community to be anything but disturbed over this legislation? I would like to read a mailgram I received this morning from President Richard Basoa of the Correction Officers Benevolent Association of New York:

Congressman MARIO BIAGGI,
Rayburn Building,
Washington, D.C.:

Urge support for Congressman Biaggi's amendment to H.R. 9400. The Biaggi amendment will be the text of his Bill of Rights to All Law Enforcement Personnel (H.R. 181). This bill is essential to extend civil rights guaranteed to our law enforcement personnel much as your bill proposes to do for incarcerated persons.

RICHARD BASOA,
President, Correction Officers Benevolent Association.

There will be an outcry in the ranks of law enforcement across this Nation. We have missed another opportunity to lift law enforcement personnel from their second-class citizen status, the process is wrong and must be rectified. If we are to pass this legislation, we have an equally strong obligation to enact H.R. 181. If it fails of passage I will renew my request for hearings by the same House Judiciary Committee which took such expeditious action on H.R. 9400.

My 23-year career in the New York City Police Department gave me extensive insights into some of the problems which law enforcement personnel face regarding their civil rights. It prompted me to introduce the law enforcement officers bill of rights in my very first year in Congress, 1969. Since that time, several States including California, Maryland, and most recently, Virginia, have passed bills of rights. Yet, why has it taken a decade to get such a measure passed in Congress? It reflects a bias against law enforcement officers which should not exist in the Congress of the United States. I call for an end to such discrimination with the passage of my bill, H.R. 181, the law enforcement officers bill of rights.

Mr. RAILSBACK. Mr. Chairman, I yield 2 minutes to the gentleman from New York (Mr. FISH).

Mr. FISH. Mr. Chairman, I thank the ranking member of the subcommittee for yielding.

Mr. Chairman, I rise to support to H.R. 9400. The primary purpose of this legislation is to provide express statutory authorization for the Attorney General of the United States to initiate civil actions to redress systematic deprivation of rights of institutionalized persons.

The protection of the rights of institutionalized persons, while primarily the responsibility of the officials who operate the institutions, is a matter of concern to the United States—when rights guaranteed under the Constitution or laws of the United States are being violated by official action. Over 1 million persons reside in institutions throughout the Nation. These people are generally very vulnerable to abuse. They are usually inarticulate, powerless, and in many cases unaware of their rights. I can understand a State's reluctance to support this legislation. There may be a conflict of interest between the State and the people they institutionalize. The State officials know the condition of their institutions. Many will say they do not need the Federal Government sticking its nose into what is State's business. This legislation takes that into account and requires that no action can be commenced until at least 30 days after the appropriate State, local, and institutional officials have been notified and that the State has had a reasonable time to develop a plan to correct such deprivations and have not done so. Also, the Department of Justice must consult with the State regarding assistance which may be available from the United States.

Over the last several years the Department of Justice has been involved in approximately 45 cases seeking to protect the rights of the institutionalized. In October 1977, the U.S. Court of Appeals for the Fourth Circuit affirmed the district court's ruling and held that "without specific statutory authorization" the United States may not sue to protect the rights of the institutionalized mentally retarded (*U.S.* v. *Solomon*, 419 F. Supp. 358; affirmed 563 F. 2d 1121, 4th Circuit 1977). Without this legislation the Department of Justice's modest activity in this area will have to cease.

It is unlikely that H.R. 9400 will appreciably increase the Department of Justice's budget or result in many new positions. In fact, given clear statutory authority, the Justice Department may need less litigation support since time can be spent on the merits rather than the procedural issue of standing. As of February 1978, the two units of the Civil Rights Division which were involved in protecting the institutionalized persons have merged into one unit. The 39 personnel in these two units will be decreased to 29 according to the budget request for fiscal year 1979. The savings will decrease the sums for both units from $1,001,000 to $815,000. The only immediate increase that may be projected as a result of H.R. 9400 would be for three additional personnel—two attorneys, and one clerk—to fulfill the requirements of section 5 of the bill which requires the Attorney General to develop and promulgate standards for grievance mechanisms and to certify those which are submitted by State institutions. For that, the cost estimated by the Congressional Budget office is $76,000 for fiscal year 1979.

Mr. Chairman, H.R. 9400 represents a modest, good faith effort to try and improve conditions in our institutions throughout the country and I urge Members to vote favorably for its passage.

Mr. KASTENMEIER. Mr. Chairman, I yield 2 minutes to the gentleman from California (Mr. DANIELSON), a member of the subcommittee.

Mr. DANIELSON. I thank the chairman for yielding to me. I merely wish to state that I support the bill. It is designed to meet a very important need and has been carefully drafted, safeguarding the rights of all persons concerned.

Mr. Chairman, I urge an aye vote on the bill.

Mr. RAILSBACK. Mr. Chairman, I yield 3 minutes to the gentleman from California (Mr. WIGGINS).

Mr. WIGGINS. Mr. Chairman, before we undertake to amend the law, we ought to reflect upon where it now stands. At the present time, absent this bill, any person—any person—denied of any constitutional right or right conferred by Federal law may sue to redress that deprivation if caused by State action in a suit filed under 42 United States Code 1983. In other words, the affected inmates have a right now.

In several cases, however, the United States has attempted to maintain these actions in its own name, and as a party plaintiff. Most such efforts have been frustrated, Mr. Chairman, because the Attorney General lacks standing—that is to say, the United States has not suffered the wrong alleged to the inmates. Under present law, the United States has an opportunity to intervene in these private lawsuits under rule 24, and this is the correct posture of the law, Mr. Chairman, since the proper role of the Attorney General in such cases is to protect the rights of inmates, the real parties of interest, and not to vindicate some claimed interest of the United States.

However, the crux of this bill is the power granted to vindicate rights secured by laws, and not constitutional rights; not 1st amendment rights, 5th amendment, 8th amendment, 13th amendment, or 14th amendment rights, which have been denied.

The desire of the administration and the reason for this bill is that the Attorney General and Secretary Califano are most anxious to monitor and mandate the type and quality of health care delivered in State health institutions. The Attorney General has asserted that Federal law gives a right to quality medical and psychiatric care. This claimed right is based upon certain congressional findings contained in various Federal grant programs.

Now, if we ratify this assertion of Federal power to recognize a right to treatment and a certain quality of treatment in State health institutions, we will be doing great violence to the Federal system. The affected inmates—the real persons involved here—are adequately protected under Federal and State law now. We ought to leave the law alone and not amend it.

Mr. KASTENMEIER. Mr. Chairman, I yield 3 minutes to the gentleman from Pennsylvania (Mr. ERTEL).

Mr. ERTEL. Mr. Chairman, I would like to commend the chairman of the committee for his diligence in pursuing this bill to its final conclusion.

I with reluctance rise to somewhat oppose the bill because I will be offering an amendment to it. I will be offering an amendment to strike from the bill the prisons, the correctional institutions, and the jails.

I have reviewed the report that was filed with the bill, and when I looked at the rationale for the bill, I found the rationale does not extend to those who are already institutionalized in prisons, jails, or correctional institutions. And if I might just go through the report, under the heading of "Present Representation of Institutionalized Persons" on page 17 there is an indication that people in institutions are unaware of their rights. I would suggest that rationale does not apply to those in prisons, jails, or correctional institutions. Last year 14,000 suits were filed by those persons in jails, prisons, and correctional institutions. These are not people who are unaware of their rights.

Second, the report indicates that they have the inability to file or to take protective action. Yet they did file 14,000 actions last year, and they do have the ability to do that.

It is said they lack money. In the correctional institutions they have the right to present their cases in forma pauperis, which means they can file without money, or they can go and appear pro se, or the States can appoint attorneys to represent these people, and the States do so in many cases.

So it seems to me the rationale for this bill can apply to those in mental institutions, and to those in juvenile institutions, and to those in nursing homes, those people who do not have the capacity to protect themselves. But those in correctional institutions not only have the capacity, they have exercised it. So

what does the bill do in respect to those people?

What it means is the prisoner who now files one of his own actions will in turn send a copy of that to the Attorney General's office and allege a pattern or practice, and now he will not only get a review in the district where he files but also a review by the Attorney General, which gives the prisoner redundant rights. He is not prejudiced by being a prisoner.

So they do have the ability to protect themselves, and in addition what we will have done is to create another bureaucracy on top of the bureaucracy that already exists. What we will have done is to divert the resources for the Attorney General's office which he should use to protect those institutionalized persons who do not have the capacity to protect themselves. This additional workload will dilute the efforts of the Attorney General to protect those who cannot protect themselves.

That is the reason I will offer the amendment to strike those in correctional institutions, prisons, and jails.

Mr. RAILSBACK. Mr. Chairman, I yield 3 minutes to the gentleman from Ohio (Mr. KINDNESS).

Mr. KINDNESS. Mr. Chairman, I thank the gentleman for yielding me this time.

Well, Mr. Chairman, here we are again, a nice cozy little group debating another bill out of the Committee on the Judiciary. Do you ever get the feeling that when it is announced that a bill out of the Committee on the Judiciary is going to be heard on the House floor it is like when somebody announces that your least favorite cousin is coming for a visit next week?

I think the importance of the legislation before us is the burden that it is going to leave potentially on the State and local governments, which is such that we really ought to have a bit more interest demonstrated than we have at the present time.

Like the gentleman from Illinois, Mr. RAILSBACK, my interest in this legislation goes back to a series of visits to State institutions housing mentally ill, disabled or retarded people. But it was a different set of visits. In my case I was a State legislator at the time. And I still remember and care about the concerns of State government in trying to meet and overcome these problems. It seems to me that we ought to look at this a little bit more in terms of the viewpoint of the State and local governments, in considering this matter.

I am fed up with people who are pressing for Federal action to do everything that needs to be done. And so are most of the taxpaying U.S. citizens. And here we come with another one.

What can result from aggressive action by the Attorney General under the authority and standing created by this bill? One thing, the identification of a wrong. Yes. But from whence cometh the solution to the problem or the righting of the wrong? It has to come from the State and local governments. What is in this bill about the money to do that with? There is no question that there is a great need for the protection of the rights of people who are confined in institutions supposedly operated for the benefit of people who are mentally ill, disabled, retarded, chronically ill, or handicapped.

Jails and prisons I agree with the gentleman from Pennsylvania are an entirely different matter. The rationale does not apply to them. There is no question but that there are many failures to properly protect the rights of those individuals, and there is no question that every improvement in the protection of the rights of people in these circumstances costs money to correct the conditions and maintain appropriate conditions, but we are not going to help to do that in this bill. Indeed, there is no mention in this bill as to how these costs will be met. But we could do a lot more for these people by providing the money to provide the necessary staffing and operating conditions rather than spending the money to hire expensive lawyers in the Department of Justice and to pay for litigation. We have done too much of that already.

We would do more for these people by not setting up the State and local governments for lawsuits to drain the time and the resources of those who should be working instead of improving the conditions about which we are complaining.

We are looking at this bill entirely backwards. It seems to me, in addition to the problem presented by our report, which does not reflect in substantial measure the things that occurred in the Committee on the Judiciary, this bill takes the wrong approach and I would certainly urge its defeat.

Mr. KASTENMEIER. Mr. Chairman, I yield 5 minutes to the gentleman from Massachusetts (Mr. DRINAN), a member of the subcommittee.

Mr. DRINAN. Mr. Chairman, as a cosponsor of this bill and a member of the subcommittee from which it came, I am pleased to add my voice to the chorus of support for this modest but important measure. H.R. 9400 seeks simply to give the Attorney General the authority to commence litigation, after complying with a number of procedural safeguards which the bill enumerates, to remedy unlawful conditions in certain institutions and facilities. Recent decisions of the Federal courts have cast doubt upon the "standing" of the United States to bring such suits. This statute is intended to clarify any ambiguity which may exist regarding that authority.

It should be observed that the Supreme Court has, for many, many years, upheld the "standing" of the United States to initiate certain suits without express statutory authority. The Court has recognized that conduct of a specified nature, whether arising from public or private sources, may be so detrimental to the interests of the United States that the sovereign should be allowed to seek judicial relief even though no statute explicitly provides for such suits. In the last century, when a labor strike threatened to prevent the movement of the U.S. mails, the Government sued to enjoin the obstruction. The Supreme Court sustained the authority of the United States to seek that relief without a specific statute in the Debs case.

In more recent times, the Court has reaffirmed that line of decisions. The Court has upheld the standing of the United States to bring civil suits without express statutory authorization at least in cases where Congress has imposed criminal sanctions arguably covering the same conduct. In Wyandotte Transportation Co. against United States, for example, the Court permitted the Government to institute a civil action based on a criminal statute to remove an obstruction in the Mississippi River. The High Court approved the same theory of standing in the New York Times case, where the United States unsuccessfully sought to prevent the publication of the Pentagon Papers. These precedents would appear applicable to civil actions brought by the Government involving deprivations of certain Federal constitutional and statutory rights of institutionalized persons to the extent Congress has made such conduct arguably a criminal offense, such as under sections 241 and 242 of title 18.

Despite these compelling precedents, the lower Federal courts have not been as receptive to such suits as the Supreme Court. Thus the United States has had mixed successes in bringing suits to remedy the illegal conditions imposed on institutionalized persons. Where the Government has participated, however, it has been an effective advocate of the rights of those persons confined to or residing in such facilities and institutions. For example, in the Gary W. case, discussed on page 16 of the committee report, the Attorney General intervened in the case on the side of the plaintiff, who represented a class of dependent children sent to out-of-State institutions by Louisiana. The Justice Department investigation disclosed that these institutionalized children were, as the report notes, "physically abused, handcuffed, beaten, chained, tied up, kept in cages, and overdrugged with psychotropic medication."

In the approximately 40 cases in which the United States has participated, similarly appalling conditions were uncovered through the vigorous investigations of the Justice Department, assisted in some instances by private individuals. These institutional violations of Federal law were not confined to any one geographic area of the country nor any single type of institution. The Department has found unlawful conditions of confinement and residence in many different States in varied institutional settings: Prisons, juvenile facilities, and mental hospitals, to identify those which readily come to mind. I invite each Member of this House to examine carefully those pages of the Committee report which document the abuses which have been visited upon institutionalized persons in facilities across the Nation. If these persons had an effective voice in the national legislature, their cry of distress would have been heeded many years ago. Coming late as we do to this terrible problem, we should not pause in approving H.R. 9400 which would give some measure of relief to persons subject to these awful conditions.

Undoubtedly there are some Members who harbor constitutional reservations about this bill. The committee carefully examined the assertions of invalidity and determined that no serious challenge could be made to H.R. 9400. I will not repeat here what the committee said in its report at pages 11 to 14. In sum, we concluded that the authority to grant the United States standing to initiate litigation to secure the rights of institutionalized persons rests at least on four grants of power: Section 5 of the 14th amendment, the commerce clause, the spending power, and the necessary and proper clause.

Because most cases arising under this bill will involve violations of the 14th amendment, the committee focused its attention on the authority given by section 5. We, of course, did not intend to diminish the significance of other sources of constitutional power by concentrating on section 5. But it seemed the most readily available source of congressional authority for enacting H.R. 9400. In a few cases, it may be that the Department of Justice, in its suits under H.R. 9400, will have to rely on other grants of authority to sustain its standing in any particular case. Be that as it may, the general contours of the bill and its application in most cases are justified most easily with reference to section 5 of the 14th amendment.

From Ex Parte Virginia in 1879 to Fitzpatrick against Bitzer in 1976, the Supreme Court has consistent interpreted section 5 to permit Congress the broadest scope of authority to secure the rights, privileges, and immunities protected by the 14th amendment. What constitutes "appropriate legislation" within the meaning of section 5 is left exclusively to the judgment of the Congress. Only if the exercise of power intrudes into an exclusive domain of State authority will the statute be declared unconstitutional. Since H.R. 9400 does not so intrude, putting aside its essential, procedural nature, its constitutionality is beyond peradventure.

We should recall that H.R. 9400 authorizes the Attorney General to bring suits to correct a "pattern or practice" of violations of Federal statutory or constitutional proscriptions. Whatever constitutional reservations one might have if the bill allowed Government suits to remedy mere "isolated or accidental" illegalities should be dissipated when the pattern or practice nature of the litigation is considered. Such violations, as we noted in the committee report, injure the United States itself, apart from any injury it may inflict upon institutionalized persons. Surely Congress may authorize the Government to sue to remedy conduct which causes injury to the sovereign.

Furthermore because a "pattern or practice" suit is a unique statutory proceeding created by Congress to focus the attention of the United States on violations which are more than "isolated or accidental" events, it would not be appropriate to apply rule 23 of the Federal Rules of Civil Procedure, which governs private actions. Such application would be inconsistent with the notions that a pattern or practice injures the United States itself and that the sovereign represents the public interest, as the Supreme Court noted in United States against Raines. Thus the holding in EEOC against D. H. Holmes Co., Ltd., even if correctly decided, is not applicable to pattern or practice suits brought by the Attorney General.

The "pattern or practice" nature of the lawsuits under H.R. 9400 is significant also after the United States has established liability and then seeks a remedial order. The courts have sustained broad, affirmative relief in such cases so that the effects of the deprivations will be fully eliminated. During consideration of H.R. 9400, the committee inserted the word "equitable" before "relief" in the bill. This amendment clarified the original intent of the measure that the United States not recover damages which would be paid into the Treasury of the United States. Needless to say, equitable relief frequently requires the defendant to expend funds to correct the conditions which led to the finding of liability, which would be permitted under this bill. Furthermore, the courts have authorized the Attorney General to secure monetary relief for individual victims of a pattern or practice of violations, such as in United States against Georgia Power Co. In suits under H.R. 9400, the court could, for example, require the defendants to investigate individual complaints of unlawful conduct, and to compensate such victims for their monetary losses, if any. Flexibility and inventiveness have always been the hallmarks of equitable relief. H.R. 9400 continues that ancient tradition.

This bill is an important contribution to the advancement of the constitutional and statutory rights of institutionalized persons. It is an extension of the authority of the Attorney General to bring suit in other areas of civil and constitutional rights. In the past Congress has authorized the United States to commence litigation in the areas of housing, voting, employment, public facilities, and other subjects. In addition we have given the Attorney General the right to sue for violations of antitrust, organized crime, environmental protection, and consumer credit laws. H.R. 9400 is perfectly consistent with what we have done previously. No Member should have difficulty in supporting this measure, and I urge each of my colleagues to approve it.

Mr. RAILSBACK. Mr. Chairman, I yield 3 minutes to the gentleman from Michigan (Mr. SAWYER).

Mr. SAWYER. Mr. Chairman, I am addressing this bill with very mixed emotions. Virtually all of the speakers have purported that the purpose and thrust of this bill is to give the Attorney General standing in the event the Attorney General finds some systematic abuse and elects to act. This bill does a good deal more than that. This bill confers on the Attorney General the right to prescribe grievance procedures and steps for all penal detention facilities and pretrial jails. Nowhere does the Federal law provide for grievance procedures to be followed by the U.S. Army. They do not for students at universities or schools all over the country. We do not inject the Federal bureaucracy into state affairs when it is not Federal money. This is not a question of the Federal Government making a grant and tying some strings or conditions to it. Here we are impinging directly on the internal management of historically State and local institutions that have been paid for by local money and have been operated by and large successfully by local and State governments. Just giving the matter to Big Brother down in Washington or the Federal bureaucracy certainly is no panacea and does not cure the problem. The people here in the bureaucracy are no better or no worse than the people running local governments and State governments, and no more dedicated.

If we will look at the record, 8 percent of the American Army apparently is shooting heroin in Germany. What are we doing about that with the bureaucracy here? If we look at HEW, it has employees who have not even paid back their loans for education. The Federal Government, certainly from Watergate to Koreagate, has not evidenced any great ability to solve problems on its own level.

Juveniles have always historically been handled in their local communities. They are not even State-institutionalized. Local civic and charitable groups involve themselves in it. They are operating foster homes and various other systems where the localities have worked it out to suit them. To allow the Federal Attorney General to intervene and dictate standards of care which the operator of any of these institutions has to provide a juvenile is unwise.

When we get down to grievance procedures, whether in prisons or jails, why not consider schools, universities, and foster homes?

The CHAIRMAN. The time of the gentleman has expired.

Mr. RAILSBACK. Mr. Chairman, I yield 2 additional minutes to the gentleman.

Will the gentleman yield?

Mr. SAWYER. I yield to the gentleman from Illinois.

Mr. RAILSBACK. I thank the gentleman for yielding.

May I just offer my opinion, which I think may be different from the gentleman's, and that is that in the bill no State need necessarily adopt the minimum regulations or guidelines promulgated by the Attorney General, in which event if they do not adopt the Attorney General's guidelines, then there will not be a requirement for exhaustion of remedies on the State level. What we are trying to do—and it was really done at the urging, frankly, of the Ford administration, is to recognize that there had been too many section 1938 petitions, 95 percent of which were thrown out and held to be frivolous. It was our feeling that we ought to try to motivate the States to set up a grievance mechanism.

Mr. SAWYER. Why, if we are this concerned and think the Federal Government to be such a panacea, do we not adopt a set of grievance procedures and guidelines for all the schoolchildren in the country, for all those in foster homes, for all those in parents' homes, if we are such great problem solvers? Why do we not address ourselves to those instead of just prisons?

Mr. RAILSBACK. Mr. Chairman, will the gentleman yield?

Mr. SAWYER. I yield to the gentleman from Illinois.

Mr. RAILSBACK. Let me just say, based on rather limited experience of my own, that after visiting Joliet prison in Illinois, after visiting some of the California facilities, and the Wisconsin facilities, it is my own personal belief that if there is any group in this bill that needs to be singled out for help, it would be the juveniles.

They are the ones that sometimes are not segregated. What they are getting is an adult lesson in crime.

Mr. SAWYER. Mr. Chairman, I might as, how about what we just read in the Washington Post about the schoolchildren in Washington, D.C., with their pictures on the front pages? Why do we not address those problems?

Mr. KASTENMEIER. Mr. Chairman, I have no further requests for time on this side.

Mr. RAILSBACK. Mr. Chairman, I yield 1 minute to the gentleman from Virginia (Mr. BUTLER).

Mr. BUTLER. Mr. Chairman, I just take this time to ask the gentleman from Wisconsin, the chairman of the subcommittee, if the gentleman would be pleased to comment on the remarks I have made and the remarks the gentleman from Ohio (Mr. KINDNESS) has made with reference to the need for State action?

Mr. KASTENMEIER. Mr. Chairman, I yield myself 3 minutes.

Mr. Chairman, I concur with the gentleman's remarks on State action. I should perhaps say that if the time of the gentleman is not adequate, I will yield time myself.

Mr. Chairman, both to aid Members in this debate and to provide clear legislative history for this bill, I would like to elaborate a bit on the issue of "State action" and H.R. 9400.

First, it is important to note that the four categories of institutions listed in section 1 of the bill are all modified by a paragraph which limits the coverage of the bill to a facility or institution which is "owned, operated, or managed by or provides services on behalf of or pursuant to a contract with any State or political subdivision of a State."

The intent of the committee in this regard is to reflect traditional concepts of "State action" as that theory of law has developed under 14th amendment litigation and to make it absolutely clear that no standing is created by this legislation to pursue purely private conduct, no matter how discriminatory or wrongful.

However, since the nexus between private and public conduct in the deprivation of the rights of institutionalized persons is frequently ambiguous, the committee has chosen to explicitly describe the sort of institution in which a pattern or practice of rights deprivations may lead to a suit under this legislation. In addition Members may wish to know that the courts have consistently held that mere licensing or regulation is not sufficient to show "State action." And the existence of public moneys in the action which violates rights has also not been held by the courts to be sufficient State involvement to constitute "State action."

It is not the intent of the Committee to create any new law with regard to this term "State action." The committee has not undertaken to formulate rules of general applicability, beyond the text of the bill, because each institution sought to be reached under this bill will be examined by the court on a case-by-case basis as the Supreme Court has held is appropriate when determining the existence or nonexistence of "State action." We are not creating any new standards for "State action" by this legislation. If there is concern on the part of any Member that the bill or the report is not clear on this point, I would reassure him now, for the record, that it is the purpose of this legislation that the traditional standards for State action developed by the courts under litigation brought under 14th amendment grounds apply in suits under this bill. I do not endorse any reading of the bill or the report which would indicate that a particular standard used by one court be utilized rather than the standards generally in application and which, I believe, are well described by the actual text in the bill. I believe that the Attorney General understands that and the courts will understand our intent. In this regard, for the record, I request that the last sentence in footnote 56b be disregarded because it appears to draw a conclusion which the committee does not intend. It was designed to be informational and not to appear to give direction to the court in finding "State action."

In summary, it is the totality of circumstances which must be considered in determining whether the threshold of "State action" has been met in litigation brought under this bill, just as such totality must be presently be considered when determining "State action" during litigation brought under the 14th amendment and the statutes drafted under it.

The CHAIRMAN. All time has expired.

Pursuant to the rule, the Clerk will read the amendment in the nature of a substitute recommended by the Committee on the Judiciary now printed in the original bill for the purpose of amendment.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That as used in this Act—

(1) the term "institution" means any facility or institution—

(A) which is owned, operated, or managed by or provides services on behalf of or pursuant to a contract with, any State or political subdivision of a State; and

(B) which is—

(i) for persons who are mentally ill, disabled, or retarded, or chronically ill or handicapped;

(ii) a jail or prison, or other correctional or pre-trial detention facility;

(iii) for juveniles held awaiting trial or residing for purposes of receiving care or treatment or for any other State purpose; or

(iv) providing skilled nursing, intermediate or long-term care, or custodial or residential care;

(2) the term "person means an individual, a trust or estate, a partnership, an association, or a corporation; and

(3) the term "State" means any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, or any of the territories and possessions of the United States.

SEC. 2. Whenever the Attorney General has reasonable cause to believe that any State or political subdivision of a State, any official, employee, or agent thereof, or other person acting on behalf of or pursuant to a contract with a State or political subdivision of a State is subjecting persons residing in or confined to any institution to conditions which deprive them of any rights, privileges, or immunities secured or protected by the Constitution or laws of the United States, and that such deprivation is pursuant to a pattern or practice of resistance to the full enjoyment of such rights, privileges, or immunities, the Attorney General for or in the name of the United States may institute a civil action in any appropriate United States district court against such party for such equitable relief as may be appropriated to insure the full enjoyment of such rights, privileges, or immunities. The Attorney General shall personally sign the complaint in such action.

SEC. 3. (a) At the time of the commencement of an action under section 2 of this Act, the Attorney General shall certify to the court—

(1) that, at least 30 days previously, he has notified in writing the Governor or chief executive officer and attorney general or chief legal officer of the appropirate State or political subdivision of the State and the director of the institution of—

(A) the alleged pattern or practice of deprivation of rights, privileges, or immunities secured or protected by the Constitution or laws of the United States;

(B) the supporting facts giving rise to the alleged pattern or practice of deprivations, including the dates or time period during which the alleged pattern or practice of deprivations occurred and, when feasible, the identity of all persons reasonably suspected of being involved in causing the alleged pattern or practice of deprivations; and

(C) the measures which he believes may remedy the alleged pattern or practice of deprivations; and

(2) that he or his designee has made a reasonable effort to consult with the Governor or chief executive officer and attorney general or chief legal officer of the appropriate State or political subdivision and the director of the institution, or their designees, regarding assistance which may be available from the United States and which he believes may assist in the correction of such pattern or practice of deprivations;

(3) that he is satisfied that the appropriate officials have had a reasonable time to develop a plan to correct such deprivations and have not adequately done so; and

(4) that he believe that such an action by the United States is of general public importance and will materially further the vindication of the rights, privileges, or immunities secured or protected by the Constitution or laws of the United States.

(b) Any certification made by the Attorney General pursuant to this section shall be personally signed by him.

SEC. 4. (a) Whenever an action has been commenced in any court of the United States seeking relief from conditions which deprive persons residing in or confined to institutions of any rights, privileges, or immunities secured or protected by the Constitution or laws of the United States and the Attorney General has reasonable cause to believe that such deprivation is pursuant to a pattern or practice of resistance to the full enjoyment of such rights, privileges, or immunities, the Attorney General for or in the name of the United States may intervene in such action upon timely application if the Attorney General certifies to the court, at the time of the filing of the motion to intervene—

(1) that, prior to such time, he has notified in writing the Governor or executive officer and attorney general or chief legal officer of the appropriate State or political subdivision of the State and the director of the institution of—

(A) the alleged pattern or practice of deprivations of rights, privileges, or immunities secured or protected by the Constitution or laws of the United States;

(B) the supporting facts giving rise to the alleged patterns or practice of deprivations, including the dates or time period during which the alleged pattern or practice of deprivations occurred and, when feasible, the identity of all persons reasonably suspected of being involved in causing the alleged pattern or practice of deprivations; and

(C) the measures which he believes may remedy the alleged pattern or practice of deprivations; and

(2) that he believes that such an action by the United States is of general public importance and will materially further the vindication of the rights, privileges, or immunities secured or protected by the Constitution or laws of the United States.

(b) Any certification or motion to intervene which is made by the Attorney General pursuant to this section shall be personally signed by him.

SEC. 5. (a) Not later than 180 days after the date of enactment of this Act, the Attorney General shall, after consultation with State and local agencies and persons and organizations having a background and expertise in the area of corrections, promulgate minimum standards relating to the development and implementation of a plain, speedy, and effective system for the resolution of grievances of persons confined in any jail, prison, or other correctional or pretrial detention facility. The minimum standards shall provide—

(1) for the participation of employees and inmates of correctional institutions (at the most decentralized level as is reasonably possible) in the formulation, implementation, and operation of the system;

(2) specific maximum time limits for written replies to grievances with reasons thereto at each decision level within the system;

(3) for priority processing of grievances which are of an emergency nature, including matters in which delay would subject the grievant to substantial risk of personal injury or other damages;

(4) for safeguards to avoid reprisals against any grievant or participant in the resolution of a grievance; and

(5) for independent review of the disposition of grievances, including alleged reprisals, by a person or other entity not under the direct supervision or direct control of the institution.

(b) The Attorney General shall develop a procedure for the prompt review and certification of systems for the resolution of grievances of persons confined in any jail, prison, or other correctional or pretrial detention facility which may be submitted by the various States and political subdivisions in order to determine if such systems are in substantial compliance with the minimum standards promulgated pursuant to this section. The Attorney General may suspend or withdraw such certification at any time if he has reasonable cause to believe that the grievance procedure is no longer in substantial compliance with the minimum standards promulgated pursuant to this section.

(c) In any action brought pursuant to section 1979 of the Revised Statutes (42 U.S.C. 1983) by an adult individual confined in any jail, prison, or other correctional or pretrial detention facility, the court shall continue such case for a period not to exceed 90 days in order to require exhaustion of such plain, speedy, and effective administrative remedy as is available if the court believes that such a requirement would be appropriate and in the interest of justice: *Provided*, That such exhaustion shall not be required unless the Attorney General has certified or the court has determined that such administrative remedy is in substantial compliance with the minimum acceptable standards promulgated pursuant to this section.

(d) The minimum standards promulgated by the Attorney General pursuant to this section shall not be implemented until the Attorney General transmits the proposed regulations to the Committees on the Judiciary of the House of Representatives and the Senate, and waits a period of 30 calendar days (not including any day on which either House of Congress is not in session because of an adjournment of more than 3 calendar days to a day certain) from the date on which such proposed regulations are received by such committees.

SEC. 6. The Attorney General shall include in his report to Congress on the business of the Department of Justice prepared pursuant to section 522 of title 28, United States Code—

(1) a statement of the number, variety, and outcome of all actions instituted or in which the Attorney General has intervened pursuant to this Act; and

(2) a statement of the nature and effect of standards promulgated pursuant to section 5 of this Act, including an assessment of the impact which such standards have had on the workload of the United States courts and the quality of grievance resolution within jails, prisons, and other correctional facilities and pretrial detention facilities.

Mr. KASTENMEIER (during the reading). Mr. Chairman. I ask unanimous consent that the committee amendment in the nature of a substitute be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

AMENDMENT OFFERED BY MR. ERTEL

Mr. ERTEL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ERTEL: On page 8, line 12, strike the words "a jail or prison, or other correctional".

And on line 13, strike "or".

The CHAIRMAN. The gentleman from Pennsylvania (Mr. ERTEL) is recognized for 5 minutes in support of his amendment.

PARLIAMENTARY INQUIRY

Mr. KINDNESS. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. KINDNESS. Mr. Chairman, my parliamentary inquiry is this: My understanding is that any amendment to the same overall section or subsection of the bill might be in order following disposition of the amendment offered by the gentleman from Pennsylvania (Mr. ERTEL) if it does not affect the particular subsection.

My inquiry should perhaps be phrased more generally, and I will inquire, how much of the bill is affected by the amendment?

The CHAIRMAN. The Chair will state that any amendment that is more comprehensive than this amendment or to another portion of the bill would be in order.

Mr. KINDNESS. Narrowing the inquiry, then, Mr. Chairman, if, for example, I had an amendment directed to subsection (1)(A), preceding the amendment offered by the gentleman from Pennsylvania (Mr. ERTEL), although his amendment goes to section (1)(B)(ii), would my amendment be in order as a separate amendment?

The CHAIRMAN. The Chair will advise the gentleman that would be a separate amendment.

Mr. KINDNESS. So that would be handled separately.

I thank the Chair.

The CHAIRMAN. The gentleman from Pennsylvania (Mr. ERTEL) is recognized for 5 minutes in support of his amendment.

Mr. ERTEL. Mr. Chairman, I do not have prepared remarks on this amendment, but I would like to incorporate what I said in the general debate in support of this amendment. My amendment is offered to strike reference only to those institutions where a person has already been adjudged guilty of an antisocial act. That means that he is in a jail, prison, or correctional institution.

This does not apply to juvenile institutions, it does not apply to mental institutions, and it does not apply to pre-trial detention facilities. This is only to apply to those adult institutions where a person has already been adjudged guilty. We are basically talking about prisons and prisoners in State and local institutions. My amendment would strike them from the coverage of this bill.

If I might add this, I have already gone through the rationale for this bill, and basically it is to protect people who are unable to protect themselves. These individuals being addressed here are able to protect themselves. Under the prisoners' rights cases they have a right to use law libraries, they have the right to petition, and they can get petitions out of prison without interference.

In addition, they have the right to institute lawsuits. They have every basic right that any other American citizen has as far as the right to redress and petition the courts is concerned, and they have access to those courts.

What we are doing here with this section is this: We are adding to that a redundant right. They now have a right to petition the Attorney General of the United States to say that there is a pattern or practice discriminating against them as well as against other people.

Let us just take one example of what has happened.

In 1976 we had approximately 14,200 prisoner cases field. Out of those the Fed-

eral courts, after reviewing them, found that 95.6 percent of them were frivolous.

Let us assume for a moment I am a prisoner in an institution and I have nothing better to do than file petitions. In one case, the Firmstone case in Pennsylvania, the petition list is about 100 individual separate petitions. A prisoner will now send petitions out to the U.S. district court, with a copy to the Attorney General's office. We will then have to review the petitions in both places. That means we are going to create another bureaucracy in the Attorney General's office to handle those cases.

In addition to that, when they start handling that kind of volume of those cases coming from these institutions, where people are capable of mental intent, and by definition they are able to do so; while those in a juvenile institution where they have the incapacity of youth, or some other institution such as that, and do not have adequate mental capacity, these cases are going to get confused; and it is going to delay those people getting rights who should be properly addressed by this bill. These 14,000 cases will interfere with that. It seems to me that if we continue on this route, we are not going to serve the purpose that underlies this bill.

Mr. ZEFERETTI. Mr. Chairman, will the gentleman yield?

Mr. ERTEL. I yield to the gentleman from New York.

Mr. ZEFERETTI. I thank the gentleman for yielding.

Mr. Chairman, I want to commend the gentleman for his amendment. As someone who has spent better than 20 years in the correctional systems in New York City and in New York State, I can attest to the number of cases that have been petitioned in the courts.

Beyond that, if we are talking about conditions, this is not the way to address them. If we are talking about spending money, let us spend the money in a proper manner and get something done within those institutions. If we are talking about an archaic system and the minimum standards that the Federal courts have answered to over a period of time, again let us address ourselves to that issue.

And while I am standing, I would also like to support some of the remarks made earlier by my colleague, the gentleman from New York (Mr. BIAGGI), for asking in his amendment for a bill of rights for law enforcement officers. As officers who have worked within the confines of that system, we found ourselves in the Federal courts almost on a weekly basis on the frivolous charges which came in on the will and on the whim of every prisoner in every institution.

Again, conditions are bad. Standards should be met. But I do not feel that this is the way. I agree with the gentleman in the well and I support his amendment.

Mr. ERTEL. I thank the gentleman for his comments.

Mr. BIAGGI. Mr. Chairman, will the gentleman yield?

Mr. ERTEL. I yield to the gentleman from New York.

Mr. BIAGGI. I thank the gentleman for yielding.

Mr. Chairman, I rise in support of the amendment.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. ERTEL) has expired.

(By unanimous consent, Mr. ERTEL was allowed to proceed for 2 additional minutes.)

Mr. ERTEL. Mr. Chairman, if I may return to one of the arguments which I am sure will be presented, that is that this only gives the Attorney General standing, which I contend he already has.

Mr. Chairman, I would suggest that when these prisoners file their petitions, and when the judge determines that there is some sort of pattern or practice, he can ask the Attorney General to come in. And they can then proceed, if there is a pattern or practice, and this has worked. There are cases throughout the United States, and specifically I cite the cases from Alabama, where Judge Johnson has in fact ruled in favor of patterns and practices in a court. So that the prisoners are adequately protected. And if we grant them this additional right, we are taking away from other people to benefit those who are already adequately protected.

I would urge my colleagues to support this amendment in the sake of fairness to those individuals in other institutions who need our care and concern.

Mr. RAILSBACK. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, if the conditions in this country and in the jails and penitentiaries were as most of us would have them, it would be to provide security. We would want them to provide security not just for the inmates, but for the guards, as well. We would not want overcrowding. We would not want any kind of sexual abuses or threat of sexual abuses. We would not want any tear gassing. We would not want any hosing. And yet, after visiting Soledad and after visiting San Quentin, Jolliet in Illinois, my home State of Illinois, Waupon in Wisconsin, Fort Levenworth, and the Cook County jail in Chicago, I can tell the Members from my own experience that we saw conditions that were overcrowded that were conducive to sexual abuses, that it was not just on the Federal level, that it was on the State level, that there were conditions which existed that I had no idea, as a practicing lawyer prior to coming to Congress, ever existed.

It is my belief that the Justice Department in the Morales cases, in the Oklahoma case which I want to refer to, which appears in the report, has indeed served a good function in trying to intervene or initiate actions where there have been serious abuses that have not been addressed by the various States.

Let me just read this statement from page 16 of the report:

> Justice Department-assisted litigation challenging conditions of confinement in prisons and jails revealed that condition in correctional facilities across the nation were, if possible, worse than those in mental institutions. In a suit attacking conditions in the prisons of Oklahoma's State Penitentiary System, the court found that facilities designed to accommodate 2,400 inmates housed 4,600. Inmates were compelled to sleep in garages and stairwells. Groups of four men were regularly confined in 6- by 6-foot cells with no ventilation, no hot water, and sewage leaks. Over a 3-year period, one facility reported 40 stabbings, 44 serious beatings, and 19 violent deaths. Kitchen and food storage areas were found to be infested with mice, rats, and vermin, and firefighting capabilities were deemed nonexistent.

Mr. Chairman, I am not going to go on with this sort of quotation. I think we have read it or things like it before.

However, if a State is not taking action, then it seems to me that the Justice Department ought to have the authority that it believed it had in the past.

Mr. Chairman, I would urge that we defeat the amendment.

Mr. ZEFERETTI. Mr. Chairman, will the gentleman yield?

Mr. RAILSBACK. I yield to the gentleman from New York.

Mr. ZEFERETTI. Mr. Chairman, let me say that these conditions have been in existence not only yesterday and the day before yesterday, but have existed for years.

Unfortunately, no one had ever given that type of system the priorities that were necessary to upgrade the system to make the institutions human habitats for people to live in, let alone to be confined in.

Mr. RAILSBACK. Mr. Chairman, I want to agree with what the gentleman has said. I think it would be tragic if we took away the one device which the Justice Department, in the interest of the general public, believes it has, although, apparently, it may not have it.

Mr. ZEFERETTI. If the gentleman will yield further, more importantly, what has happened, because of the Justice Department and because of the litigations that have taken place is that almost every Federal court in the land has closed down institutions, has given mandates as to minimum standards, and has gotten people aware so that now we can recite a litany of what is wrong; but it has only been through those actions.

This legislation is not addressed to remedy those conditions.

Mr. RAILSBACK. I really wish the gentleman was right, but every indication that I have seen shows that the gentleman is not right about that last point.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. RAILSBACK) has expired.

(On request of Mr. ZEFERETTI and by unanimous consent, Mr. RAILSBACK was allowed to proceed for 1 additional minute.)

Mr. ZEFERETTI. Mr. Chairman, will the gentleman yield further?

Mr. RAILSBACK. I yield to the gentleman from New York.

Mr. ZEFERETTI. Mr. Chairman, I agree with what the gentleman from Illinois (Mr. RAILSBACK) is saying. However, what I am saying is that this legislation does not remedy the conditions. We should be addressing ourselves to the type of legislation which would upgrade those standards.

This particular piece of legislation is designed strictly for those who are incarcerated and does not go to what the real needs are.

Mr. RAILSBACK. Mr. Chairman, I appreciate the gentleman's opinion, and I respect his opinion. However, I happen to think, based on my own experience, that the Congress will be back here in another 40 years asking that something be done; and somebody will be saying, "Let us address it in a different way"—differently from the way we are trying to address it right now.

Mr. ZEFERETTI. If the gentleman will yield further, I have a bill, H.R. 10402, which I hope the gentleman would look at. Perhaps that will address the problem.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. RAILSBACK) has expired.

(On request of Mr. ERTEL and by unanimous consent, Mr. RAILSBACK was allowed to proceed for 1 additional minute.)

Mr. ERTEL. Mr. Chairman, will the gentleman yield?

Mr. RAILSBACK. I yield to the gentleman from Pennsylvania.

Mr. ERTEL. Mr. Chairman, I agree with many of the things which the gentleman from Illinois (Mr. RAILSBACK) has said. However, I would ask him whether the case he cited was one in which the Justice Department intervened under existing law.

Mr. RAILSBACK. The cases that I cited, I will tell the gentleman——

Mr. ERTEL. No. If I may interrupt the gentleman, I am referring to the case referred to in the report, which the gentleman read from.

Did not the Justice Department intervene under existing law? Did they not have the right to intervene, and did they not intervene?

Mr. RAILSBACK. It is my belief—and the gentleman can correct me—that the Oklahoma case was decided prior to the Solomon case. I think that what the Solomon case has done is that it has kind of thrown a monkeywrench into those few cases where the Justice Department is seeking, on behalf of the general public, to intervene where there has been a pattern or a systematic series of abuses.

My feeling is that the gentleman, by eliminating prisons and jails, if that were to be adopted, he has cut the bill in half and has protected those who may be voluntarily confined in mental institutions. However, he has taken out the people who may really have no rights whatsoever, where there have been a series of abuses.

Mr. DANIELSON. Mr. Chairman, I move to strike the last word, and I rise in opposition to the amendment.

Mr. Chairman, I oppose the amendment. I have been very pleased to listen in on the debate. I think it it quite obvious that only those persons who are confined in prisons and jails and the like are in a firsthand position to complain when the rights which should be guaranteed to them by the Constitution are infracted or denied or diminished. But, I would hope that my good friends who seek to provide the remedy, and which the Attorney General can step in in a necessary case, in a proper case, to obtain redress for those grievances, I hope that my dear friends who do support that provision will remember when the time comes—and it will—when we seek to expand and modernize and provide appropriate, decent detention facilities, and will support that demand.

Just recently, during the authorization hearings for the Justice Department in the Judiciary Committee, I sought to remedy some of the things that my colleague from New York (Mr. BIAGGI) and my other colleague from New York have complained of, such as inadequate facilities for holding the prisoners; facilities in which, due to crowding and due to obsolescence, it is practically impossible to provide detention facilities that are in keeping with the twentieth century and modern standards of cleanliness and understanding of confinement.

Yet, I find strangely, some of the very people who seek to provide remedies in this bill, speaking to the very idea of providing decent prisons and jails which are sanitary, which are fireproof, which are not reasonably overcrowded, in which prisoners can be segregated according to the category of the offense and their personalities. I do hope they will remember.

I am opposing this amendment, because I say that someone has to bring these grievances to the attention of proper authorities, but at the same time I do hope that my friends who feel so sympathetic to the prisoners here today will remember, if we are going to protect the rights of those same prisoners, then we had jolly well better get around to providing decent, sanitary, fireproof facilities in which we can humanely incarcerate the people who have violated our laws.

Mr. ERTEL. Mr. Chairman, will the gentleman yield?

Mr. DANIELSON. I yield to the gentleman from Pennsylvania.

Mr. ERTEL. Mr. Chairman, I appreciate the gentleman's comments. I would hope only that he would support the amendment—which he does not—but I do have a bill filed to improve jails in State institutions, and I hope very much that the gentleman will support it in order to get it out of his subcommittee.

Mr. DANIELSON. The gentleman may find that I support him every now and then.

Mr. WIGGINS. Mr. Chairman, I move to strike the last word, and I rise in support of the amendment.

Mr. Chairman, the case simply cannot be made that prisoners in State institutions lack either the capacity or the will to seek a vindication of their own rights. Indeed, the courts have been inundated with 1983 petitions filed by these State prisoners. The number is in the thousands—14,000 has been mentioned, which is higher than I thought, but clearly in the thousands.

If the proposed law were to provide a means of reducing these 1983 filings, perhaps the bill could be supported on that basis, but individual prisoners are in no way bound by an action filed by the Attorney General. Rather than reduce the 1983 filings, this bill increases them by the number filed by the Attorney General himself.

This bill, Mr. Chairman, is conceptually flawed. Rather than granting an independent right of action to the Attorney General, we should have considered granting to the Attorney General a parens patriae right to maintain a class action on behalf of the prisoners themselves so that the prisoners would be bound by any judgment entered in that class action and thereafter be barred from maintaining independent duplicative actions.

Mr. Chairman, the amendment does not go far enough, but I support it insofar as it goes and urge a favorable vote on the amendment.

AMENDMENT OFFERED BY MR. KINDNESS AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. ERTEL

Mr. KINDNESS. Mr. Chairman, I offered an amendment as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. KINDNESS as a substitute for the amendment offered by Mr. ERTEL: On page 8, strike the language beginning on line 12 through to the semicolon on line 16.

On page 8, line 17, strike "(iv)" and insert "(ii)" in lieu thereof.

Mr. KINDNESS. Mr. Chairman, the amendment offered now as a substitute for the amendment offered by the gentleman from Pennsylvania (Mr. ERTEL) is broader, of course, in that it would take out from the definition of "institution" not only jails and prisoners or other correctional facilities, but also pretrial detention facilities and facilities for juveniles held awaiting trial or residing for purposes of receiving care or treat-

I think it has been made clear from the debate up to this point on the amendment by the gentleman from Pennsylvania that there are those of us who feel that jails and prisons and any type of correctional facility do not properly belong within the scope of this bill.

It has been argued well by the gentleman from Illinois (Mr. RAILSBACK) that there are bad conditions that exist in State and local prisons and jails as well as in Federal prisons. It has also been argued well that the Federal Government has not done a 100-percent job of cleaning things up in the Federal prisons, so maybe we ought to be talking about taking care of our own house first.

But certainly we are not offering to do anything constructive about the underlying problems in this bill, and I think we ought to look at the whole scope of correctional-type facilities, of facilities for juveniles, of facilities for pretrial detention, or just those we call jails, prisons, or correctional facilities, put them in one category, and bring them out from under the coverage of this bill.

If this bill is so good and it works well in the case of institutions for the mentally ill, the retarded, the handicapped, or chronically ill, then let us follow that example after it has had an opportunity to operate; and then include jails and prisons if we must. But certainly at this point there has not been stated in my view ample justification for classifying together jails and prisons and mentally ill and disabled and retarded and chronically ill and handicapped per-

sons. And beyond that, the definition of institution includes those facilities which provide skilled nursing and intermediate or long-term care or custodial care.

That is a third type of category, I believe.

Among those three categories that are included within the scope of the bill, jails, prisons, and that type of facility certainly do not belong here.

I would now yield to the gentleman from Massachusetts.

Mr. DRINAN. Mr. Chairman, I thank the gentleman for yielding to me.

I believe that the language is inappropriate due to the fact that this bill expresses a particular sympathy that the Federal Government should have for each and every one who is institutionalized. I think that it would be wrong to say those in jail, or juveniles who are awaiting trial ought to be denied the protection of this act.

Mr. KINDNESS. Mr. Chairman, I would reclaim my time, then, if the gentleman from Massachusetts (Mr. DRINAN) only seeks to argue his opposition to the amendment. I thought the gentleman might seek further clarification of some point.

However, I would certainly urge that whatever the age of the institutionalized person may be, or the conditions may be, we are talking about essentially a State and local governmental concern. I think we ought to be looking at that aspect of it, and not to assume unto ourselves all that is good and positive in the Federal Government's practices in this regard as though we did not have that same problem existing in the Federal protection. But let us, at least, look realistically at the point that jails, prisons, correctional facilities and other related types of facilities are in a different category and the persons in this category already have remedies available to them, and they are exercising them very adequately, you might say very industriously, as distinct and separate and quite different from those people in the other two categories covered by the bill.

I would urge that the amendment which is offered as a substitute to take out both subsections (ii) and (iii) be adopted.

Mr. KASTENMEIER. Mr. Chairman, I rise in opposition to the amendment offered as a substitute by the gentleman from Ohio (Mr. KINDNESS) to the amendment offered by the gentleman from Pennsylvania (Mr. ERTEL).

Mr. Chairman, these amendments were overwhelmingly rejected in the Committee on the Judiciary and in the subcommittee.

It is hard to say whether, in terms of the impact it would cut out half the bill or not, but certainly a very significant portion of it. I think it is terribly unfair to select out a group, because they essentially are less popular than another group.

All the testimony and evidence has been that prisoners as a class are as needful of this sort of intervention as are any other class. If they are, in fact, articulate, they, indeed still, undoubtedly, rank in the bottom line in terms of the desirability of legislatures and even the Congress to provide for them.

I think it is important, because this bill seeks to protect all these classes of persons, but in a very limited way. In fact, some of the arguments made do not seem to understand what we are attempting to accomplish.

We would permit the Attorney General to initiate a suit where a pattern or practice is involved denying rights to inmates in correctional facilities.

We also provide, because we are not seeking to promote litigation, for a mechanism by which the Attorney General of the United States contacts the superintendent and warden of the State institution, the State Attorney General and the State Governor telling them when, why and what, and, in fact, offering consultation and aid to that State. We are trying to assist rather than to produce additional litigation.

As far as all the filings and the condition of confinement suits under 1983, we do not add to or subtract from them. They do not in and of themselves cause the Attorney General to initiate suits or to intervene in suits. He does so, as a matter of fact, presently in perhaps 20 suits in the country, whereas we impose in this bill a statutory standard of general public importance, but all the private individual suits may continue. But we do provide a voluntary grievance mechanism. If States will adopt the mechanism suggested by the Attorney General, those thousands of per se applications can be diverted back into State and local grievance mechanisms. We think that this is a practical way to handle it. We think it will result in less work for the courts, in less litigation, not more, so, Mr. Chairman, I strongly urge that the substitute amendment and the amendment both be rejected.

Mr. ERTEL. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the substitute amendment.

Mr. Chairman, I reluctantly rise to oppose the substitute amendment offered by the gentleman from Ohio inasmuch as it lumps together two different types or groups of people. He would lump in juveniles who are presumed not to have the capacity to protect their own rights and, therefore, would exclude them from the benefit of the Attorney General's filing suit on their behalf in pattern practice suits, so that, therefore, we are going much further than what would be the amendment that I proposed.

In addition, I would just like to comment on my chairman's comments and quote to the Members what Judge Aldisert of the Third Circuit Court of Appeals, says what this would do, he cites Drew Days, who is the man from the Department of Justice who testified, and then says:

> I do not know the size of this staff—

Referring to the size of the staff that this bill would require—

> and I do not know what the impact of this legislation will be in institutions other than jails and prisons. But if we are to assume that the Department of Justice is going to examine at least the number of cases filed last year in state prisons alone, a total of 6,958 cases, then I suggest that the subcommittee be satisfied that sufficient manpower is available in the Department of Justice staff. Otherwise I cannot see how the stated promise of the Department of Justice can be achieved.

It seems to me by including prisons and jails we have taken and diverted our assets as Judge Aldisert has said. Once justice is being selective in the cases that they are going to file, they are going to have to review all of these cases which are presently being reviewed by a Federal district court. We have an additional review and, therefore, prisons and jails should be excluded, but I do not believe that juvenile institutions should be because, in fact, they are the people who are not able to file their own type of actions.

Mr. KINDNESS. Mr. Chairman, will the gentleman yield?

Mr. ERTEL. I yield to the gentleman from Ohio.

Mr. KINDNESS. I thank the gentleman for yielding.

I would like to point out to the gentleman from Pennsylvania that I support his amendment, and I realize that there is a difference in the two categories, but at the same time there is directed toward the juvenile facility and toward the juvenile who is incarcerated or detained a much more localized concern. I do not think we have quite as many problems in that area that would be brought to light by the Attorney General as we have in these other categories. It is for that reason that I think if we take the whole penal-like atmosphere out of this bill, it would be better. If it is deemed necessary at a later date to include that, I think we would see the building of lawyers at the Department of Justice at a little later date for that purpose.

Mr. KASTENMEIER. Mr. Chairman, will the gentleman yield?

Mr. ERTEL. I yield to the gentleman from Wisconsin.

Mr. KASTENMEIER. Mr. Chairman, I have asked the gentleman to yield, because I think there is an erroneous conclusion drawn that this will build up a bureaucracy. There is no requirement for the Attorney General to review these thousands of cases that the gentleman refers to. Those are the ones handled in section 5 and would be diverted back to the States for the grievance mechanism under this bill, if the States elect to come under it.

Furthermore, the Attorney General has suggested, and we have put in what is provided by this bill, that there are two additional attorneys and one additional clerk. That is what we are talking about. We are not talking about thousands of extra cases. We are not talking about any substantial increment of additional cases. We cannot only monitor this, we already know about what to expect.

I think the suggestion that somehow the Attorney General is going to individually review thousands of cases is just fallacious.

Mr. ERTEL. Mr. Chairman, if I can reclaim my time, I might point out this

may be voluntary, but if the Attorney General is going to be conscientious and look for patterns and practices, he is going to have to review those, or else violate his duty.

I do not suggest for a moment that we can legislate on the basis that the Attorney General is going to violate his duty.

It is true that every prisoner, I can just see it now, they are just going to add a pattern and practice allegation to their petitions and send them to the Department of Justice.

Mr. Chairman, I spent a year on reviewing some of these cases and I have seen them tie up the courts' time and now we will tie up the time of the Attorney General as well.

Mrs. FENWICK. Mr. Chairman, I move to strike the requisite number of words. I rise in opposition to both amendments.

Mr. Chairman, this opposition is not through any sentimental view, but through hard experience. I was a member of the appropriate committee in my State assembly, and chairman of the Joint Senate-Assembly Commission, studying child abuse, so that when we refer to juveniles, I know that problem particularly. I have been in every correctional institution in my State, but what was revealed in the county juvenile institutions was something so frightful that we cannot cut that section out of this bill.

This will not make it possible for the Justice Department to review every single case, but what it does do is to offer a promise, a hope, that for those most outstandingly unjust cases brought by prisoners who are certainly mentally competent, but not competent as lawyers to prepare great trial cases for themselves, it offers some hope that their constitutional rights will be observed, that there is some place to which they can turn when a constitutional right is being violated. This is so particularly true in the juvenile cases, in the juvenile institutions. We have had constitutional rights violated without due process, children shunted off, because of the complaint of a drunken parent, without any lawyer turning up to protect them, locked up in an institution where they were not allowed out even 1 hour a day from their cells.

Mr. Chairman, I urge defeat for both these amendments.

Mr. VOLKMER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I first would like to engage the gentleman from Wisconsin in a colloquy, if I may, so that I have a better understanding of the provisions of the bill.

I relate directly to section 5, and the reason I ask these questions is because of how the amendments pending would relate in the event they were adopted. As I understand section 5, it is a method in which minimum standards for grievance procedures for penal institutions, basically jails, and so forth, can be established by the Attorney General and then that State or political subdivisions could submit those voluntarily for approval; is that correct?

Mr. KASTENMEIER. Mr. Chairman, if the gentleman will yield, yes; I think the gentleman has stated the proposition correctly. Section 5(a) is the promulgation of minimum standards which the gentleman refers to.

Section (b) suggests that the Attorney General shall have a procedure for review and certification of these as they are submitted by States who care to submit them.

Mr. VOLKMER. Then if no State or political subdivision, State or county or city, submitted them, there would be no action by the Attorney General under section 5 in regard to those cities, counties, or States; is that correct?

Mr. KASTENMEIER. The gentleman is correct. Existing law would prevail.

Mr. VOLKMER. In the event none were ever submitted and an inmate from one of those institutions then filed a petition under section 1983, the judge under the other provisions would have a duty to determine whether or not there was a grievance procedure, or if there were none, just proceed as he does presently under 1983.

Mr. KASTENMEIER. Yes. This would give him no right in particular.

Mr. VOLKMER. So there is no language in this bill that would give the Attorney General the power to impose upon any State, city, county, or any political subdivision minimum standards for a grievance procedure for penal institutions; is that correct?

Mr. KASTENMEIER. The gentleman is correct.

Mr. SAWYER. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I want particularly to call the attention of some of the Members who are not on the Committee on the Judiciary to the fact that this grievance procedure is totally different and in addition to the legal standing part of the act.

This language allows the promulgation by the Attorney General of minimum grievance standards on all State and local institutions that are correctional facilities, pretrial holding areas, jails, or prisons, and the recommended minimum grievance standards are as follows:

The act suggests that these steps must first be followed: First, they have to participate on as low a level as possible among all the employees—and I suppose that means from the warden on down to the guard level—in the formulation and the operation of a grievance system.

Then they must specify time limits for written replies to every grievance that is put into this program, with written reasons assigned.

Then there is a priority section for those that are considered an emergency, and at the end it requires that, as an additional step, the whole grievance must be submitted to some person outside the penal institution, and he must review it and provide written reasons as required for each step.

We can just imagine the burden of this kind of a procedure that would be imposed on the States, counties, and cities.

The argument has been made both by the gentleman from Illinois and the gentleman from Missouri that the States do not have to do this. As a practical matter, however, the act is designed so that they, for their own protection, will have to accept these procedures; otherwise the exhaustion of any administrative procedure is waived, and the Attorney General can go right to the U.S. district court without allowing any time for any kind of a reasonable grievance resolution. So they either can go full-sled and indulge in this multistep procedure, even with outside parties, not connected with the system, reviewing and giving written replies with reasons, or have no procedure of their own.

We can imagine, when we take into account the number of grievances they get in a labor union situation, the number they would get when there are 7,000 to 10,000 totally unhappy inmates in a correctional institution. We can imagine the kind of a system that is going to have to be built up to take care of this and comply with what are described as minimum requirements, with these guidelines built into the act that the Attorney General is to promulgate. And it is all paid for from State and local taxes.

Mr. WIGGINS. Mr. Chairman, will the gentleman yield?

Mr. SAWYER. I yield to the gentleman from California.

Mr. WIGGINS. Mr. Chairman, in describing who must participate in the formulation of these minimum standards, the gentleman failed to mention the inmates themselves. The bill requires the inmates will have a role not only in preparing the standards but in their implementation.

Mr. SAWYER. Mr. Chairman, I agree with the gentleman, and that was an oversight.

The inmates and even the lower level employees participate in this multi-step procedure, and they must supply written reasons and give in effect a judicial opinion. They end up with everybody participating in it; everybody, from the warden down, has passed on it and given written reasons. They must state that they have answered all aspects of each complaint, and then they even have to get an outside party to do the same thing.

When we think of the volume, if we have had any experience with penal institutions and the discontent generally, even under the most ideal circumstances of confinement, we could just imagine the volume of goodies that are going to be gratuitously imposed on State institutions and county jails, all of which are hard pressed to afford adequate staffing now. We are not paying for it. We are requiring the states and localities to support this kind of thing. I will tell the Members that it is going to be an absolute can of worms when we see the volume that is going to come through that kind of system. Many prisoners would file a grievance every day to have something to

do and to get the multitiered recognition and written responses. That is one of the reasons why I am in support of the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. KINDNESS) as a substitute for the amendment offered by the gentleman from Pennsylvania (Mr. (ERTEL).

The amendment offered as a substitute for the amendment was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. ERTEL).

The question was taken; and the Chairman announced that the ayes appeared to have it.

Mr. RAILSBACK. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

The CHAIRMAN. A quorum of the Committee of the Whole has not appeared.

The Chair announces that a regular quorum call will now commence.

Members who have not already responded under the noticed quorum call will have a minimum of 15 minutes to record their presence. The call will be taken by electronic device.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 266]

Abdnor	Flowers	Nix
Ambro	Fountain	Oakar
Andrews, N.C.	Fraser	Pettis
Archer	Frey	Pickle
Armstrong	Gammage	Pressler
Baldus	Goodling	Pursell
Beilenson	Gudger	Quie
Bevill	Harsha	Rangel
Bingham	Heckler	Rhodes
Boggs	Hightower	Rodino
Bolling	Hillis	Roe
Bonker	Howard	Roncalio
Bowen	Hyde	Rosenthal
Brademas	Ireland	Runnels
Breckinridge	Johnson, Colo.	Ruppe
Brown, Calif.	Jones, N.C.	Santini

Eilberg	Murphy, N.Y.	Wylie
Fascell	Myers, Michael	Yatron

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. OBERSTAR, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill H.R. 9400, and finding itself without a quorum, he had directed the Members to record their presence by electronic device, whereupon 318 Members recorded their presence, a quorum, and he submitted herewith the names of the absentees to be spread upon the Journal.

The Committee resumed its sitting.

RECORDED VOTE

The CHAIRMAN. The pending business before the Committee is the demand of the gentleman from Illinois (Mr. RAILSBACK) for a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 227, noes 132, not voting 75, as follows:

[Roll No. 267]

Diggs	Nix	Whitley
Eckhardt	Oakar	Wirth
Eilberg	Pettis	
Fountain	Pressler	

The Clerk announced the following pairs:

On this vote:

Mr. Burleson of Texas for, with Mr. Rodino against.

Mr. Teague for, with Mr. Carney against.

Mrs. Boggs for, with Mr. Shipley against.

Mr. Don H. Clausen for, with Mr. Brademas against.

Mr. Frey for, with Mrs. Burke of California against.

Mr. Goodling for, with Mr. Wirth against.

Mr. Ruppe for, with Mr. Dellums against.

Mr. Wampler for, with Mr. Eilberg against.

Mr. Kazen for, with Mr. Le Fante against.

Mr. Nix for, with Mr. Rangel against.

Mr. FASCELL changed his vote from "aye" to "no."

Mr. COUGHLIN and Mr. FITHIAN changed their vote from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

Mr. KASTENMEIER. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. OBERSTAR, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 9400), to authorize actions for redress in cases involving deprivations of rights of institutionalized persons secured or protected by the Constitution or laws of the United States, had come to no resolution thereon.

SUPPORT FOR H.R. 7485, TO AUTHORIZE BANKS TO UNDERWRITE AND DEAL IN REVENUE BONDS

(Mrs. SPELLMAN asked and was given permission to address the House for 1 minute and to revise and extend her remarks and include extraneous matter.)

Mrs. SPELLMAN. Mr. Speaker, I should like to call the attention of my colleagues to a recent letter from the Federal Reserve, a copy of which is inserted in the RECORD after these remarks, endorsing H.R. 7485, cosponsored by me and the Chairman of the Banking Committee, Representative HENRY REUSS. This important proposal, which has also been introduced by 30 of our other colleagues, would enable State and local governments to save hundreds of millions of dollars annually by increasing substantially the market for their revenue bonds. This would be done by authorizing banks to underwrite these bonds, as they are now authorized to underwrite general obligation bonds issued by these same governments.

I know of no other proposal now pending before the Congress through which we can ease the financial burden of State and local government by hundreds of millions of dollars without any cost to the Federal Government. As we all know, when we decrease the cost of government, we decrease the burden on the taxpayer. In this day of high taxes and inflationary pressures, it is imperative that any legitimate action that the House can take to ease both should be a matter of highest priority.

Mr. Speaker, H.R. 7485 is a most appropriate means for us to assist State and local government finances. Instead of throwing dollars after the problem, it uses that time-tested American method of decreasing costs—increasing competition. The lack of competition is one of the principal problems facing the municipal revenue bond market today. Over 90 percent of the general obligation bond issues, which banks are authorized to underwrite, were sold on a competitive basis in 1977, as compared to about 41 percent of the revenue bond issues sold in 1977, most of which banks are not now permitted to underwrite.

The benefits that would flow to State and local governments from the increased competition of bank entry into the revenue bond market were set out very well in the letter of April 10, 1978, from Federal Reserve Chairman G. William Miller to Chairman REUSS:

> The benefits to State and local governments that would accrue from commercial bank underwriting and dealing in revenue bonds potentially could be of considerable magnitude. Underwriting costs incurred in bond offering should be reduced as a result of the increased competition provided by commercial banks. In addition, reoffering yields should be cut as the participation of bank dealers leads to more efficient distribution of new issues and a more liquid secondary market.

The magnitude of these potential savings to State and local governments was estimated in a recent study, undertaken for the Dealer Bank Association by Prof. Phillip Cagan of Columbia University, at $412 million over the life of the revenue bonds issued by these governments in 1977. Professor Cagan further estimated that the savings over the past 10 years, if banks had been authorized to underwrite revenue bonds, would have been $1.68 billion. Other studies over the years have projected similar significant savings from bank participation in the revenue bond market, including one done some years ago by the staff of the Federal Reserve.

The potential benefits from this legislation, and, therefore, the need for it, have increased sharply in recent years, as State and local governments have turned increasingly to revenue bond financing to meet their capital needs. The revenue bond proportion of State and local financing has increased from 34 percent in 1970 to over 61 percent in 1977, when $28.6 billion in revenue bonds were issued. All indications are that this heavier reliance on revenue bonds will continue.

Mr. Speaker, I should like to mention one last principal benefit that will flow from enactment of H.R. 7485. In recent weeks we have all become aware that inflation is once again becoming a major concern of the Nation. The President has announced that his administration intends to increase substantially its efforts to take all appropriate actions to reduce inflation, and here in the House there is increasing discussion of how our legislative actions will impact on inflation. I share with my colleagues their concern about the pernicious effect of inflation.

H.R. 7485 gives us an excellent opportunity to take a significant step forward in the fight against inflation. It will reduce the cost of government, without at the same time reducing needed governmental services, as is so often necessary when government must tighten its belt.

H.R. 7485 is supported by practically every major organization of the State and local officials. Their governments, and taxpayers (who are also our taxpayers and constituents) would benefit from its enactment. These supporters include the National Governors Association, the U.S. Conference of Mayors, the National League of Cities, and the National Association of Counties. They also include those officials who are most knowledgeable about its potential benefits—the Municipal Finance Officers Association; the National Association of State Auditors, Comptrollers and Treasurers; the American Public Power Association; and the Airport Operators Council International.

As I mentioned earlier, 30 other Members of the House have joined Chairman REUSS and me in sponsoring identical legislation, 12 of them members of the Banking Committee. Nineteen other members of the Banking Committee have joined the sponsors in calling for hearings in time to permit the committee and the House to act if the benefits the sponsors believe will flow from H.R. 7485's enactment bear up under the scrutiny of a public hearing.

Mr. Speaker, I urge you and all other Members of the House to join with me and the 31 other sponsors of this legislation in pushing for early action on H.R. 7485. We should not let the opportunity slip by that H.R. 7485 gives us to reduce the costs of government for our constituents without at the same time reducing their governmental services. Savings of over $400 million a year to State and local government without any cost to the Federal Government cannot be ignored. Nor can a ready-made means of fighting inflation be any longer ignored.

> FEDERAL RESERVE SYSTEM,
> *Washington, D.C., April 10, 1978.*
>
> Hon. HENRY S. REUSS,
> *Chairman, Committee on Banking, Finance and Urban Affairs, House of Representatives, Washington, D.C.*
>
> DEAR MR. CHAIRMAN: In response to your request, I am pleased to report that the Board of Governors supports H.R. 7485, a bill that would authorize national banks (and also, under the Federal Reserve Act, State member banks), subject to certain prohibitions and limitations, to underwrite and deal in investment-grade revenue bonds issued by a State or a political subdivision.
>
> Federal law at present permits a member bank to underwrite only those revenue bonds that are issued for housing, university, or dormitory purposes, subject to a limitation of 10 percent of the bank's capital and surplus for any one issuer. Otherwise, the only obligations issued by a State or a political subdivision that may be underwritten by member banks are general obligations—that is, obligations supported by general taxing powers. Those obligations may be underwritten without limitation.
>
> Revenue bonds were rarely used as an instrument of municipal finance forty-five years ago, at the time of the enactment of the Banking Act of 1933. Today, however, revenue bonds account for a substantial portion of all long-term State and local debt issuance. New municipal bond issues in 1977 amounted to approximately $46 billion; of this sum, nearly $28 billion—or three-fifths—was in revenue bonds.
>
> The benefits to State and local governments that would accrue from commercial bank underwriting and dealing in revenue bonds potentially could be of considerable magnitude. Underwriting costs incurred in bond offering should be reduced as a result of the increased competition provided by commercial banks In addition reoffering yields should be cut as the participation of bank dealers leads to more efficient distribution of new issues and a more liquid secondary market.

The Board believes that the prohibitions and limitations contained in H.R. 7485, along with the rules and regulations of the Municipal Securities Rulemaking Board, will provide adequate safeguards to protect the banks and the public from potential conflicts of interest and other dangers.

The Board appreciates the opportunity you have afforded us to present our views on this legislation. I hope our comments will prove helpful to you and the other members of the Committee.

Sincerely,

G. WILLIAM MILLER.

UPDATE ON PACIFIC/ASIAN AMERICAN HERITAGE WEEK—HOUSE JOINT RESOLUTION 540

(Mr. HORTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. HORTON. Mr. Speaker, I would like to report the progress that has been made in acquiring the necessary cosponsors for House Joint Resolution 540 calling upon the President of the United States to proclaim a Pacific/Asian American Heritage Week during the first 10 days in May. As of April 21, 1978, 145 Members of Congress from 26 States, the Commonwealth of Puerto Rico, the District of Columbia, Guam, and the Virgin Islands, have agreed to cosponsor the resolution.

Under new rules of the Post Office and Civil Service Committee, 218 Members are required to cosponsor a resolution before it will be acted upon. We have not introduced a new resolution each time an additional 25 Members have agreed to cosponsor the resolution because of the high cost of printing each new resolution.

In addition, national organizations such as the National Association of Counties and the National Coalition for a Pacific Asian/American Heritage Proclamation are supporting the resolution and have urged Members of Congress to sponsor the resolution.

In the near future, Members who have not yet joined us on this resolution will be receiving a letter requesting their support. Representative NORMAN MINETA and I urge them to join with us.

Because of the interest that has been shown in this resolution, Representative NORMAN MINETA and I thought it would be appropriate to list the names of the cosponsors in the RECORD. The following is the list of cosponsors of House Joint Resolution 540:

CO-SPONSORS (PACIFIC/ASIAN AMERICAN HERITAGE WEEK JOINT RESOLUTION) (AS OF APRIL 21, 1978)

Frank Horton, (R-NY) and Norman Y. Mineta, (D-Calif.).

Alabama: Tom Bevill.

Alaska: None.

Arizona: None.

Arkansas: None.

California: Glenn M. Anderson, Robert E. Badham, Anthony C. Beilenson, George E. Brown, Jr., Clair W. Burgener, Yvonne Burke, John L. Burton, Phillip Burton, James C. Corman, George E. Danielson, Ronald V. Dellums, Don Edwards, Mark W. Hannaford, Augustus F. Hawkins, William M. Ketchum, John Krebs, Robert J. Lagomarsino, Robert L. Leggett, Paul N. McCloskey, Jr., John J. McFall, Leon E. Panetta, Jerry M. Patterson, Shirley N. Pettis, Edward R. Roybal, Leo J. Ryan, B. F. Sisk, Fortney H. Stark, Lionel Van Deerlin, Henry A. Waxman, Bob Wilson, Charles H. Wilson, Jim Lloyd, Harold Johnson, Charles Wiggins, Del Clawson, John Moss.

Colorado: None.

Connecticut: None.

Delaware: None.

Florida: None.

Georgia: Wyche Fowler, Jr., Larry McDonald.

Hawaii: Daniel K. Akaka, Cecil Heftel.

Idaho: None.

Illinois: Tom Corcoran, Robert McClory, Tom Railsback, Paul Simon, Sidney R. Yates, John Fary, Abner Mikva, Ralph Metcalfe, Henry Hyde.

Indiana: Andy Jacobs.

Iowa: Jim Leach.

Kansas: Martha Keys.

Kentucky: John B. Breckinridge, Carroll Hubbard.

Louisiana: None.

Maine: None.

Maryland: Marjorie S. Holt, Barbara A. Mikulski, Parren J. Mitchell, Gladys Noon Spellman, Newton I. Steers, Jr.

Massachusetts: Joe Moakley, Silvio Conte, James Burke, Paul Tsongas.

Michigan: Lucien N. Nedzi, William Ford, David Bonior, Carl Pursell, John Conyers, Bill Brodhead, Robert Carr.

Minnesota: Bruce F. Vento.

Mississippi: None.

Missouri: Robert A. Young, William Clay.

Montana: None.

Nebraska: None.

Nevada: None.

New Hampshire: None.

New Jersey: Millicent Fenwick, Harold C. Hollenbeck, James J. Howard, William J. Hughes, Joseph A. Le Fante, Peter W. Rodino, Jr., Robert A. Roe.

New Mexico: Manuel Lujan, Jr.

New York: Herman Badillo, Shirley Chisholm, Barber B. Conable, Jr., James J. Delaney, Elizabeth Holtzman, Jack F. Kemp, Hamilton Fish, Jr., Edward I. Koch, Donald J. Mitchell, John M. Murphy, Henry J. Nowak, Otis G. Pike, Charles B. Rangel, Frederick W. Richmond, Samuel Stratton, William F. Walsh, Lester L. Wolff, Leo C. Zeferetti, Matthew McHugh, Ben Rosenthal, James Hanley, John LaFalce, Joe Addabbo, Stephen Solarz, Ben Gilman, Richard Ottinger, Tom Downey, John Wydler, Ted Weiss, Mario Biaggi, Bill Green, Robert Garcia.

North Carolina: None.

North Dakota: None.

Ohio: Clarence J. Brown, Willis D. Gradison, Jr., Thomas A. Luken, Charles W. Whalen, Jr., Louis Stokes.

Oklahama: None.

Oregon: Les AuCoin, Robert Duncan, Al Ullman.

Pennsylvania: Joshua Eilberg, Allen E. Ertel, Peter H. Kostmayer, Robert N. C. Nix, William F. Lederer.

Rhode Island: None.

South Carolina: James Mann.

South Dakota: None.

Tennessee: None.

Texas: Charles Wilson.

Utah: Dan Marriott.

Vermont: None.

Virginia: Dave Satterfield, Bob Daniel.

Washington: Jack Cunningham, Norman D. Dicks, Mike McCormack, Lloyd Meeds, Joel Pritchard.

West Virginia: John M. Slack.

Wisconsin: Robert W. Kasten, Jr., Robert W. Kastenmeier, Clement Zablocki.

Wyoming: None.

District of Columbia: Walter Fauntroy.

Guam: Antonio Borja, Won Pat.

Puerto Rico: Baltasar Corrada.

Virgin Islands: Ron De Lugo.

COTTON BONANZA ACT OF 1978

(Mr. FINDLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. FINDLEY. Mr. Speaker, just 2 weeks ago this House met its responsibilities to the farmers of this Nation by defeating a hastily conceived and poorly drafted farm bill. Let us not be fooled again this week. In a few days we will have an opportunity to vote again on what I consider to be very bad legislation. It will come to us described as the Emergency Agriculture Act of 1978—it is in disguise however, the Cotton Bonanza Act of 1978. This is not a farm bill—this is a cotton bill which, in the short term benefits large cotton producers not deserving of additional Federal handouts. In the long term it will harm cotton interests.

What started as a good faith attempt, however misdirected, to aid financially pinched wheat and feed grain producers now resurfaces as a 4-year giveaway to the cotton segment of the agricultural economy—a segment totally lacking a perceived need.

What have the conferees done? They have adopted, without public hearings and without debate on this floor, a 4-year farm bill. Who is the primary beneficiary? Large cotton producers—that is who.

This is not the way to legislate. This body is about to be duped by King Cotton, unless we send this legislation back to the Committee on Agriculture and permit public hearings on the cotton price support loan changes. The administration is troubled by the action of the conferees and the cotton industry which came to us united in 1977 has a right to be heard on these changes.

THE COTTON ECONOMY IS HEALTHY

The cotton economy is healthy, helped considerably by the legislation passed by Congress last fall. The conference action imperils the competitive ability of U.S. cotton to compete effectively in world markets by establishing a price support loan formula designed to keep prices at unnecessarily high levels.

The cotton section of the farm bill enacted in 1977 is functioning in the manner intended by Congress. Since the act was signed by President Carter on September 29, cotton prices have risen approximately 7 cents per pound or $35 a bale. Foreign cotton acreage has been reduced 2 million acres, and U.S. export sales are 6.4 million (480 lb.) bales and 3 months still remain in the current marketing year. These export sales are the highest since 1973 and the second highest level since 1960.

The December futures price is 62 per pound and the current average spot market price is about 56 cents per pound. Farmers can sell their 1977 or 1978 crops at what are considered to be favorable prices.

Changes in the proposed legislation will provide price incentives for the 50 foreign nations who compete with U.S. cotton producers by stimulating unneeded worldwide production, and bene-

fit United States and foreign manufacturers of synthetic fibers.

The marketplace is currently providing adequate income levels for the great majority of cotton producers. Any action by Congress will be an unnecessary expenditure of Federal funds which are so vitally needed for other less fortunate segments of the U.S. economy.

In simple terms, exports are up, prices are up, and foreign production is down. Existing legislation is effectively providing U.S. cotton producers with favorable market conditions.

COTTON INDUSTRY SEEKS NO CHANGE

In 1977 my colleagues and I on the Agriculture Committee bore witness to the unity of the entire cotton industry. Cotton producer organizations from North Carolina to California came before us and spoke in behalf of a cotton loan formula which they themselves had developed. Cotton farmers wrote the cotton section of the 1977 act, and only 2 months ago the National Cotton Council of America testified before the Agriculture Committee and stated:

> The Council recognizes that the cotton section of the Food and Agriculture Act of 1977 embodies the desired elements of a long-range government cotton program, and reaffirms the principles of that section.
>
> This resolution sums up the strong feeling of our delegates that the cotton section of the 1977 Act—on which this Committee worked so hard—is good, basic legislation under which cotton grower income can be protected. We believe it should be given a fair trial.

That is still their position today. What the conferees have done is unjust and prejudicial to cotton farmers outside the Mid-South and Southeast who are strongly opposed to these changes, and who have been denied an opportunity to be heard on this matter.

The cotton industry rather than destroy the unity achieved in the 1977 law sought not to change the law but instead prevailed upon Secretary Bergland to take administrative measures in April to strengthen cotton prices further. Although unnecessary, given the strong economic cotton situation, the Secretary made available a program which pays cotton producers not to plant cotton. The White House authorized this give-away program to reduce acreage, ignoring the highest level of cotton export sales in 20 years, and an improved price situation.

Some still not satisfied have again utilized their exceptional political skills to beget additional advantages for cotton farmers. The time to put a stop to this latest cotton maneuvering is now. Let us send this "cotton pickin" bill back to committee and legislate according to the usual rules of the game.

Today, U.S. cotton must attempt to compete in a world marketplace with 50 cotton producing nations. The No. 1 and 2 cotton producers are the U.S.S.R. and the People's Republic of China. In recent years the United States held down third place in production, but has managed to remain an effective and dependable exporter because of its ability, through sound legislation, to remain price competitive.

The insidious changes in the formula for determining the cotton price support loan stand to benefit foreign producers, particularly those with centrally controlled governments. Under the conference report the minimum floor prices for the entire 4 years of the bill will be 48 cents. More damaging perhaps is the limitation placed upon the Secretary to adjust the loan rate only by increasing the level. These are new rules never before utilized for determining the cotton loan. These are dangerous precedents which have many responsible cotton farmers concerned and alarmed.

In his testimony to the Agriculture Committee in February, Lonn Mann, a cotton producer from Arkansas and president of the National Cotton Council, stated that it was his understanding—

> . . . that several foreign representatives at the International Cotton Advisory Committee meeting last Fall were disappointed to learn that our loan was not going to be over 50 cents. They felt that a higher U.S. loan would have been quite helpful in assuring market expansion for their cotton producers.

What the conferees have done is inform the centrally controlled economies of the United States will guarantee their farmers 48 cents per pound for their cotton. Who stands to lose? Most likely U.S. cotton farmers, and yes, U.S. taxpayers.

Let us not turn back the clock to the days of rigid planting restrictions due to large surpluses. This is what we face by giving away our competitive advantage to foreign cotton producing nations. Let us continue to be a reliable source of fiber to U.S. and foreign mills.

If the cotton provisions adopted by the conferees are allowed to become law, I fear that producers who have planted, merchants and mills who have contracted acreage and made business plans for the future based on the legislation in effect will have little confidence in the stability of future legislation.

To change a major piece of legislation only 7 months after it became law, without the opportunity for the industry concerned to consider whether such changes are in the best interests of that industry, is unprecedented in my experience.

Let us not have the world lose confidence in us as an important supplier of cotton. Let the world and our own cotton farmers know that:

First, when legislation is passed, it will not be changed;

Second, when a cotton program is announced, it will not be changed; and

Third, when a contract is entered into, essential changes will not be made in loan calculations thus providing competitors an unfair advantage.

I do not believe that the establishment of new loan rates or even target prices are necessary, wise or justified by present economic measurements for cotton. As a matter of fact, these new cotton provisions could prove damaging by negating the trigger provisions of the 1977 act, thereby returning the United States to above-market loans and reduced exports. Establishing a higher loan for this year can result in increased production in certain parts of the country which would be counterproductive to the diversion program announced in April.

To change the cotton provisions of the 1977 Agriculture Act will jeopardize everything the cotton industry, the Department of Agriculture and the Congress have worked so hard to bring about in the way of improved prices and new markets for U.S. cotton these past 10 years.

WE SEEM TO HAVE BEFORE US A POLITICAL AGREEMENT TO BENEFIT COTTON

As I stated before the cotton economy is healthy thanks to the farm bill we passed last fall. Since that bill was enacted cotton prices have risen about 7 cents per pound or 14 percent. Now the conferees raise the price support loan by almost 10 percent to a 48-cents-a-pound minimum for the entire four years of the bill; completely change the formula for calculating the loan thus guaranteeing higher prices in 1979, 1980, and 1981; and provide the Secretary with a unique type of discretion—he can only increase prices. Thus we are guaranteed high cotton support prices for future years unrelated to world prices. Only last year wheat and feed grain farmers agreed to give the Secretary discretion to lower the price support loan by up to 10 percent a year in order to make wheat and feed grains competitive in world markets.

President Carter has made his position clear, or has he? Only last week he told Senator CLARK he would accept only the small increase in the wheat target price to $3.40 per bushel and an expansion in the Secretary's discretionary authority to increase target prices when set-aside programs are in effect. Vice President Mondale and Secretary Bergland have made similar public statements.

Mr. President, speak out against this blatant boondoggle—have the courage to reject it.

To my colleagues in this House, let me remind you this body has taken the lead in eliminating many of the program advantages cotton farmers enjoyed over wheat and feed grain producers. We led cotton farmers away from restrictive controlled acreage programs with high loan rates and huge direct subsidy payments. Cotton farmers have prospered under the current program and the great majority of cotton farmers do not want to turn back the clock. That is precisely what this conference report would do.

This conference report is worse than the one we voted down 2 weeks ago. A vote for it is a vote for a big cotton bonanza. A vote against it is a vote for the regular process of legislation through the committee system followed by a thorough debate in the Committee of the Whole in this chamber. Let us follow the proper procedure by voting down this conference report.

SUBSTITUTE TO BE OFFERED TO FIRST CONCURRENT RESOLUTION ON BUDGET

(Mr. ROUSSELOT asked and was given permission to address the House for 1 minute and to revise and extend

his remarks and include extraneous matter.)

Mr. ROUSSELOT. Mr. Speaker, as my colleagues in the House are aware, tomorrow we will begin consideration of the first concurrent resolution on the budget for fiscal year 1979. As most of my colleagues are also aware, I intend to oppose the committee's resolution and offer a substitute calling for a balanced budget and across-the-board cuts in tax rates.

Rather than effectively addressing the true economic problems of our country—inflation and lagging investment due to high taxes—the resolution sent to the floor by the Budget Committee, on which I am a minority member, I might remind my colleagues, simply gives us another dose of the same old laxative that is always prescribed by the majority—more spending and bigger deficits. Although it is expounded that we are in the third year of economic recovery, at this stage inflation is worsening on a daily basis, and, just at a time when spending should be restrained more than ever, the committee resolution asks for the very thing Congress should be trying to avoid—an increase in the deficit. A $60 billion add-on deficit for fiscal year 1979.

Approving an add-on of $60 billion to the Federal debt will escalate inflation and decrease the earning power of America's working taxpayers. It will crowd out investment and production and cripple the ability of individuals and the private sector to save, invest, expand, and develop new resources and technologies. This is what stimulates our economy and creates the permanent, meaningful jobs that our Nation is seeking.

Joining me in criticizing the excessive deficits that are added to the Federal budget year after year is Senator WILLIAM PROXMIRE who states as follows in his additional views to the Joint Economic Committee Report of 1978:

I believe that both the President's proposed $500 billion budget and this Committee's estimate of expenditures of $500 to $505 billion are too high. These expenditures represent an enormous burden on American taxpayers. They should be cut by a minimum of $25 billion and better yet, by $35 billion in order to provide a freeze on Federal outlays of about $465 billion as the distinguished financial expert Henry Kaufman proposed before the House Committee on the Budget.

First of all, this is an achievable cut. It represents only a 5 to 7 percent cut in the President's budget and would provide for total budget outlays at about the fiscal 1978 level. Further, as one who has routinely examined the budgets of numerous Government agencies as a member of the Senate Appropriations Committee, I assert without fear of contradiction that there is not a single general Government function where a 5 to 7 percent cut of the funds could not result in a more efficient or less wasteful program combined with better service to the American public. One can name the function—defense, foreign aid, delivery of mails, welfare, housing, education, law enforcement, highways, public works, reclamation, sugar or mineral subsidies, etc.—and know from experience that the budget could be cut without harming the function.

The ever-increasing deficits like those recommended by the majority constitute a trend so ominous that even many of the liberal economists are claiming we are "deficit addicted." They admit that deficits are no longer stabilizing to the economy and that, rather than simply acting as an "occasional" stimulus, deficits have occurred in greater magnitude and regularity every year. Otto Eckstein, a member of President Johnson's Council of Economic Advisers, recently testified before a congressional subcommittee that—

The weakness of modern economic policy has always been that it removes the discipline of the balanced budget . . . (and further he complains that politically popular but economically unproductive expenditures) . . . can be clothed in the virtue of deficit-creating stimulus packages.

To address the intent of the Budget Act, tomorrow I will offer an amendment in the nature of a substitute which will not only place restraints on increases in spending but also provide for a permanent reduction in tax rates for all Americans. A copy of my substitute resolution follows:

AMENDMENT IN THE NATURE OF A SUBSTITUTE TO H. CON. RES. 559

Resolved by the House of Representatives (the Senate concurring), That the Congress hereby determines and declares, pursuant to section 301(a) of the Congressional Budget Act of 1974, that for the fiscal year beginning on October 1, 1978—

(1) the recommended level of Federal revenues is $464,648,000,000 and the amount by which the aggregate level of Federal revenues should be decreased is $38,700,000,000;

(2) the appropriate level of total new budget authority is $521,437,000,000;

(3) the appropriate level of total budget outlays is $464,648,000,000;

(4) the amount of the deficit in the budget which is appropriate in the light of economic conditions and all other relevant factors is $0; and

(5) the appropriate level of the public debt is $782,200,000,000 and the amount by which the statutory limit on such debt should accordingly be increased is $29,000,000,000.

SEC. 2. Based on allocations of the appropriate level of total new budget authority and of total budget outlays as set forth in paragraphs (2) and (3) of the first section of this resolution, the Congress hereby determines and delclares pursuant to section 301(a)(2) of the Congressional Budget Act of 1974 that, for the fiscal year beginning on October 1, 1978, the appropriate level of new budget authority and the estimated budget outlays for each major functional category are as follows:

(1) National Defense (050):
(A) New Budget authority, $128,439,000,000.
(B) Outlays, $115,679,000,000;
(2) International Affairs (150):
(A) New budget authority, $8,754,000,000,
(B) Outlays, $5,500,000;
(3) General Science, Space, and Technology (250):
(A) New budget authority, $5,216,000,000,
(B) Outlays, $5,027,000,000;
(4) Energy (270):
(A) New budget authority, $9,200,000,000,
(B) Outlays, $6,200,000,000;
(5) Natural Resources and Environment (300):
(A) New budget authority, $13,000,000,000,
(B) Outlays, $11,331,000,000;
(6) Agriculture (350):
(A) New budget authority, $9,197,000,000,
(B) Outlays, $9,308,000,000;
(7) Commerce and Housing Credit (370):
(A) New budget authority, $5,386,000,000,
(B) Outlays, $3,148,000,000;
(8) Transportation (400):
(A) New budget authority, $16,200,000,000,
(B) Outlays, $16,000,000,000;
(9) Community and Regional Development (450):
(A) New budget authority, $8,500,000,000,
(B) Outlays, $8,264,000,000;
(10) Education, Training, Employment and Social Services (500):
(A) New budget authority, $21,842,000,000,
(B) Outlays, $26,529,000,000;
(11) Health (550):
(A) New budget authority, $48,600,000,000,
(B) Outlays, $45,000,000,000;
(12) Income Security (600):
(A) New budget authority, $182,394,000,000,
(B) Outlays, $148,000,000,000;
(13) Veterans Benefits and Services (700):
(A) New budget authority, $20,711,000,000,
(B) Outlays, $20,471,000,000;
(14) Administration of Justice (750):
(A) New budget authority, $3,974,000,000,
(B) Outlays, $4,051,000,000;
(15) General Government (800):
(A) New budget authority, $3,876,000,000,
(B) Outlays, $3,903,000,000;
(16) General Purpose Fiscal Assistance (850):
(A) New budget authority, $9,098,000,000,
(B) Outlays, $9,237,000,000;
(17) Interest (900):
(A) New budget authority, $43,500,000,000,
(B) Outlays, $43,500,000,000;
(18) Allowances (920):
(A) New budget authority, $1,050,000,000,
(B) Outlays, $1,000,000,000;
(19) Undistributed Offsetting Receipts (950):
(A) New budget authority,—$17,500,000,000,
(B) Outlays,—$17,500,000,000;

The Rousselot substitute resolution conceptually addresses two primary themes: Restraints in Federal Government spending and permanent, across-the-board cuts in tax rates.

The current tax rate structure in the United States more than any other single factor has contributed to the problems our economy has experienced over the last several years. It has acted as a disincentive to economic growth and production, discouraged entrepreneurial activity and stood in the way of vigorous economic activity. Today, in the United States, marginal tax rates go from 14 percent on incomes above $2,200 for a single person up to 70 percent on incomes above $102,200. Thus, as an individual's income rises, whether through inflation, real growth in the economy or through hard work, the tax system takes progressively more out of each dollar earned. In other words, as we work harder and longer, the Government takes an ever-increasing portion of our earned dollars.

To correct the imbalance, my substitute resolution assumes a tax rate reduction in the amount of $38.7 billion. In form, it follows the reductions suggested in a bill introduced by my noted colleague from New York, JACK KEMP, and Senator BILL ROTH of Delaware—a bill that I and many of my colleagues have cosponsored and is endorsed by our leadership—which, if enacted, would have the effect of increasing incentive, investment and capital formation. Specifically, the legislation would, first, reduce all in-

dividual income tax rates by an average of 30 percent across the board over a 3-year period; second, reduce the corporate income tax level from 48 to 45 percent over a 3-year period; and third, increase the corporate surtax exemption from $50,000 to $100,000.

While some would criticize our program because they fear a reduction in Federal revenues, I would remind my colleagues that the Kemp-Roth legislation is conceptually similar to a tax cut program successfully implemented by the Kennedy administration in the early 1960's. Then, as now, many Keynesian critics and Federal bureaucrats warned of the serious consequences of enacting large tax cuts which would result in heavy revenue losses. As the following table demonstrates, however, this did not result.

EFFECT OF 1962-64 TAX CUTS ON REVENUES, 1963-68

[In billions of dollars]

	1963	1964	1965	1966	1967	1968	Tota
Revenue losses estimated in 1963 by U.S. Treasury	−2.4	−5.2	−13.3	−20	−23.7	−24.4	−89
Actual revenue gains	+7.0	+6.0	+4.0	+14	+19.0	+4.0	+54
Differences in estimates	9.4	11.2	17.3	34	42.7	28.4	143

Source: U.S. Department of Treasury.

Recently, Prof. Walter Heller, Chairman of the Council of Economic Advisers during the Kennedy administration, was asked to comment on the effects of the Kennedy tax cuts. He stated:

What happened to the tax cut in 1965 is difficult to pin down but insofar as we are able to isolate it, it did seem to have a tremendously stimulative effect, a multiplied effect on the economy. It was the major factor that led to our running a $3 billion surplus by the middle of 1965 before escalation in Vietnam struck us. It was a $12 billion tax cut which would be about $33 or $34 billion in today's terms, and within one year the revenues into the Federal Treasury were already above what they had been before the tax cut . . . Did it pay for itself in increased revenues? I think the evidence is very strong it did.

During debate on the Kennedy tax cut bill, former Ways and Means Committee Chairman Wilbur Mills had this to say:

Many believe we can spend our way to prosperity. On the other hand, I am firmly convinced that if Congress adopts a tax reduction and revision bill of the type which is before this body today, we can also achieve this more prosperous economy by loosening the constraints which the present Federal tax system imposes on our free enterprise system. These tax reductions will bring about a higher level of economic activity, fuller use of our manpower, more intensive and prosperous use of our plants and equipment, and with the increase in wages, salaries, profits, consumption and investment, there will be increases in Federal tax revenues.

There can be little doubt, then, that reductions in income tax rates do not result in higher deficits; rather, they expand the tax base, increase revenues, boost GNP, create jobs and bolster economic growth.

In addition to assuming a $38.7 billion tax cut, my resolution would also restrain growth in Federal spending. In doing so, it maintains Federal outlays slightly above their fiscal year 1978 level. Again, potential critics might be inclined to label such a proposal as "irresponsible" claiming that without increased spending and add-on deficits unemployment will soar and the economy will falter. History proves otherwise. As the following chart shows, between 1945 and 1948 Federal spending plummeted over $60 billion—the current equivalent of about $250 billion—yet national income (GNP) charged ahead. This occurred during the Truman administration when there was a Republican majority in Congress.

FEDERAL RECEIPTS AND OUTLAYS FROM 1945-48

[In billions]

Year	Receipts	Outlays	Surplus or deficit
1945	45.2	92.7	−47.8
1946	39.3	55.2	−15.8
1947	38.4	34.5	+3.9
1948	41.8	29.8	+12.0

The private sector smoothly converted from a wartime to a peacetime economy, provided jobs for millions of veterans and defied the cries of the Keynesians who said that unemployment would hit the 10 million mark unless Government jobs programs were increased. This remarkable transition took place because the Federal Government did not preempt the needs of the private sector and the free market system was left to operate without massive governmental interference. Adequate money was available in the capital markets to supply the expansion needs of private industry because the Treasury did not crowd out the private sector nor drain the lifeblood of free enterprise.

Keynesians would suggest that the most efficient way to create jobs is through Government spending in the area of public service and public works. Experience, however, under the fiscal year 1978 budget, belies this notion that meaningful permanent jobs can be created by spending taxpayer dollars in the name of economic stimulus. The following chart produced by the House Budget Committee shows that under the 1978 revised budget figures $10.6 billion produced 1,034,000 public service and public works jobs at an annual average cost of $10,251 per job.

DIRECT SPENDING ASSOCIATED WITH ECONOMIC STIMULUS PROPOSALS

[Dollar amounts in billions]

	Outlays, 1978 revised estimate	Revised estimate 1978, end of year
Public service employment	$5.4	725,000
Youth Demonstration and Employment Projects Act	.6	57,600
STIP and HIRE	.1	32,500
Job Corps	.3	36,000
Accelerated local public works	2.8	82,900
Subtotal	9.2	1,034,000
Counter-cyclical revenue sharing	1.4	(1)
Total	10.6	

1 No estimate available.

Skeptics may continue to question the ability of the Government to maintain expenditures at their current level without losing important services. They should be reminded that no new budget authority is needed to keep spending levels in many Federal programs from falling in future years. On the contrary, future outlays will result from funds already authorized and appropriated. According to the Office of Management and Budget, total unexpended balances for fiscal year 1979 are expected to be over $679 billion—$224,301 in unobligated balances and $455,154 in obligated balances. (The unobligated amount continues to grow as a result of the agencies errors in overestimating their needs. In 1976, these overestimates grew to 22 percent). When added together, these unexpended balances, both unobligated and obligated, total more than $679 billion—an amount greater than the new authorizations for the fiscal year 1979 budget reported by the committee. This surplus should be more than enough to satisfy those who believe 1979 spending needs to exceed last year's levels.

In summary, Mr. Speaker, my substitute, House Concurrent Resolution 584, calls for a solution that is simple and straightforward—reduce tax rates and restrain increases in spending for fiscal year 1979. I invite my colleagues to carefully consider the positive elements of such a course of action.

THE GREAT EDUCATION DISASTER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. MICHEL) is recognized for 15 minutes.

Mr. MICHEL. Mr. Speaker, in a short while we will again be allocating hundreds of millions of tax dollars for education. We have been doing this for many years and we have been told that this would improve education.

The fact is that college board test scores have gone down as Federal spending for education has gone up. Things have gotten worse, not better, even though we are told year after year that by spending all these dollars we are helping students.

The Washington Post is publishing a series of articles about the Washing-

ton, D.C., schools. The first article in the series is about a high school student named Roger. He is 19. He is a high school senior but he reads on a second grade level. He is not alone. According to the Post:

Forty-two percent of all black 17 year olds in the country are functionally illiterate.

Why have these teenagers received such a poor education? Perhaps it is because of the blunders of the schools, and perhaps it is because of attitudes that have arisen among students during recent years. The Post quotes a Washington school official:

Civil unrest led a lot of students to believe that they could do things and get things without sacrificing the time and energy to study—just demand it, just demand a job. . . .

Mr. Speaker, there is a great education disaster going on in this country and Roger is a small part of it—but I believe when you read his story you will feel not only pity for him but anger and outrage at an educational system that allows such things to go on.

At this point I wish to include in the RECORD "Secret of a Senior Classman: He Doesn't Know How To Read" from the Washington Post, April 30, 1978.

SECRET OF A SENIOR CLASSMAN: HE DOESN'T KNOW HOW TO READ

(By Juan Williams)

It's Roger's secret. He hides it from his girl, the guys in the neighborhood, his boss at his part-time job at a food distributing firm and the other seniors at Eastern High School. He hides it behind pleated pants from Britches of Georgetown, in the dizzy, swirling crowds at the disco, and he hides it behind his ambition to be a lawyer earning more than $40,000 a year.

After 12 years in Washington schools, Roger cannot read.

"If I could read, I'd be a different person," Roger said.

To keep his secret through a day where teachers, friends and even someone he just met may hand him a menu, leave him a note or show him a joke and expect him to laugh, Roger (not his real name) has learned little tricks to get someone else to read whatever it is out loud or to find clues that will let him in on a secret code that everyone else seems to know: the written word.

When the bell rings to end his last class of the day, Roger leaves Eastern's massive red brick, Gothic-style school building down the street from RFK Stadium and jaywalks across East Capitol Street to a corner where several buses stop. He waits for the bus among faded row houses and rundown apartment buildings with front doors missing and steps littered by broken liquor bottles. As each bus pulls up, the lanky 19-year-old tries to figure out which bus is the one he takes home everyday. He cannot read the "Sheriff Road" sign that identifies his bus or the signs that identify the routes of any other bus that passes.

Sometimes he looks for the U4 symbol at the top of the front of the bus—he has memorized that—or he looks for faces he has seen before on the bus that will take him home.

Roger's problem is not all that exceptional at Eastern High, at 17th and East Capitol Streets NE. Between 30 and 40 other Eastern students somehow made it through the school system to high school without even being able to read their own names, according to John Skehan, a remedial reading teacher at Eastern. More than half of the student body has a reading problem of one sort or another, he said, with the typical student reading at the sixth or seventh grade level.

And the problem is getting worse. Teachers report that this year's sophomore class is the worst group of readers ever to enter Eastern. Two special courses for nonreaders—one in biology and one (which Roger takes) in government—had to be created at mid-year so students who cannot read will have a chance to learn something about those two basic and required courses.

According to Nellie Lewis, assistant for reading in the school system's office of instruction, Eastern High is an "average" high school when compared to all the city's public secondary schools. The Washington public school system as a whole scores far below the national average on standardized reading tests and is also well below the average for big-city school systems, national testing surveys show.

Nationwide, the statistics show the situation for blacks (who make up 99 percent of Eastern's student body) to be even more striking. An estimated 42 percent of all black 17-year-olds in the country are functionally illiterate, according to a federally funded study by the National Assessment of Educational Progress. Functional literacy is measured by whether a person can read such basic items as recipes, instructions and newspapers.

"SURVIVAL" COURSES

Reading is only one aspect of the problem facing this city's educators. More than 500 Eastern students—out of a student body of over 1,800—now attend "survival" classes. These teach basic mathematics to high school students who can barely add, remedial reading to students who cannot read, and English composition to sophomores, juniors and seniors who cannot write a coherent sentence.

Teachers at Eastern argue that the students—like Roger—who fill the school's "survival" courses are similar in intelligence to those in suburban classrooms. Roger's quick mind has helped him find ways to hide his illiteracy so well that at one college recruitment session for Washington high school seniors, his graceful manners, stylish clothes, and intelligent questions impressed a number of college representatives, including one from Brown University.

But, of course, Roger never told the recruiter that he could not read, a fact his mother has known for 10 years.

She remembers telling her son when he was in the second grade to get a can from the kitchen shelf and waiting as he fumbles with the cans, staring at one before putting it back and reaching for another.

She realized her son did not know which can to bring because he could not read the labels. He also could not read the comics lying around the house.

A few months later, when Roger's mother saw his report card, which said the boy had been promoted to the third grade, she said she went to the school and asked that her son repeat second grade because he could not read.

But the teacher refused to keep Roger in the second grade, his mother recalled, because although Roger had a problem, there were worse readers in the class, the teacher said, and they were being promoted.

By the end of the third grade, however, Roger still could not tell his mother what was in the can on which "PEAS" was printed in large green letters. His mother went back to the school, and this time demanded that her son repeat the third grade because he still did not know how to read.

"They were just passing him on without him even knowing if he was looking at his name when he saw it," she said.

When, after his second year in the third grade, Roger still could not read, his mother gave up and let the teacher promote her son to the fourth grade. She wasn't going back to the school to argue with teachers again, his mother said.

"By them keeping him back it didn't improve him any, so they might as well have passed him on," she said. "I decided I'd leave the teaching to the teachers."

KEEPING TO HIMSELF

Walking through the halls of Eastern today as a 6-foot-1 inch senior, Roger nods and jokes with no one. He does not play and gossip with the class-cutters lining Eastern's halls or stand on the basement ramp shooting the breeze and smoking dope. After class, when the other students have gone, he sometimes loosens up with one or two teachers who know about his secret. But that's it. He will not risk being embarrassed in front of other students.

He does not play on any of Eastern's sports teams despite his love of athletics and he does not belong to any school clubs.

"Yeah, I never got into nothing," he said. "I always thought about reading. Try to read, that's all I ever do, try to read . . . you know, like if you was to go someplace . . . you had to know where you're going, right? So you have to read, right? Drive me a cab, and you couldn't read, how you going to know where you are going . . . (sometimes) I don't know which bus to take . . . I get on a bus, say the U8 or the 4. See, I go by the numbers or the numbers and the letters.

". . . Bus's not the problem, you know. When you have to read something to go to someplace, like you're going in (a) building right? . . . You got to read the signs that tell you to go this room, you know, you got to read something before you go in or whenever, you know. That's the problem right there," he said.

So Roger stays to himself, away from other seniors or the guys on the block. He is shy, not angry or bitter, about his awful secret. He is himself—talking about the boat trips on the Wilson Line that were his favorite as a boy and his new car, a Mazda. But only with persons he can trust with his secret.

"Hey, man, I love people," he said. "I hate to be left out, that's me. But you can only take so much of, 'What, you can't read?' and all that, unless you're dumb.

"I don't want to know no whole bunch of people anyway, see," he said. "So I don't want a whole lot of people knowing my business. Nothing wrong with that. Right? Right!"

Roger is making it through school with his problem—he did not drop out—because education means too much to his parents, a maid and a janitor. But the reading problem does not start when Roger enters the big red brick school building and end when he leaves. The reading problem is like a foul odor that follows Roger. Everywhere.

It is his private frustration, his private curse.

In school most teachers respect the secret. They do not call on him when it's his turn to read. Some others understand when he responds: "I don't have it," "My eyes hurt," or "I don't know where you're at, go ahead."

Even Roger's girl friend does not know that he cannot read.

"No, uh-uh, my girl don't know," he said. "She don't have to know. Only my parents and my brothers and sisters, teachers. They know. It's easy to hide. If someone gives you something that suppose to be funny you look at it and laugh. If they give you something to read you move your eyes over it and act like you picking it up. If they give me something to read before I sign it, I read, you know, look at it, and then I sign my name."

You could end up signing an IOU for a million dollars, someone told Roger.

"I don't sign too much out in the street," he said. "but I sign what my teachers, the

people at work, my parents, you know, what they give me to sign. . ."

A JOB, STYLISH CLOTHES

Roger hasn't allowed his inability to read to keep him totally out of the flow of life. He has had a job in a food distributorship for over three years, and wears the stylish clothes he has admired since he was a boy.

Dressed in a loose-knit pearl white sweater that matches his pleated white pants, Roger explains that he buys his clothes from Britches when the seasons change and he can purchase a winter sweater at a spring sale price.

He obtained a D.C. driver's license by passing an oral test given by an attendant at the motor vehicles department.

At home Roger, the oldest son, is the best math student in the house, helping his six brothers and sisters with math homework and his mother and father with bills. He has lost his earlier interest in hanging out around Eastern or in his Southeast neighborhood near Fort DuPont Park. Roger's neighborhood, Ward 6, has the third highest rate of unemployment, crime and poverty among the city's eight wards, according to city statistics.

With the high chance of trouble that comes with being on the streets in his neighborhood, which stretches from the Capitol to the hills of far Southeast Washington, Roger can be found at home.

His teachers describe him as a "hard worker," "honest," and "quick-witted."

When anyone unearths the secret that Roger cannot read, he flinches and tells them it is because he skipped kindergarten and first grade.

". . . I was skipped, I didn't really go to first," he said. "That's probably where I made my mistake. See, when everybody was doing the sounds in the first grade, see, I would say them but I really didn't know them.

". . . See when everybody else went to second grade, they was reading. When I got in there, I didn't know what they were doing," he added.

"HE'S NOT A DUMB BOY"

But his mother said her son has never skipped a grade and was, in fact, left back at her insistence.

"He don't talk about it too good," she said. "He's ashamed of it, so he makes up things. He wants people to think he was put ahead so they don't think he was dumb for being left back. You know how children can be with each other, he's ashamed. Really, he's not a dumb boy, he's just got that reading thing to get over."

According to his mother, Roger was never given any tests to determine if he had a learning disability. The only time he received any special help with his reading problem was when his ninth grade teacher kept him after class and helped him through an elementary school reader. That book is the only book Roger has ever gone through.

At Eastern, Roger spent his sophomore year and the first half of his junior year in a remedial reading class. But he did not register for the class in the second semester of his junior year because, he said, he felt he wasn't learning anything.

After leaving the class, Roger tried to get into a night class in remedial reading at Spingarn High School. But only students who have dropped out of high school are eligible for the class and Roger does not want to drop out of Eastern. He wants to graduate.

Since he was left back that one time, Roger never has failed a course or missed another promotion in the D.C. schools. But his teachers report that as a senior this year at Eastern, he reads on the second-grade level.

Last fall, reassured by the knowledge that he had not failed a class since elementary school even though he cannot read, Roger began planning to apply to the best college he could find. Apparently the limits imposed on his future by his illiteracy were not obvious to him. His steady advance through school seemed proof enough to him that he would be acceptable to a college somewhere, and his confidence was reinforced by the good impression he had made on college recruiters.

Roger decided to apply to Brown University and told his "survival" government class teacher, William Broadnax, about it.

"Roger shocked me, after watching him to see what kind of work he could do, after correcting a couple of his tests and observing him in class," Broadnax, said. "Roger came to me and told me he was going to see the college rep from some big northeastern school like Brown University. You know, Brown University is not an easy college to get into . . . I said, 'Now, what in the world gave (Roger) the idea he could go to college?'

"So I went to the principal and I told the principal what had happened . . . what (Roger) had said. I have been teaching this course for seven years and nothing like this ever happened. Even though kids probably had the same idea, I bet they never verbalize it to me.

"So I said (to the principal), there's a fellow in my class who can't read. He can't write. He can't pass a simple test other than to mark true or false and put down any letter for matching," Broadnax said. "In matching (Roger) will use letters that aren't even on the paper. In matching there's only A, B, C, D, and E. In tests I've given Roger, he's put Fs and Gs over here. There's no Fs and Gs on the paper.

"(And the principal said) what do you think could solve it? . . . So I said there's no need to go downtown to school administration headquarters because you're not going to get anything done down there; it'd be a long, drawn out process and somebody's got to write the course and you got to have somebody come out and teach you how to do it and then they got to appropriate money and they got to OK it and it'll take 10 years.

"By that time, the man is grown and has a family . . . Roger's not retarded. He is not dumb."

GAMES AND DIAGRAMS

Broadnax suggested reorganizing classes so that games, diagrams and simple words were used, instead of using a high school textbook that most of his students could not decipher.

Broadnax then faced Roger man-to-man, and told him college was not a reasonable ambition for him.

A month later Roger's ambitions had still not dimmed: he claimed he could be a $40,000-a-year lawyer. But he also had begun to consider a new career as a TV cameraman.

"I figure I'll do that," he said. "They make good money. They should."

Sitting at the dinning room table in his parents' home, talking about all the things he'd like to do—travel, be a lawyer, fly an airplane—Roger said he'd be doing these things right now if he could read.

"If I could read, I'd be a whole different person," he said. "I'd have a whole different personality. . . . For one thing, I wouldn't be in high school. I'd be in college. And you wouldn't be talking to me now.

"Also," he added, "in the way I express myself I wouldn't use so many small words. I wouldn't be working at (a fast-food restaurant). I'd be down there in the government somewhere. It'd be different because when you can read you know what's going down."

In his five government classes, composed of 150 students, Broadnax estimated that 10 students had a severe reading problem—they read between the kindergarten and third-grade levels—and 50 more had a reading problem that would prevent them from comprehending a high school textbook and doing better than "D" work.

Another 70 of the 150 students, he calculated, could read some of a text book but would find reading it such a frustrating experience that they'd avoid reading assignments or hurry through them and fail to understand ideas or concepts in much of what they had read.

Twenty of the 150 students in his classes can handle the book well (they read on the 10th to 12th grade level or higher) and can do exceptional work, Broadnax said.

Day-to-day, class-to-class, Broadnax said, the reading problem at Eastern is limiting what he can teach his students about American government.

"If I ask a student to go home and watch television, the news or a special program and to write the general idea of what took place or what they learned," Broadnax said, "students come back who cannot write it down, and lots of times they can't even verbalize it. They can't even tell you what they've heard, simply because they have no concept of how to put something together, can't structure it . . . (They) can't even come back and tell you in a coherent sentence what they've learned."

NO PUBLIC STATISTICS

Test statistics on the reading level of each high school in Washington have not been made public by the school superintendent or the Board of Education since autumn, 1968. According to the 1968 test results, as an average, Eastern students scored in the 30th percentile in reading, a ranking that means that 70 percent of all high school students nationwide who took the same test scored higher. The average reading score nationally was in the 50th percentile.

At one point during the three months this reporter spent at Eastern, acting principal Gloria Adams gave Eastern's student body a test to determine how severe the school's reading problem had become. She has refused to make the test scores public, however, explaining that she feels it would be unfair to her students to release the results because the test was not administered by a professional tester.

But several teachers who helped grade the tests reported that the test scores were very low.

How D.C. high school seniors compare as a whole to seniors in schools across the Nation reading skills was reported in the August 1977 Report of the Comprehensive Test of Basic Skills.

The test results showed that high school seniors in this city lagged behind most high school seniors in the Nation in reading. It also revealed that high school seniors here, on average, were worse readers than high school seniors who learned to read in schools in other cities, such as Detroit and Philadelphia.

According to the 1977 basic skills report, the average high school senior in the District is 2.8 years behind the average U.S. high school senior in reading ability.

"I'm not shocked by that (the reading statistics)," said a teacher who has been at Eastern for more than 10 years. "It has been getting worse for the last five to seven years, and it's been bad all along. This is nothing new."

Nellie Lewis said she believes most students at Eastern read at least on the seventh grade level. She considers that adequate for a high school student.

"There is nothing so drastically wrong that a good teacher should not be able to teach him (the student) if he is reading on the seventh grade level," she said. "If anything is wrong, it is that the teacher is copping out, looking for a reason not to teach that student."

At Eastern, where teachers and administrators admit there is not much that can be done to help a student whose skills are at the seventh grade level by the time he or she starts the 10th grade, efforts to deal with the reading problem now involve creating special catering to the needs of the nonreading student.

"We assumed we couldn't accommodate everybody that needed a course that didn't rely on reading skills," said Nancy Cooksey, the Eastern biology teacher who had the idea of offering courses for nonreaders. "So we're taking only those students who have a severe problem in the courses for nonreaders. The most severe would be a preprimer (kindergarten) level."

According to Cooksey, who canceled a second-year biology course to help students who were failing elementary biology because of their reading problems, the program for students who do not read will be expanded next year.

REMEDIAL CLASSES ON WAY

Beginning next year, Eastern will help students with the most severe reading problems by having them work in remedial reading classes for two or three periods daily. To give them additional help, students in reading classes will be grouped in biology, government and other courses required for graduation.

Eastern also is tackling the citywide reading problem by offering high school teachers courses in how to teach basic reading. Most high school teachers are specialists only in one subject, and have never been instructed in how to teach reading.

But just as Roger is hounded by his illiteracy, the reading problem at Eastern High dogs students and teachers alike in just about everything they do.

Tests often are read aloud to insure that everyone understands the question. Teachers now read aloud whatever they write on the board automatically, realizing that some students in the class would not know what was on the board otherwise. Homework is limited to simple assignments that involve a minimum of reading and writing.

Foreign language teachers complain that they cannot make much progress in teaching French, Spanish or Latin to students "who don't have a solid foundation in their own language."

The test scores of Eastern students who take the Scholastic Aptitude Tests (SATs), those crucial yardsticks used by colleges to help them decide which applicant to accept, are low because students "don't understand the questions," according to Pat Edwards, chairwoman of school testing at Eastern. "Sometimes they know the answer but they can't read the question."

The reading problem also haunts students who apply for jobs.

"They can't understand why the employer wants them to fill out a form," said a teacher who asked not to be named. "They figure they can get the job, do the job, without ever coming across the written word."

And the reading problem creates frustration and anger in students who come to regard Eastern as a place where they feel stupid, a place where their inability to read is spotlighted for the world to see.

Some students drop out, others stand in the hallways, cutting classes that frustrate them, and others sit in class cracking jokes or flirting, disrupting the class to avoid facing an embarrassing problem.

"I had one young lady come to me the other day and literally break down," said Walter Brown, the teacher's union representative at Eastern. "She told me 'Mr. Brown, I'm 17 years old. I cannot read.' Now she sees herself in this position. Nobody else had to tell her. So it finally dawns on her what her chances are . . ."

CAUSE IS ELUSIVE

From the city's Board of Education downtown to the classrooms of Eastern High School in Northeast, no one can pinpoint a definite cause for the reading problem.

Broadnax sees part of the problem stemming from the fact that today's high school students were the elementary school students of the late 1960s. "Civil unrest led a lot of students to believe that they could do things and get things without sacrificing the time and energy to study . . ." he said. "Just demand it, just demand a job . . . These kids were very impressionable then."

Skehan believes that the reading problems of his students may reflect the fact that from the late 1960s on there were a series of new school superintendents, some of whom espoused different approaches to the teaching of reading skills.

By last year, according to associate school superintendent James T. Guines, about 30 different reading programs were being used in D.C. public schools. The decision on which one to follow, Guines said, has been left up to individual teachers.

"In most school systems there are just a few adopted text books that everybody must use," Guines said. "But we're very democratic."

Superintendent Vincent Reed agrees with Skehan that there have been too many differing approaches.

"(The series of superintendents was) one of the most devastating things ever to happen to the school system," Reed said. "For several reasons: Every two or three years we changed direction. Educators have their own individual ways of doing things. That means by the time the system got geared up to go in one direction, everyone had to change and go somewhere else. The constant changeover in superintendents contributed to the reading problem because it kept teachers in each class from knowing where the system was going. The last three superintendents were outsiders: Sizemore, Scott and Manning. They spent a great deal of time getting adjusted, getting to know the people, the system.

"Up to this point the school system has not dealt in developing skills in PK (kindergarten) through (grade) five in the way they should have . . . up until this administration, there has been no systematic thrust. We had 7,000 teachers going in different directions."

TESTING FOR COMPETENCY

To remedy the problem, Reed has proposed establishing a comprehensive new curriculum that would spell out in step-by-step detail how almost all subjects, including reading, would be taught in every school in the city.

Under Reed's plan, called a "competency-based curriculum," students would be required to pass a series of uniform tests before they could move ahead in any subject. Eventually, they would have to show they had attained certain minimum skills before they could graduate from high school.

The curriculum is being tested this year in 29 schools. Originally, it was supposed to be used throughout the city next fall. But Reed announced last month that it would be delayed for at least a year because it was taking more time than expected to develop the curriculum and make sure it works.

Most teachers and administrators agree with Reed that the blame for the school system's reading problem, must lie with the elementary and junior high schools.

"Something went wrong, down below somewhere," said Victor Nicholas, a counselor at Eastern. "I just can't conceive of anyone going to school all those years and then coming here reading on the first and second grade level."

There is widespread doubt among Eastern's faculty, however, that Reed's competency-based curriculum will be of any help.

"We don't have the facilities to hold all the kids that would be left back if we followed CBC, and said that every student leaving the 10th grade had to have all the skills a 10th grader should have," said Ray Hammond, an assistant principal at Eastern.

"We won't be seeing those kids, the ones that will be coming through the CBC system, for years," said a teacher who asked not to be named. "What are we going to do until then?"

Whatever the reason for the reading problem in the D.C. schools, Roger, a shy and handsome young man, will graduate from high school this spring as a 19-year-old who reads on the second grade level.

Roger plans to go into the Army next year if he can pass the preinduction examination. He expects the Army school to teach him how to read.

From there, Roger hopes he will go on to become a TV cameraman and the reading problem that has caused him so many problems as a teen-ager will be a thing of the past.

"I don't care how much you preach or write about it," said Walter Brown, one of Eastern's biology teachers. "These kids still have missed. We know we missed them. But what are we going to do about it as an administration? What are we going to do about it as people in society? Are we really giving the kids a chance that are coming along now? That's what I'm concerned about."

PROMINENT ECONOMISTS SAMUELSON AND HELLER URGE CONGRESS TO MOVE FORWARD ON TAX REDUCTION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. KEMP) is recognized for 10 minutes.

● Mr. KEMP. Mr. Speaker, while many here in Congress are urging President Carter to cut back on his tax reduction program for fear that a large tax cut will fuel inflation, two prominent economists from the Kennedy administration, Walter Heller and Paul Samuelson, argue that we need tax reduction more than ever.

I am especially pleased to see that these two well-known Keynesian economists should come forward with proposals for tax reduction that are so similar to what President Kennedy proposed in 1963. For example, Paul Samuelson urges an across-the-board reduction in personal and corporate income tax rates, and Walter Heller urges a phased-in tax reduction. Consequently, it seems to me that what these economists really want is a program such as I have currently proposed, which would cut all individual income tax rates by approximately a third over 3 years—the essence of which was the strategy President Kennedy used to encouraged economic expansion in the early 1960's.

In any case, both Heller and Samuelson make this point very strongly: A tax cut is not going to be inflationary. Quite the contrary. If it leads to the creation of jobs and a real increase in GNP the

result will be lower prices, not higher prices.

I urge my colleagues to read both the essays by Samuelson and Heller before concluding that we should cut back on tax reduction instead of moving forward more strongly.

THE CASE FOR A TAX CUT

(By Paul A. Samuelson)

While down in Florida at a conference with some Federal judges, I received phone calls from three congressmen. Each put to me the same question:

Do we still need a tax cut of about $25 billion by the autumn?

The general mood in Washington and New York evidently went through a quick change. First, the recent burst in activity in the stock market and the sharp rise in the Dow Jones industrial average has given a boost to the investment and banking community. Once again they believe it is safe to revert to the old-time religion of lowering the fiscal deficit and enforcing the discipline of a tighter monetary policy.

Second, the public-opinion polls have reported that inflation has moved back up to the position of being the No. 1 economic problem bothering the American citizenry. President Carter's advisers, noting the poll reports, have stressed their recognition of inflation as a problem that is to be combated. The President himself announced a program to fight inflation. Consisting mostly of placebo, the Carter anti-inflation proposals have met with indifference if not outright hostility.

FACTS VS. MYTH

The outlook for tax reform by Congress never looked too good. Each loophole in the tax law is there for a good reason, in the sense that there are powerful economic interests exercising their political powers to hang onto their tax goodies. What is new is the drastic shift in probabilities against the likelihood of a meaningful 1978 tax cut.

Such a shift in sentiment would be perfectly understandable if, over the last half year, the recovery were showing signs of reaching its natural limits; if over-all excess capacity were becoming uncomfortably thin; if sectoral shortages of capacity, like those of 1972–73, were now developing; if delivery times on goods were stretching out and the new-order queues were lengthening; if speculative inventory accumulation were spiraling upward at an unmaintainable rate; in short, if the economy were displaying signs of overfull employment and strong demand-pull inflation.

When you read the reports of the Department of Commerce, the Federal Reserve Board and the Bureau of Labor Statistics, you encounter few such signs of a traditional close approach to, or overshoot of, the economy's full-employment ceiling. In point of fact, each of the last several quarters has seen weaker demand growth than its predecessor. Although much of the weakness in the first quarter of 1978 can be explained away as a result of the blizzards and the coal strike, not all of it can. And even if the present quarter shows a rebound, the first half of 1978 is now expected to show weaker growth than when the tax cut was first planned.

A tally of three dozen consensus forecasters—banks, corporations, universities, and consulting services—revealed that almost all of them have revised downward their 1978 output projections. On the average, they have revised upward their inflation forecasts, but only by a fraction of a per cent.

YES, MAYBE

I, therefore, had to give this reply to the inquiring congressmen:

Weighing the costs in terms of extra inflation against the costs in terms of reduced living standards, lower incomes, reduced job opportunity, and lowered profits, I would at this time favor an October tax cut of about $25 billion. Preferably it should include the following features:

Some tax reform.

Some cuts in payroll taxes.

Some cuts in Federal excises.

New business incentives (lower corporate tax rates, widened investment tax credit).

Across-the-board cuts in personal income-tax rates.

If not all of these five features can be had, three will be better than none. If Jan. 1, 1979, replaces the Oct. 1 date, the damage will be minimal.

The science of political economy consists of weighing evidence in order to arrive at best judgments. Its art involves sensing when they should be reversed.

By midyear we shall have a better reading of the economy's basic strength. If natural forces then promise feverish growth, I shall be the first to counsel shading fiscal stimulus downward. Luckily, there is no need for split-second timing in this matter.

THE RIGHT TAX CUT MIX

(By Walter W. Heller)

Given the political headwinds Mr. Carter's $25 billion tax cut is encountering, one is moved to reexamine the economic case for it. That case was strong and widely accepted in January. Has it been weakened by economic developments since then?

Let's remind ourselves of that persuasive, not to say airtight, case as it appeared in January:

Built-in tax hikes: Without a cut, the economy would by 1979 be moving against a tide of at least $30 billion of new payroll and "inflation tax" liabilities.

Growth prospects: Some weakening of our economic advance seemed to be in the cards for late 1978 and 1979 unless this tax overburden was removed.

Inflation outlook: No breakout of inflation (beyond its stubborn 6 percent basic rate of the past 3 years) was in sight. Besides, U.S. inflation was clearly of the cost-push variety, and $25 billion of tax cut in a $2 trillion-plus economy would not push it into excess-demand terrain.

Budget impacts: Mr. Carter's $500 billion budget for fiscal 1979 represented only a 1.6 percent rise in real terms in an economy growing at over 4 percent a year. The combined tax and budget impacts added up to only a mild fiscal stimulus for the economy.

Investment incentives: To help pep up the sluggish private investment sector, not only stronger markets but stronger business tax incentives were badly needed.

Let's examine each of these in turn.

Built-in tax hikes: They are still built in. Even if no crude oil taxes are enacted, $14 billion of payroll tax add-ons are going into effect in 1978–'79 (plus another $15 billion or so in 1980). And as inflation pushes our income into higher brackets, the federal tax bite increases another $8 billion a year (over and above the normal rise in tax collections generated by economic recovery and expansion). Without the offset of a hefty tax cut, this undercutting of purchasing power would unduly retard expansion in 1979.

GROWTH PROSPECTS

The outlook for GNP growth is weaker today than it was when the tax cut was launched in January. Even with an expected rebound of GNP at an 8 percent rate in the current quarter, the prospective rise in real GNP, fourth quarter 1977 to fourth quarter 1978, has slipped from January's 4.8 percent to perhaps 4.0 percent, while the year-over-year growth prospect is down from 4.6 percent to 3.9 percent. The economic launching pad for 1979 is correspondingly weaker, thus bolstering the case for the tax cut.

STILL A LOT OF SLACK

True, unemployment has behaved better than expected. But there is still a lot of slack in the economy. Operating rates in manufacturing are still poking along at 82.9 percent of capacity, a bit less than last summer. The Labor Department's broader unemployment measure, which takes discouraged and part-time workers into account, is still running at 8.5 percent. And after a welcome downswing, the "official" unemployment rate is likely to hover near 6 percent, or, at best a trifle below, for the rest of 1978. If the rate were to drop sharply below 6 percent, second thoughts on the size and timing of the tax cut would be in order.

INFLATION OUTLOOK

The fear of flying into a higher inflation orbit on the wings of a tax cut plays a major role in the rising doubts about the Carter tax program. Is inflation getting worse? Will dropping the tax cut make it better?

Compared with the January outlook, inflation is worse, but not much. Appearances have outrun facts. In the sensitive area of food, especially meat, an estimated 8–10 percent price rise this year has replaced earlier projections of about 6 percent. But non-food commodities in the CPI have been on an essentially even keel for many months. And large stocks of grains and soybeans, plus the rains that came to California, will moderate the food price upswing later in the year.

Import prices are up, but a steadying dollar will limit the rise while a strengthening dollar would reverse the uptrend. More worrisome for longer-pull inflation prospects is the rise in average hourly earnings at roughly an 8 percent clip today against 7 percent a year ago.

The upshot? Against a rise of 6.8 percent in consumer prices during 1977, the 1978 rise might be a little over 7 percent. And the "underlying rate" of inflation, stuck at about 6 percent for the past three years, may be nudging up to 6.5 percent or so. Far too high, but hardly a panic-button breakout.

In relating the recent spate of price increases to the tax cut, one should note not only that, as in 1977, their pace is likely to ease later in the year, but also that the price increases are coming from the cost side: food, imports, and wages, not bottlenecks, shortages, and excess demand.

Even so, say the critics, dropping the tax cut would sharply improve prospects for reducing inflation. Not so in an economy still running well below its potential. Using the midpoint of "all the statistical estimates I know," Arthur Okun told the Ways and Means Committee Monday that dropping the tax cut would cost $40 billion a year of real output by 1980 while saving only two-tenths of a point on the price level. By any economic or social criterion I know, that's a poor tradeoff.

To fight cost-push inflation, one has to get at the forces that have relentlessly pushed costs up in the face of weak demand. After letting too many horses out of the barn, the Carter program seeks to do just that, partly by setting a Spartan example on federal pay raises, partly by policing its own costly regulations, and party by unleashing Robert Strauss. A powerful program? No. But it is aimed at the right target and, diligently pursued, offers greater promise of curbing inflation than would a jettisoning of the tax cut.

Budget impacts: Budget revisions since January suggest small, not larger deficits. For fiscal 1978, spending underruns have cut the prospective deficit from $62 billion to $53 billion. Further spending shortfalls in fiscal 1979 are likely to offset, or more than

offset, budget increases for agricultural defense, and other programs, spending is likely to end up at or below Mr. Carter's $500 billion.

A more relevant question: How strong a stimulus will the combined budget and tax actions provide? Adjusted estimates of the high-employment budget show that, even if the full Carter program were adopted, the net fiscal stimulus would be less than $10 billion in 1979. Without the tax cut, the built-in tax increases would clearly be a net drag on the economy.

Investment incentives: Even though business investment is hardly drying up, who would argue that it is robust enough to play its full part in sustaining 1978–'79 expansion, boosting productivity, and expanding capacity? The answer is clear: Business tax incentives are fully as much in order today as they were in January.

So the case for a tax cut remains strong. It does not follow that the Carter formula is sacrosanct.

A BASIS FOR COMPROMISE

Bearing in mind both the economic goal of sustaining expansion with a minimum of inflation and the political goal of producing a tax cut that will not only *be* right but *seems* right, I would urge Mr. Carter and the Congress to consider the following basis for compromise.

First, combine an economic good with a political need by substituting perhaps $8 billion of payroll tax cutback for an equal amount of individual income tax cuts. The $25 billion tax cut would then consist of about $8 billion of business and excise tax cuts; $9 billion of individual income tax cuts; and $8 billion of payroll tax cutbacks (in the form of shifting one-third of the cost of Medicare hospital insurance to general revenue financing, the other two-thirds to be shifted in two more $8 billion installments in, say, 1980 and 1981). This would soften the political blow of scheduled payroll tax increases and deliver the happy economic result of combining a rise in purchasing power with a fall in business costs. What better tax medicine can one prescribe for a high-inflation, slow-growth economy?

Second, split the $25 billion tax reduction into two stages, somewhat akin to the 1964-65 tax cut. Illustratively, $15 billion might go into effect Oct. 1, 1978, and another $10 billion the following July 1. If economic events call for a change before the tax bill emerges from Congress late next summer, adjust the staging accordingly. Under this flexible two-stage approach, the economy would have the assurance of the sustaining stimulus of the tax cut, yet the deficit impact would be softened and congressional concerns about doing too much at once would be accommodated.

In short, a $25 billion tax cut still makes good economic sense. But its economic impact could be improved by making room for a sizable payroll tax cut. And its adaptation to political reality—and conceivably also to economic circumstances—would be improved by adopting the two-stage approach.●

PREGNANCY DISCRIMINATION AND ABORTION DISCRIMINATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. GREEN) is recognized for 10 minutes.

Mr. GREEN. Mr. Speaker, in early May, the House will consider legislation of paramount importance to the Nation's working women. The pregnancy disability bill, H.R. 6075, clarifies the intent of Congress to include pregnant workers among those protected from discrimination under title VII of the Civil Rights Act of 1964.

The Committee on Education and Labor approved an amendment granting employers the option to deny their employees coverage for abortions under any medical, health, or disability plans. Unfortunately so far, the debate has centered on the abortion issue, diverting attention from the merits of the bill.

I am strongly opposed to all amendments limiting a woman's rights to an abortion and am especially disheartened to see this amendment on a bill designed to make pregnancy a realistic option for women workers.

Because this issue is so critical, I wish to share with all of my House colleagues the eloquent remarks of Representative TED WEISS, submitted as dissenting views in the committee report on the bill, which fully discuss the adverse ramifications of the amendment:

PREGNANCY DISABILITY BILL, H.R. 6075

COMMITTEE REPORT: DISSENTING VIEWS OF MR. WEISS

The original concept of this legislation was to provide a legislative remedy for an adverse Supreme Court ruling which said that women workers who became pregnant did not have to be covered by disability plans. H.R. 6075, as originally proposed, is an amendment to the Civil Rights Act of 1965; its purpose being to insure equal treatment of women in employment-related matters.

In appending an anti-abortion rider to this legislation, the committee has been diverted from the original purpose of protecting the rights of women employees to protecting the rights of their employers. I voted against the bill as reported with the anti-abortion language because it adds a new form of discrimination in place of the one it seeks to eliminate.

ANTI-ABORTION LANGUAGE WILL NOT PROTECT EMPLOYERS: IT WILL MAKE THEM TARGETS

There is a great irony about the decision of the committee. Every member knows that employers and their representatives are quite capable of presenting their views on issues which come before us; during the course of the 95th Congress, every member of the committee has received literally thousands of pieces of correspondence concerning such issues as common situs picketing, minimum wage, and labor law reform, to name just a few. Yet not one employer who allegedly would be protected by the anti-abortion provision has come forward to promote it.

It is logical to ask, why? Because this amendment will not protect employers; it will turn the focus of the battle over abortion directly on to them. I am sure that there will be attempts by the opponents of abortion coverage to have major corporations eliminate such coverage in their benefit plans; likewise, smaller businesses will be subject to pressure to alter their benefits packages. I am sure that neither employers nor labor unions bargaining collectively with them will be pleased by such a prospect.

UNEQUAL TREATMENT OF WOMEN WILL CONTINUE: EARNED BENEFITS MAY BE DENIED THEM

While exposing employers to new—and unexpected—pressures, the anti-abortion provision will perpetuate unequal treatment for women workers. Health benefits are not gifts of the employer to the employee; like wages and other fringe benefits, they are earned. In many cases, employees are contributing to their health benefit plans; according to figures made available by the Social Security Administration, one-third of all health plans are contributed to solely or in part by employees. The discriminatory aspect of the anti-abortion language is obvious: Male employees—regardless of whether they have contributed to their health plans or not—would be covered for all surgical procedures; female employees—even if there is no employer contribution—would be subject to employer discretion concerning coverage for abortion. The discriminatory aspect could not be more blatant.

THE COMMITTEE'S ACTION EFFECTS HEALTH PLANS WITHOUT KNOWING HOW THEY OPERATE

Unlike the issue of pregnancy disability, the abortion exclusion has not been adopted with any understanding of current health insuance practices. There are 51,600 different health insurance plans available to 58.2 million Americans in the private sector who contribute some $27.1 billion for coverage. Fifty-five percent of these plans are negotiated; 45 percent are not.

ABORTION COVERAGE IS NOW COMMON

According to the National Association of Insurance Commissioners and the Health Insurance Association of America, abortion coverage is now common in most health insurance plans. Spokesmen for these representatives of the industry indicated to members of my staff that currently there is no ban on specific surgical procedures either by law or regulation regarding private insurance coverage.

FINANCIAL CONTRIBUTION OF EMPLOYERS IS "INSIGNIFICANT"

I know that one of the concerns of the members of the committee who approved the abortion exclusion was the fear that some employers would be forced to make great financial contributions to abortion services if the amendment had not been adopted. Industry representatives have stated to my office that there are no industrywide statistics on abortion, but added that abortion as a procedure effecting insurance premiums is "insignificant."

Also, insurance industry representatives were unable to predict that precluding abortions would result in a lowering of premiums to employers; they were not able to speculate as to what percentage of the average health plan premium would be applied for abortion services. Again, they did say it would be insignificant.

MOST LIKELY RESULT OF THE ANTIABORTION AMENDMENT; NO CHANGE IN PREMIUMS AND A LOSS OF COVERAGE

As a result of the adoption of this amendment, we may find ourselves in a situation where there is no change in the employer's contribution for health benefits, but benefits which are earned by women and which they currently have would be eliminated.

RELIGIOUS INSTITUTIONS ARE PROTECTED

The other major concern of many members of the committee is whether religious institutions would be forced to provide abortion coverage by virtue of this legislation. They would not. Senator Jacob Javits, in his presentation before the Senate, stated that it was not the intention nor design of the sponsors of this legislation to interfere with the first amendment rights of a church which has a religious tenet respecting abortion; the church's position, according to Senator Javits, is protected under the first amendment.

Also, as we know, section 702 of the Civil Rights Act, allows religious institutions to hire solely members of their own faith. It is doubtful that an employee-member of a church which prohibits abortions would seek abortion coverage from the church. Indeed, there has never been a court case concerning failure to cover abortions by either a secular or religious institution.

STATES HAVE PROMOTED SIMILAR LEGISLATION WITHOUT EXCLUSIONS

The States have taken an active role concerning pregnancy disability legislation. Half

the States now interpret their fair employment practices legislation to prohibit sex discrimination on the basis of pregnancy and child birth. Connecticut and Minnesota have recently adopted legislation based on the unamended version of H.R. 6075. Not one State has anti-abortion language in its laws concerning pregnancy disability and in not one State is there legislative activity to include such a ban.

SUPPORT FOR AN UNAMENDED BILL COMES FROM BOTH SIDES OF THE ABORTION DISCUSSION

The very nature of this bill—unamended—is to help women carry their pregnancies to term. In its original form, the legislation was supported by a diverse coalition of pro-life, labor, and women's organizations. Many of these groups believe that an abortion provision is unnecessary in this legislation.

During the June 29, 1977, hearing which the Subcommittee on Employment Opportunities conducted, Dr. Dorothy Czarnecki, a representative of the American Citizens Concerned for Life, of Philadelphia, Pa., responded in the following manner when I asked her if this legislation, H.R. 6075, increases the likelihood of abortion:

Dr. CZARNECKI. This legislation would save babies in my opinion. It would encourage a woman to keep a pregnancy or do what she wants. It gives the woman a choice.

In further questioning, I asked:

In the event a female employee decides to abort a pregnancy, do you think that the employee should be denied medical coverage and disability from complications resulting from the medical procedure?

Dr. CZARNECKI. I feel we should treat this as a condition, period.

The list of supporters for this legislation without an abortion amendment is endless; it includes many groups with whom all of us work regularly:

AFL–CIO, AFSCME, Leadership Conference on Civil Rights, NEA, League of Women Voters, and United Auto Workers.

United Steel Workers, International Ladies Garment Workers Union, Coalition of Labor Union Women, and American Association of University Women.

ONE GROUP, ALONE, LOBBIED FOR THE AMENDMENT

The only group which actively came forward to promote the antiabortion provision was the United States Catholic Conference, the conference of bishops, and never at a public hearing. In fact, there is not a single word of testimony on the record supporting the antiabortion amendment in this bill.

PREGNANCY DISABILITY COVERAGE FACES AN UNCERTAIN FUTURE AS A RESULT OF THE ANTI-ABORTION LANGUAGE: WOMEN WILL SUFFER

During the course of the 95th Congress, the Members of Congress have had 11 opportunities to make their position known on the issue of Federal funding of abortion; unlike the Hyde amendment, this legislation, unamended, does not involve public subsidization of abortion.

We are now faced with, the prospect that pregnancy disability legislation will not be enacted this year as a result of the fears of the members of this committee. The Senate has voted not to append an anti-abortion rider to their version of this legislation; our 5-month battle over the Hyde amendment with stalled the Labor-HEW appropriations will likely be repeated. As a result, women, whose rights we have sought to protect, will suffer.

Finally, the Members of Congress must realize that as a result of amending H.R. 6075 with an abortion prohibition, we must prepare ourselves for a legislative agenda which will require our voting on abortion at every turn. If this legislation, which can be considered nothing but "pro-life," must be amended by those who oppose abortion, no bill which comes before the House of Representatives can be insured of freedom from such an amendment.

The crowning irony is that the anti-abortion amendment not only undercuts the very purpose of this legislation but it would undercut as well the aim of the "pro-life" forces to encourage women to carry their pregnancies to term. The aim of the amendment's proponents has tragically misfired. The amendment is anti-employer, anti-labor, anti-woman, and anti-life. It is my sincere hope that in the final analysis, the anti-abortion rider to this legislation will not prevail.

TED WEISS.

LEGISLATION TO ESTABLISH NATIONAL OFFICE OF THE HANDICAPPED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Vermont (Mr. JEFFORDS) is recognized for 5 minutes.

● Mr. JEFFORDS. Mr. Speaker, today I am introducing a bill which will establish a National Office of the Handicapped. This will do the following:

First. Bring together the two major programs for the handicapped (Bureau for Education of the Handicapped and Rehabilitation Services Administration) in one National Office of the Handicapped.

Second. While this bill will bring these two agencies together it will not alter any of their programs.

Third. By bringing them together it will:

Bring focus on programs for the handicapped;

Facilitate coordination; and

Should eliminate overlapping and duplication.

Fourth. The only new item to be authorized would be a Federal Council on the Handicapped. The idea of it would be to have one national council overseeing all Federal efforts for the handicapped.

Fifth. This is one of the first recommendations from the White House Conference on the Handicapped and one which most organizations for the handicapped seem to feel is necessary and needed.●

AGRICULTURAL CONSERVATION PROGRAM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Montana (Mr. BAUCUS) is recognized for 10 minutes.

Mr. BAUCUS. Mr. Speaker, I would like to discuss the agricultural conservation program administered by the USDA. This year makes the 23d consecutive year the administration has recommended major cutbacks in the program.

In each of those years, Congress has voted to restore funding for this program, and I stand to urge my colleagues to do so again this year. The agricultural conservation program (ACP) is an essential part of this Nation's efforts to protect its soil and water resources.

ACP is administered by the Agricultural Stabilization and Conservation Service of the USDA. Under the program, the ASCS pays part of the costs of conservation practices farmers engage in. Examples of approved practices include wildlife food plots or habitat, wind erosion control operations, animal waste management practices to control pollution, contour farming, lime application, and others.

Farmers could not afford to engage in these conservation efforts without the financial assistance provided by the ACP. Clearly the Nation as a whole gains from these efforts to conserve our soil, water, and wildlife resources.

Mr. Speaker and fellow colleagues, in my travels around Montana, I am constantly reminded of the benefits the agricultural conservation program has provided since it was conceived in the Dust Bowl days of the 1930's.

With this Federal assistance, thousands of small ponds and lakes have been built around the State. These are generally constructed in the coulees and gullies that characterize our landscape. They capture water that otherwise would only cause erosion during the spring runoff and store it for use by livestock and wildlife throughout the year.

Those of you who have had the opportunity to visit the arid parts of Montana during midsummer know something of the appreciation our State has for these small oases.

The agricultural conservation program has been instrumental in helping farmers control wind erosion on the Great Plains. As you know, this region including the eastern part of Montana was severely damaged by a combination of wind and drought in the thirties.

We still have drought in Montana, and will still have wind. Average rainfall in our wheat-growing regions is only 14 inches; many years it is less than that. On the eastern slopes of the Rockies, steady winds of 20 to 40 miles per hour have been the norm this spring, and hurricane-force gusts have been recorded many places.

Thanks to the agricultural conservation program though, most of Montana's soil is staying where it belongs. With the help of ACP, farmers now use stubble-mulch farming practices whereby crop residues protect the soil from blowing. Millions of trees have been planted to provide windbreaks; in addition, these "shelter belts" are a haven for wildlife and birds.

Many of you come from parts of the country that are naturally woodland and may not appreciate the significance of planting trees. But in parts of Montana you can drive for hundreds of miles and the only trees you'll see are there because of the Agricultural Conservation Program.

I do not want to imply that the ACP's goals have been achieved. At the same time the USDA is proposing a huge cut in the program, their press releases show that this Nation's losses to wind erosion are still unacceptable. In addition, the program faces new challenges as this Nation steps up its efforts to improve water quality.

State and local ASCS committees are an integral part of the Agricultural Con-

servation Program. They determine what conservation practices deserve priority for their specific area. Thus, the program is adaptable to all regions of the country and to changing conservation needs over time. My rural colleagues can all tell you about past accomplishments and future challenges of the Agricultural Conservation Program in their districts.

As a member of the Agricultural Appropriations Subcommittee, I intend to work for restoration of the ACP budget. And I urge all of you to vote yes for this long-term investment in America's soil and water.

H.R. 12464: U.S. INVESTMENT AND SOUTH AFRICA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. SOLARZ) is recognized for 10 minutes.

● Mr. SOLARZ. Mr. Speaker, today I am introducing legislation designed to prohibit new American investments in South Africa and to regulate existing corporate investments by establishing a fair employment code of conduct. I hope that my coleagues will be able to join me in supporting a modest proposal that will put the United States on record in opposition to the oppressive apartheid system that exists in South Africa today.

The recent bannings by the South African Government and the death of Steve Biko in prison have led many Americans in and outside the Government to reevaluate the U.S. role in South Africa. In the absence of an abolition of apartheid and an eventual shift toward majority rule, South Africa will inevitably be shaken by a cataclysm that will not only rip that nation apart but could be disastrous for the United States as well. Accordingly, the United States has an enormous stake in facilitating a peaceful transition to an equitable power sharing arrangement in South Africa.

Unfortunately, the entire history of that state has shown that, in the absence of outside pressure, no constructive change can be expected. I hope this proposed legislation will prompt the government of South Africa to move toward abolishing the apartheid system. Although this bill clearly cannot guarantee that constructive changes will take place, I believe it is a necessary first step to demonstrate our resolve that the United States will not support the repressive system of apartheid and separate development.

My bill has two parts. First, it would prohibit all new investments in South Africa by any American corporation, although existing investments could continue as could investments from money earned from on-going investments within South Africa. Violations of this section could bring fines of up to $1 million for a corporation and a fine of $10,000 or imprisonment of up to 5 years for an individual. This provision would, at a minimum, insure that U.S. economic entanglements in South Africa do not increase.

The second part, similar to a joint resolution previously introduced by Africa Subcommittee Chairman CHARLES DIGGS, would prohibit U.S. corporations doing business in South Africa from engaging in unfair employment practices there. It would prohibit discrimination on the basis of race, religion, sex, or national origin for hiring, promotion, rates of pay, selection for training, and other areas of employment.

Corporations would be required to take affirmative action to end discrimination within American-owned enterprises, among other things, by applying the new guidelines to present employees and to potential applicants. The bill would also require employers to allow employees to organize and bargain collectively.

Penalties for violating the second part could include termination of export licenses, U.S. Government contracts, tax credits, and the services of the Export-Import Bank for transactions involving South Africa.

In urging your support for this measure, I would like to point out several features of this proposal that should help alleviate the concerns of some who would oppose action of this sort. First, this bill is a moderate proposal. Though it begins the process of limiting U.S. corporate involvement in South Africa, it does not require disinvestment nor prevent the orderly transaction of business by existing enterprises. Second, no part of this bill would violate South African law, so no U.S. corporation would be caught in the difficult dilemma of being ordered to do contradictory things by two governments.

If a corporation claimed that it was trapped in a conflict of laws, it could obtain a waiver of certain provisions, if it could demonstrate its claim to the satisfaction of the legislation's administrator.

Finally, this bill will have the support of many whites in South Africa who would like to abolish the apartheid system. In recent testimony before the International Relations Committee, Donald Woods hailed this proposal as a "significant" measure that would provide a "valuable psychological boost in morale" to black South Africans.

Mr. Speaker, I include the text of my bill, H.R. 12464, at this point in the RECORD:

H.R. 12464

(Mr. DIGGS, Mr. HARRINGTON, Mr. FRASER, Mr. ROSENTHAL, Mrs. COLLINS of Illinois, and Mr. PEASE)

A bill to amend the Export Administration Act of 1969 to prohibit any new investment in South Africa by United States persons and to impose sanctions on United States persons with existing investments in businesses in South Africa that engage in unfair employment practices

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Export Administration Act of 1969 (50 U.S.C. App. 2401 et seq.) is amended by inserting after section 4B the following new section:

"INVESTMENT IN SOUTH AFRICA

"4C. (a)(1) No United States person may make any investment in South Africa, other than an investment which consists solely of earnings derived from an existing enterprise of a United States person in South Africa and which is made in such enterprise.

"(2) The Secretary shall carry out the provisions of paragraph (1). In carrying out such provisions the Secretary shall—

"(A) issue such regulations as the Secretary considers necessary to implement the provisions of paragraph (1);

"(B) establish mechanisms to monitor compliance with the provisions of paragraph (1) and any regulations issued pursuant to subparagraph (A) of this paragraph;

"(C) in any case in which the Secretary has reason to believe that a violation of paragraph (1) has occurred or is about to occur, refer the matter to the Attorney General for appropriate action; and

"(D) in any case in which the Secretary has reason to believe that any person has furnished the Secretary with false information relating to the provisions of this subsection, recommend to the Attorney General that criminal proceedings be brought against such person.

"(3) The Secretary may, in carrying out the provisions of this subsection, conduct investigations, hold hearings, issue subpenas, administer oaths, examine witnesses, receive evidence, take depositions, and require by subpena the attendance and testimony of witnesses and production of all books, papers, and documents relating to any matter under investigation.

"(4) Any United States person that violates the provisions of paragraph (1) shall, upon conviction, be punished by a fine of not more than $1,000,000.

"(5) Whenever a United States person violates paragraph (1) of this subsection—

"(A) any officer, director, or employee of such United States person, or any natural person in control of such United States person, who knowingly and willfully ordered, authorized, acquiesced in, or carried out the act or practice constituting such violation; and

"(B) any agent of such United States person who knowingly and willfully carried out such act or practice, shall, upon conviction, be punished by a fine of not more than $10,000 or by imprisonment for not more than five years, or both.

"(6) Whenever a fine is imposed under paragraph (5) of this subsection upon any officer, director, employee, or agent of a United States person, or upon any natural person in control of such United States person, such fine shall not be paid, directly or indirectly, by such United States person.

"(b)(1) No United States person who, on the effective date of this section, has a major investment in an enterprise in South Africa—

"(A) may receive any export license under this Act with respect to any exports to be shipped directly or indirectly to South Africa;

"(B) may enter into any contract with any agency of the United States Government;

"(C) may receive credit, under section 901 of the Internal Revenue Code of 1954, for any income, war profits, or excess profits taxes paid or accrued to South Africa; or

"(D) may use the services of the Export-Import Bank of the United States with respect to transactions involving South Africa,

if such United States person or other person engages in an unfair employment practice in conducting such enterprise, or if such United States person is not listed on the roster established pursuant to paragraph (4) of this subsection. Such United States person shall be subject to any or all of the penalties set forth in this paragraph.

"(2) The President shall designate an appropriate head of a department or agency (hereinafter in this subsection referred to as the 'Administrator') to carry out the pro-

visions of this subsection. In carrying out such provisions the Administrator may—

"(A) establish mechanisms to monitor compliance with the provisions of this subsection and any regulations issued thereunder;

"(B) in any case in which the Administrator has reason to believe that any person has furnished the Administrator with false information, relating to the provisions of this subsection, recommend to the Attorney General that criminal proceedings be brought against such person;

"(C) make reasonable efforts within a reasonable period of time to secure compliance with the provisions of this subsection by means of conference, conciliation, mediation, and persuasion before proceedings are begun under paragraph (5) of this subsection; and

"(D) conduct investigations, hold hearings, issue subpenas, administer oaths, examine witnesses, receive evidence, take depositions and require by subpena the attendance and testimony of witnesses and production of all books, papers, and documents relating to any matter under investigation.

The Administrator shall issue regulations implementing the provisions of this subsection.

"(3) Each Federal agency shall cooperate with the Administrator in carrying out the provisions of this subsection, including, upon the request of the Administrator, taking steps to insure compliance with the provisions of this subsection and any regulations issued thereunder, and investigating unfair employment practices.

"(4)(A) Each United States person having a major investment in an enterprise in South Africa shall so notify the Administrator, in such form and manner as the Administrator may by regulation prescribe.

"(B) The Administrator shall, after giving notice and an opportunity for a hearing to each such United States person, review the employment practices of the enterprise.

"(C) The Administrator shall, on the basis of such review, issue an order establishing a roster of all such United States persons complying with the provisions of this subsection.

"(D) The Administrator shall notify the Secretary, Secretary of Treasury, Secretary of Labor, and the President of the Export-Import Bank of the United States, of all United States persons included on the roster established pursuant to subparagraph (C) and of any United States person having a major investment in an enterprise in South Africa who is not included on such roster. The Secretary, Secretary of the Treasury, Secretary of Labor, and the President of the Export-Import Bank of the United States shall enforce the provisions of this subsection in accordance with such roster.

"(E) The Administrator shall, at least once in every 2-year period, review the eligibility of each such United States person for inclusion on the roster established pursuant to subparagraph (C).

"(F) Any United States person aggrieved by an order of the Administrator issued pursuant to this paragraph may seek judicial review thereof in accordance with the provisions of chapter 7 of title 5, United States Code.

"(5)(A) Whenever it is charged by any person under oath, in a written statement setting forth the facts upon which it is based, that an unfair employment practice referred to in paragraph (1) of this subsection is being engaged in, the Administrator shall furnish a copy of such charge to the United States person or persons with a major investment in the enterprise concerned and shall conduct an investigation of such charge.

"(B) If on the basis of such investigation the Administrator determines that the charge is nonfrivolous, the Administrator shall hold a hearing, as speedily as possible, with respect to such charge. Interested persons may file memorandums in support of or in opposition to such charge.

"(C) If the Administrator finds, on the basis of evidence produced at such hearing, that the unfair employment practice is being engaged in, the Administrator shall issue an order stating such finding and recommending that appropriate action be taken, in accordance with paragraph (1) of this subsection—

"(i) by the Secretary, with respect to export licenses.

"(ii) by the Secretary of Labor, with respect to Government contracts,

"(iii) by the Secretary of the Treasury, with respect to tax credits, and

"(iv) by the President of the Export-Import Bank of the United States, with respect to transactions with the Export-Import Bank,

each of whom the Administrator shall notify of such order. In addition to any of the penalties set forth in paragraph (1) of this subsection, the recommendations of the Administrator may include cancellation, termination, or suspension of any existing export license, contract with a Federal agency, or transaction with the Export-Import Bank. The Secretary, the Secretary of Labor, Secretary of the Treasury, and President of the Export-Import Bank, as the case may be, shall enforce any order of the Administrator.

"(D) Any action imposed under subparagraph (C) with respect to tax credits shall first apply with respect to the taxable year in which the finding of a violation is made. Any sanction imposed under subparagraph (C) shall be effective until such time as the Administrator determines, on the basis of evidence produced by the United States person or persons with respect to whom an unfair employment practice referred to in paragraph (1) of this subsection was found, that no such unfair employment practice is being engaged in. The Administrator shall give each such United States person an opportunity to present such evidence at a hearing before the Administrator.

"(6) In any case in which the Administrator determines that compliance by a United States person with the provisions of paragraph (1) of this subsection would violate any law of South Africa enacted before the date of the enactment of this subsection, the Administrator may waive the provisions of such paragraph with respect to such United States person. The Administrator shall submit an annual report to the Congress setting forth the circumstances concerning each waiver granted under this paragraph. The Administrator shall review each waiver granted under this paragraph at least once each year and may terminate any such waiver at any time if the circumstances resulting in the waiver have altered such that the waiver is no longer warranted.

"(7) In any case in which the President determines that compliance by a United States person with the provisions of paragraph (1) of this subsection would harm the national security of the United States, the President may waive such provisions with respect to such United States person. The President shall report to the Congress concerning the circumstances involving each waiver granted under this paragraph. Any such waiver shall become effective 60 days after the date on which the report concerning the waiver is submitted to the Congress unless both Houses of Congress, within such 60-day period, adopt a concurrent resolution disapproving the waiver.

"(8) The Administrator may secure directly from any department or agency of the United States information necessary to enable the Administrator to carry out the provisions of this subsection.

"(9)(A) The President shall appoint an Advisory Board the function of which shall be to recommend policy to the Administrator with respect to the exercise of the authority of the Administrator under this subsection.

"(B) The Advisory Board shall be composed of 11 members as follows:

"(i) The Administrator, who shall serve ex officio

"(ii) Ten members appointed by the President as follows:

"(I) One member from the field of education.

"(II) One member from the field of labor.

"(III) One member from among representatives of civil rights organizations.

"(IV) One member from the field of business.

"(V) One member representing religious groups.

"(VI) One member from the Department of Commerce.

"(VII) One member from the Department of State.

"(VIII) One member from the Equal Employment Opportunity Commission.

"(IX) Two members representing the public interest.

"(C) The President shall designate a Chairman from among the members of the Advisory Board.

"(D) A vacancy in the membership of the Advisory Board shall be filled in the same manner in which the original appointment was made.

"(E) Members of the Advisory Board appointed by the President shall be appointed for terms of three years; except that of the members first appointed, three shall be appointed for terms of one year, and three shall be appointed for terms of two years, as designated by the President at the time of the appointment. Any member appointed to fill a vacancy occurring before the expiration of the term for which the predecessor of such member was appointed shall be appointed only for the remainder of such term.

"(F) The Administrator shall provide necessary secretarial and staff assistance for the Advisory Board.

"(G) Members of the Advisory Board shall serve without pay, except that, while away from their homes or regular places of business in the performance of services for the Board, members of the Board shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703 of title 5, United States Code.

"(10) As used in this subsection—

"(A) the term 'unfair employment practice' means—

"(i) any act of discrimination on the basis of race, color, religion, sex, or national origin which is prohibited by sections 703 and 704 of the Civil Rights Act of 1964;

"(ii) any failure to take affirmative action to the same extent as is required of a Government contractor under Part II of Executive Order 11246 (dated September 24, 1965); and

"(iii) refusal to allow employees to organize, bargain collectively through representatives of their own choosing, and to engage in other concerted activities for the purpose of collective bargaining or other mutual aid or protection;

"(B) the term 'South Africa' includes the 'Republic of South Africa' and any territory under the administration, legal or illegal, of South Africa, including the 'bantustans' or 'homelands' to which South African blacks are assigned on the basis of ethnic origin;

"(C) the term 'investment' includes a loan made by a public or private banking institution; and

"(D) the term 'major investment' includes any investment that (i) consists of more than 50 per cent of the aggregate investment in the enterprise concerned, (ii) enables the investor to control the enterprise, or (iii) effects ownership or control of the enterprise

by the investor and one or more United States persons."

SEC. 2. The President may waive the provisions of section 4C of the Export Administration Act, as added by the first section of this Act, for periods of not more than one year each, if the President determines that the government of South Africa has made substantial progress toward the elimination of unfair employment practices, as defined in subsection (b) (8) (A) of such section, toward the full participation of all the people of South Africa in the social, political, and economic life in that country, and toward an end to discrimination based on race or ethnic origin. The President shall submit such determination, and the basis therefor, to the Congress. Each such waiver shall take effect 90 days after the date on which such determination is submitted to the Congress unless both Houses of Congress adopt a resolution disapproving such determination.

SEC. 3. It is the sense of the Congress that the President should cooperate with other countries in initiating steps to facilitate fair employment practices in South Africa, including those steps taken by countries in the European Economic Community.

SEC. 4. (a) The amendments made by the first section of this Act shall take effect at the end of the 1-year period beginning on the date of the enacement of this Act.

(b) Regulations implementing the provisions of section 4C(b) of the Export Administration Act, as added by the first section of this Act, shall be issued not more than six months after the date of the enactment of this Act.●

THE 1978 DANTE AWARD GOES TO DANIEL T. PECARO

The SPEAKER pro tempore. Under a previous order of the House the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, I congratulate Mr. Daniel T. Pecaro, who will receive the Seventh Annual Dante Award of the Joint Civic Committee of Italian Americans on May 19 at a luncheon in his honor at the Como Inn of Chicago.

Dan Pecaro is the president and chief executive officer of the WGN Continental Broadcasting Co. He also serves as president of the company's Colorado and Productions subsidiaries, as well as a director of WGN Continental Broadcasting Co. and all of its subsidiaries.

The Dante Award was established by the Joint Civic Committee of Italian Americans, an umbrella organization comprised of more than 40 civic organizations in the Chicago area, to extend recognition annually to an individual in the mass media communications field who has made a positive contribution toward fostering good human relations.

Mr. Speaker, I have known Dan Pecaro for many years and he has always been dedicated and devoted to his family and to his community. He loves people, has been responsible for many program innovations on WGN radio and TV, and he has a long and solid record of creative achievement in broadcasting. It is for these reasons that he so richly deserves the Dante Award, for it was Dante Alighieri, in his "Divine Comedy," who said, "Men should never be timid about the truth."

He was born and educated in Chicago, attending Carl Schurz High and DePaul University, where he received his degree in education. He enlisted in the Navy and served in the South Pacific during World War II, and after his discharge, he returned to Chicago where he taught public school and coached sports for 5 years. In 1955, he accepted a position with WGN as a radio producer-director-writer after having worked part time at WGN radio as a night member of the traffic department.

According to WGN Continental Broadcasting Co., through the years Daniel T. Pecaro:

Has been responsible for many program innovations on WGN Radio and WGN Television and has contributed immeasurably to the success and recognition the company enjoys today.

Promoted to production supervisor in 1957, his creativity earned him another promotion, Assistant Program Manager, in 1958. Two years later, he was named Program Manager for the radio station and conceived many of the fine programs still on WGN today.

Named program manager in 1962 at WGN–TV and manager for all WGN's stations in 1965, Dan Pecaro was elected vice president in 1966, and WGN–TV's general manager in 1967. His rise to the top continued in 1968 with his election to the board of directors, and in 1972 he became the executive vice president and general manager. In 1975, he was elected to his present position.

WGN also states:

In April of 1979, Mr. Pecaro will have completed his 25th year in broadcasting—all at WGN Continental Broadcasting Company. During his rise through the program ranks, he has written, produced and directed radio programs, handled countless remote broadcasts, musical variety shows, sports events, presidential conventions and numerous elections.

While he was program manager for WGN Television he developed several program concepts which shaped the future course of that station and which were subsequently duplicated by other major broadcasters throughout the country. The station also produced several award winning live series that were syndicated across the land and in foreign countries. These included An Evening With . . .," "Big Bands," and several documentaries. In the period 1962 through 1967, under his leadership, the station's programs won 27 Emmy Awards.

Mr. Pecaro is now completing his second term on the television board of directors of the National Association of Broadcasters, one of 15 persons elected from the entire television industry, and recently was elected to a 3-year term on the Chicago Boys Club board of directors. He is also a member of the board of directors of the Illinois State Chamber of Commerce, the Executive Club, and the International Radio and Television Society, and of the Economic Club as well.

Dan Pecaro married the former Nancy Jean Mihills, and they live in Chicago with their two sons, Dan, born in 1955, and Tim, born in 1956.

Mr. Speaker, Mrs. Annunzio and I congratulate Dan Pecaro, his wife, and his children, for the strong and constructive impact he has made on our community. His career, his character, and his record confirm that he is indeed a "friend to truth," and we are proud to have him as one of our friends.●

A CALL FOR INTERNATIONAL STANDARDS ON ENVIRONMENTAL, WORKPLACE SAFETY PROTECTION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. REUSS) is recognized for 5 minutes.

● Mr. REUSS. Mr. Speaker, I am today introducing House Concurrent Resolution 591, a resolution calling on U.S. trade negotiators to work toward international standards for environmental protection and the safety and health of workers.

The purpose of such negotiations would be to end or minimize the competitive trade advantage other countries may gain, through lower costs of production, if they do not have environmental and worker protection standards comparable to ours.

Because the United States has taken the lead in establishing such standards, there are now often great disparities between the United States and many other nations. Every effort should be made to equalize as much as possible these factors which can be a major cost of production.

For instance, the Occupational Safety and Health Administration (OSHA) has proposed standards for control of cotton dust, which causes brown lung disease, in spinning mills. Implementation of the standards is estimated to cost the yarn industry $984 million, adding as much as 6 cents in cost per dollar of sales for cotton yarn. India, a major textile competitor, has no such worker protection requirement.

Similarly, it is estimated that imposing noise limits of 90 decibels for 22 industries such as primary metals fabrication would cost $10.5 billion, or $185 per worker. As another example, the Commerce Department estimated—in 1975—that environmental controls for production of copper, which currently sells for 64 cents a pound, cost the United States 6.6 cents per pound, Canada 2.7 cents, and Peru and Chile only 1.4 cents.

Harmonizing standards for environmental protection and worker health and safety would help head off protectionist moves. It would also improve the U.S. balance-of-trade position and strengthen the dollar by making our goods more competitive.

Moreover, seeking to harmonize standards among trade competitors would be a better approach than weakening our own standards, as some interests would like. The Trade Act of 1974, which authorized the current round of GATT negotiations, calls for negotiation toward more uniform fair labor standards. It does not define such standards, however, and negotiations would not necessarily include standards for the environment or health and safety in the workplace unless specifically called for.

I wish to express my thanks to Carolyn Shaw Bell of Wellesley College for calling this problem and a potential solution to my attention.

Last Wednesday I addressed a letter to President Carter stating my belief that he has ample authority to initiate such negotiations now, and asking him to instruct Special Representative for Trade Negotiations Robert Strauss to include discussion of these issues in the current trade talks.

The letter and the concurrent resolution follow:

WASHINGTON, D.C., *April 25, 1978.*

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: United States environmental and workplace standards are making it increasingly difficult for U.S. manufacturers to compete with foreign manufacwho are not required to meet comparable standards. Our balance of trade and the international strength of the dollar are adversely affected by these trade advantages. The workers and communities we have sought to protect from workplace hazards and pollution are instead faced with loss of jobs and industry.

As you know, there is increasing pressure to repeal or weaken these standards. Far more beneficial, I believe, would be an intensive effort, led by the United States' Special Reprepresentative for Trade Negotiations, to persuade our trading partners to adopt environmental and workplace standards comparable to our own. To this end, I am introducing a resolution which expresses the sense of the Congress that you should include environmental and safety and health standards among the international fair labor standards whose adoption is sought under section 121 (a)(4) of the Trade Act of 1974.

In the interim, I believe you have ample authority to initiate negotiations on this issue in the appropriate bilateral and multilateral forums, and should so instruct our Special Representative for Trade Negotiations. I am sure you will agree that trade advantages should not be acquired at the expense of the environment and worker safety, and the lowering of trade barriers should not penalize nations that have required their industries to adhere to progressive standards for pollution and worker safety.

Sincerely,

HENRY S. REUSS,
Member of Congress.

H. CON. RES. 591

Whereas, to the extent that the costs of preventing environmental pollution and protecting the safety and health of production workers are borne by producers, such costs must be recovered through increased product prices; and

Whereas, differing national standards with respect to environmental pollution and occupational safety and health may operate to the trade disadvantage of nations which adopt responsible and humanitarian policies in these areas; and

Whereas, section 121(a)(4) of the Trade Act of 1974 (19 U.S.C. § 2131(a)(4)) requires the President to take such action as may be necessary to bring trade agreements into conformity with principles promoting the development of an open, nondiscriminatory, and fair world economic system, including the adoption of international fair labor standards; Now, therefore, be it:

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that in carrying out his duties under section 121 of the Trade Act of 1974 (19 U.S.C. § 2131), the President should seek to bring about the adoption and application of trade agreements in such manner and form as to include environmental and safety and health standards among the international fair labor standards to be adopted.●

LEGISLATION AMENDING INTERNAL REVENUE CODE TO IMPROVE OPERATION AND ADMINISTRATION OF TAX LAWS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Louisiana (Mr. WAGGONNER) is recognized for 5 minutes.

● Mr. WAGGONNER. Mr. Speaker, today I am introducing a bill containing several technical changes to the Internal Revenue Code in order to improve the operation and administration of our tax laws.

The bill was prepared by the staff pursuant to my instruction to review recommendations submitted by the Treasury Department, the American Bar Association, the American Institute of Certified Public Accountants and various other groups, including State and local bar and accounting associations. This is the second bill introduced based on the recommendations of these groups. An earlier bill, H.R. 7320, was passed by the House on November 1, 1977, and has been reported favorably by the Senate Finance Committee.

This bill provides for: First, the extension of time for the payment of dividends to reduce the amount subject to personal holding company tax by certain companies when they are classified as personal holding companies for the first time; second, the extension of the filing period for agreements which are necessary to qualify redemptions in complete termination of a shareholder's interest for capital gains treatment; third, the eligibility of bankrupt estates as a shareholders in a subchapter S corporation; fourth, the payment of interest to a person whose property is wrongfully seized by the Internal Revenue Service; fifth, the elimination of an exempt organization reporting requirement for certain transfers of property, and the elimination of certain overlapping private foundation reporting; and sixth. the treatment of members of a decedent's family as a single shareholder or partner for purposes of qualifying for extensions of time for the payment of estate tax attributable to a closely held business.●

WHAT SHOULD U.S. POLICY BE TOWARD SAUDI ARABIA?

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. LEHMAN) is recognized for 10 minutes.

● Mr. LEHMAN. Mr. Speaker, at the heart of the controversy over the administration's proposed Mideast arms sales package are attempts by the administration to reach out to those Arab nations which appear to be interested in friendship with the United States.

We have already done much to reach out to Saudi Arabia. When the Saudis imposed their oil embargo on the United States in 1973, we preferred to suffer the inconvenience of hours-long lines at the gas stations rather than see our Nation take military action to seize the oil fields of the Arabian peninsula.

As a result of the increase in the price of oil which followed the embargo, we have, again quietly, witnessed the transfer of hundreds of billions of dollars of our Nation's wealth into Saudi hands.

Today, tens of thousands of Americans are working in Saudi Arabia to help transform that country into a technologically modern state.

Yet we choose to ignore that Saudi Arabia is one of the few remaining absolute monarchies in the world. They have no legislature and show little regard for basic human rights.

Many Americans have told me they believe our Nation is following the dictates of the Saudis out of fear of more price increases or even another break in the flow of oil.

Whatever policy we take toward Saudi Arabia, we would be well advised to remember our Nation's struggles in the early 1800's in that region with the Barbary pirates. In 1815, a U.S. naval fleet under Stephen Decatur ended the Barbary states' imposition of tribute on American merchant vessels. The American people and James Madison, our fourth President, would not tolerate this violation of American freedom and independence. Let us formulate our policy toward Saudi Arabia in that same spirit of American independence.

On the question of the transfer of advanced U.S. weapons, let us tell the Saudis we will not give them the world's best warplane, the F–15, as long as they remain hostile toward our longstanding ally, Israel.

If the Saudis are that concerned about their security and need our F–15's that badly to defend against legitimate threats from Iraq, South Yemen, or Ethiopia, they should agree to sit down right now, face to face, with the Israelis, who are no threat to them, as Egyptian President Sadat has done. Saudi Arabia should then establish normal diplomatic and economic relations as part of a true peace with Israel, a peace which Egypt, hopefully, will also soon conclude with Israel.

Peace must come first, before the transfer of modern U.S. weapons to Arab States hostile to Israel.●

THE ECONOMIC IMPACT OF GOVERNMENT REGULATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia (Mr. LEVITAS) is recognized for 5 minutes.

● Mr. LEVITAS. Mr. Speaker, some 200 years ago the English political leader Edmund Burke, spoke out for a "manly, moral, regulated liberty." If Edmund Burke were here today, I think he would be dismayed at how literally his words were taken. Liberty, particularly in the marketplace, has become so regulated it has become a scarce commodity itself. What is even more disturbing is the cost this "regulated liberty" has imposed on

society so that its actual benefits are being called into question.

The evidence is overwhelming that Government regulations have a significant economic impact upon those persons and businesses required to comply. In a study conducted by the Center for the Study of American Business at Washington University in St. Louis, the total cost of complying with Government regulations in fiscal year 1977 was $79.1 billion. And, the price tag is rising. It is estimated that the aggregate cost of Government regulations in fiscal year 1979 will be a staggering $102.7 billion, consisting of $4.8 billion in direct expenses by regulatory agencies and $97.6 billion in costs of compliance on the part of the private sector.

It is the consumer, though, who ultimately bears the cost of Government regulations. Reducing the cost of compliance is not just a business concern, but it is important to consumers as well. For example, according to figures compiled by the center at Washington University, the price of a new house goes up from $1,500 to $2,500, because of Federal, State, and local regulations imposed on developers.

There is clearly a need to establish the economic impact of Government regulations before they go into effect. Congress and the public need to know the cost/benefit comparison of new Government regulations. Yet, there is no statutory requirement for a systematic analysis of whether the benefits to be received from a proposed rule would exceed any negative economic impact.

At the end of the last session, I introduced a bill, H.R. 12057, which would amend the Administrative Procedures Act to require the preparation and development of economic impact analyses for all rules and regulations required to be published in the Federal Register. My bill requires a detailed analysis that would address the cost/benefit impact of regulations on consumers, businesses, markets, and Federal, State, and local governments. It would deal with the estimated cost of implementing, monitoring, and enforcing the rule by the agency, the effect of the rule on employment, and the fiscal effects of any predicted increase in unemployment if the analysis so indicates, the effect of the rule on competition and on supplies of important products and services, and the effect of the rule on productivity of wage earners, businesses, and Government. It would also require the alternatives that were considered by the agency to the proposed rule, to be published along with a finding as to why the alternatives were not proposed.

Economic indicators are pointing in the direction that the economy is moving into a phase of acute inflationary pressures. It is imperative that we stem this tide before it swells. One of the significant steps we can take to decrease inflationary pressures is to lessen the costs imposed by Government regulations.

As you know, President Carter in the inflation message he delivered 2 weeks ago stated:

I am determined to eliminate unnecessary regulations and to insure that future regulations do not impose unnecessary costs on the American economy.

We can help the President accomplish this by making regulatory economic impact analyses part of the statutory requirements for promulgating regulations. This would insure that the analyses are accomplished and available to Congress and the public, as well as insure that future administrations would not be able to change this policy.

Mr. Speaker, I am reintroducing my bill today with additional cosponsors. The bill has strong bipartisan support with members of all political philosophies. To date, 64 of our colleagues have joined me in cosponsoring this legislation which will improve the public's confidence in Government, because it makes that Government better. I hope that we can move ahead with this proposal.

The list of cosponsors follows:

Andrews of North Dakota, Ashley, Baucus, Bedell, Benjamin, Bevill, Blanchard, Brinkley, Brown of Ohio, Burgener, Butler, Carr, Cederberg, Chappell, Cochran of Mississippi, Corcoran of Illinois, Cohen, D'Amours, Derwinski, Dornan, Edgar, Edwards of Oklahoma, Evans of Georgia, Fenwick, Flynt, Ford of Michigan, Forsythe, Frenzel, Grassley, Guyer, Hamilton, and Hannaford.

Harrington, Hughes, Jacobs, Kemp, Ketchum, Lent, Lloyd of Tennessee, Lott, Mathis, McCloskey, Meyner, Moore, Mottl, Neal, O'Brien, Ottinger, Patterson of California, Rinaldo, Russo, Santini, Sharp, Spellman, Stump, Traxler, Treen, Trible, Walgren, Walker, Charles H. Wilson of Texas, White, Whitehurst, and Young of Missouri.●

HOUSE COMPUTER CAPACITY INCREASED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. THOMPSON) is recognized for 5 minutes.

● Mr. THOMPSON. Mr. Speaker, the Committee on House Administration today issued a purchase order to the Amdahl Corp. for additional computer equipment for the U.S. House of Representatives. This award was made as a result of a thorough and definitive evaluation of proposals submitted by three computer manufacturers and two third-party computer leasing companies.

Under its funding resolution for 1978 (H. Res. 977) the House Information Systems was authorized to increase computer capacity to improve the reliability of information retrieval and computational services that it presently provides to increase the scope of those services, and to make them available to more Members and committees.

In this regard, the House Information Systems of this committee prepared a request for quotations and then reviewed the companies' submissions against detailed evaluation criteria which had been set forth in the request for quotations. The solicitation was necessarily limited to that equipment which could meet the service needs of the House in a very short time. The selection of Amdahl was based both on the detailed technical evaluation and an analysis of costs. It is our expectation that this equipment will provide the additional computer capacity needed for more productive and efficient information system support to committees, Members, and offices of the House and its supporting institutions.●

PROJECTS APPROVED FOR CONSTRUCTION, LEASE, ALTERATION OR REPAIR BY HOUSE COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION

The SPEAKER laid before the House the following communication from the Committee on Public Works and Transportation, which was read and referred to the Committee on Appropriations:

COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION,
Washington, D.C., April 28, 1978.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the House, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the Public Buildings Act of 1959, as amended, the House Committee on Public Works and Transportation approved for construction, lease, alteration or repair the following projects on April 25, 1978:

Leases: Arlington, Virginia—Crystal Plaza No. 34; Washington, D.C.—1405 Eye Street, N.W., San Francisco, California—211 Main Street.

11(b) Resolutions: Omaha, Nebraska.

Alterations: Laguna Niguel, Orange County, California; Arlington, Virginia—The Pentagon; Kansas City, Missouri—Federal Building at 1500 East Bannister Road; Arlington, Virginia—Federal Building No. 2; Hartford, Connecticut—Federal Building-Post Office; Washington, D.C.—Agriculture South; Seattle, Washington—Federal Center South; Washington, D.C.—Federal Trade Commission; Lexington, Kentucky—Post Office-Courthouse; Washington, D.C.—Federal Building No. 6; Washington, D.C.—H.E.W. North; Washington, D.C.—Mary Switzer Building; Washington, D.C.—Lafayette Building; Washington, D.C.—Forrestal Building.

The original and one copy of the authorizing resolution are enclosed.

Sincerely,
HAROLD T. (BIZZ) JOHNSON,
Chairman.

DISAPPROVAL OF EXPORT OF NUCLEAR FUEL TO INDIA

(Mr. OTTINGER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. OTTINGER. Mr. Speaker, today I and my good friend and colleague CLARENCE LONG are introducing a resolution of disapproval of the President's Executive order relating to the export of nuclear fuel to India.

More than 2 years ago, Mr. LONG and I were joined by 48 other House Members in sending a letter to the Nuclear Regulatory Commission urging full-scale proceedings on the Tarapur export. We remain concerned that insufficient evidence has been provided to justify this export at this time.

In short India has not signed the Non-Proliferation Treaty, refuses to place all her nuclear facilities under international inspection or safeguards, refuses to say that after the use of the nuclear fuel to be shipped it will not be recycled into weapons grade plutonium, and agrees to place only the fuel—and not the Tarapur reactor—under safeguards. Further, the safeguards to which India has agreed ap-

pear to apply only so long as the United States supplies fuel to the Tarapur reactor; this smacks of blackmail.

Congressman LONG and I are not desirous of insulting the government of India, but we feel strongly that section 304, providing for congressional review of any Executive order providing for export—particularly in the case of a nation not complying with all safeguards and inspection requirements—needs to be enforced, forthrightly, as a signal to all other would-be importers of enriched uranium that we are serious about proliferation problems.

Under the Nonproliferation Act, the International and Foreign Relations Committees have 45 legislative days to consider a resolution of disapproval; following that, if those committees do not report favorably, we have the option of offering a privileged motion on the floor.

We hope other Members will join in cosponsoring this resolution of disapproval.

H. CON. RES. 599

Concurrent Resolution Disapproving the Proposed Export of Low-Enriched Uranium to India

Resolved by the House of Representatives (the Senate concurring), That the Congress does not favor the proposed export of low-enriched uranium to India which would be authorized by the Executive order transmitted to the Congress by the President on April 27, 1978.●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. RODINO (at the request of Mr. WRIGHT) for April 27 and May 1, on account of illness in the family.

Mr. FOUNTAIN (at the request of Mr. WRIGHT), for today, on account of official business.

Ms. HOLTZMAN (at the request of Mr. WRIGHT) for April 24, on account of illness.

Mr. JONES of North Carolina (at the request of Mr. WRIGHT), for May 1 and 2, on account of official business.

Mr. STUMP, for Monday, May 1, 1978, on account of official business.

Mr. WHITLEY (at the request of Mr. WRIGHT) for this week, on account of medical reasons.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. CUNNINGHAM) to revise and extend their remarks and include extraneous material:)

Mr. MICHEL, for 15 minutes, today.
Mr. KEMP, for 10 minutes, today.
Mr. GREEN, for 10 minutes, today.
Mr. JEFFORDS, for 5 minutes, today.

(The following Members (at the request of Mr. BONIOR) to revise and extend their remarks and include extraneous material:)

Mr. PEPPER, for 60 minutes, today.
Mr. BAUCUS, for 10 minutes, today.
Mr. SOLARZ, for 10 minutes, today.
Mr. GONZALEZ, for 5 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. REUSS, for 5 minutes, today.
Mr. WAGGONNER, for 5 minutes, today.
Mr. LEHMAN, for 10 minutes, today.
Mr. LEVITAS, for 5 minutes, today.
Mr. THOMPSON, for 5 minutes, today.
Mr. OTTINGER, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. CUNNINGHAM) and to include extraneous matter:)

Mr. HILLIS.
Mr. GUYER.
Mr. CRANE.
Mr. MICHEL in two instances.
Mr. GILMAN in two instances.
Mr. KINDNESS.
Mr. EDWARDS of Oklahoma.
Mr. KEMP.
Mr. SYMMS in two instances.
Mr. COLLINS of Texas in two instances.
Mr. HAGEDORN.
Mr. WALSH.
Mr. YOUNG of Florida.
Mr. MCCLOSKEY.
Mr. FINDLEY in two instances.
Mr. LAGOMARSINO.

(The following Members (at the request of Mr. BONIOR) and to include extraneous material:)

Ms. MUKULSKI.
Mr. MOFFETT.
Mr. BINGHAM in 10 instances.
Mr. DODD.
Mr. HOLLAND in five instances.
Mr. BAUCUS.
Mr. FISHER in 11 instances.
Mr. FRASER.
Mr. LEHMAN in two instances.
Mr. DAVIS.
Mr. MIKVA.
Mr. CLAY.
Mr. WAXMAN.
Mr. DANIELSON.
Mr. BYRON in 10 instances.
Mr. ROSENTHAL in 10 instances.
Mr. SISK.
Mrs. LLOYD of Tennessee in five instances.
Mr. ANNUNZIO in six instances.
Mr. GONZALEZ in three instances.
Mr. BROWN of California in 10 instances.
Mr. HAMILTON in 10 instances.
Mr. FASCELL in two instances.
Mr. RANGEL in 10 instances.
Mr. DRINAN.
Mr. RAHALL.
Mr. BRODHEAD in two instances.
Mr. BLANCHARD.
Mr. UDALL.
Mr. KOSTMAYER in two instances.
Mr. FOWLER.
Mr. CORRADA.
Mr. MITCHELL of Maryland.
Mr. ASPIN in 10 instances.
Mr. CARNEY.
Mr. MURTHA in two instances.
Mr. LEDERER in three instances.
Mr. OTTINGER.
Mr. PEPPER.
Mr. ULLMAN in two instances.
Mr. GEPHARDT.

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 1819. An act to establish alternatives to criminal prosecution for certain persons charged with offenses against the United States, and for other purposes; to the Committee on the Judiciary;

S. 2016. An act to establish fees for services performed by U.S. marshals; to the Committee on the Judiciary;

S. 2049. An act to establish fees and allow per diem and mileage expenses for witnesses before U.S. courts; to the Committee on the Judiciary;

S. 2078. An act to amend the Jury Selection and Service Act of 1968, as amended, to make the excuse of prospective jurors from Federal jury service on the grounds of distance from the place of holding court contingent upon a showing of hardship on an individual basis; to the Committee on the Judiciary;

S. 2074. An act to amend the Jury Selection and Service Act of 1968, as amended, with respect to the selection and qualification of jurors, and to extend to all jurors in the U.S. district courts the provisions of title 5, United States Code, applicable to Federal employee service-related injuries; to the Committee on the Judiciary and Education and Labor;

S. 2075. An act to amend the Jury Selection and Service Act of 1968, as amended, by revising the section on fees of jurors and by providing for a civil penalty and injunctive relief in the event of a discharge or threatened discharge of an employee by reason of such employee's Federal jury service; to the Committee on the Judiciary;

S. 2411. An act to amend chapter 315 of title 18, United States Code, to authorize payment of transportation expenses for persons released from custody pending their appearance to face criminal charges before that court, any division of that court, or any court of the United States in another Federal judicial district; to the Committee on the Judiciary;

S. 2616. An act to amend the Independent Safety Board Act of 1974, as amended, to authorize additional appropriations; to the Committee on Interstate of Foreign Commerce and the Committee on Public Works and Transportation; and

S. 2789. An act to provide authorization for appropriations for the Office of Rail Public Counsel, and for other purposes; to the Committee on Interstate and Foreign Commerce.

ADJOURNMENT

Mr. BONIER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 45 minutes p.m.) the House adjourned until tomorrow, Tuesday, May 2, 1978, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

4000. A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation to provide a voluntary self-help program which is designed to assist producers of agricultural products to protect themselves against loss of production when natural or uncontrollable conditions adversely affect production and which will assure consumers that producers will be able

to continue to produce food and fiber; to the Committee on Agriculture.

4001. A letter from the president, National Railroad Passenger Corporation, transmitting a request for an urgent supplemental appropriation for fiscal year 1978, pursuant to section 601(b) of the Rail Passenger Service Act of 1970, as amended; to the Committee on Appropriations.

4002. A letter from the Acting Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Air Forces' proposed sale of certain defense equipment and services to Israel (transmittal No. 78–34), pursuant to section 813 of Public Law 94–106, as amended; to the Committee on Armed Services.

4003. A letter from the Acting Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Air Force's proposed sale of certain defense equipment to Israel (transmittal No. 78–33), pursuant to section 813 of Public Law 94–106, as amended; to the Committee on Armed Services.

4004. A letter from the Acting Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Air Force's proposed sale of certain defense equipment and services to Egypt (transmittal No. 78–32), pursuant to section 813 of Public Law 94–106, as amended; to the Committee on Armed Services.

4005. A letter from the Acting Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Air Force's proposed sale of certain defense equipment and services to Saudi Arabia (transmittal No. 78–35), pursuant to section 813 of Public Law 94–106, as amended; to the Committee on Armed services.

4006. A letter from the Deputy Assistant Secretary of the Army (Manpower and Reserve Affairs, transmitting a draft of proposed legislation to amend section 2107 of title 10, United States Code, to remove the limitation on the number of cadets or midshipmen who may be appointed from the 2-year Senior Reserve Officers' Training Corps course; to the Committee on Armed Services.

4007. A letter from the Assistant Secretary of the Army (Manpower and Reserve Affairs), transmitting a draft of proposed legislation to amend section 4349(a) of title 10, United States Code, to provide that the companies of the Corps of Cadets at the U.S. Military Academy may be commanded by commissioned officers of the Army, Navy, Air Force, or Marine Corps; to the Committee on Armed Services.

4008. A letter from the Assistant Deputy Chief of Naval Material (Contracts and Business Management), transmitting the semiannual report covering the period October 1, 1977, through March 31, 1978, on Navy research and development procurement actions of $50,000 and over, pursuant to 10 U.S.C. 2357; to the Committee on Armed Services.

H.R. 12472. A bill to establish a Federal Insurance Commission to regulate the insurance industry; jointly, to the Committees on Banking, Finance and Urban Affairs, and Interstate and Foreign Commerce.

By Mr. LAFALCE (for himself, Mr. NEAL, Mr. MCKINNEY, and Mr. HOWARD):

H.R. 12473. A bill to amend the Internal Revenue Code of 1954 with respect to the tax treatment of small business investment companies electing to be taxed as regulated investment companies; to the Committee on Ways and Means.

Mr. LAFALCE (for himself, Mr. BLOUIN, and Mr. MOFFETT):

H.R. 12474. A bill to amend the Internal Revenue Code of 1954 to provide that trusts established for the payment of product liability claims and related expenses shall be exempt from income tax, that a deduction shall be allowed for contributions to such trusts, and for other purposes; to the Committee on Ways and Means.

By Mr. LAFALCE (for himself and Mr. JENRETTE):

H.R. 12475. A bill to encourage investment in small business concerns, and for other purposes; jointly, to the Committee on Education and Labor, Interstate and Foreign Commerce, Small Business, and Ways and Means.

By Mr. LEVITAS (for himself, Mr. BEVILL, Mr. BRINKLEY, Mr. OTTINGER, Mr. MOORE, Mr. RINALDO, Mr. YOUNG of Missouri, Mr. STUMP, Mr. LOTT, Mr. COHEN, Mr. WALGREN, Mr. HAMILTON, Mr. SHARP, Mr. D'AMOURS, Mr. O'BRIEN, Mr. TRIBLE, Mr. JACOBS, Mr. BUTLER, Mr. CHAPPELL, Mr. EDGAR, Mr. WALKER, Mr. MCCLOSKEY, Mr. FORD of Michigan, and Mr. TREEN):

H.R. 12476. A bill to amend the Administrative Procedure Act to require the performance and publication of economic impact analyses in the Federal Register for all proposed and final rules which are subject to the provisions of the act; to the Committee on The Judiciary.

By Mr. MOAKLEY:

H.R. 12477. A bill to improve rail freight transportation and the transportation of passengers by common carriers by motor vehicle; Jointly, to the Committees on Interstate and Foreign Commerce, Public Works and Transportation, and Education and Labor.

By Mr. BROWN of Michigan:

H.J. Res. 877. Joint resolution to authorize the President to proclaim the last Friday of April each year as "National Arbor Day"; to the Committee on Post Office and Civil Service.

By Mr. MARKS:

H.J. Res. 878. Joint Resolution disapproving proposed regulations of the Department of the Treasury requiring centralized governmental registration of firearms; jointly, to the Committees on the Judiciary and Ways and Means.

By Mr. MOORE (for himself, Mr. ENGLISH, Mr. ABDNOR, Mr. ANDERSON of Illinois, Mr. BADHAM, Mr. BEARD of Rhode Island, Mr. BEARD of Tennessee, Mr. BREAUX, Mr. BROWN of Ohio, Mr. BUTLER, Mr. CAPUTO, Mr. COLEMAN, Mr. CONABLE, Mr. CORCORAN of Illinois, Mr. CUNNINGHAM, Mr. ROBERT W. DANIEL, JR., Mr. DAN DANIEL, Mr. DEVINE, Mr. DICKINSON, Mr. DINGELL, Mr. DRINAN, Mr. DUNCAN of Tennessee, Mr. EDWARDS of OKLAHOMA, Mr. EMERY, and Mr. ERLENBORN):

H.J. Res. 879. Joint resolution designating July 1, 1978, as "National Free Enterprise Day"; to the Committee on Post Office and Civil Service.

By Mr. MOORE (for himself, Mr. EVANS of Delware, Mr. FARY, Mrs. FENWICK, Mr. FLOWERS, Mr. FRENZEL, Mr. GINN, Mr. GRADISON, Mr. GRASSLEY, Mr. HAGEDORN, Mr. HALL, Mr. HAMMERSCHMIDT, Mr. HANSEN, Mr. HOLLENBECK, Mrs. HOLT, Mr. HUBBARD, Mr. HUCKABY, Mr. JEFFORDS, Mr. JOHNSON of Colorado, Mr. KASTEN, Mr. KELLY, Mr. KEMP, Mr. KETCHUM, Mr. KINDNESS, and Mr. LAGOMARSINO):

H.J. Res. 880. Joint resolution designating July 1, 1978, as "National Free Enterprise Day; to the Committee on Post Office and Civil Service.

By Mr. MOORE (for himself, Mr. LATTA, Mr. LONG of Louisiana, Mr. LOTT, Mr. MCCLORY, Mr. MCDONALD, Mr. MCEWEN, Mr. MARLENEE, Mr. MARRIOTT, Mr. MICHEL, Mr. MILFORD, Mr. MILLER of Ohio, Mr MITCHELL of New York, Mr MOORHEAD of California, Mr. MURPHY of Pennsylvania, Mr. JOHN T. MYERS, Mr. PEPPER, Mr. RAILSBACK, Mr. ROSE, Mr. ROUSSELOT, Mr. RUDD, Mr. SPENCE, Mr. SEBELIUS, Mr. SYMMS, and Mr. WAGGONNER):

H.J. Res. 881. Joint resolution designating July 1, 1978, as "National Free Enterprise Day"; to the Committee on Post Office and Civil Service.

By Mr. RAILSBACK for himself, Mr. WHITEHURST, Mr. GUYER, Mr. BOWEN, and Mr. NOLAN):

H. J. Res. 882. Joint resolution designating the composition known as "The Stars and Stripes Forever" as the national march of the United States; to the Committee on Post Office and Civil Service.

By Mr. OBEY:

H. Con. Res. 585. Concurrent resolution disapproving the proposed sale of F–16 aircraft to Israel (transmittal No. 78–34); to the Committee on International Relations.

H. Con. Res. 586. Concurrent resolution disapproving the proposed sale of F–15 aircraft to Israel (transmittal No. 78–33); to the Committee on International Relations.

H. Con. Res. 587. A concurrent resolution disapproving the proposed sale of F–5F aircraft to Egypt (transmittal No. 78–32); to the Committee on International Relations.

H. Con. Res. 588. Concurrent resolution disapproving the proposed sale of F–13 aircraft to Saudi Arabia (transmittal No. 78–35); to the Committee on International Relations.

H. Con. Res. 589. Concurrent resolution disapproving proposed regulations of the Department of the Treasury requiring centralized registration of firearms and other matters; jointly, to the Committee on the Judiciary and Ways and Means.

By Mr. LONG of Maryland (for himself, Mr. WOLFF, Mr. WHALEN, Mr. MITCHELL of Maryland, Mr. SANTINI, and Mr. MADIGAN):

H. Con. Res. 590. Concurrent resolution disapproving the proposed "package" of sales of aircraft to Saudi Arabia, Egypt, and Israel; to the Committee on International Relations.

By Mr. REUSS:

H. Con. Res. 591. Concurrent resolution expressing the sense of the Congress that the President should include environmental and safety and health standards among the international fair labor standards whose adoption is sought under section 121(a)(4) of the Trade Act of 1974; to the Committee on Ways and Means.

By Mr. VANDER JAGT:

H. Con. Res. 592. Concurrent resolution disapproving proposed regulations of the Department of the Treasury requiring centralized registration of firearms and other matters; jointly, to the Committees on the Judiciary and Ways and Means.

By Mr. WHALEN (for himself, Mrs. FENWICK, and Mr. LONG of Maryland:

H. Con. Res. 593. Concurrent resolution disapproving the proposed "package" of sales of aircraft to Saudi Arabia, Egypt, and Israel; to the Committee on International Relations.

By Mr. WHALEN:

H. Con. Res. 594. Concurrent resolution disapproving the proposed sale of F–15 aircraft to Israel; to the Committee on International Relations.

H. Con. Res. 595. Concurrent resolution disapproving the proposed sale of F–16 aircraft

to Israel; to the Committee on International Relations.

H. Con. Res. 596. Concurrent resolution disapproving the proposed sale of F–5E aircraft to Egypt; to the Committee on International Relations.

H. Con. Res. 597. Concurrent resolution disapproving the proposed sale of F–15 aircraft to Saudi Arabia; to the Committee on International Relations.

By Mr. WOLFF (for himself, Mrs. COLLINS of Illinois, Mr. GILMAN, Mr. NIX, Mr. LONG of Maryland, Mr. AMBRO, and Mr. LUKEN):

H. Con. Res. 598. Concurrent resolution disapproving the proposed sale of aircraft to Saudi Arabia; to the Committee on International Relations.

By Mr. OTTINGER (for himself and Mr. LONG of Maryland):

H. Con. Res. 599. Concurrent resolution disapproving the proposed export of low-enriched uranium to India; to the Committee on International Relations.

By Mr. TUCKER (for himself, Mr. BEDELL, Mr. CORRADA, Mr. SKELTON, Mr. GEPHARDT, Mr. SIMON, Mr. STUMP, and Ms. MIKULSKI):

H. Res. 1157. Resolution expressing the sense of the House of Representatives that the study provided for by section 4(d) of the International Investment Survey Act of 1976 be completed not later than December 31, 1978; to the Committee on International Relations.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

388. By the SPEAKER: Memorial of the Legislature of the State of Idaho, relative to proposals for the transfer of the Forest Service from the Department of Agriculture; to the Committee on Agriculture.

389. Also memorial of the Legislature of the State of Idaho, relative to stability of the domestic nutritive sweetener industry; to the Committee on Agriculture.

390. Also, memorial of the Legislature of the State of Arizona, relative to acreage limitations and residency requirements for farmland irrigated with water from Federal reclamation projects; to the Committee on Interior and Insular Affairs.

391. Also, memorial of the Legislature of the State of Idaho, relative to proposed fuel economy standards for new model year 1980–81 light trucks; to the Committee on Interstate and Foreign Commerce.

392. Also, memorial of the Legislature of the State of Nebraska, requesting that Congress call a convention for the purpose of proposing an amendment to the Constitution of the United States relative to the right to life; to the Committee on the Judiciary.

393. Also, memorial of the Legislature of the State of Oklahoma, requesting that Congress call a convention for the purpose of proposing an amendment to the Constitution of the United States requiring, with certain exceptions balanced Federal budgets; to the Committee on the Judiciary.

394. Also, memorial of the House of Representatives of the State of New Hampshire, relative to issuing a Veterans Day commemorative postage stamp; to the Committee on Post Office and Civil Service.

395. Also, memorial of the Legislature of the State of Idaho, relative to proposed Internal Revenue Service regulations which would eliminate public employee deferred compensation plans; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. EDWARDS of Oklahoma:

H.R. 12478. A bill for the relief of Ernest C. Onukogu; to the Committee on the Judiciary.

By Mr. HEFTEL:

H.R. 12479. A bill for the relief of Judge Louis Le Baron; to the Committee on the Judiciary.

By Mr. KRUEGER:

H.R. 12480. A bill for the relief of Lawrence J. Kelly and Peggy M. Kelly; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

456. By the SPEAKER: Petition of State senator, Clarence D. Bell, Media, Pa., relative to the Governor's veto of a bill of the Pennsylvania General Assembly requesting that Congress call a convention for the purpose of proposing an amendment to the Constitution of the United States concerning the right to life (Memorial No. 377); to the Committee on the Judiciary.

457. Also, petition of the Kentucky Federation of Women's Clubs, Louisville, Ky., relative to flood control; to the Committee on Public Works and Transportation.

458. Also, petition of the Western States Legislative Forestry Task Force, Sacramento, Calif., relative to establishment of a special committee to expedite resolution of issues involving the future use of roadless areas in the National Forest System; to the Committee on Rules.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H. CON. RES. 559

By Mr. ROUSSELOT:

Resolved by the House of Representatives (the Senate concurring), That the Congress hereby determines and declares, pursuant to section 301(a) of the Congressional Budget Act of 1974, that for the fiscal year beginning on October 1, 1978—

(1) the recommended level of Federal revenues is $464,648,000,000 and the amount by which the aggregate level of Federal revenues should be decreased is $38,700,000,000;

(2) the appropriate level of total new budget authority is $521,437,000,000;

(3) the appropriate level of total budget outlays is $464,648,000,000;

(4) the amount of the deficit in the budget which is appropriate in the light of economic conditions and all other relevant factors is $0; and

(5) the appropriate level of the public debt is $782,200,000,000 and the amount by which the statutory limit on such debt should accordingly be increased is $29,000,000,000.

SEC. 2. Based on allocations of the appropriate level of total new budget authority and of total budget outlays as set forth in paragraphs (2) and (3) of the first section of this resolution, the Congress hereby determines and declares pursuant to section 301 (a) (2) of the Congressional Budget Act of 1974 that, for the fiscal year beginning on October 1, 1978, the appropriate level of new budget authority and the estimated budget outlays for each major functional category aro as follows:

(1) National Defense (050):
(A) New budget authority, $128,439,000,000,
(B) Outlays, $115,679,000,000;
(2) International Affairs (150):
(A) New budget authority, $8,754,000,000,
(B) Outlays, $5,500,000;
(3) General Science, Space, and Technology (250):
(A) New budget authority, $5,216,000,000,
(B) Outlays, $5,027,000,000;
(4) Energy (270):
(A) New budget authority, $9,200,000,000,
(B) Outlays, $6,200,000,000;
(5) Natural Resources and Environment (300):
(A) New budget authority, $13,000,000,000,
(B) Outlays, $11,331,000,000;
(6) Agriculture (350):
(A) New budget authority, $9,197,000,000,
(B) Outlays, $9,308,000,000;
(7) Commerce and Housing Credit (370):
(A) New budget authority, $5,386,000,000,
(B) Outlays, $3,148,000,000;
(8) Transportation (400):
(A) New budget authority, $16,200,000,000,
(B) Outlays, $16,000,000,000;
(9) Community and Regional Development (450):
(A) New budget authority, $8,500,000,000,
(B) Outlays, $8,264,000,000;
(10) Education, Training, Employment and Social Services (500):
(A) New budget authority, $21,842,000,000,
(B) Outlays, $26,529,000,000;
(11) Health (550):
(A) New budget authority, $48,600,000,000,
(B) Outlays, $45,000,000,000;
(12) Income Security (600):
(A) New budget authority, $182,394,000,000,
(B) Outlays, $148,000,000,000;
(13) Veterans Benefits and Services (700):
(A) New budget authority, $20,711,000,000,
(B) Outlays, $20,471,000,000;
(14) Administration of Justice (750):
(A) New budget authority, $3,974,000,000,
(B) Outlays, $4,051,000,000;
(15) General Government (800):
(A) New budget authority, $3,876,000,000,
(B) Outlays, $3,903,000,000;
(16) General Purpose Fiscal Assistance (850):
(A) New budget authority, $9,098,000,000,
(B) Outlays, $9,237,000,000;
(17) Interest (900):
(A) New budget authority, $43,500,000,000,
(B) Outlays, $43,500,000,000;
(18) Allowances (920):
(A) New budget authority, $1,050,000,000,
(B) Outlays, $1,000,000,000;
(19) Undistributed Offsetting Receipts (950):
(A) New budget authority, $17,500,000,000,
(B) Outlays, $17,500,000,000;

By Mr. VOLKMER:

In the matter relating to the appropriate level of total new budget authority decrease the amount by $5,401,000,000;

In the matter relating to the appropriate level of total budget outlays decrease the amount by $2,797,000,000;

In the matter relating to the amount of the deficit decrease the amount by $2,797,000,000;

In the matter relating to the appropriate level of the public debt decrease the amount by $2,797,000,000;

In the matter relating to the amount by which the statutory limit on the public debt should accordingly be increased, decrease the amount by $2,797,000,000.

In the matter relating to 050: National Defense decrease the amount for budget authority by $2,354,000,000; and decrease the amount for outlays by $1,459,000,000.

In the matter relating to 150: International Affairs decrease the amount for budget authority by $127,000,000; and decrease the amount for outlays by $56,000,000.

In the matter relating to 250: General Science, Space and Technology decrease the amount for budget authority by $104,000,000; and decrease the amount for outlays by $71,000,000.

In the matter relating to 270: Energy decrease the amount for budget authority by $209,000,000; and decrease the amount for outlays by $73,000,000.

In the matter relating to 300: Natural Resources and Environment decrease the amount for budget authority by $299,000,000; and decrease the amount for outlays by $123,000,000.

In the matter relating to 350: Agriculture decrease the amount for budget authority by $35,000,000; and decrease the amount for outlays by $29,000,000.

In the matter relating to 370: Commerce and Housing Credit decrease the amount for budge authority by $59,000,000; and decrease the amount for outlays by $19,000,000.

In the matter relating to 400: Transportation decrease the amount for budget authority by $294,000,000; and decrease the amount for outlays by $103,000,000.

In the matter relating to 450: Community and Regional Development decrease the amount for budget authority by $293,000,000; and decrease the amount for outlays by $67,000,000.

In the matter relating to 500: Education, Training, Employment and Social Services decrease the amount for budget authority by $577,000,000; and decrease the amount for outlays by $294,000,000.

In the matter relating to 550: Health decrease the amount for budget authority by $160,000,000; and decrease the amount for outlays by $94,000,000.

In the matter relating to 600: Income Security decrease the amount for budget authority by $546,000,000; and decrease the amount for outlays by $115,000,000.

In the matter relating to 700: Veterans Benefits and Services decrease the amount for budget authority by $133,000,000; and decrease the amount for outlays by $112,000,000.

In the matter relating to 750: Administration and Justice decrease the amount for budget authority by $83,000,000; and decrease the amount for outlays by $63,000,000.

In the matter relating to 800: General Government decrease the amount for budget authority by $85,000,000; and decrease the amount for outlays by $77,000,000.

In the matter relating to 850: General Purpose Fiscal Assistance decrease the amount for budget authority by $22,000,000; and decrease the amount for outlays by $22,000,000.

In the matter relating to 900: Interest decrease the amount for budget authority by 0; and decrease the amount for outlays by 0.

In the matter relating to 920: Allowances decrease the amount for budget authority by $21,000,000; and decrease the amount for outlays by $20,000,000.

In the matter relating to 950: Undistributed Offsetting Receipts decrease the amount for budget authority by 0; and decrease the amount for outlays by 0.

EXTENSIONS OF REMARKS

FIGHTING INFLATION

HON. JAMES J. BLANCHARD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. BLANCHARD. Mr. Speaker, the problem of inflation is one that demands our serious, thoughtful, and immediate attention. I believe we must take firm action to control inflation. That is why I sponsored the bill and voted to continue the Council on Wage and Price Stability last fall, although many argued that the Agency was not needed.

And yet, I am convinced that, beyond this, we must zero in on a specific anti-inflation approach. The problem has been with us a long time, and it requires new, creative solutions. An idea that I believe deserves serious consideration is using the tax system as either an incentive or a penalty to moderate wage and price demands. The concept of "tax-oriented income policies," or TIP, is one which I hope the Banking Subcommittee on Economic Stabilization, on which I serve, and eventually the full House will seriously consider.

A recent article by Hobart Rowen of the Washington Post gives a good summary of this approach, and I would like to call my colleagues' attention to it. The article follows:

THE TIP CARROT OR THE TIP STICK

(By Hobart Rowen)

President Carter has now made an important shift in his economic policy targets by putting the fight against inflation ahead of everything else, and nominating the brash and persuasive Robert Strauss to take charge.

The presidential concern with inflation has proved to be a tonic in foreign exchange markets. He even has given a lift to Wall Street—which continues, however, to appraise Carter with a somewhat jaundiced eye.

But the president's reliance on totally voluntary restraints and the wagging of the Strauss jawbone is likely to produce little more than a temporary euphoria.

It is clear, as President Carter himself said at last week's press conference, that the present inflation is the product of a self-maintaining spiral of wages and prices. Something dramatic is needed to break the cycle, and it is doubtful that even Bob Strauss can do it by himself in the face of a stubborn 7 percent inflation rate.

C. Jackson Grayson, who was President Nixon's price controller, said in an interview here last week: "Sure, Strauss got U.S. Steel to roll prices back. But it was kind of a false victory. That (effort) and a few others like it won't hold back the main forces in the economy. And once you start jawboning, you can't stand many failures—the pressures grow to put on controls."

What is there short of controls that would supplement and reinforce the Carter-Strauss anti-inflation game? Under the sponsorship of the Ford Foundation, economists of various political ideological persuasion have examined what has come to be called the "TIP" idea—short for tax-oriented income policies.

In brief, the idea is to use the tax system as a carrot (the Arthur Okun version) or as a stick (the Henry Wallich-Sidney Weintraub scheme) to induce companies and unions to moderate their wage and price demands.

Wallich and Weintraub would set a numerical wage guidepost, and corporations that offered higher pay increases would be penalized by higher taxes. They argue that competitive forces would prevent companies from paying higher wages and shifting the tax penalty to the consumer through higher prices.

With the same objective, Okun turns the Wallich-Weintraub plan into a tax incentive: The employes would get a tax rebate; and if employers hold down their prices, they also would get tax reductions.

Okun has become persuaded by criticism by his colleagues, including Gardner Ackley (who was a price controller during the Korean war), that the reward on the price side of his plan probably would run into an administrative mess.

There seems to be more sentiment—especially among those economists who are concerned about inflation—for the "stick" approach. That's because it could be selective, dealing, say, with the biggest firms, whereas the carrot approach would have to be universal.

Wallich argues persuasively that even if TIP is not perfect, and needs more study, we cannot sit still and let inflation take control of the economy again.

Price reductions won't happen by themselves. Look how eagerly Detroit raised car prices as soon as higher exchange rates pushed up Japanese car prices.

Organized labor will fight TIP tooth and nail for the simple reason that TIP tackles inflation by trying to get a handle on wages. It's obvious that there is a better chance of controlling inflation if excessive wage increases are dampened. "If you hold down prices, you can't be sure that it will work back into wages," says one economist.

But, surely, thoughtful leaders in the unions are aware of the overwhelming—if misconceived—notion prevalent in Congress and at the Federal Reserve Board that the way to fight inflation is to hold down government spending and the federal budget deficit. This notion dominates congressional thinking even though there is no evidence of excessive de.nand.

It would be in labor's own interest to consider the TIP plans with an open mind. As TIP proponents say, if price inflation were to fall point for point with wage inflation, they would lose nothing from restraint.

Strauss will be discussing various inflation-fighting techniques with a group of academic advisers this week. It would be worth his while to explore TIP carefully. It would save wear and tear on his overworked vocal cords.●

THE INLAND WATERWAY SYSTEM

HON. TOM HAGEDORN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. HAGEDORN. Mr. Speaker, the inland waterway system of this country continues to suffer from the failure of Congress to approve legislation to replace the antiquated locks and dam No. 26 structure along the Mississippi River at Alton, Ill. H.R. 8309, approved by the House last fall, remains languishing in the other body where opponents threaten to impose higher taxes upon waterway transportation.

The following is correspondence addressed to the distinguished Speaker (Mr. O'NEILL) and signed by 117 business, labor, agricultural, port, civic, and other officials who are concerned about this legislation. As they observe, the new user taxes imposed by H.R. 8309 represent a hard-fought compromise and would raise more than $100 million annually when fully operational. An increase of the magnitude proposed by some in the Senate would sharply disrupt the balance between transportation modes in this country while having a detrimental impact upon employment, trade balances, and consumer costs.

I would like to bring this letter to the attention of my colleagues:

NATIONAL WATERWAYS ALLIANCE,
Washington, D.C., April 13, 1978.

Hon. THOMAS P. O'NEILL, Jr.
Speaker of the House, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: The purpose of this letter is to eliminate any misunderstanding as to the position of waterway-related interests on the question of waterway user charges. The undersigned officials of businesses, industries, trade associations, organized labor, port authorities, development commissions, state and local governments, agricultural organizations, water carriers, electric power companies and cooperatives, waterway terminals, and river basin associations representing the overwhelming majority of directly affected interests are unanimous in their conviction that H.R. 8309, which authorizes replacement of Locks and Dam 26 and imposes a waterway fuel tax, constitutes a fair and reasonable limit of compromise for a complex issue having profound ramifications.

The fuel tax which this legislation would levy on shallow-draft waterway commerce is substantial and in line with the Federal fuel tax paid by private automobiles, highway trucks, business aviation and recreational boating. When it is fully operational, the 6¢ commercial navigation tax coupled with the 4¢ tax paid by recreational craft will produce revenues in excess of $100 million annually.

Any increase in waterway taxation above the levels provided in H.R. 8309 would tend to pre-judge the very issues which require in-depth examination as to regional impact, job losses, dislocation of industry, trade balances, inflationary pressures, and diversion of traffic to less safe and less efficient modes—all of which are matters which we believe must be considered carefully and objectively before the Nation is committed to a user charge program exceeding the levels specified in H.R. 8309. In the absence of a full study of all relevant aspects, the shippers, farmers and consumers who would bear the added cost of any waterway imposition cannot reasonably be expected to pay higher fees.

Consideration of H.R. 8309—which was passed by the House of Representatives by an overwhelming majority—has been seriously delayed in the Senate, where opposing forces have sought to gain votes for higher level and restrictive charge plans, with insufficient attention to potential economic and regional impacts and to the need for an adequate inland waterway system. As a result of the lingering controversy over the level of user charges, many business planning and investment decisions are being delayed and large segments of the labor force and agricultural community are being kept in doubt as to future prospects.

Notwithstanding the conviction of the overwhelming majority of affected waterway interests that continuation of historic American toll-free navigation policy is in the national interest, particularly in light of the energy efficiency and bulk-carrying capacity of the inland waterway fleet, in a sincere effort to resolve this issue, we have agreed to support the fuel tax of 4¢ rising to 6¢ per gallon embodied in H.R. 8309. We have endorsed the House compromise, which was passed with the aid and endorsement of the Democratic leadership.

In view of the continuing uncertainties over this legislation in the Senate, we call upon the Administration and the Congress to recognize the seriousness of the issues involved in imposing charges on American waterways for the first time in our history and to join with us in rejecting any proposal for charges above the levels of H.R. 8309 as premature, dangerous and lacking a sound factual basis. Furthermore, we trust that the Administration and the Congress will concur in our views and acknowledge the reasonableness of our position in order that the user charge dilemma can be settled in an acceptable manner.

Similar letters are being addressed to President Carter and to the President Pro Tempore of the Senate. For your information, we have suggested to them that conferences with affected waterway interests be arranged at the earliest convenient date(s) so that we may share with them our strong convictions on the need to support H.R. 8309 as well as factual information on the potential impacts of waterway charges at high levels on our millions of members, employees, customers, farmers and citizens generally.

Sincerely yours,

STATE-BY-STATE LISTING AND ORGANIZATIONAL AFFILIATIONS OF LETTER-SIGNERS

A SALUTE TO GALLANT FIREMEN WHO DARED AND A COMMUNITY THAT CARED

HON. TENNYSON GUYER

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. GUYER. Mr. Speaker, the Blanchard River that inspired Tell Taylor to write "Down by the Old Mill Stream" was a turbulent scene of a sad disaster on Saturday, April 22, 1978.

And Findlay, Ohio—known as Flag City, U.S.A., had hundreds of flags at half-mast, and an entire community was stunned, shocked, and saddened by a quadruple drowning, the worst such tragedy in the history of Hancock County.

On that fateful day, two gallant firemen, Roland G. Smith, Jr. and William C. VanAtta, gave their lives in trying to rescue two teenagers, Troy Lee Best and Michael D. Armstrong, whose canoe capsized during an attempt to shoot the dam's waterfall at Riverside Park.

The raging waters, powerful current, and angry undertow proved to be too much for both the boys and the courageous firemen who gave their lives trying to rescue the youthful victims.

It was 6 days before the last body was recovered from the river, which marked the most massive rescue attempt by hundreds of dedicated people, who utilized every dragging facility and all lifesaving equipment that could be secured to try to save, then recover the bodies from the swollen river.

Sympathy, understanding, and love poured out from the hearts of all the people, to the surviving families of the victims of the tragedy.

Unprecedented memorial services, and funeral corteges were held in reverence, respect, and sorrow, by our community, whose people were choked with deep emotion over our great loss.

It would be impossible to give proper recognition to all who joined hands in the rescue and recovery operations, which extended through long nights of vigil and anxious days of unceasing toil.

But a salute is in order in behalf of the firemen, policemen, sheriff's department, Mayor Renninger and the city agencies, the Red Cross, hospital and ambulance personnel, city and county officials, agency workers, underwater experts, and scores of citizens from home and from surrounding counties, who worked and cared beyond duty.

As our community attempts to return to normalcy, we cannot forget the sorrowing families, nor the brave men who laid their lives on the altar of sacrifice. They shall not be forgotten.

All too seldom do most of us think of the great work done by our firemen, police, and law enforcement officials, who serve that we might be safe and secure.

Our community will not be the same since this tragic event, but we can remember in memoriam and requiem, what they did here.

Perhaps the Bible says it best: "Greater love hath no man than this, that a man lay down his life for his friends." ●

STATEMENT OF CHAIRMAN AL ULLMAN, COMMITTEE ON WAYS AND MEANS, WITH RESPECT TO THE RULE TO BE REQUESTED FOR CONSIDERATION OF A "REVENUE SHARING" AMENDMENT TO H.R. 3350, DEEP SEABED MINING LEGISLATION

HON. AL ULLMAN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. ULLMAN. Mr. Speaker, on April 27, 1978, the Committee on Ways and Means ordered favorably reported to the House a "revenue sharing" amendment to H.R. 3350, the Deep Seabed Hard Mineral Resources Act. H.R. 3350 has previously been considered and approved with various amendments by the Committees on Merchant Marine and Fisheries, Interior and Insular Affairs, and International Relations. The Committee on Ways and Means only considered the revenue sharing aspects of this legislation. The committee's amendment would establish an international revenue sharing fund, and would impose an excise tax on mining companies equal to 3.75 percent of the value of the hard minerals recovered by the company from deep seabed mining. These excise tax revenues would be deposited in the revenue sharing fund for use if the United States becomes a party to an international agreement requiring contributions to an international fund for the sharing of revenues from deep seabed mining which occurred prior to the entry into force of the agreement.

I take this occasion to advise my Democratic colleagues as to the request that I will make to the Committee on Rules for consideration of the revenue sharing amendment on the floor of the House. The Committee on Ways and Means specifically instructed me to request the Committee on Rules to provide a rule that would permit the revenue sharing amendment approved by the committee to be offered as an amendment for a separate title on the floor without amendment, except for an amendment, if offered by Mr. Stark, to increase the rate of the proposed excise tax from 3.75 percent to 10 percent.

It is our intention to request a hearing before the Committee on Rules concurrently with the other three committees involved in this legislation.●

MIDEAST PEACE

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. FINDLEY. Mr. Speaker, we are ever mindful of the constant tragedy that is intertwined in the Middle East web. Yet, sometimes, even in the midst of our deepest despair, we see indications that a hope for peace in that troubled region remains. Thus, the recent sequence of sad events in Israel and in Lebanon has demonstrated not only that the Middle East is never far from conflict but also that progress toward peace is still possible.

An acute sense of realism has convinced the parties with the most to lose in Lebanon that their interests lie closer to cooperation than to renewed hostilities. They have agreed, therefore, to disengage and to accept a United Nations peacekeeping force in southern Lebanon. As U.N. troops assume their positions, Israel will withdraw its own forces. This withdrawal is, in turn, a critical prelude to a resumption of peace talks in the Middle East. Israel has further underlined its commitment to continued negotiations by reaffirming its acceptance of U.N. Security Council Resolution 242 as the basis for peace talks.

Syria, also, has contributed to developing a new momentum toward establishing a Middle East peace by exercising great restraint in its conduct in Lebanon. During Israel's incursion, Syria carefully avoided situations that might have led to engagements between Syrian troops stationed in Lebanon and the Israeli Defense Force. Damascus has been helpful by supporting the U.N. role in Lebanon and has directed its own soldiers to suppress fighting in Beirut and elsewhere. In addition, President Assad has resisted Iraqi pressure to renounce U.N. Security Council Resolution 242, thereby keeeping alive the possibility that Syria will eventually join the peace negotiations.

Yasir Arafat, chairman of the Palestine Liberation Organization, has also contributed to containing hostilities in Lebanon. He has given U.N. Secretary-General Waldheim his assurances that the P.L.O. will support the U.N. presence and mission in Lebanon. To reinforce his position, Arafat is now attempting to subdue and to bring under his control those most radical elements of the P.L.O. thought to have been responsible for the recent brutality near Tel Aviv.

Thus, from the destructive mesh of politics and religion that is Lebanon, there has emerged a renewed hope for peace in the Middle East. Many problems remain, not the least of which are the thousands of Lebanese refugees, the security and well-being of Israel, and the fate of the Palestinians. But there is reason to believe that many in the Middle East want to continue their efforts to resolve their differences and to seek peace.●

TURNING WARPLANES INTO HOUSES—AND JOBS

HON. PARREN J. MITCHELL

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. MITCHELL of Maryland. Mr. Speaker, the House will soon be considering the first concurrent budget resolution for fiscal year 1979. This resolution will provide us with a major opportunity to debate national priorities and to examine whether the President's budget has adequately addressed the needs of revitalizing our major urban and rural areas. At the same time, we will compare the enormous expenditures for the military not only against the requirements for international peace and stability but against these domestic revitalization needs as well.

In the coming weeks, I plan to introduce a series of materials into the RECORD for consideration of my colleagues on the crucial national priorities which will be debated when the first budget resolution is called up.

I would like to draw your attention to an article by Sanford Gottlieb on the impact of military spending on job creation. He indicates that military spending cannot be counted on to maintain high employment levels and that we are unprepared to make the transition through defense conversion from a military to a civilian based economy. I urge my colleagues to read these arguments closely. I believe the issues of military spending reductions and defense economic conversion should be closely related, as this article makes clear.

The article by Sanford Gottlieb follows:

TURNING WARPLANES INTO HOUSES—AND JOBS

(By Sanford Gottlieb)

The summer of '43 I managed a Good Humor ice cream stand at Coney Island. The $50-a-week pay was almost princely at the time; the fringe benefits, including a swim after work, were attractive. I supervised five employees. How did an untrained teenager not yet 17 attain such a level of pay and responsibility?

World War II did it. Some 12 million citizens were in the armed forces. Millions more entered defense plants, among them the ex-housewives symbolized by Rosie the Riveter, precursor of today's working women. It was the war effort that cured the swollen unemployment of the Great Depression, and in the process, opened the jobs to young people like me.

To my generation it became an article of faith that war—or, failing that, a high military budget—wards off joblessness. We somehow overlooked the millions in uniform at meager pay, but our belief was firmly rooted in actual experience. Our faith has survived, unshaken, through three decades of swift-paced change.

How realistic is that certainty today? Not very. Study after study, private and governmental, has in recent years reached the conclusion that a variety of civilian activities would generate more jobs than the same dollar volume of military spending. For example:

2.1 million new jobs would result from a 30 percent cut in military spending, provided the savings were shifted to specific domestic programs.

A public housing program and a tax cut would each create more jobs than the equivalent sum spent on the B–1 bomber over a 10-year period.

Education revenue-sharing and state and local government projects both finish ahead of Pentagon programs in jobs created per billion dollars spent.

Something funny happened to Pentagon job-creation on the way to the cold war. In World War II General Motors could retool its assembly line to manufacture tanks, hire three shifts a day, seven days a week, and then retool again after V–J Day to manufacture Chevrolets. That work was labor-intensive, requiring lots of semi-skilled blue collar workers. But the research, development, testing and production of today's strategic weapons are in a different league. They require large amounts of raw materials, sophisticated laboratories and technology, relatively more scientists and engineers, and many fewer blue collar workers. Defense work today is capital-intensive. It costs a whole lot more but employs fewer hands.

Military spending is not only less of a boost to employment than in World War II, but it imposes an unnecessary burden on the economy through the Defense Department's procurement practices. Most of the big Pentagon contracts are let without benefit of advertised competitive bids. The large defense contractors get paid for what they spend, not what they produce. In the old days this was known as "cost plus." Today, it hides behind other names, but the effect is the same. These companies can usually count on the Pentagon to pick up the tab, cost overruns and all. Cost-effectiveness thus becomes a rare commodity. Why cut costs when this also cuts your profits? And when a conscientious official like Ernest Fitzgerald blows the whistle on a hidden cost overrun, he, not Lockheed is punished.

There's good news and bad news in this picture. The good news is that we can afford to stop fearing or worrying about the effect successful SALT agreements might have on the unemployment rolls. With advance planning, the federal government could produce new jobs by shifting funds to civilian programs, implementing a tax cut, or both.

How many and what kinds of jobs would depend on the precise combination of governmental actions and the economic conditions at the time. New jobs stemming from civilian programs would presumably be geared to meeting public needs such as health care, housing, transportation, education and environmental controls. New jobs that come from a tax cut would be determined by the decisions of millions of individual taxpayers about how to spend the bonanza. Although a tax cut might prove politically irresistable, as a job stimulant it would have certain limitations. The tax-cut option could not be directed at helping the specific regions most affected by a decrease in defense spending, as new civilian programs could, and it would take longer to have an impact.

The bad news is that the big defense firms are woefully unprepared to shift to civilian production. Many of them may also be unable to compete in civilian markets, after years of maximizing their costs and delivering their expensive products to one sure customer. The government should not continue subsidizing inefficiency. It should encourage and assist these firms to plan for the day when their defense contracts dip, and to provide help of various kinds of individuals who lose their jobs through defense shifts or arms reduction agreements.

Planning is best done at the local level, close to the work place. It should involve not just the management but also the

unions, local government, and local business groups that function in the civilian sector. In short, planning should involve all the groups in the community that will be affected by cuts in military spending and stand to benefit if these cuts are converted into opportunities for economic development. Concerned citizens in defense-dependent communities—and elsewhere—can help the process by encouraging the creation of joint local committees to plan for new economic activities.

One model for helping laid-off workers is the aid offered by the Trade Expansion Act of 1962. To workers hurt by lowered tariffs, the legislation provides adjustment allowances, counseling and job placement services, retraining, and relocation to another area. It has not worked well, however. The federal and state bureaucracies have been slow to move, and workers often know nothing of the services available. Still, when a Rhode Island rubber plant gave one year's advance notice of a closing, the union in the plant applied for adjustment assistance and the state employment agency set up a retraining service. In that case the act worked well to ease the transition.

As Jimmy Carter said during the 1976 campaign, national security decisions should be made for national security reasons and economic decisions for economic reasons. It hasn't always worked that way. When Treasury Secretary John Connally testified before the Senate in 1971 on the federally guaranteed bank loan to Lockheed, manufacturer of the ill-fated C-5A cargo plane, he declared: "What do we care whether they perform? We are guaranteeing them basically a $250 million loan . . . so they can provide employment for 31,000 people. . . ."

The fear of job loss in the defense sector has been one of the engines driving an arms race that contributes nothing to our security. Now we know that mutual disarmament and higher employment could be achieved simultaneously. There's much work to be done in a nation groping for the moral equivalent of war.

Sanford Gottlieb is arms reduction coordinator of New Directions, a Washington-based citizens' group with international concerns.●

THE WORLD AND JIMMY CARTER

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. MICHEL. Mr. Speaker, American Cause, a bipartisan, tax-exempt political educational organization recently published a special report titled: "The World and Jimmy Carter." This informative and incisive report, written by C. J. V. Murphy is a detailed and observant analysis of current foreign policy trends. Mr. Murphy's conclusion about these trends is anything but reassuring, but no one can deny the underlying truths that form his pessimistic vision of United States foreign policy. He is particularly impressive in discussing the current administration's debacle in Africa. While you may not agree with every point raised in this article, the force and persuasiveness of many of its arguments make it well worth reading.

At this time I would like to submit in the RECORD, American Cause, "The World and Jimmy Carter," by C. J. V. Murphy, November 1977:

THE WORLD AND JIMMY CARTER

(By C. J. V. Murphy)

(Mr. Murphy was for 34 years a writer and editor of Fortune magazine.)

President Carter does not favor light touch in his formal public discourses, but he did begin a major speech a while back with a pretty good story. He did not tell the story quite as well as it deserved, but the point came through plainly enough and his audience was delighted. It went like this:

A man was hauled into court to answer a charge of being drunk and setting his bed on fire. The judge asked him how he pleaded: "Not guilty," was the confident answer. "I couldn't have been drunk, your Honor, because I have a clear recollection that the bed was already on fire when I got into it."

The circumstances that raises this little joke to the level of cosmic hilarity was the occasion on which the President chose to tell it. He used it to set the mood for his speech on foreign policy at the Commencement Day exercises at Notre Dame University, on May 22. That speech unveiled the outlines of what President Carter called a new foreign policy for the United States. His policy would be "open and candid;" it would be pervaded by "optimism in its historical vision" and given character by "constant decency in its values." Best of all, he was in the process of fitting it into a world where, as he read the signs, the "threat of conflict" with Soviet Russia was becoming "less intensive," and where the normalization of relations with communist China would supply "a key force for global peace;" where colonialism "has nearly gone."

It was all bewitching flummery. The hard fact is that Mr. Carter's "new" foreign policy, like the bed in his story, was already afire before he had quite gotten into it.

WHAT THE VISION OVERLOOKED

Soviet Russia, currently celebrating the 60th anniversary of the Bolshevik Revolution, the direful consequences of which were seven years in progress when Jimmy Carter was born, is armed to the teeth. It continues to arm on a scale that can be rationally explained only if the goal is military invincibility.

The delusion called detente—a term which President Ford dropped in embarassment but which the Carter folk have reinstated—is now entering its sixth year. It was supposed to produce, by American expectations, a long truce in the course of which a mellowing Politburo would rein in its wilder apprentices, and a start would be made in the SALT process toward slowing down the Soviet rush to nuclear superiority. On the Soviet side, the primary interests were two: ready access to American technology and credits and a formal acknowledgment that eastern Europe was a legitimate sphere of Soviet influence.

The American latchstring remains out, but few goodies have flowed our way. Detente did not spare South Vietnam the final assault in 1975. It failed to induce Moscow to stay the Arabs whom it had armed from striking Israel on Yom Kippur in 1973. And it did not deter the Russians from stage-managing the communizing of Angola with the assistance of their Cuban "Gurkhas". Now they and the Cubans are in Ethiopia where they are maneuvering for the dominant position overlooking the Red Sea trade routes to the Persian Gulf and the Indian Ocean.

As for SALT, it has hardly slowed the Russians down. A few weeks ago, President Carter in a speech in Des Moines startled his audience with a ringing prediction that he was on the verge of bringing off a new SALT agreement that would be "the pride of our country." He could then proceed in confidence "toward my ultimate goal of reducing nuclear weapons in this world to zero."

The facts point to an opposite outcome. On the face of things, Mr. Carter is in unabashed retreat from the bold position he staked out last March when he sent Secretary of State Vance to Moscow with a "comprehensive" proposal for bringing to the massive panoply of Soviet strategic weaponry down closer to the American level.

In Asia, the prospect is hardly more encouraging. The China that enchancted President Nixon and Dr. Kissinger is behaving more and more like the Russia of Stalin. A bloody purge is moving to crescendo. Reports from travelers and from Peking itself tell of wholesale public executions running into the thousands. The "capitalist-roaders" among the scholars, administrators, and the party bureaucracy who were humiliated, jeered at, beaten up and purged by Mme. Mao's hordes of radicals during the Cultural Revolution a decade ago are finally squaring accounts with the followers of "The Gang of Four."

The myth of using China as a massive counterweight to Soviet military power—a notion floated by Dr. Kissinger—has been exploded. Mr. Harrison Salisbury of the New York Times reports that the anarchy sabotage, pillage, and civil war unloosened by the Cultural Revolution in 1966 have cost the Chinese economy the equivalent of two years' of national economic product, and that insofar as any real growth was concerned, the past years of convulsion represent a "lost" decade.

What the leaders of communist China want of us is not in doubt. They want to use us as a counterweight against Soviet power, especially in Western Europe.

As Mr. George W. Ball, Under Secretary of State in the Kennedy Administration, reminds us, Mao's successors, like Mao himself, are bidding for American attention for one reason only—"that we are the enemy of its enemy, the Soviet Union." Chairman Hua made no bones about their strategy in his address to the 11th National Party Congress last August. Quoting Lenin in defense of his dealings with the Americans, he argued that:

"The most powerful enemy can be vanquished only by . . . making use without fail of every, even the smallest, rift, among the enemies . . . and also by taking advantage of every, even the smallest, opportunity of gaining a mass ally, even though this ally be temporary, vacillating, unstable, unreliable and conditional."

Hua means us, of course.

WARMAKING SITUATIONS

So there is precious little in the behavior of the two communist super powers to encourage a belief that we can do satisfactory and beneficial business with either of them. And when one looks beyond into the Middle East and Africa, the picture turns gloomier still.

Having rightly perceived that a homeland, a political and social and geographical identity of some sort, for the scattered Palestinians was the core issue, Mr. Carter raised the point forthrightly. But before he was able to develop his case, an election in Israel brought to power under Premier Menachem Begin a political party determined to recover for Israel of the 20th century as much of the biblical metes and bounds of the Kingdom of David as can be repossessed.

Manifestly, there is no room in Mr. Begin's vision for a Palestinian state, let alone one dominated by the Palestinian Liberation Organization. The fear throughout Israel is that such a state would raise on Israel's frontiers a society of fanatics devoted to Israel's destruction.

Mr. Carter is acutely aware of the vulnerability of our economy to a stiff hike in the price of crude, let alone another OPEC

embargo. With the idea of reassuring the Arabs, while putting Israel on warning, he brought the Russians back into the peacemaking process, in their all but defunct role as co-chairmen of the Geneva Peace Conference. It was a misguided action. Soviet influence in the Middle East has been at a low ebb since President Sadat threw his Soviet advisors out of Egypt.

Moscow, it turns out, was Mr. Carter's trump card in a game when for three decades the U.S. held all the face cards, as Israel's only effective ally and banker and as the dominant sea and air power in the Mediterranean.

The best that American diplomacy can hope to gain from the Soviet Union's return to the Middle East cockpit is an understanding, in the interest of enriching the thin atmosphere of detente generally, that they will induce the Syrians and the PLO charges to moderate their hatred of Israel in the bargaining of Geneva.

Israel would founder overnight without American credits and money gifts. But the good provider has lost control of the situation, at least temporarily. War has become the way of politics in the Middle East, and the chance of another savage round of battle remains high. What is new is that the Arabs have learned to use oil as a weapon against Israel's backers, and the Israelis are now so strong militarily—their armor and their air force make them the world's third most effective combat power—that they could win their fifth war handily from the battle stock already on hand.

The danger for the United States lies in the fact that the Israelis, having witnessed the American retreat from Indochina and Africa, no longer count on our word. This is not to say that the mistake cannot be redeemed. President Sadat has daringly slipped out from under the joint U.S.-Soviet auspices and away from the deadened road to Geneva that Mr. Carter had blunderingly reopened. Sadat, by making his way to Jerusalem alone, introduced reason and moderation into Middle East statesmanship. Will Mr. Carter, having missed a fateful turning on the Arab side, now have the courage to demand as much from Prime Minister Begin?

AFRICA: SOWING THE WINDS OF TURMOIL

In Africa, another war situation is palpably in the making. This one could be quite as disastrous over the long run of history to broad American interests as the one in ferment in the Middle East. What is at stake here is future access to southern Africa's vast stores of metals, its fertile savannahs, and the strategic trade route around the Cape of Good Hope to the oil of the Persian Gulf. Yet again, in this other far place, by the perverse logic of American Domestic politics and, most compellingly, because of Mr. Carter's quite fatal dependence upon the unanimous support of the American black community, the United States again finds itself ranged alongside the Soviet Union, in support of black radicals determined, for the most part, to drive the whites off the continent.

There is a profound difference, however, between the considerations that have shaped the attitude of the American people toward the rights of Jews in Israel over the past four decades and those that lately account for our support of black revolutionaries. The roots of Western civilization go deep into the Judaic past.

By contrast, in Africa, American foreign policy is aligned on the side of utter strangers, whose history is impalpable, whose political philosophy is lately borrowed, and whose aims run, for the most part, contrary to our own. For this bewildering result, we can credit the frisky diplomacy of our man at the United Nations, Ambassador Andrew Young, and Vice President Mondale, both of whom are acutely sensitive to Jimmy Carter's dependence on unanimous black support at home.

The incident which first revealed how far the Carter Administration was prepared to push American policy in support of the black revolutionary movements in Africa was a press conference that Mr. Mondale gave in Vienna in May, after meeting with Prime Minister Vorster of South Africa. There Mondale disclosed that the United States wanted political power in South Africa put on a one-man, one-vote footing. Mr. Young, in his dress-rehearsal tour of the freshly minted African nations, had implied as much as he made his bouncy rounds, raising his fist in the black salute, belting out the anthems of black nationalists, and deriding the legitimacy of the last two white governments remaining on the continent. But these judgments were at first suffered to pass without rebuke as the actions of an untutored statesman who, if allowed enough rope, would surely hang himself.

Mr. Mondale's ultimatum in Vienna altered that judgment. It was a signal to the South Africans and the Rhodesians that time had run out on them. They are on peremptory warning to come to terms with the black opposition forthwith, or face, in isolation, the uprising the blacks are arming for. The choice before them is brutally plain: either accept expropriation and almost certain expulsion, or prepare to fight for your life and property in Africa.

So in Africa, as in the Middle East, Mr. Carter and his young activists have sowed the wind of turmoil. And no more in Africa than in the Middle East do they seem to have prepared for the whirlwind that could well be theirs to reap.

DR. BRZEZINSKI'S TWIN HORSEMEN OF APOCALYPSE

A repugnant strain of hypocrisy runs through the current thinking on Africa. The President's advisor on national security matters, Dr. Brzezinski, says piously, "nothing could be more destructive than for the United States to position itself as the ultimate shield of white supremacy at a time when racial equality is coming to be accepted as an imperative norm." The term "white supremacy" is a pejorative phrase associated with the Ku Klux Klan. Dr. Brzezinski, like Ambassador Young, mistakenly sees the struggle in Africa in civil rights terms. The one, a Pole by birth, appears to have little better understanding of the white-to-black relationship in 20th century Africa to the historical experience of the American black than the other, an American black until recently a stranger to Africa, has of the bearing of his own experience on the present situation of the African black.

Both men miss the point. For one thing, in Africa the proportions of the two races are reversed. For another, the Afrikaners of South Africa populated an empty veldt three centuries ago. No blacks had preceded the Boers into the land. Unlike the Israelis and the Palestinians, these whites are not plotting to regain a lost homeland. They have no ancient seedbed to return to. If their hold on the land and the law is broken, are we Americans and the Europeans prepared to take them in, to make room for them in our already overcrowded, quarrelsome societies?

We had better face up to the realities. The idea that the rule of one-man, one-vote is a reasonable path to a Western model of representative government in southern Africa is utter nonsense. In the event, the transformation of Africa as a whole has produced, in a crop that already includes 19 blatant dictatorships and more than a score of one-party juntas, a bare half-dozen multi-party states. Dr. Brzezinski would have us believe that the heavy hand the Carter Administration has laid on the Rhodesians and the South Africans is to save those societies from being overrun by "the twin horsemen of apocalypse—racial war and ideological war." The hoofbeats he hears are being made by the Russians and Cubans. The contest that will determine the future character of southern Africa is not so much a struggle between whites and blacks as it will be a war between blacks being armed by Russians and led by Cubans against other blacks.

Two years ago, Portugal let its vast colonies in Angola and Mozambique go free in the false expectation, fostered by Western liberal reasoning, that the emerging black leadership could be counted upon to evolve authentically native social systems. What has come instead is black civil war and dictatorships. The winners are communists trained and armed by the Soviet Union and the eastern bloc, hating Americans and determined to drive the white man into the sea.

A like brutal outcome is being prepared for Rhodesia. There is no evidence that either of the two radical black guerrilla tribal chiefs flitting about in Angola and Mozambique commands a substantial following inside Rhodesia. But Mr. Carter and the British government are under fierce pressure to force Prime Minister Smith to yield power to them without recourse to a referendum among the Rhodesian blacks, which they would most certainly lose now. It is Mr. Carter's acute susceptibility to these pressures, especially from the Black Caucus in Congress, that caused the Mr. Ball quoted earlier to warn that American meddling in the affairs of South Africa and Rhodesia, if persisted in, could well provoke a catastrophe which those societies would be spared if the whites and moderate blacks were left alone to resolve the fundamental political problems.

We would do well to heed the sage advice of that highly civilized, French-educated statesman, President Houphouet-Boigny, who presides over the tranquil state that calls itself the Ivory Coast. Soviet strategy, he reminds us, is only incidentally interested in the "liberation" of Africa from white colonialism. Moscow's goal is "to sever the vital communications links between the highly industrialized West and the rich raw-material resources of Africa, thereby fatally weakening the western economy."

AN INCREDIBLE DELUSION

How did we ever get into this fix? The failures of foreign policy began with the faltering of American purpose in Vietnam, the delusions fostered by detente and the decline of American military power. All the same, the philosophical baggage Mr. Carter brought with him to the White House contained not a few delusions of his own devising.

That came out all too plainly in the speech at Notre Dame. There was this extraordinary sentence:

"Being confident of our own future, we are now free of that inordinate fear of communism which once led us to embrace any dictator that joined us in our fear."

It is doubtful that any sentence ever uttered by an American President in a prepared speech has ever been so grossly misleading, or so mistaken in its judgment of the realities. In truth, as one foreign observer, Mr. Robert Moss wrote in The Daily Telegraph of London, what is truly inordinate about western conceptions "is not the fear of communism, but the failure to take necessary action to halt its advance into what is left of the world." There is, as the telling comment of Mr. William F. Buckley Jr. that the dictators whom the Carter Administration is itself embracing—"those who preside over China, Russia, eastern Europe, Mozambique, Vietnam, Cuba—are not dictators who fear communism but who exult in communism."

Can Mr. Carter really believe what he is telling us? Mr. James Reston of the New York Times, finds "noble yearnings" and "gentle manners" in Mr. Carter's view of the world. But he also sees "inexperience, isolation and a kind of stiff-necked personal confidence and Georgia pride." Still, it is difficult to square the excuse of inexperience with the declared political philosophies of the men and women with whom Mr. Carter has staffed the policy-shaping echelons at State, the Pentagon, the Arms Control and Disarmament Agency, and the National Security Council. They are, in decisive measure, McGovernites or neo-McGovernites. The policies they have brought forward in abundance are McGovernish in character—identifiable by the saffron streak of appeasement. Their man lost the presidency but under Carter they have captured the policy-making apparatus.

These people are taking us into associations with which American life has no true links whatever. They are debasing the currency of our values. They are unravelling (in Taiwan, in South East Asia, in Africa, in the Middle East) old and tested and irreplaceable ties. They are drawing us into the orbits of dictators and adventurers who detest and fear us at our best. None of this makes sense. One is put in mind of George Orwell's acidulous description of the well-meaning fools who zestfully saw away on the very branch they are sitting on, ignorant of the fact that what lies beneath them is not a bower of flowers, but a cesspool laced with barbed wire. As an Englishman remarked about their predicament in another connection, "if the rest of us are eventually precipitated into tyranny and oppression, it will be very little consolation to discover that we are in the company of those who wielded the saw."

Being mindful of President Carter's little story at Notre Dame, let us pray that Bismarck was right: that the Good Lord looks out for drunks, little children and the United States of America.●

METRIC MOVE CAUSES HEAT

HON. WILLIAM F. WALSH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. WALSH. Mr. Speaker, I would like to bring to the attention of my colleagues a newspaper article from today's Syracuse Post-Standard about the problems the British are having with conversion to the metric system.

About a year ago I vigorously opposed a move by the Federal Highway Administration to begin changing signs on U.S. highways to metric measurement. The plan was withdrawn. I now have questioned the U.S. Department of Defense's plans to convert to metrication and am awaiting a reply by the Secretary of Defense.

And I will continue my opposition to "going metric" until the U.S. Metric Board sets up voluntary guidelines for all segments of society to follow. Otherwise I think the U.S. Government will find itself proceeding into metric conversion in an atmosphere of confusion and hostility very similar to what the British government is now finding.

Following is the Associated Press article on the British situation right now:

LONDON.—The Labor government is having second thoughts about forcing Britons to abandon their yards, gallons and pounds in favor of meters, liters and kilograms by the early 1980s.

"It is clearly impossible to proceed against a background of hostility," said John Fraser, minister in charge of the government-ordered switch from imperial to metric weights and measures.

"Resistance against the recent metrication orders has led us to review whether we can still claim universal support."

Fraser made his remarks in an open letter recently sent to more than 100 organizations asking for their views on metrication. So far, the compulsory aspect of the changeover has roused ire in the British press, in Parliament and among ordinary Britons.

"There are a lot of little people in Britain who are tired of being pushed around by bureaucrats," said Anthony Beaumont Dark, finance committee chairman of the West Midlands County Council.

The 44-year-old stockbroker announced last Friday that any project estimates submitted to him using only the metric system will be returned for inclusion of imperial units. He advocates the voluntary use of both systems "in tandem" so as to lessen confusion.

There have been no recent public opinion polls on the shift, but letters to newspapers seem to be running strongly against it.

A writer to The Times of London the other day questioned whether the government ever had wide support for metrication.

"Can Mr. John Fraser point to a thousand, or a hundred, or a dozen housewives who prefer grams and centimeters to ounces and inches?" wrote Philip Jones.

Former Prime Minister Harold Wilson in 1965 reluctantly committed Britain to change to the metric system. In 1969, he set up the Metrication Board to ease the transition under pressure from industrialists who claimed Britain was out of the metric step.

There was no compulsion in the British changeover until the present government of Prime Minister James Callaghan, Wilson's successor, pushed through Parliament the Weights and Measures Act of 1976. This provided for the phasing out of the imperial system, some of whose units have been used since England was a part of the Roman Empire.

In the United States, President Gerald R. Ford signed the Metric Conversion Act in 1975 setting U.S. national policy for increased voluntary use of the system. There has been no action since then.

Canada instituted a metric changeover in 1975 with the use of kilometers and Celsius or centigrade, temperature readings in place of Fahrenheit. The target date for a complete switchover is 1980.

Britain's European neighbors use the metric system devised by the Paris Academy of Sciences in 1791. The country's entry into the nine-nation Common Market in 1973 increased the pressure for metrication.

A timetable of cutoff dates was published in April, 1977, after which use of imperial weights and measures for various commodities would be illegal and violators subject to fines up to 50 pounds, or $90.

The first few cutoff dates were approved by Parliament with no trouble. Now, however, some members are balking at the enforcement orders. Among the measures already approved was one requiring manufacurers to package sugar and cookies only in metric units as of April 21.

Ian Wooldridge, sports columnist for London's Daily Mail, wrote that "there must be many millions of Britons who share my total incomprehension of, and have no patience with, all matters metric."●

SENATE SUBCOMMITTEE ATTACKS ADVERTISING

HON. STEVEN D. SYMMS

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. SYMMS. Mr. Speaker, I am concerned about the current efforts of the Senate Subcommittee on Administrative Practice and Procedure to subpena confidential advertising information from the major oil companies. In the following editorial from Barron's, April 3, 1978, Shirley Scheibla points out that the subcommittee's probe could seriously hinder major corporations from doing any type of image or issue advertising and, in a broader sense, could "undermine the financial foundations of the free press."

GETTING THE MESSAGE: WASHINGTON HAS LAUNCHED A DRIVE AGAINST CORPORATE ADVERTISING

WASHINGTON.—A Senate subcommittee has just launched a hunting expedition aimed against advertising which gives corporate views on controversial issues. It also includes ad campaigns designed to improve the corporate image. Specifically, the Senate Subcommittee on Administrative Practice and Procedure has subpoenaed mountains of materials, much of it confidential and some involving trade secrets, from four major oil companies, Exxon, Gulf, Mobil and Texaco, and their four advertising agencies, Benton & Bowles; Doyle, Dane, Bernbach; McCaffrey & McCall, and Young & Rubicam. The chief executive officers of the eight firms have been ordered to appear, with the material, before the Subcommittee this Friday.

Stated purpose of the investigation is vague. According to Subcommittee Chairman James Abourezk (D., S.D.), it's to see whether the Internal Revenue Service, Department of Energy, Federal Communications Commission and Federal Trade Commission are carrying out their duties with regard to such advertising and exercising proper coordination in doing so. In fact, it looks like a thinly disguised attempt to see whether the Subcommittee can find anything to pin on the oil companies in their effort to get across to the public their side of issues. On this score, of course, their position tends to differ from that of Chairman Abourezk, who last year co-sponsored legislation to break up 18 major oil companies. The Subcommittee reportedly also plans to extend its ad investigation to such food processors as General Foods, General Mills and Pillsbury.

Whatever the purpose of the Subcommittee's probe, it is bound to have a chilling effect on all issue and image advertising. The specter of subpoena of confidential information may haunt all future dealings with Madison Avenue. Among other things, the Subcommittee wants all tapes and movies for broadcast commercials and tearsheets for printed ads since 1973, tax records involving the ads, minutes of boards of directors' meetings and corporate correspondence setting advertising strategy. Thus, compliance in itself would be punitive, even if the Subcommittee finds nothing wrong. Contrariwise, failure to honor the subpoenas would involve substantial legal expense, as well as perhaps risking a finding of contempt of Congress.

Ominous enough in itself, the Subcommittee is only part of a growing and multifaceted federal attack on advertising, one which bodes ill for future freedom of expression. It also seems to run counter to several recent U.S. Supreme Court decisions,

notably that involving the Virginia Pharmacy Board, in which the high tribunal declared: ". . . Speech does not lose its First Amendment protection because money is spent to project it, as in a paid advertisement. . . ."

However, more than free speech for advertisers is involved. After all, the press keeps watch on government. To carry out that mission, it needs the financial support of advertisers (who obviously don't control it, or they wouldn't spend their ad money to express contrary views). Taken altogether, the federal attacks on advertising strike some observers as an attempt to undermine the financial foundations of the free press.

Over on the House side, the Subcommittee on Commerce, Consumer and Monetary Affairs is in the midst of an investigation of advertising; it expects to hold hearings later this month. The House effort is concentrating on what it views as the illegality of deducting issue and image advertising as a cost of doing business.

Peter Barash staff director of the House Subcommittee, estimates that corporations spend $1 billion or more a year on advertising and mass mailings aimed at influencing public opinion on legislative matters. He cites particularly the ads of Mobil, the utility and shipping industries and mass mailings which seek to influence stockholders and/or employes. Many companies, he said, don't realize that because they constitute so-called grass roots lobbying, such expenses are not deductible. (Mobil told Barron's it takes no tax deductions for its political ads.) Barash adds that the Subcommittee so far has found inadequate IRS enforcement and significant non-compliance with the law.

IRS has gotten the message. Commissioner Jerome Kurtz wrote the General Accounting Office last December that the agency will audit half the returns filed by large trade associations (and perhaps large firms later) to see if they are violating Section 162 of the Internal Revene Code on issue and image advertising. Kurtz added: "We recognize our responsibility to audit this area because of its public policy implications, even though its revenue producing potential may be less than other issues."

Section 162 of the Code involves thorny issues concerning the difference between indirect lobbying, educational material and free speech. (The Code exempts the press.) It permits lobbying to be deducted as a business expense when it involves direct contact with the legislature, but stipulates that this "shall not be construed as allowing the deduction of any amount paid or incurred in connection with any attempt to influence the general public, or segments thereof, with respect to legislative matters, elections or referendums."

Stuart Siegel, chief counsel of IRS, told *Barron's* that so far as he knows, this has never been challenged constitutionally. Tax deductions, he said, are a matter of legislative grace. We pointed out, however, that the press is specifically exempted from Section 162. Doesn't this indicate that First Amendment rights are involved? "That is an interesting point; I really haven't thought it out," he replied. Siegel added, however, that newspaper and magazine stories and editorials deal with matters involving the public interest, whereas mass mailings, issue advertising and other forms of indirect lobbying deal with issues in the self interest of business, not the public interest. The Constitution, however, doesn't guarantee free speech only to those promoting the public interest.

Conceding gray areas in the Code, Kurtz wrote that IRS will publish clarifying rulings; it has issued four. These hold, in essence, that corporate expenses are not deductible if they seek to influence legislation through stockholders (mailing testimony of a corporate president, for instance) or through newspaper and magazine ads. An association may deduct the expense of urging its members (but not prospective ones) to contact their Congressmen. It must not deduct the cost of urging its members to contact their employes and customers on legislative matters.

Uncle Sam already has financed propaganda against advertising through the National Endowment for the Humanities. It paid for a blistering tirade in one installment of Congress by Newspaper, the gist of which was that advertising is ripping off the public and should not be tax deductible as a business expense. While we read it in The Washington Post, some 400 newspapers publish the Courses, and over 250 colleges give credits to those who read them and pass tests on them.

Here's just one of the installment's many controversial statements: "The advertising subsidy that supports and guides the cultural industry is extracted through a levy on the price of all advertised goods and services. Some call this private taxation without representation. The price is hidden in the price of soap; I pay when I wash, not when I watch TV or read a magazine."

Such views, of course, run counter to elementary economics. Advertising is essential for large volume, which, in turn, permits lower prices because of economies of scale. And advertising also encourages competition. The results, needless to add, have been a standard of living that is the envy of the world.

Spending all of one's adult life as a Washington journalist means encountering a lot of tortured reasoning. But our prize, one lollipop, goes to a 346-page study by the staff of the Federal Trade Commission, which persuaded the commissioners to vote unanimously for a rule-making proceeding to consider prohibiting or regulating advertising of sugared products on TV commercials aimed at children. A lot of money is involved, since FTC estimates expenditures of all kiddie commercials are around half a billion dollars a year. By law, the Commission has authority only to regulate unfair and deceptive trade practices. Accordingly, the study found that televising sweets commercials to children is unfair because it persuades them to consume products which are cariogenic (close in sound, but not in meaning, to the scare word, carcinogenic).

The study was especially concerned about the naivete of the extremely young. But two- and three-year olds don't go shopping on their own. This leaves it up to their parents. The staff said, however, that denying requests of babies for candy and such injures the parent-child relationship. If this establishes the precedent that the government has the obligation to step in to prevent parental discomfort in denying any request of a child, the implemations are mind-boggling.

At the Commission meeting in late February, just before it voted to proceed with the rulemaking, it heard arguments from its staff. Liberally lacing their conversations with warnings about cariogenic dangers from sweets, staffers warned emotionally that tooth decay is growing pandemic because most recent surveys indicate that 20 million Americans have full sets of false teeth. What they neglected to mention in the oral presentation is that the "most recent survey" was taken in 1962.

FTC Director of Policy and Planning Robert Reich says that his agency will be doing more to force advertisers to pay for commercials representing contrary viewpoints, as well as "corrections." A case involving whether FTC can force the marketers of Listerine to pay for corrective commercials now is on its way to the U.S. Supreme Court.

Last year the FCC ruled that Washington's WTOP-TV violated the Fairness Doctrine by broadcasting a Texaco commercial against breaking up the oil companies. As a result, the station aired without charge 30 TV spots by Energy Action which not only countered the commercials but also attacked oil industry participation in other forms of energy and equated oil executives with muggers. According to William Hesse, president of the American Association of Advertising Agencies, "Our members feel restrained because of the Texaco thing."

Well they might—and because of other aspects, too, of the federal attack on advertising. Much soul-searching reportedly is going on now in corporate board rooms and executive suites over how to meet the onslaught. Like most inroads on freedom, the moves ostensibly have a noble purpose. What could be finer, for instance, than protecting children? What could be more popular than attacking Madison Avenue? But is it really chipping away at the financial foundations of the free press and threatening freedom of speech? If such attacks proliferate, questions like these someday may have a hard time finding their way into print.

HUMAN RIGHTS

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. MICHEL. Mr. Speaker, today I am going to introduce a bill to require the Secretary of State to transmit to the Congress an annual report on the status of human rights in all foreign countries.

As you know the State Department in early February issued a report on the status of human rights in certain countries, but that report did not mention the Soviet Union, Red China, and South Africa, among others. My bill would guarantee that the Congress has access to adequate and balanced information on human rights problems in all foreign countries.

Today is May Day, traditionally celebrated by Communists. And yesterday, April 30, was the third anniversary of the conquest of Vietnam by the Communists.

It is my hope that my bill will enable the Congress and the American people to see exactly what happens to those who fall under Communist domination. Perhaps by next year, when April 30 and May 1 arrive, we will have the facts and figures available to show that April 30 is a day of infamy and that what the Communists "celebrate" on May 1 every year is their denial of human rights to all those who dare to oppose them.●

RECLASSIFYING PCP AS A SCHEDULE I DRUG AND INCREASING THE PENALTIES FOR ITS ILLICIT MANUFACTURE OR SALE

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. GILMAN. Mr. Speaker, last month I introduced H.R. 11727, a measure cosponsored by 14 of my colleagues on the Select Committee on Narcotics Abuse and Control, of which I am a member, that (1) would place phencyclidine (PCP) into schedule I of the Controlled Substances Act, thereby providing the most stringent warnings to the public regarding the use of this pernicious drug and (2) would establish within section 401(b)(1)(B) of that act, which governs penalties for nonnarcotic schedule I and II drugs, mandatory minimum prison sentences for those who unlawfully manufacture, dispense or distribute PCP or any of its analogs, derivatives or variants.

Subsequent to the introduction of H.R. 11727, a number of my colleagues have expressed an interest in this proposal. Accordingly, Mr. Speaker, today I am introducing this measure which is cosponsored by 37 colleagues.

To date, the following 50 Members have cosponsored this proposal:

Mr. Akaka of Hawaii.
Mr. Badham of California.
Mr. Beard of Tennessee.
Mr. Biaggi of New York.
Mr. Buchanan of Alabama.
Mr. Burke of Florida.
Mr. Carter of Kentucky.
Mr. Cederberg of Michigan.
Mr. Cornwell of Indiana.
Mr. Corrada of Puerto Rico.
Mr. Coughlin of Pennsylvania.
Mr. de la Garza of Texas.
Mr. Dornan of California.
Mr. Downey of New York.
Mr. Drinan of Massachusetts.
Mr. Duncan of Tennessee.
Mr. Edwards of California.
Mr. Eilberg of Pennsylvania.
Mr. Ertel of Pennsylvania.
Mr. Fary of Illinois.
Mr. Florio of New Jersey.
Mr. Guyer of Ohio.
Mrs. Holt of Maryland.
Mr. Howard of New Jersey.
Mr. Hughes of New Jersey.
Mr. Kemp of New York.
Mr. Ketchum of California.
Mr. Krueger of Texas.
Mr. Lagomarsino of California.
Mr. McClory of Illinois.
Mr. Mitchell of Maryland.
Mr. Murphy of Pennsylvania.
Mr. Murphy of Illinois.
Mr. Neal of North Carolina.
Mr. Ottinger of New York.
Mr. Patten of New Jersey.
Mr. Pickle of Texas.
Mr. Railsback of Illinois.
Mr. Rangel of New York.
Mr. Rodino of New Jersey.
Mr. Roe of New Jersey.
Mr. Roncalio of Wyoming.
Mr. Simon of Illinois.
Mr. Skubitz of Kansas.
Mr. Treen of Louisiana.
Mr. Vento of Minnesota.
Mr. Walgren of Pennsylvania.
Mr. Wolff of New York.
Mr. Whitehurst of Virginia.
Mr. Zeferetti of New York.

Mr. Speaker, a complete text of this legislation, together with my remarks, was printed in the CONGRESSIONAL RECORD of March 22, 1978, on pages 8160–8162. I welcome the support of all my colleagues on this legislation to stiffen the regulations on PCP, the most dangerous hallucinatory drug on the market, which is being consumed by so many of our Nation's teenagers.●

COMMONSENSE—WHAT EVER HAPPENED TO IT?

HON. THOMAS N. KINDNESS

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. KINDNESS. Mr. Speaker, the President of Miami University, Dr. Phillip R. Shriver, located at Oxford, Ohio, had occasion recently to correspond with the Secretary of Health, Education, and Welfare, Mr. Joseph Califano, regarding that department's "Operation Common Sense." The purpose of "Operation Common Sense" is supposedly to identify rules and regulations which most urgently need revision and clarification.

President Shriver's response demonstrates very concisely the extent of the effect some Federal regulations have upon those who must operate real world businesses and institutions. I would like to share President Shriver's response to Secretary Califano with my colleagues:

PRESIDENT SHRIVER SPELLS IT OUT FOR BUREAUCRACY

(This letter from President Phillip R. Shriver to the Secretary of Health, Education, and Welfare mirrors the frustration of higher education as it attempts to perform its role on behalf of the people of the United States under the increasingly repressive yoke of bureaucracy.)

Hon. JOSEPH A. CALIFANO, Jr.,
Secretary of Health, Education, and Welfare, Washington, D.C.

MY DEAR MR. SECRETARY. I am replying to your form letter of September 19, in which you solicit identification of those regulations, rules and procedures that I believe deserve the top priority attention of Operation Common Sense. Quite frankly, Mr. Secretary, I began to get into the specifics of this question only to find myself overwhelmed with the sheer numbers and complexities; the maze of regulations, rules, and procedures is now so tangled as to be nearly incomprehensible. Consequently, I have decided to try to reduce my concerns to the most basic, and they are these:

1. A two- or three-sentence Congressional statute seems to emerge as hundreds of pages of regulations, oftimes having little resemblance to the original.

2. The underlying, the recurrent theme of these regulations seems to be "you are guilty until you can prove yourself innocent."

3. In a manner not unreminiscent of the Jacobin phase of the French Revolution, it takes only a thirteen-cent stamp and a piece of paper to level an accusation which will then be picked up by a federal office, using federal agents and federal lawyers at taxpayers' expense, with the accused compelled to spend countless hours and countless dollars from diminishing resources in attempting to make defense. As Lorene Rogers, president of the University of Texas, pointed out the other day, it cost the University $500,000 to defend itself against a single accusation. The personal cost to the accuser was almost nothing. Even though the University won the case, how many times can it defend itself against mounting numbers of accusations, when the cost can run as high as half a million dollars for each one? It is literally easier today to plead guilty to a charge for which you are innocent and then make an out-of-court settlement than it is to defend yourself in court when you know you are innocent, win the case, and then be rendered destitute in the process. As long as the accuser spends virtually nothing and the defendant runs the risk of destitution through the sheer process of trying to prove innocense, we have a system which is anything but just in its operation.

I grew up believing in the concept of impartial justice, of the lady with eyes blindfolded holding balance beams in her hands. As those of us who are trying to operate colleges and universities across the country well understand, the balance beams have been knocked askew. Far from achieving equity, the regulations, rules, and procedures of the Department of Health, Education and Welfare and other federal departments have tended to bring us to the present jungle of inequity.

The biggest thing missing in government today is common sense. I am not sure that Operation Common Sense can find it, but I applaud you for making the effort.

Sincerely yours,

PHILLIP R. SHRIVER,
President.●

PANAMA AND PAX AMERICANA

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. CRANE. Mr. Speaker, although the Senate has concluded the Panama debate, now is a good opportunity for reflection on the issue that dominated the headlines for the past 8 months With the question of the House role still in limbo, I wish to share with my colleagues the following which appeared in a recent edition of the Wall Street Journal. There can be no doubt that there are still many unanswered questions; Jude Wanniski deals with the issue effectively and completely. He is correct that the Senate and the American people were poles apart on this issue. Let us hope that the final tally of history shows that if the American people were in the losing column on this occasion, in the long run their interests were served through the rediscovery that in a self-governing Republic, public officials are servants and the citizenry their masters.

The edition follows:

[From the Wall Street Journal, Apr. 7, 1978]

PANAMA AND PAX AMERICANA

(By Jude Wanniski)

One of the most puzzling political phenomena of the year is the wide gap between the people and the politicians on what to do with the Panama Canal.

Who doubts that if there were provisions in the Constitution for a national referendum, and one were held on the Canal treaties, that the voters would bury them? The opinion polls suggest the public opposes the

treaties by roughly a two-to-one margin. Yet the representatives of the people, in the White House and in the U.S. Senate, by astonishingly lopsided margin of roughly 70 percent to 30 percent, back the treaties, interpreted by the people as "giving away" the Canal.

Of course it's true that in a representative form of government we expect as natural the frequent discrepancies between the apparent wishes of the citizens and the votes of their delegates. This is because we expect our political delegates to weigh the intellectual arguments and passions of their constituents in addition to the numerical majority. In other words, Americans accept the idea that majority rule is not inconsistent with the notion that the squeaky wheels gets the grease.

But how can we explain this Canal voting? Not only has antitreaty sentiment among the citizenry amassed a wide numerical majority. It also commands the passion of that majority. There is scarcely any intensity among the minority of citizens who support treaties. Senators Howard Cannon of Nevada and Paul Hatfield of Montana, for example, can hardly find any of the citizens who they represent agreeing with their protreaty votes.

What's going on?

AN EXPLANATION

There must be a rational explanation. And there is, I think, an honest difference of opinion here between the people and their representatives. When you come right down to it, President Carter and two-thirds of the Senate base their decision on the idea that "imperialism" is a bad thing and that the Panama Canal (which we "stole fair and square") is a symbol of American imperialism (Teddy Roosevelt, gunboat diplomacy and all that). Furthermore, they believe imperialism is antihistorical, as witness the crumbling of the Roman and British empires.

The American people, on the other hand, still think Yankee-style imperialism is not a bad thing, all things considered. By this we'd mean an extension of hegemony not by conquest, but through superior example, leadership and salesmanship. Americans more or less think our system of government is the best in the world. For 60 years the U.S. economy has been preeminent. For a good part of that time U.S. military power has protected the interests of democracy and freedom. The U.S. dollar has been the world currency. American culture has become an international language. A benign imperialism mostly.

Nor do Americans, generally speaking, believe "imperialism" is antihistorical. On the contrary, if the world is going to be unified someone has to be in the lead. If it is not the United States it looks to the man in the street that it will be the Soviet Union. The problem with empires, like any club, is that they are good only as long as people really want to belong to them. Previous empires broke down because the costs of belonging finally overtook the benefits.

For the last dozen years or so, unhappily, the costs of membership in the Pax Americana have been rising and the benetfis have been falling. American imperialism has been getting a bad name. People are trading in dollars for yen. France and Italy are on the brink of switching to the other guys. German citizens are taking up collections to help support our tattered legions stationed there. And when Omar Torrijos rattles his Panamanian saber, our Kissingers tremble.

President Carter and two-thirds of the U.S. Senate are correct in their calculations. A shrinking Pax Americana cannot keep clients against their will. One must cut the empire down to size, smiling as we wave bye-bye to former customers. So long, Cuba. Goodbye, Vietnam and Indochina. Adios, Angola. Goodbye, Canal. Shrink the U.S. Navy to bathtub size. Ban the neutron bomb. Take what you can get at SALT, and start thinking about kissing Taiwan goodbye.

The American people are making different calculations, and seem to be saying it is too soon to throw in the towel on Yankee world leadership. Heck, we hardly had a descent run at it, and when the President and Senate reach so far down into the barrel to give away the Canal, it seems premature. Sure, if the economy continues to bleed itself with inflated currencies and debt finance we'll have no choice but to retreat, to lighten the load. But so soon?

What, though, is the alternative? It goes without saying that internal economic disintegration must be halted and real expansion renewed. But even if Mr. Carter and two-thirds of the Senate had a clue as to how this could be done, it would not be enough to boom the host country of this empire. The American failure of the last 30 years, as an imperialist host, is that it unwittingly poisoned the poor countries of the world with unfortunate advice. In the next run at a Pax Americana, this has to change.

Consider Panama. The chief reason by far that the people of Panama want the Canal is economic. In addition to getting a big bag of money to take the Canal off our hands, Panama gets the right to boost Canal tolls and milk it for everything the traffic will bear. The people of Panama seem to have a vague hope the revenues will go to reducing their domestic taxes.

Why are Panamanian taxes so high? The main reason is that for the last decade Gen. Torrijos ran the government the way Nelson Rockefeller ran New York State. Spend and tax, spend and borrow. Mr. Torrijos was advised that this was the best way to build a modern economy by his friend, Nelson Rockefeller, who a decade ago sent a team of experts to Panama to help him out. Panama's external debt is at least $2 billion and debt service takes 37 cents of every dollar of national revenue. For the most part, New York banks hold the paper. Mr. Rockefeller is the only American we know who exhibits genuine passion on behalf of the treaties and Mr. Torrijos.

A BETTER WAY

There must be a better way of redeeming Mr. Rockefeller for his dreadful advice to his friend than giving up the Canal and a lot of money. Sen. Harry Byrd of Virginia thinks the U.S. taxpayer costs will hit $10 billion before the deed is done in the year 2000. And chances are slim that Mr. Torrijos will use the money to relieve his people of oppressive taxes. He'll buy a lot of military trinkets and build a replica of the Albany Mall.

Why not pay off Panama's $2 billion debt if the government agrees to cut tax rates by 37% (the amount of revenues now going to debt service). The Panamanians would love it.

We shouldn't pin this to Mr. Rockefeller, either. He was, after all, only one of a crowd of Americans who circled the globe since World War II selling a British brand of economics. It never occurred to the American Keynesians that the British Empire crumbled under the idea that public debt and high tax rates were the correct, modern formula for growth. Mr. Rockefeller was honest. He practiced what he preached. New York has not recovered, just as the former British colonies have not recovered, just as Panama has not recovered. And observe the prosperity of Egypt 22 years after Mr. Nasser grabbed Suez from the dying Pax Britannica.

Imperialism becomes malign when the Empire disseminates poisonous advice. Lucky for us that countries like Germany, Japan, Taiwan and several others ignored our advice and kept the Western economy buoyant.

Perhaps this partly explains why there is such a gap between the people and the politicians on the Canal. The citizenry may sense that Keynesianism is on its last laps, and we'll soon abandon the idea that an American hegemony can succeed with economic theories that destroyed the British Empire. American global leadership must surely become more attractive once we stop advising the Panamas of the world to search for happiness in debt, devaluation and taxation.

This is an optimistic view. The President and the Senate clearly do not believe any of this foolishness, which is why they vote the way they do. The people haven't given up on another run at a Pax Americana, which is why they are putting up such a fuss.●

ARMENIAN MASSACRES

HON. PETER H. KOSTMAYER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. KOSTMAYER. Mr. Speaker, I rise today to commemorate the 63d anniversary of the Armenian massacres. On this day in 1915, one of the most savage events of the past century, the killing of thousands of helpless Armenian people, began.

Two weeks ago we were reminded of the tragic mass murders of thousands of innocent Jews in Nazi Germany. As we remember that tragedy we must remember as well the Armenian tragedy. We cannot help but be saddened knowing of the atrocities which took place 63 years ago.

We must recognize both of these events as lessons in history, teaching us the true value of human life and dignity. But today especially we must be thankful for the opportunity to remember the history of the Armenian struggle against the Turkish Government. Only by recalling such events can we hope to learn the mistakes of the past, and use these lessons to better prepare us for the future. The shameful murders of so many Armenians may help us to prevent such action from ever occurring again.

Let us also, Mr. Speaker, not forget the Armenian people who immigrated to the United States and whose families, although having suffered, managed to put down roots in America. We have learned a lesson from them also; that we should always strive toward human freedom, a freedom that is not only the American dream, but also the dream of all peoples everywhere.

Mr. Speaker, in my own public life I have come to know many Americans of Armenian extraction and today I join with them and on their behalf in remembering that day in 1915. Let us never forget.●

AGRICULTURAL DEVELOPMENT IN YUKON FLATS

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. UDALL. Mr. Speaker, on March 21, the Committee on Interior and Insular Affairs reported H.R. 39, the Alaska National Interest Lands Conservation Act, the most important land conservation legislative initiative in the history of our country.

An important feature of H.R. 39 is the establishment of new units of our great National Wildlife Refuge System. Creation of these fish and wildlife areas from the public lands at no cost to the taxpayer for land acquisition will protect natural habitats critical to the survival of numerous fish and wildlife species. Habitat of migratory birds, enjoyed and utilized by many thousands of people throughout the Western Hemisphere, is particularly significant in the Yukon Flats National Wildlife Range. This magnificent area, located in east-central Alaska, is one of the world's most productive wildlife areas, especially migratory waterfowl.

During the Interior Committee's consideration of H.R. 39 amendments were offered to delete large tracts from the Yukon Flats Wildlife Range in favor of what was purported to be possible agricultural development. All such amendments were rejected. The Committee found that the State and Native's have already selected over 70 percent of the high potential agricultural lands in the entire State as well as 66 percent of the lands classed as having significant agricultural potential. The bulk of the lands in the Yukon Flats have been classed as only potentially arable, so agricultural development schemes are highly speculative; furthermore, about three million acres have been selected by native corporations in the area. The Committee decided that the overwhelming national values of the Yukon Flats is its fish and wildlife resources, particularly migratory bird production.

Following is a letter from Mr. William J. Bailey, Jr., chairman of the Central Flyway Council which is composed of the directors or their designee of the State fish and wildlife agencies from Colorado, Kansas, Montana, New Mexico, Oklahoma, Nebraska, North Dakota, South Dakota, Texas, and Wyoming.

The council unanimously expresses its concern that lands will be transferred out of Federal ownership in the Yukon Flats and designated as agricultural lands.

(Text of letter follows):

NEBRASKA GAME AND PARKS COMMISSION,
Lincoln, Nebr., April 11, 1978.

Hon. MORRIS K. UDALL,
Chairman, Committee on Interior and Insular Affairs, Longworth House Office Building, Washington, D.C.

DEAR CONGRESSMAN UDALL: The Central Flyway Waterfowl Council at its meeting in Phoenix, Arizona, on March 19, 1978, was briefed on some of the considerations in disposition of D–2 lands in Alaska and particularly the Yukon Flats. Membership of the Central Waterfowl Council includes the Directors or their designee of state fish and wildlife agencies from Colorado, Kansas, Montana, New Mexico, Oklahoma, Nebraska, North Dakota, South Dakota, Texas and Wyoming.

The Council resolved unanimously to express its concern that some consideration is being given to designating some of the D–2 lands in the Yukon Flats as agricultural land and to suport appropriate action to maintain the ecological system of the Yukon Flats area since it is a major contributor of waterfowl to the Central Flyway.

Based on the best information available to the Council, the Yukon Flats is a significant part of the waterfowl production habitat of North America as well as having substantial value for salmon, moose, furbearers and other wildlife. As waterfowl production habitat, it is relatively stable and enhanced and maintained under present conditions by flooding, wildfires and relatively high summer temperatures. The fall flight of waterfowl produced in the Yukon Flats is about one-fifth of the total production in Alaska or about two million birds, many of which pass through and to the Central Flyway.

The Council believes the primary consideration in designation of Yukon Flats should be protecting the wildlife values.

The Council directed that these comments and concerns be forwarded to you, Congressman Leggett and Senator Jackson.

Thank you for your consideration.

Very truly yours,

WILLIAM J. BAILEY, JR.,
Chairman, Central Flyway Council.●

PAUL L. MILLER, SR.

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. CLAY. Mr. Speaker, I wish to take this opportunity to share with my colleagues the success story of one of St. Louis' leading citizens.

PAUL L. MILLER, SR.

Paul L. Miller, Sr. was born on August 7, 1912 in Sturgis, Mississippi. He received his early education in the rural school system in Sturgis, Mississippi. He spent his early years working as a farmer, a chauffer, and an insurance salesman. He spent over ten years working for North Carolina Mutual Insurance Company and Universal Life Insurance Company both in Mississippi and Alabama. He started as a salesman and worked his way up to management with Universal Life Insurance Company. He moved to St. Louis, Missouri in 1945 from Meridan, Mississippi to assume a management position with Universal Life Insurance Company in St. Louis. While living in Meridan he had met Mr. Eugene F. Young, the founder of E. F. Young, Jr. Manufacturing Company in Meridan, Mississippi, one of the early pioneers in the beauty industry along with Mme. C. J. Walker and Annie Malone, the founder of the Poro Beauty System. Mr. Young hired Mr. Miller as a sales representative in 1946 along with four other salesmen who were responsible for selling the Young products all over the country. During this time Mr. Miller traveled all over the country selling beauty products out of the back of his car. He often drove fifty to seventy-five thousand miles annually throughout the states of Arkansas, Kentucky, Tennessee, Mississippi, Alabama, Georgia, Florida, Southern Illinois, Texas, Oklahoma, and in several instances as far away as California.

Miller Beauty Supply was started in 1950 principally as a small mail order business by Paul L. Miller, Sr. It was located initially in the basement of his home at 1825 North Sarah Street, St. Louis, Missouri. He entered the business initially to supply non-competing items to his customers who were already buying E. F. Young products. He traveled regularly throughout Missouri, Arkansas, Kentucky, Tennessee, Mississippi, Oklahoma, and Alabama. He would sell some items out of his car and then book orders for items not carried in the trunk. These orders were mailed to his home where his wife, Alma and his son, Paul Jr., would process the orders, with Paul usually delivering the orders to the Post Office each morning prior to going to school. To supplement the mail order business a small area of the business was devoted to a store for local barbers, beauticians, and the general public to purchase these items. As the local business began to increase, the business was moved in 1962 to 4125 Easton Avenue. With Easton Avenue being a major throughfare more people became acquainted with their service and the products distributed. In addition to selling beauty and barber shops, sales were made to other small wholesalers and salesmen operating independently.

In 1963, Paul L. Miller, Sr., was seriously injured in an automobile accident while enroute to a beauty show being held in Philadelphia. The accident incapacitated him for a period of eight months. During this time the business was held together by his wife, son, and two daughters. It was during this time the name was changed to Miller & Son Beauty Supply Company. The business continued to grow steadily and in 1967 another location was opened at 3619 N. Grand Blvd. at Natural Bridge. Paul L. Miller, Jr., joined the business on a full time basis in 1968 after receiving a B.S. degree in accounting from St. Louis University, working for the F.D.I.C. as a bank examiner for three years, and completing a graduate study in management under the auspices of the American Management Association in New York. An additional location was opened at 4925 Easton Avenue in 1970 on what is now Dr. Martin Luther King Drive. A third location at 4601 State Street in East St. Louis, Illinois was opened in 1976. The company presently operates three stores, a warehouse, and employs twenty people. Sales are made to beauticians, barbers, and retail stores. In addition to items specifically oriented toward the black market the company also serves as a major wholesaler for general market beauty items manufactured by companies such as Revlon and Clairol.

Paul L. Miller, Sr., officially retired in August of 1977 as president and chief executive officer of Miller & Son Beauty Supply Co. In addition to his tenure at Miller & Son he is also active as a deacon at Central Baptist Church and serves on the boards of Gateway National Bank, New Age Federal Savings and Loan Association, Union Sarah Economic Development Corp., and the United Church Men of Greater St. Louis. Paul L. Miller, Jr. assumed the presidency of the company in 1977 and represents the second generation in Miller & Son Beauty Supply Co.

Mr. Miller Sr., is being honored at an Awards Banquet on Sunday, May 14, 1978 at the Breckenridge Pavilion Hotel at eight o'clock p.m.●

HEALTH RISKS OF ASBESTOS EXPOSURE AND CIGARETTE SMOKING LINKED

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. WAXMAN. Mr. Speaker, this past Wednesday, Health, Education, and

Welfare Secretary Joseph Califano announced a Governmentwide effort to call public attention to the health hazards associated with occupational exposure to asbestos. The Secretary cited statistics demonstrating a strong relationship between asbestos exposure in the workplace and the development of serious lung diseases such as lung cancer, mesothelioma and asbestosis.

Workplace experience with asbestos indicates that 20 to 25 percent of all workers exposed to asbestos will die of lung cancer. Two out of every ten asbestos workers will contract asbestosis or mesothelioma.

The overwhelming variable influencing whether an individual exposed to high levels of airborne asbestos will suffer from a lung related disease is cigarette smoking. A nonsmoker exposed to asbestos runs a three to four times greater chance of contracting lung cancer than a nonsmoker who is not exposed. For asbestos workers who smoke, the risks increase dramatically. In fact, a smoker exposed to asbestos is 90 times more likely to suffer from lung cancer than a nonsmoker who is not exposed. Asbestos workers who smoke are eight times more likely to die from lung cancer than a smoker in the general population.

The program announced by Secretary Califano will bring together the collected expertise of the Surgeon General of the United States, the National Cancer Institute, and the National Institute of Environmental Health Sciences. Together they will cooperate in the development of a public education campaign aimed at physicians and the over 8 million former and present asbestos workers.

The HEW campaign will stress actions which will reduce the susceptibility of asbestos workers to serious lung diseases. The campaign will emphasize that the most important step a former or present asbestos worker may take to reduce the risk of lung cancer is to stop cigarette smoking.

I applaud Secretary Califano for this initiative and urge my colleagues to give him their full support.

I request that Secretary Califano's statement announcing the new HEW asbestos education program be printed in the RECORD at this point.

STATEMENT OF SECRETARY JOSEPH A. CALIFANO, JR., DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Scientific studies have demonstrated that asbestos creates an especially high risk of lung cancer and other serious lung disease for workers who have been heavily exposed to this toxic substance.

The total number of workers exposed to asbestos since the beginning of World War II is estimated at between 8 and 11 million. Of that total, approximately 1.5 to 2.5 million are presently employed, while the remainder—between 6.5 and 8.5 million workers—were formerly employed in environments with significant asbestos exposure, including 4.5 million who worked in shipyards during World War II. Of those exposed in the past a certain number—which we cannot estimate with accuracy today—have already died, either from asbestos-related or other causes.

Federal government responsibility for regulating current asbestos exposure is lodged in several agencies—with the Occupational Safety and Health Administration bearing primary responsibility for regulating asbestos levels in the workplace and requiring employers to provide warnings to current employees.

But, to date, there has been no systematic government effort to notify physicians, past workers and others at risk of the hazards associated with asbestos exposure. Such notification is of special importance because the serious diseases associated with asbestos take a long time to develop—from 15 to 35 or more years—and because recent studies have underscored that workers exposed in the past, especially those from the war years, may just now be facing immediate, serious health threats.

As part of my responsibility to promote and protect the public health, I am today announcing several steps to inform doctors, workers and others about the increased health risks of asbestos exposure.

Dr. Julius Richmond, the Surgeon General of the United States, will immediately send an advisory letter to all 400,000 doctors in the nation. This Surgeon General's advisory will set out the nature of the health risk posed by asbestos, describe certain steps doctors may wish to take when diagnosing or treating patients, and tell physicians where they can obtain additional information about asbestos-related diseases. [Both the physician advisory and a more detailed National Cancer Institute question and answer paper are attached to this statement.]

HEW will launch a public information campaign aimed at workers and others exposed to asbestos. Dr. Arthur C. Upton, director of the National Cancer Institute, and Dr. David P. Rall, director of the National Institute of Environmental Health Sciences, will co-chair an HEW team to develop a detailed public information proposal in consultation with other Executive Departments, unions, employers and other interested parties. To the extent possible, the campaign will be targeted on those at the greatest risk. I have spoken with Secretary of Defense Harold Brown, and he has directed the Department of Defense personnel to work with us in taking appropriate steps to inform former military and Federal civilian workers in Naval shipyards.

The HEW team will consider other measures which the Department might take to deal with the asbestos problem, in addition to preparing the public information campaign. Such measures include: improved surveillance, other means of informing affected individuals such as outreach through unions and employers, development of further information for physicians, and additional research.

Asbestos is the term used for a group of fibrous materials that do not burn and are excellent thermal insulators. In the past four decades, asbestos has been used for a great number of purposes—more than 3,000 uses have been identified—with two-thirds of all asbestos used in the construction industry. Ship construction has been an activity with especially high use of asbestos, since the substance is effective in insulating boilers, steampipes, hot water pipes and nuclear reactors.

Unfortunately, numerous studies have indicated that exposure to asbestos in settings, like the workplace, where it is concentrated, significantly increases the risk of incurring four serious diseases: lung cancer, asbestosis (a progressively debilitating lung disease that impairs breathing and increases risk of serious illness or death from respiratory infections like pneumonia), mesothelioma (a cancer of the chest and abdominal cavities) and certain gastro-intestinal cancers.

Both the Surgeon General's advisory and public information campaign will suggest certain actions that individuals exposed to asbestos can take to reduce or mitigate the health threat to the greatest extent possible. They will stress that no single step has a more important effect in reducing risks from two of the most common diseases associated with asbestos—lung cancer and asbestosis—than stopping cigarette smoking.

Our best estimates of the increased risks associated with asbestos exposure are based on HEW supported studies of workers heavily exposed to asbestos before the government began to regulate asbestos in the workplace in the late 1960's and early 1970's. As a result of recent government regulation, current workers, without previous exposure, can be expected to face smaller risks than those exposed in the past.

The risks for past workers regularly exposed to asbestos are estimated to be as follows:

Lung Cancer. A non-smoker who has been exposed to asbestos is three to four times more likely to develop lung cancer than a non-smoker who has not been exposed. However, a smoker who has been exposed to asbestos is up to 90 times more likely to incur lung cancer than a non-smoker who has not been exposed, and up to 30 times as likely to incur lung cancer than a non-smoker who has been exposed.

At present, it is estimated that 20-25 percent of workers, both smokers and nonsmokers, exposed to asbestos before the era of government regulation die of lung cancer.

Asbestosis. Only individuals exposed to asbestos contract asbestosis which afflicts approximately 7 percent of the number of workers exposed in the past. Asbestosis is an irreversible and progressively disabling lung disease that impairs breathing, and individuals with the disease are much more likely to die of respiratory ailments, like pneumonia, than individuals who do not have asbestosis. The Surgeon General advises me that clinical experience indicates a person who smokes and has been exposed to asbestos faces a greater risk of developing asbestosis and of dying from a respiratory ailment than an asbestos exposed individual who does not smoke.

Mesothelioma. As with asbestosis, only those individuals exposed to asbestos appear to contract this disease. Approximately 7–10 percent of those exposed to asbestos in the past die of this cancer.

Gastro-intestinal cancer. Individuals exposed to asbestos in the past are estimated to be about twice as likely to die of gastro-intestinal cancers—including cancers of the esophagus, stomach and colon—as nonasbestos exposed individuals. Approximately 8 to 9 percent of asbestos-exposed individuals die of these types of cancer.

In addition to the 4.5 million persons who worked in shipyards during World War II, it is estimated that 500,000 to 1.4 million persons have been employed in shipyards since the War. Other occupations in which there has been significant exposure to asbestos include asbestos mining and processing; construction work involving insulation; building demolition; roofing; and automotive work in brake and clutch lining installation and repair.

In addition to the Surgeon General's advisory, information will be available to physicians through other means: Ca-The Cancer Journal for Clinicians, a publication of the American Cancer Society, is publishing this week in its March–April issue an article by Dr. Irving Selikoff and Dr. E. C. Hammond on the effect asbestos exposure has had on shipyard workers; the American Medical Association will be publishing a physician advisory in its Journal; and the attached question and answer background paper prepared by the National Institute will be made available to doctors through the American Cancer Society, the American Lung Association and all state medical societies, as well as through the National Cancer Institute itself.

The actions I am announcing today with respect to asbestos are based on a number of factors, but two of the most important are: the number of individuals affected who are unaware of the risk and the fact that

asbestos is one of the most dangerous and insidious substances in the workplace.

Given the numbers of unaware individuals affected and the serious risks involved, it is imperative that HEW—the Executive Department primarily charged with developing health policy—work closely with other Executive Departments and Agencies in devising all appropriate steps to protect the health of our citizens.

If individuals have questions about what they should do in addition to stopping smoking, they should consult their personal physicians.●

DISTURBING DEFENSE DECISIONS

HON. MICKEY EDWARDS

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. EDWARDS of Oklahoma. Mr. Speaker, a growing number of responsible Americans have reached the disturbing conclusion that the foreign policy of this administration is no longer adequate for the security needs of the United States or its allies.

Since becoming Commander in Chief, President Carter has responded to the massive and uninterrupted Soviet military buildup by: Announcing his plans for a United States withdrawal from Korea; setting the stage for a rupture of our defense treaty with Taiwan; defending his Ambassador to the United Nations when he said the Cuban military incursions in Africa provide "an element of stability"; unilaterally canceling production of the B–1 bomber; slowing down production of the MX mobile missile system; postponing further production of the neutron bomb; refusing requests for a crucially needed naval shipbuilding program; and considering acquiescence to a Soviet demand that the United States deny its cruise missiles to our allies.

The President is a man who has consistently talked tough but acted weak.

I have strongly opposed the administration's willingness to give away the Panama Canal. But I am even more concerned about another treaty—SALT II.

Although this treaty is not yet finalized, there is already strong evidence that it is heavily weighted to the Soviets' advantage. But even beyond the all-important question of strategic arms there is the equally vital question of verification and compliance.

Former Defense Secretary Melvin Laird, talking about Soviet compliance with SALT I, said:

> The evidence is incontrovertible that the Soviet Union has repeatedly, flagrantly and, indeed, contemptuously violated the treaties to which we have adhered.

Mr. Speaker, I appeal to my colleagues to think long and hard about the risks this administration has taken with our country's security and the security of other free and democratic countries around the world which still count on the United States for leadership and support. If this administration is unwilling and incapable of providing that leadership and support, then the Congress must take action.

I call the attention of my colleagues to an excellent editorial in the Wall Street Journal, "Whitewashing the Reds," which points out how the administration has covered up for Soviet violations in SALT I and is now preparing to do the same to insure ratification of the eventual SALT II treaty.

WHITEWASHING THE REDS

With Secretary of State Vance and disarmament chief Paul Warnke arriving in Moscow today for further strategic arms talks, this is as good a time as any to review two extraordinary documents their departments are now circulating back here at home. They concern compliance and verification, that is, whether the Soviets have cheated on current arms agreements and whether we can detect cheating on proposed ones.

The issues are many and complex, but a few snapshots of them tell a lot about the attitudes Mr. Vance and Mr. Warnke carry into Moscow today. Especially since U.S. reconnaissance satellites are the key "national technical means of verification," the best place to start is this section of the compliance report:

HUNTER-KILLER SATELLITES

"Antisatellite Systems. It has been alleged that Soviet development of an antisatellite system is a violation of the obligation not to interfere with national technical means of verification of compliance with SALT provisions. Since development of such systems is not prohibited, this program does not call into question Soviet compliance with existing agreements. The actual use of an ASAT system against U.S. national technical means is prohibited, but this has not occurred."

MOBILE MISSILES

Like hunter-killer satellites, mobile missiles have been in the news lately, with Soviet deployment of the intermediate-range SS–20. The State Department notes that the existing agreement covers only missile silos, not mobile missiles. It adds, "While the range capability of any missile system, including the SS–20, can be extended by reducing the total weight of its payload or adding another propulsion stage, there is no evidence that the Soviets have made any such modifications to the SS–20."

State does not add that the SS–20 is in fact two of the three stages of the SS–16, already deployed as an intercontinental missile in fixed silos and capable of a mobile role as well. There have been press reports that the extra stages to convert the SS–20s into SS–16s are being produced and stored in warehouses. It is not clear if State means to deny that SS–16 stages are being produced, or whether, in the spirit of the antisatellite section, State is merely saying the Soviets have not yet bolted the section together.

THE SS–19

While not banning mobile missiles, the first strategic arms agreement did commit the sides not to convert silos for light missiles to heavy ones. It did not, however, define "light" and "heavy," except that the U.S. unilaterally said that if considered as heavy anything "significantly greater" in size than current light missiles. The Soviets promptly began deploying the SS–19, about 50% larger than the missiles it replaced.

The problem has been solved, State now assures us, because "The U.S. and U.S.S.R. delegations have agreed in the draft text of the SALT TWO agreement on a clear demarcation, in terms of missile launch-weight and throw-weight between light and heavy ICBM's." State does not tell us that this definition legitimizes the SS–19. That is, that the problem was resolved by a change in the announced American position on what would constitute a violation.

A compliance problem arose when new silos suddenly appeared in Soviet missile fields. The U.S. objected, but, State reports, "decided to close discussion of this matter on the basis that the silos in question are currently used as launch control facilities." State does not tell us that the dispute within the U.S. government was not about how the silos are "currently used," but over whether they can be quickly converted to missile launchers. The old "launch control facilities" were retained, and the new silos have missile suspension systems and blowaway lids.

AND SO ON

Soviet testing of air-defense radars on target missiles was OK because they stopped doing it after we complained (or maybe after they finished the planned tests). Their new ABM radar on the Kamchatka Peninsula is "not strategically significant," and anyway one can argue that it is on an allowed test range (though this argument abandons a previously announced American position). Delay in dismantling missile silos when new submarines put the Soviets over the agreed numerical limits is OK because they eventually did deactivate the silos (though there is no way to escape a clear if temporary violation of the agreement.)

The problems in monitoring a new treaty would be even worse. The Soviets already have cruise missiles large enough to fly thousands of miles if equipped and programed to do so; how will we know what's inside the airframe? If their new Backfire bomber is not intended for an intercontinental role, why does it have air-to-air refueling equipment? Mr. Warnke's verification document does not even mention these hard questions. Instead, he says;

"We have had over five years' experience in monitoring Soviet compliance with the ABM treaty and the interim agreement. We have demonstrated our ability to verify compliance with the SALT ONE agreements with high confidence. This experience reinforces our assessment of the capabilities of U.S. national technical means to verify compliance with SALT agreements."

Another way to read the record was offered in the Reader's Digest by former Secretary of Defense Melvin Laird: "The evidence is incontrovertible that the Soviet Union has repeatedly, flagrantly and indeed contemptuously violated the treaties to which we have adhered."

For our part, the lesson seems to be that strategic arms agreements are nearly impossible to "violate." The Soviets will abide by gross limitations, but they are clever enough to get loopholes for the programs they have in mind. They know our programs and can negotiate to block them; we do not know their plans. Last time we were surprised by the SS–19 and the SS–16. No doubt something similar will happen this time. Whatever the legalistic arguments, the plain blunt fact is that under cover of SALT–I the Soviets have conducted a massive arms buildup.

This is the key fact lost in the new documents on compliance and verification. The most unsavory feature of the strategic arms talks is what they do to the likes of Mr. Vance and Mr. Warnke. To sell an inevitably dubious treaty domestically, they are forced to whitewash Soviet behavior. At times, indeed, they seem willing to argue the Soviet case before the American people with any argument they can get away with without being thrown physically from the room. So they dismiss new radars and delay in dismantling silos as not affecting the strategic balance, and dismiss the SS–19, SS–16 and hunter-killer satellites as not violating the agreements.

In the end, our State Department seems to be telling us that we can condone Soviet programs that legalistically violate the agreements so long as they do not affect the strategic balance, and that we can condone Soviet programs that affect the strategic bal-

ance so long as they do not legalistically violate the agreements.●

REPORT ON MARCH 1977, MEETING, INTERPARLIAMENTARY UNION

HON. JOSEPH L. FISHER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. FISHER. Mr. Speaker, the recent Interparliamentary Union (IPU) meeting in Lisbon which I attended as a delegate from the U.S. Congress proved to be valuable for me and, I believe for the Congress and the country as a whole. The IPU was established nearly 100 years ago. The United States participates under a statute passed in the 1930's, which includes regular authorization of funds for our participation. Most of the countries of the world are members of the Union. Seventy-four attended the Lisbon meetings, representing virtually all of the Western, more developed countries, virtually all of the Eastern Socialist countries, and a large number of the developing countries in Africa, Asia, and Latin America.

I was assigned to the economic and social committee, which included representatives from all 74 countries, and was spokesman for the U.S. delegation in this committee. The principal issues considered were stabilization of world prices of raw materials, the establishment of a common fund for this purpose, and what to do about accumulated debts of certain developing countries which could not be repaid on schedule. At the opening committee session I presented the gist of a memorandum from the U.S. delegation as the initial statement of its position on these matters.

I was appointed to an eight-member committee to draft a resolution on the issues before the committee, and was able in the give and take to contribute to a formulation that was acceptable to the U.S. delegation as a whole. After much debate and typical parliamentary maneuvering, the committee agreed to a resolution which was presented to the plenary session and accepted. (The full text of this resolution follows my report.)

After the drafting committee had agreed upon its resolution, I presented a statement of further views for consideration of the full committee. In addition to endorsing the resolution, I pointed out a number of potential pitfalls and difficulties. These pertained to the way in which any common fund is brought forward, emphasizing that separate commodity agreements would have to be developed simultaneously. Operating rules for decision and for use of a stabilization fund should also have to be specified in advance of country commitments. I dealt also with the danger that use of the common fund might be extended beyond a buffer stock stabilization to trying to promote general economic and industrial development and trying to operate the fund so as to maintain artificially high commodity prices. In either case, I argued, the fund would become depleted and the original purpose of it, commodity price stabilization, would be sacrificed.

Other committees dealt with disarmament, terrorism, illiteracy, and colonialism. Resolutions were fashioned on these subjects, with the one of disarmament being most hotly contested. The focus here was on the manufacture and deployment in western Europe of the so-called neutron bomb, which the socialist countries in particular opposed. The U.S. delegation, with support of others, succeeded in placing similar warnings and strictures against the Soviet intermediate ballistics missile system, the so-called SS–20, and other more or less similar systems, thereby taking the edge off the Soviet effort to castigate only the neutron bomb and the United States. In this, our delegation had support, not only from western countries, but also from developing countries.

But beyond the resolutions, which were significant in themselves, I would say the principal value of the meetings to me was to take part in an international effort of parliamentarians from many countries to agree on resolutions dealing with significant issues. This required the exchange of information, viewpoints, attitudes, and values—all of which underlie international policies and must be understood if progress is to be made toward solving major international issues. As a result of this experience, I believe I will be in a better position, particularly as a member of the Trade Subcommittee of the Ways and Means Committee, to understand and deal intelligently with the numerous trade and economic issues that this Government faces.

[Inter-Parliamentary Spring Meeting]

THE FIXING OF FAIR PRICES FOR PRIMARY COMMODITIES SUPPLIED MAINLY BY DEVELOPING NATIONS, THE MAINTENANCE OF THE PURCHASING POWER PROVIDED BY THEIR EXPORTS, AND THE ALLEVIATION OF THEIR EXTERNAL DEBTS

DRAFT RESOLUTION UNANIMOUSLY ADOPTED BY THE ECONOMIC AND SOCIAL COMMITTEE

Rapporteurs: Mr. T. Larue (France), Mr. P. Salolainen (Finland).

The 65th Inter-Parliamentary Conference,

concerned at the adverse evolution of the economic situation of the developing countries,

Noting that the trade system currently governing international economic relations contributes to increasing the inequalities between developed and developing countries, thus constituting a serious threat to world peace and security,

Recalling that the prices of the products imported by developing countries have risen considerably, while their incomes from the export of primary commodities have dropped, resulting in an excessive increase in the foreign debt of developing countries, which together with the respective interests represents a very costly economic burden for each of these nations,

Considering that the economic situation of the developing countries is itself very diverse,

Recalling the previous resolutions of the Inter-Parliamentary Union on the establishment of a new international economic order,

Deeply attached to the achievement of the objectives assigned to the integrated programme for commodities by resolution 93 (IV) of the United Nations Conference on Trade and Development.

Very concerned at the inadequate progress achieved in more than a year at the UNCTAD negotiations on individual commodity agreements and on a common fund within the framework of the integrated programme for commodities and on official development assistance,

Convinced of the relevance for the 53 countries of Africa, the Caribbean and the Pacific, of the STABEX system of stabilization of export earnings applied within the framework of the Lomé Convention,

Stressing the role of Parliaments and parliamentarians and the importance of the public opinion of all countries and particularly that of the developed countries, for the achievement of the objectives of a new international economic order,

Convinced of the importance, for the development of the economies of the developing countries, of the creation of a common fund which would be capable not only of governing commodity buffer stocks but also, within the limits to be set by the parties concerned, of taking measures for market promotion and improvement regarding certain commodities,

Concerned at the disproportionate burden which the external debt servicing of the developing countries and, in particular, of the poorest developing countries currently places on their economies,

Aware of the need to increase and to diversify the amount of official development assistance and to relax its terms,

1. Reaffirms forcefully the need for the rapid conclusion of international commodity agreements, an increase in official development assistance and more advantageous terms for the granting of such assistance, in order to contribute reliable and regular resources to the economies of the developing countries;

2. Notes the commitments undertaken within the framework of the Conference on International Economic Co-operation held at Paris in June 1977 and of the ministerial meeting of the UNCTAD Trade and Development Board at Geneva in March 1978, with regard both to the establishment of a common fund—the key instrument for the achievement of the objectives of the integrated programme for commodities—and certain aspects of official development assistance, and, in particular, official external debt relief of developing countries;

3. Notes further the points of agreement stated by the Chairman of the Negotiating Conference on a Common Fund at Geneva in November 1977;

4. Calls on the members of the Inter-Parliamentary Groups to take action in their respective Parliaments in order to encourage their Governments:

To enter into the largest possible number of negotiations on agreements on the commodities covered by the UNCTAD integrated programme;

To promote, within the framework of the UNCTAD negotiations, the establishment, as soon as possible, of a common fund capable of acting with the maximum effectiveness, without however prejudicing the legitimate interests of the consumer nations;

To take measures for establishing a relationship between the prices of basic products on the international market and those of products imported by developing countries;

To adopt measures to reduce the burden of the external debt of the developing countries and, in particular, of the poorest developing countries, to increase and to diversify the actual amount of official development assistance and to relax its terms, in

conformity with the decisions of the Ministerial Session of the UNCTAD Trade and Development Board held in March 1978;

5. Recommends that parliamentarians inform public opinion in their countries of the urgent need for effective solidarity, in particular at the financial and technical levels, between the industrialized and the developing countries, and that co-operation not confrontation is required to achieve the agreements and establish the mechanisms for a fair and orderly marketing of primary commodities.●

GENTLE READER: FOND FAREWELL

HON. PETER H. KOSTMAYER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. KOSTMAYER. Mr. Speaker, last Sunday, April 23, the well-known columnist for the Philadelphia Inquirer, Marciarose, wrote her last column.

I enter it in the RECORD today because it summarizes the contribution she has made to so many of us for so long.

Indeed as one reader said, she was a "window on the world." That she was, Mr. Speaker, for millions who never saw what she saw, heard what she heard, felt what she felt, or went where she went.

She wrote in the words of F. Scott Fitzgerald "of the inexhaustible variety of life."

Fortunately for us all she will continue to be heard, Mr. Speaker, and listened to as well.

GENTLE READER: FOND FAREWELL

(By Marciarose)

I have been looking through some of my old columns, which is not the idle indulgence it might at first appear to be.

I have been leafing through the old papers and musing over past articles because with today's edition this column comes to an end.

And I will miss it.

For 3½ years, it has been an invitation to adventure and discovery, a passport to people and a mandate to do what I enjoy the most—asking questions, exploring ideas and just plain talking to other people.

When I first started writing, however, I was really scared by what I had undertaken. As a television broadcaster, I dealt with words that disappeared into the ether. Now the words were going to come back to haunt me,, locked in print, rough edges and all.

To make things easier, I promised myself that I would have my first column completed two weeks before the scheduled start Sept. 15, 1975. It was a very sensible idea.

But at 3 a.m. on Sept. 15 I was still writing the first column—a pattern that has not changed markedly in three years.

THE PEOPLE, YES

Those beginning days occurred before the total "people" explosion, which now blankets us, had hit newspapers and magazines. I knew from my own insatiable curiosity that what most fascinates people is other people. And that is what I wanted to write about, but not with lots of dots and dashes and gossipy one-liners.

That style could never transmit to you the feelings that I wanted to share about the spirit and humanity of Hubert Humphrey, the calm of Karen Quinlan's priest, the exuberance of Liza Minnelli, the wit of Prince Philip, the smarminess of Truman Capote or the beauty of the empress of Iran.

There were also hundreds of people whose names were not as familiar who were exciting to write about, too. People who sold antiques, sang in little bistros, came through mental illness to sculpt again, ran for minor offices or made grief therapy their life's work.

Wherever I went, whomever I met, whatever I did, my sense of the column was ever present.

It lent a cutting edge to supper at the mountain retreat of the prime minister of Portugal to know that I could share with you my observations about his courage. Talking with Cornelia Wallace about her life with her paralyzed husband was all the more intense because I would be writing about it. And when, minutes before we were due at the first state dinner at the Carter White House, we discovered that my husband had left his required "black tie" at home, we giggled at the disaster, knowing what fun it would be in print.

It has been a joy to me to poke around my adopted city, in which I feel such pride, and to report its latest happenings.

I glow at each new cultural addition to our city. I am delighted by its gastronomic revolution; I am continuously enchanted by its infinite variety, civility and grace. And I confess, too, that I have loved the warmth, interest and support of the many people who have made me a part of their lives.

The street corner conversations, the letters, the cards and the phone calls have all gone toward heightening my sense that while I am writing I am really talking with friends.

WINDOWS ON THE WORLD

About a year and a half ago, The Inquirer's letters to the editor department published a reader's letter that thanked the paper for my column and said that I served as his "windows on the world."

I have been thinking of that letter today, and I realize that the opposite is true. It is the readers who have been my windows on the world. You have given me the reason to grow in other directions, to expand my own horizons and to experience new adventures.

I will continue to revel in Philadelphia's progress, to discover new offbeat boutiques and restaurants, to go to the theater, the galleries, the happenings and to talk with politicians, writers, artists and entertainers.

I will continue to enjoy all those experiences to the fullest. What will be missing for me, however, will be the unique opportunity that this column has provided—the joy of sharing those experiences with you.●

STATEMENT OF CHAIRMAN AL ULLMAN, COMMITTEE ON WAYS AND MEANS, WITH RESPECT TO THE RULE TO BE REQUESTED FOR CONSIDERATION OF H.R. 11986, THE NOISY AIRCRAFT REVENUE AND CREDIT ACT OF 1978

HON. AL ULLMAN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. ULLMAN. Mr. Speaker, on April 24, 1978, the Committee on Ways and Means reported H.R. 11986, the Noisy Aircraft Revenue and Credit Act of 1978. In general, the bill reduces the present 8-percent airline passenger ticket tax and the 5-percent air freight tax by 2 percentage points, and suspends the present $3 international departure tax, for a 5-year period. In place of these reduced or suspended taxes, the bill imposes 2-percent domestic passenger and freight taxes and new international departure and air freight taxes on airline operators, with a mandatory pass-through of these taxes to passengers and shippers. Airline operators would receive a refund or credit against the tax to the extent that investments are made to retrofit or replace aircraft which fail to comply with FAA noise standards.

I take this occasion to advise my Democratic colleagues as to the nature of the rule that I will request for consideration of H.R. 11986 on the floor of the House. The Committee on Ways and Means specifically instructed me to request the Committee on Rules to grant a closed rule for consideration of H.R. 11986 which would provide for:

First, committee amendments which would not be subject to amendment;

Second, 2 hours of general debate, to be equally divided:

Third, waiving all necessary points of order; and

Fourth, one motion to recommit with or without instructions.●

BETTER HEARING: AN INSPIRATION

HON. MENDEL J. DAVIS

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. DAVIS. Mr. Speaker, during the period, April 12 through 15, 1978, the National Convention of the Hearing Industries Association was held at the Hyatt on Hilton Head Island in South Carolina. On one of those days, it was brought to the attention of that body that Fred W. O'Green of America's 60th ranking industrial firm has had a hearing impairment since he was 5 years old, and would live in a world of total silence where it would be impossible for him to function without electronic assistance. His company, Litton Industries Inc., of Beverly Hills, Calif., is a respected employer in my State and 35 others in this country as well as more than 20 other countries. Fred O'Green is one of this year's poster persons for the information campaign of the Better Hearing Institute here in Washington, D.C. He is an inspiring example of human courage and tenacity, one who refused to give up and through the wonders of technology he led a contributing, participating and full professional life. The talk given about him to the Hearing Industries executives was made by Col. Barney Oldfield (USAF Ret.). And for what it might do to encourage others, I offer those remarks and urge the Members to read them.

REMARKS OF COL. BARNEY OLDFIELD

Members and friends of the Hearing Industries Association: How lucky can I be? I'm here among nice people in Hilton Head, South Carolina, representing Litton Industries' President and Better Hearing Institute Board Member, Fred W. O'Green. He found he couldn't be here, because of some chores he has to do in Europe. It took him a lot longer to get there than it did for me to get here. And the tasks which face him there are bound to be much more difficult than mine are here. Beyond that, he can't monitor what I'm about to say about him which might embarrass him—but it's the sort of thing you should know in order to understand how important he feels you are.

You have been very much a part of his success story. I know he would want me to say that. Because of the fantastic items you people have manufactured, and improved on, and continue to better through the years, he has known one of the fullest of widely ranging professional lives in this country. Without you all, it couldn't have happened!

Fred has only worked for three companies. Each one thought him a real talent, and he proved those assessments to be correct. He was that kind of executive able to grow to meet the requirements of the job he was on, and the next one he was given—no matter how demanding, how larger, or exotic.

When the Russians put up Sputnik I, he was one of the key Americans selected to get us back in space competition, and eventually ahead in that race. He became the first individual cited by our Air Force Systems Command for his early work in satellite programs.

He came to Litton Industries in 1962, which was a lucky moment in our corporate history. He worked his way up to the Presidency of the corporation. He has played a most significant role in our recovery from recent difficulties, and the stability and vigor with which Litton faces the world today.

At no point along his amazing career when he was being considered for each major, new responsibility has anyone ever asked if he could hear. If anyone had phrased that question he would have had to say that on his own—without electronic assistance—he could NOT!

Fred is a man who loves stories, tells them well to make others laugh, and laughs louder than anyone else at the ones he hears. He would be first to see kinship with the oldtimer whose hearing was deteriorating, so he went to his doctor for a checkup. After the usual audio tests, the doctor wanted a current profile update on him, his habits, customs and lifestyle. Did he drink? Sure, two bottles of whisky a day. Did he smoke? Of course, two packs of cigarettes a day. Sex? As often as possible, but never more than twice a day. His doctor was shocked and told him so, and said he would just have to cut all that out! "What," the oldtimer said, "just so I can hear a little better?"

Fred O'Green had his own quiver of arrows in the form of executive talents, and through you all, HE has been able to hear more-than-a-little better.

For how long has this shadow of silence fallen over him?

One thing sure about a top executive as visible as he is, is that he is tremendously busy. But he also gets a certain kind of mail, and no matter how involved he is, he answers it promptly. These are the letters he gets from youngsters who have hearing problems, and he knows how much extending hope and reassurance to them can mean.

Not long ago, he had one from a boy in Findlay, Ohio, who wrote:

"DEAR MR. O'GREEN: I am a student at the Howard School for the hearing impaired. We are doing a project for American Heritage Day. We know that you are hearing impaired. Will you help us? Will you please answer these questions? When did you lose your hearing? Do you have a hearing aid? What kind of a hearing aid do you have? Are you deaf or hard of hearing? Where did you go to school? Have you had any problems because you are hearing impaired? Could you tell us about your work? Thank you for helping us. Your friend, Eddie Wilch."

Fred O'Green at that moment was deeply into a hassle over a multi-billion dollar contract when that letter came. But he took the time to write Eddie thanking him for his letter on a subject which he described as of great importance to them both. The exact cause of his hearing loss, he said, probably derived from such childhood diseases as measles or mumps. "My hearing loss began when I was a youngster and was first detected when I began to use the telephone, having to use my right ear instead of my left ear which would have been more common for the old-fashioned telephones of that way. . . . my hearing loss in my other ear began to show itself after I had finished school, graduating from college in 1943. By 1947 when I was 26 years old I went to the Hearing and Speech Clinic at Johns Hopkins in Baltimore. I learned there of my need to begin wearing a hearing aid, and purchased a Zenith hearing aid at that time. Since then I have worn several Zenith aids and at present wear one made by Siemens because of its excellent amplification capabilities in a small package. My present position is that of a total or near-total loss in my left ear, and a very, very severe loss in my right ear to the point where I would be non-functional on a hearing basis without an aid. I have had a Stapes mobilization performed on my left ear and have had no operations on my right ear. I wear a behind-the-ear aid most of the time, and a body aid under certain circumstances when noise background is very high. I went to grade and high school in Mason City, Iowa. I graduated from Iowa State University at Ames, Iowa and finished my Master's Degree at the University of Maryland. As present I am an executive in a very large company, serving as President. The kinds of work I do are varied and cross many disciplines. My work definitely involves the ability to communicate with people on a constant basis. I would guess that all who have hearing problems experience certain difficulties as a result. My answer to your question is that I do not feel I have problems because of impaired hearing. I encourage all who have hearing impairments to recognize them only as a physical defect and to adopt an attitude which will permit them to achieve a happy and successful life in spite of any difficulties they may encounter.

Sincerely,

FRED W. O'GREEN."

In that letter to Eddie Wilch, he went well beyond just using his personal accomplishments as beacons of hope and inspiration. He stepped back in time to a close relationship with his young correspondent, let him sense the 5-year old who was just discovering the telephone, but his limitations in its use. There was the possible kinship of a measles and mumps experience. There was the moment of graduation from two major Universities, being ready and eager to take on a world, but aware of its all-important sounds and human voices were denied him. These are the bleak plateaus on which the Eddie Wilchs and Fred O'Greens stand, but there is comfort in knowing they are not unique, and they are not immovable obstacles. Having conveyed this essence of courage, and with his credibility to re-enforce it, a Fred O'Green could go back to his hassle over a contract. But there in his mind must have been the thought that perhaps he just may have written to a future company President or Chairman of the Board in the making.

Naturally, with all this known to him as a possibility and better than most, he wanted to be sure that as I am here on his behalf that you are thanked for what you have done and continue to do in the Hearing Industries Association. He has been a long time believer in the programs which are pushed and made possible by Better Hearing Institute. In the past year, the Better Hearing Institute has cajoled more than $4,000,000 in public service time from our country's radio and television stations, more than $20,000,000 in the past five years to raise the level of understanding for those with hearing troubles. The continuance of this effort is crucial, and he hopes you will all search your consciences and your treasuries to the end of increasing contributions in this sector.

The deaf, or those with severe hearing restrictions, have many an uphill battle still to win. The Fred O'Greens indicate to us how much is possible, but there are hundreds of others whose stories are heart-rending. Out our way, we had a deaf couple who had their youngster taken from them, the fear being that the child would never learn to talk. Court action became necessary to restore the family unit, with the child getting speech instruction from other quarters. When we consider that about 10 percent of the U. S. population encounters audio difficulties, we are addressing ourselves to no small fraction. Our public school system is often unable to deal effectively with such afflicted children, and higher education even less so because shortages of teachers and interpreters in this area are considerable. The deaf consumer has hard going, often penalized by insurance companies who shy away from coverage of deaf drivers. Our Federal Communications Commission says 13,000,000 people require special telephone services. The deaf are challenged when they come up for jury duty. The list of shortcomings which seem to accent rather than relieve this kind of handicap stretch and grow daily.

An entity such as the Better Hearing Institute is extremely "good business" for the millions who need and benefit from its persistence. The more the word is spread to the general public, the more appreciated your kind of manufacturing effort will be. A combination of understood need and an infrastructure which can provide and insure ever advancing technologies attracts funding as iron filings to a magnet. The Better Hearing Institute is a round-the-clock, unflagging story teller and placer of this information and alternatives for all those who can see and hear, to see and hear.

Litton itself is a beneficiary of the hearing business. A part of our heritage comes from two men with hearing shortcomings, and we literally reach around the world by means of what they gave us. One was a man from Milan, Ohio named Tom Edison, who gave us the motion picture, and the other, Lee De Forest, of Council Bluffs, Iowa, whose inventiveness brought about the audion tube. The audion tube was the key to making possible the long distance telephone, radio and television networks, and sound and talk on the motion picture screen. Both men had a deep interest in amplification, one giving us a second dimension of a visual—movement—and the other, the means for the screen to speak and project natural sound loudly to a whole world. From this wedding of two men who did not hear well, what is now the Westrex Division of Litton Industries was born. More than 250 nominations for Academy Awards in the category of Best Sound have been Westrex-assisted over the years, and four of the five nominations up for decision earlier this month had Westrex help. When the U.S. Postal Service brought out its 50th Anniversary of Talking Pictures stamp last October, Litton was deeply involved in that commemoration along with all the motion picture industry. We continue to be very much in the action of movie studios around the globe helping all peoples everywhere hear, be informed, entertained and made an audience in the truest sense of that word. In part, it was Lee DeForest's inability to hear well which spurred his quest for many related technologies which provided bridges to fuller lives for some of us, and a way out of stillness for the less fortunate among us.

When I was a youngster I had a favorite cousin who was born deaf. She became one of the most revered and respected teachers at the Omaha School for the Deaf. She was older than I was, and she fascinated me because she was a keen lipreader. In all those jum-

bled enthusiasms which are plentiful among the young prone to start talking in the middle of their thoughts rather than beginning at the beginning. I used to come to her with absolute cascading torrents of words, and she always knew what I was saying—seeming to sense it all in context before I got it out. And she loved movies—they were silent then—and she used to take me. Afterward she would tell me about the titles of those old movies, that the actors who were credited with saying them didn't really say that. She got more from the movies than others did because she could read lips, and I was made wiser for knowing her. I thought how wonderful it was that rather than losing anything by deafness, she gained a whole new avenue and dimension in understanding. Years later, when I got in the public relations business and had to advise people going on TV talk shows, that favorite cousin's earlier admonitions have been useful. For instance, never trust a microphone even when they say CUT, it may still be on; and even if it's not, watch your language while the camera stays on the principals and the credits roll. There may be lip-readers out there!

And if I may be personal—stepping away from my role as Fred O'Green's surrogate, I want to thank you all myself.

My mother is 91 years old, going on 92. Had it not been for hearing aid manufacturers and suppliers like you, she would never have been able to hear me when I have talked to her these last 21 years. Thank you for making that difference!●

HEW TASK FORCE REPORTS ON THE TREATMENT OF WOMEN UNDER SOCIAL SECURITY

HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. FRASER. Mr. Speaker, at the request of the Congresswomen's caucus, HEW Secretary Joseph Califano created a task force to study the treatment of women under social security. The task force released its report in March and has requested public comment on its work.

Secretary Califano directed his staff to begin a new study, required by the Social Security Amendments of 1977 (P.L. 95–216). Since this study will build on the work of the initial report to the Congresswomen's caucus, public comments now can be an effective way to guide its direction.

Congresswoman MARTHA KEYS and I believe from our work on our own reform plan, that the available knowledge in the whole area of women and social security is inadequate. We sought the expertise and assistance of HEW by encouraging an effort on the part of the Congresswomen's caucus to secure this report as well as the legislation in the 1977 social security amendments requiring an additional 6-month study.

For over 2 years now, we have been involved in developing, improving, and explaining our reform legislation. The Fraser/Keys plan has gained national attention as the only comprehensive reform option currently before Congress.

Our bill embodies an "earnings-splitting" concept. It begins by assuming that marriage is an economic partnership. Both spouses enable income to be earned so both should have equal access to any benefit associated with that income. This assumption leads us to a reform proposal that would allow couples to combine income annually, each being credited on their own social security wage records with an equal portion of the total.

Through this plan, if only one spouse worked in covered employment in a given year, social security contributions and credits would be divided between the wage records of both spouses. This way, both spouses would continue to build wage records and the spouse working in the home would no longer forgo retirement, disability, and survivor insurance because of her absence from the paid labor force.

This "earnings-splitting" notion is relatively new and has only until the past few months been scrutinized with any intensity or sophistication. We drafted our plan as a vehicle to begin explaining and testing the concept, not as a perfect piece of legislation ready for immediate enactment. We have sought these studies hoping they might aid us in perfecting our plan.

The task force report is divided into three parts. The first, "Changing Social Trends and Description of the Major Features of the Social Security Program," presents a statistical survey of changes in both the labor force participation patterns of women and their marital status along with a description of how the social security financing and benefit structure works.

The second part, "Issues and Suggested Approaches," identifies 10 issues relating to the treatment of women under social security. These issues, the source of women's problems with the system, are grouped into three areas. The first group includes issues of fairness among different types of retirees, for example, fairness in the benefit levels of one- and two-earner couples based on contributions. The second group covers issues related to gaps in coverage of homemakers and the third group covers issues of fairness and adequacy of protection for divorced, separated, and widowed spouses.

The third part of the report offers an analysis of eight approaches to resolving all or some of the 10 issues. The framework in which each approach is analyzed first identifies which of the 10 issues each proposal addresses, how each plan would work, how it responds to each of the issues and its other significant effects.

The final section of the report contains six appendices, most of which provide background and data relating to the treatment of women under social security. The final appendix F of this 133 page report is a two page presentation of potential costs of each of the plans.

Our responses to the task force report fall into four categories. First, gaps in the general description of social security and subsequent biases implicit in the report. Second, a response to the report's discussion of the Fraser/Keys bill. Third, we respond with dissatisfaction to the superficial cost estimates and, fourth, raise specific questions that ought to be answered by any subsequent study.

Gaps and Biases: The entire report is admirably lucid given the complexity of the system and any plan to reform it. However, the report avoids acknowledgement of the dual goals of the social security system. These goals are generally defined as "individual equity" and "social adequacy."

Individual equity refers to the goal that, since workers pay for their retirement insurance from wage contributions throughout their work lives, the size of the benefit should be related to the amount of total lifetime contributions. Social adequacy refers to the goal of providing the security of a minimum income floor to all families when they loose access to earned income.

Beginning with the report's introduction and continuing throughout, the purpose of social security is identified only as an earnings-related system (which is a function of the individual equity goal), ignoring the balancing effect of the weighted benefit formula (which is a function of the social adequacy goal).

This is a serious omission because an understanding of both the individual equity (represented by the earnings-relatedness of the system) and the social adequacy (represented by the weighted benefit formula) functions of the social security system is imperative when evaluating the relative merits of reform plans. Social security is not and never has been a purely wage-related program. The welfare features of the program have existed since its enactment and the tension between these two goals is reflected in the benefit and taxing changes which have occurred since the 1940's.

To omit discussion of the social adequacy element of the program has the effect of analyzing the reform plans only as they affect the individual equity goal. For example, the analysis of each reform plan, while giving great attention to the effect on earnings replacement rates (the amount of preretirement earnings that would be replaced by social security benefits), offers no discussion of previously vulnerable populations that might be protected. The underlying biases reflected in much of the report would be removed or diminished if the discussion about the dual nature of the system became more central to each analysis.

Analysis of Fraser/Keys plan: In general the report's analysis reflects a reluctance to view social security as portable. We developed a plan that would update social security records annually because marital status, salary levels and work patterns change from year to year. The assumption implicit in the entire analysis of the Fraser/Keys plan is that people are either two-earner couples, or one-earner couples, or single, and that they remain in this state for their entire lives.

The reality is quite different—people are single and work in covered employment, they marry, they may or may not have children, both members of the couple may or may not work at different times during the marriage, they may divorce, one of them may die, become disabled or leave the marriage. The marital situation is not static and social security must reflect this pattern. We developed our proposal to adjust to reality, but the analysis tells us nothing

about how the plan responds to this need for portability.

The report also does a serious injustice to the Fraser/Keys plan by offering only a cursory description and admitting that critical features of the plan were omitted from the analysis. This is followed by a section identifying how the plan responds to issues. The analysis fails to describe why the plan has those results and whether they might be intended or unintended and which of those results may have been altered had the complete proposal been analyzed. We are left with no tool to learn what feature of the plan might be modified to change an identified effect.

The report identifies the resulting disability coverage the Fraser/Keys plan offers for homemakers as a supplement to the primary earner's wages if the unpaid or low-paid spouse became disabled or retired first. While this description is not inaccurate, it is, in fact, misleading. That homemaker may well have made substantial payments into the system at various times during her life. A more appropriate description of this effect, flowing from the proposal's conceptual framework, would describe this benefit not as a supplement to the primary earner's wage but as income to replace the lost services and past wages of the homemaker and the loss of potential future wages due to her disability. The approach taken by the report seems to reflect a bias against the fact that people's work lives are not static and the notion that marriage is an equal economic partnership.

In describing the administrative complexities the Fraser/Keys plan might involve, the report raises a question about enforcement of earnings splitting. This discussion ignores the fact that the bill ties the decision to split earnings for social security purposes to the decision to split income for tax purposes. This is important to note because it highlights the precedent for income splitting found in our tax system and clarifies the procedure for implementing an income-splitting plan. Again, by ignoring this feature of the proposal, the analysis raises false questions about enforceability that needlessly mislead the reader.

Appendix F—Costs: The cost estimates are inexcusably inadequate. Although the report describes the estimates as preliminary, there should be a description of assumptions used in even preliminary estimates. We have no idea what version of our plan was costed out and how to compare it with the estimates of other plans. While we may see that one plan costs twice as much as another it may also be that one plan's scope is twice that of another. Perhaps there are other offsets that should be identified. In short, the report seems to be comparing apples and oranges and should never have released estimates with such inadequate supporting and descriptive information.

Specific Questions: The report requires further exploration and documentation of the following:

First. How often, in two-earner couples, would the absence of the woman's earnings put the family in poverty? This data would provide us with an understanding of the relative importance of working women's wages. There is increasing evidence that most families are two-earner families many times during the marriage.

Second. While the report contains some note that women move in and out of the labor force, to what extent does this occur? Since this kind of work-life behaviour seems to be the major source of gaps in coverage for women and since it also is increasingly predominant in U.S. life, it ought to be addressed in greater depth.

Third. How many women are poor? We know that the majority of old age supplemental security income (SSI) recipients are women. Why? Because they lack social security coverage or because their social security payments are so low that they still qualify for SSI? How many of the retirees receiving the minimum social security benefit are women—excluding double dipping Government workers?

Fourth. Who collects survivor and retirement benefits early? Are they mostly women?

Fifth. How many women have worked in social security covered employment but do not qualify for their own benefits? How many men?

Sixth. How many children today are collecting survivors' benefits on the basis of their mother's coverage? How many children are collecting as a result of their father's coverage? Are the benefits for survivors consistent in all plans?

Mr. Speaker, Congress must begin putting together a reform plan that will bring greater equity to the social security system. For this reason, the availability of fair and thorough analyses of reform options is critical. We need options analyzed, with reliable cost estimates of each component, so we can improve the work already begun.●

FINANCIAL STATEMENT

HON. ABNER J. MIKVA

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. MIKVA. Mr. Speaker, following is a statement of my net worth, earnings, and taxes paid for 1977. I am making this public information as I have in previous years.

FINANCIAL STATEMENT—NET WORTH STATEMENT OF CONGRESSMAN ABNER J. MIKVA, AS OF MAY 1, 1978

ASSETS

Home at 1015 Sheridan Road, Evanston, Ill.:	
Purchase price and improvements	$80,000
Less mortgage at Exchange National Bank	41,000
Equity	39,000
One-half interest in house in Lakeside, Mich.:	
Purchase price	17,500
Less loan at Continental Illinois National Bank	11,000
Equity	6,500
Cash in bank:	
Sergeant-at-arms checking account	1,000
Equity in pension funds:	
State of Illinois	5,000
U.S. Congress	30,000
American Bar Association retirement plan	2,000
Stocks and bonds:	
Unarco Corp. 400 shares at 11¼	4,500
State of Israel bonds—purchase price	3,000
Executive House debenture	400
Harper Court bond	100
Carson's, 111 shares at 22½	2,500
Cars, furniture, miscellaneous	10,000
Interest in real estate joint venture, Chicago, Ill	25,000
Total assets	129,000

LIABILITIES

Loan from Exchange National Bank of Chicago	3,500
Loan from Amalgamated Trust and Savings Bank	2,000
Loan from National Bank of Washington	4,000
Total liabilities	9,500
Net worth	119,500

FAMILY INCOME STATEMENT OF ABNER J. MIKVA FOR 1977

Income as Members of Congress, Abner J. Mikva	$54,275.00
Salary from Evanston School District, Zoe Mikva	13,569.70
Dividends	772.24
Interest income	1,149.50
Honorariums	4,713.00
Net taxable capital gains	5,427.23
Total income	79,906.67
Less dividend exclusion	200.00
Less tax deductible expenses, losses, personal exemptions and deductions	23,553.41
Net taxable income	56,153.26
Income taxes paid:	
U.S. (joint return)	18,566.77
Illinois (joint return)	1,809.87

●

THE VANCE STYLE

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. FASCELL. Mr. Speaker, one of the most unheralded, but effective, members of the President's Cabinet is Secretary of State Cyrus Vance. He has been working diligently to soothe international trouble spots, maintain harmonious relations between the United States and other nations, and otherwise promote a sound and beneficial foreign policy.

Among the factors contributing to Secretary Vance's success in these endeavors is his personal "style"—a low-key blend of expertise and earnest judiciousness. This was examined in a recent editorial in the Christian Science Monitor, which concluded: "The Vance style is in tune with history."

I am sure our colleagues will be interested in these comments:

[From the Christian Science Monitor, Apr. 26, 1978]

THE VANCE STYLE

Kissinger he's not. Nor is Kissinger the man the moment calls for. Cyrus Vance increasingly looks like the right Secretary of State at the right time. His style does not draw attention to itself. But if people listen to him, at home or abroad, they can gain a valuable feeling for living in today's complex, ambiguous international community.

Perhaps Mr. Vance has been traveling too much, especially considering the meager results disclosed so far from his latest swing abroad. But he is a reluctant barnstormer. We can't imagine President Carter saying to him what President Eisenhower apocryphally said to the wide-roving John Foster Dulles: "Don't just do something, Foster; stand there!"

Mr. Vance's diplomacy shines less in public than in encounters of the more important kind—with other diplomats in sessions designed to clarify positions and prepare agreements. He does not face the cameras as a supersalesman. He does not pluck or stroke the strings of the press with the virtuoso Kissinger touch. But on the trip from which he returned this week he was said to be able to relax a little more with reporters. He will no doubt communicate better all the time.

But Mr. Vance ought not to lose the sense of earnest judiciousness that can inspire confidence not only in his diplomatic opposite numbers but in a public fed up with the foreign policy deceptions and exaggerations of the past. When the Secretary returns from Moscow, saying there is good reason for maintaining confidentiality on his arms-control talks there, he inspires belief rather than doubt. His explanation makes sense: that progress could be deterred because the Soviets would regard U.S. airing of the information as a propaganda move.

But withholding the points of SALT II agreement or disagreement from the press and public makes it all the more essential that Secretary Vance's urgings against leaks be honored. The SALT debate has been damaged and distorted in the past by opponents' use of leaks to undercut proponents by getting out information first, and sometimes mistaken information, in a negative context.

On the larger question of détente, it seems clear now that Kissinger, not to mention Brezhnev, oversold the prospects several years ago. The subsequent slackening of détente seemed worse than it should have. Détente can hardly help but continue to be an up-and-down situation as long as America and Russia are ideologically so far apart.

By not claiming too much, Mr. Vance contributes to present and future realism as the precarious process continues. Nothing is monolithic any more. Nations have to get used to living together while representing shifting shades of a wide political and economic spectrum. It is a time for coolness in negotiation along with strictness in adherence to basic principles. The Vance style is in tune with history.

USE OF U.S. CLUSTER BOMBS

HON. PAUL N. McCLOSKEY, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

Mr. McCLOSKEY. Mr. Speaker, following the extensive public discussion of Israeli's use of U.S.-supplied cluster bombs (CBU's) in civilian areas of southern Lebanon last month, I thought the House would be interested in the following letter I received from Israel's Ambassador to the United States, Simcha Dinitz:

APRIL 20, 1978.

Hon. PAUL N. MCCLOSKEY,
U.S. House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN MCCLOSKEY: I thank you for your letters of April 10th and April 17th. I have communicated with our Ministry of Defense in order to be able to give you an authorized reply.

First, with regard to the interview of Mr. Joseph Rom, Member of Knesset, on the PANORAMA Program of April 17th. After checking the verbatim record of Mr. Rom's interview, it is clear to me that Mr. Rom referred to the Mutual Defense Agreement of July 1952, and treated the use of the cluster bombs by Israel under the terms of that Agreement.

Mr. Rom was evidently unaware of the additional secret assurances that were communicated by us to your Government on December 16, 1976, *under which the use of the CBU was not permitted in an operation such as the one that took place in Lebanon.* (Emphasis added.)

Subsequent discussions were held between our two Governments on this matter and a further exchange of Notes took place confirming the assurances given by Israel with regard to the use of the CBU's.

I have apprised Mr. Rom of the existence of these secret assurances, of which he was unaware at the time that he appeared on the program.

With regard to your earlier communication of April 10th and the enclosures to it, I can now report to you the following on the basis of the information that was transmitted to me by the Ministry of Defense in Israel:

On a number of occasions, during the operation in Lebanon and before the ceasefire came into effect, when artillery fire and Katyashua rockets were fired unceasingly on our civilian settlements and villages in the north of Israel, CBU bombs were used by the Israel Defense Forces against those artillary units and field positions.

The Ministry of Defense has further authorized me to state that CBU bombs were not supplied to Ethiopia.

I trust that the above information will clarify the questions you put to me.

Sincerely,

SIMCHA DINITZ,
Ambassador.

The House will note that Ambassador Dinitz clears up two previously uncertain facts:

First, Israel did violate an agreement with the United States that U.S.-supplied CBU's would not be used in an operation such as the Israelis mounted in southern Lebanon, and

Second, Israel has not supplied CBU's to Ethiopia as was reported in the Washington Post and Star last January 17 and 18.

With Ambassador Dinitz's clarification of these points, I believe that the matter can be closed on the understanding that Israel will not again violate the very restrictive limitations the United States has required as a condition of our past delivery of CBU's to Israel. It would be my hope that the United States would cease supplying these weapons to any nation in the future save under the same limitations that have been imposed on Israel.

These limitations are precise in prohibiting use of CBU's against guerrilla forces operation out of a civilian-occupied area such as southern Lebanon where over 400,000 Lebanese resided in the area attacked by the Israeli forces. Palestinians also resided there and without question, armed Palestinian guerrilla units numbering perhaps 15,000 operated from this area. But, as Israeli scholar Zeev Sternhal of Tel Aviv University recently wrote:

> The massive attack of a modern army on a guerrilla movement is not necessarily efficient and does not always achieve good results.

This is precisely the lesson we learned so painfully in Vietnam between 1965 and 1973.

Mr. Speaker, all of us have deplored the terror tactics of the PLO, and we, both as a nation and as individuals, are committed to the survival, security, and prosperity of the one true democracy of the Middle East.

Likewise all of us have Jewish constituents, whom we respect as friends as well as fellow citizens of superb commitment and concern, for the United States as well as for Israel. We deeply sympathize with the sense of kinship that Americans of Jewish ancestry to Israel and its goals. No one of us who is not Jewish can hope to fully share the emotional feelings and concerns of a people who lost 6 million of their compatriots in the holocaust of Adolph Hitler's Third Reich and who continue to face wholesale deprivation of human rights in nations such as the U.S.S.R.

But support of Israel does not require, nor should we give, support to those policies of an ally and friend which we believe to be wrong. To do so is to mislead that ally and friend, and to create the possibility of further wrongs.

In using CBU's in southern Lebanon against guerrilla units in a predominantly-civilian area, Israel was wrong.

I have attached copies of the two letters I transmitted to Ambassador Dinitz prior to his letter of April 20, together with a copy of a letter from presidential security adviser, Zbigniew Brzezinski, on the same point, as well as an article from yesterday's Washington Post describing Israel's intervention in Lebanon:

APRIL 10, 1978.

Hon. SIMCHA DINITZ,
Ambassador of Israel,
Washington, D.C.

DEAR AMBASSADOR DINITZ: I enclose a set of documents which are self-explanatory. I don't know of any other way to express my shock and anger over Israel's decision to use CBU's against civilian areas in the recent fighting in southern Lebanon.

My respect and support for Israel and her people remains undiminished, but I want you to know that I will vote unhesitatingly to cut off future aid to Israel if there is any further use of CBU's against refugee camps or civilian areas sheltering guerrilla forces.

I appreciate that acts of terror justify measured military response. I do not, however, believe that the use of CBU's against civilian areas can be justified under any circumstances. It seems to me Israel practically ensures a generation of terrorism by her opponents with this sort of governmental decision.

Sincerely,

PAUL N. MCCLOSKEY, Jr.

APRIL 17, 1978.

Hon. SIMCHA DINITZ,
Ambassador of Israel,
Washington, D.C.

DEAR MR. AMBASSADOR: I was concerned a few minutes ago to hear Mr. Joseph Rom, a member of the Knesset and of the Likud party, state that the Israeli use of cluster bombs in southern Lebanon last month did not violate the agreements between the United States and Israel. The enclosed letter from the National Security Advisor, Zbigniew Brzezinski, confirms that Israel's use of the CBU's did contradict previous assurances given to the United States by Israel. Further, it has been my understanding that the Israeli government has admitted the violation, apologized for it, and promised not to repeat such violation.

I would have ascribed Mr. Rom's comment to the possibility of the misinformation which commonly exists between Members of Congress and the Administration when we are not always fully advised of our government's position on certain actions.

In this case, however, Mr. Rom was accompanied by at least one employee of your Embassy and I am, therefore, assuming that he was fully informed by your Embassy prior to his statement over public television. Specifically, Mr. Rom stated that he and his colleagues had been fully advised of the circumstances surrounding the use of CBU's and that he (they) was completely satisfied that U.S./Israeli agreements had not been taken.

I solicit your early and comprehensive reply as to the position of your government on this issue.

Sincerely,

PAUL N. MCCLOSKEY, Jr.

APRIL 13, 1978.

Hon. PAUL N. MCCLOSKEY, Jr.,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN MCCLOSKEY: Thank you very much for your letters to the President of March 22 and April 10, 1978, concerning Israeli use of cluster bomb units in military operations in southern Lebanon. As you know, the Government of Israel has confirmed that CBU's were in fact used in south Lebanon in contradiction to previous assurances given to us, and the State Department has communicated to the Israeli Government U.S. concern over this matter.

Contacts are still underway between our government and the Israeli Government on this issue which bear directly on some of the questions you posed in your latest letter. Consequently, I have forwarded your letter to the Department of State for a more substantive response.

Sincerely,

ZBIGNIEW BRZEZINSKI.

[From the Washington Post, Apr. 30, 1978]

DOUBTS IN ISRAEL ON LEBANON CAMPAIGN

(By H. D. S. Greenway)

JERUSALEM.—Six weeks have passed since the United Nations Security Council met hurriedly to cope with Israel's invasion of southern Lebanon, calling for an immediate withdrawal of Israeli forces. Today, Israel is staging its third partial pullback in Lebanon, turning over positions in the western sector to the United Nations forces.

Despite the fact that virtually all Israeli leaders have said that Israel has no intention of keeping troops in Lebanon and would like to withdraw them quickly, however, a total withdrawal is not yet in sight. Much of southern Lebanon lies in ruins and there has been serious criticism in Israel itself both as to the wisdom of occupying Lebanese territory and the manner in which it was carried out.

Prime Minister Menachem Begin, Defense Minister Ezer Weizman and the Israeli army have all declared the operation a success. But there are other Israelis, some of them senior officials, who harbor grave doubts.

Supporters of the invasion say that the Palestine Liberation Organization has now been pushed north of the Litani River, that the PLO has suffered heavy losses and that the northern frontier of Israel is now safe from the threat that the PLO presence there presented. "The damage caused to the terrorist organizations themselves, on the planes of morale, inter-Arab politics and military, is great," an official Israeli army summary of the operation said.

Detractors are not so sure. The Palestinians can boast that it took the Israeli army, with its vastly superior force, seven days to push them out of southern Lebanon—one day longer than it took Israel to defeat the armies of Egypt, Syria and Jordan in the 1967 war. The two operations cannot be legitimately compared but the point being made is that PLO morale may have been enhanced, not reduced.

Politically, the PLO has been brought once more into center stage because of the Israeli invasion. When U.N. Secretary General Kurt Waldheim conducted his recent investigation of the Lebanese situation, he consulted PLO leader Yasser Arafat on almost an equal footing as he consulted Menachem Begin. Peace on the Litani depends as much on PLO observance of the cease-fire as it does on Israeli acquiescence. And as for the safety of Israel's northern settlements, many are still in range of PLO guns north of the Litani line at which the Israeli invasion halted.

Although the cease-fire has, on the whole, been respected, there have been exchanges of fire by both sides and, according to Lebanese Christians, their villages are still being occasionally shelled from PLO positions north of the Litani.

There has also been military criticism over the fact that the Israeli army put no blocking forces behind the PLO in order to stop their escape and that therefore the main PLO forces were allowed to withdraw while the Israelis pounded many undefended villages with artillery and airstrikes. Of all the villages destroyed, there were comparatively few which the PLO actively defended.

As the military correspondent of the Jerusalem Post put it, the Israeli army abandoned the "Davidian" finesse for which it is famous in favor of stomping through southern Lebanon like a raging Goliath. The amount of Israeli firepower employed is attested to by the ruins of solid stone houses throughout southern Lebanon. Everything from the new American F–15 fighters, which were employed in combat for the first time anywhere, to the tried and true and highly efficient killer known as the cluster bomb were brought into the play.

That Defense Minister Weizman now says he was unaware of Israel's promise not to use cluster bombs on offensive operations does not inspire confidence in either Weizman or the defense ministry.

"It would have been foolish on our part had we acted like David while our strength was like that of Goliath . . ." the recently retired chief of staff, Mordechai Gur, said of the operation he commanded.

However, as political scientist Zeev Sternhal of Tel Aviv University recently wrote, "The massive attack of a modern army on a guerrilla movement is not necessarily efficient and does not always achieve good results."

HOLDING DOWN ISRAELI CASUALTIES

In a frank assessment which the Israel Defense Force made public as a preliminary summary of the Litani war, the Israeli army admitted to using tactics which would both increase civilian casualties and allow the main force PLO units to escape.

The summary says that the two main considerations were (1) to prevent the invasion from escalating into a war with Syria and (2) to carry out the task with a "minimum of losses to our forces."

"Every move and advance by our forces was preceded by an artillery softening up, bombing from the air and shelling from the sea," the report said. "It was clear that these bombings and shellings would cause suffering to the civilian population in southern Lebanon and would give the terrorists time to get out . . .

"We took into consideration the suffering of our own residents, the destruction and damage to our settlements in the north in the course of recent years—the direct result of the collaboration, even if under compulsion, of the residents of southern Lebanon with the terrorists. We also took into consideration the large number of deaths in the terrorist raid on the coastal road [There were 35 Israelis killed in the March 11 attack near Tel Aviv.] . . . We decided to carry out the

operation with an advance softening up all along the front in order to reduce our losses to a minimum."

This remarkable document would seemingly hold the civilian population of southern Lebanon to account for collaborating with the PLO as a partial justification of the invasion, while at the same time admitting that this same collaboration may have been under compulsion.

However, informed observers here suggest that the holding down of Israeli military casualties was a political necessity. The relatively high losses of the 1973 war are still remembered here and the government might have lost considerable domestic support had the Israeli army suffered the casualties that would have been necessary to capture south Lebanon without largely destroying it first, let alone trying to block the retreat of the main force PLO units from the area.

As it was, the Israelis lost 19 men in combat and another 12 in accidents. The Israeli estimate of the number of PLO dead ranges between 250 and 300. As for civilian dead, the Israelis admit to having buried 180 Lebanese civilians killed in the fighting and estimate that 100 more may have been buried by relatives or may yet lie under the rubble, according to the Jerusalem Post. The estimate does not include civilians who might have been killed in air raids and commando attacks north of the Litani.

According to the British Broadcasting Corporation, a reliable estimate of civilian dead from Lebanese and Red Cross sources puts the number of civilian dead close to 1,000, with 250,000 refugees from the entire area, north and south of the Litani, having been generated by the invasion. The Israelis say about 60,000 civilians have returned to the area south of the Litani.

A PLANNED RETALIATION

It is clear that the invasion had been planned for some time and that the PLO raid on the Tel Aviv coast road merely provided the right psychological moment to attack. Begin admitted as much when he told the Knesset foreign affairs and defense committee recently that sooner or later Israel might have had to strike into Lebanon even if there had been no "outrage" on the coast road.

Chief of Staff Gur admitted on television recently that he had long opposed an invasion of southern Lebanon but that the PLO attack on the coast road changed the political circumstances both at home and abroad.

It is said that Foreign Minister Moshe Dayan opposed the idea of a prolonged occupation and suggested a quick raid—in and out before Israel became embroiled in the politics of both the United Nations and Lebanon. He was overruled.

Weizman has admitted that the original goal was to take a 6-mile-wide strip along the border rather than most of south Lebanon. "The original plan, political and military, was to occupy a smaller territory," he said in a recent newspaper interview. "The intention was not for the scale that developed as a result of the requirements of the situation . . ."

That Israel's army should be sucked further into Lebanese territory than was originally thought advisable either in military or political terms gives rise to grave doubts. Weizman gives three reasons why it happened: (1) "Terrorist resistance and their attempts to harm our soldiers continued," (2) Arab *mukhtars* (village chiefs) asked to be taken under Israeli protection and (3) the intervention of the Security Council made it advisable to take the Litani River line in order to hand over a better and more defendable position to the U.N. forces.

The first reason given is the most revealing, as it points up the danger inherent in all such adventures when protecting the men in the field becomes more important than the original political purpose of the operation.

The second reason can be largely, if not completely, dismissed as self-serving propaganda. Any sensible *mukhtar* still alive waves the white flag and asks to be taken under Israeli protection when faced with Israeli tanks at the village gate.

The third reason, however, makes sense from both a political and a military view. The Litani line does make more sense if the U.N. forces hope to stop the return of armed men to the region and, if you take more you have more to give back to the U.N. in order to comply with the Security Council resolution without really harming your tactical position.

Weizman, in another recent newspaper interview, held the United States partly responsible because the United States called the Security Council meeting so hurriedly. "When we set out on the Litani operation we set short-term goals for ourselves. But then something happened: the U.S. government got involved—mistakenly, to my mind—like a bulldozer."

In fact, the reason the United States pushed ahead so quickly on the Security Council resolution of March 19 was because it had the support of the Lebanese government and Washington was afraid that the Lebanese delegation might waiver under pressure from other Arab states.

Indeed, if the Israeli invasion of Lebanon turns out, in the end, to have been the catharsis which forced the Lebanese to become masters of their own house once more, then this could be counted as a political plus for Israel. But it is by no means sure that the new Lebanese government can either restrict the Palestinians or disarm the various Lebanese factions.

The Israelis have promised the United Nations that they will withdraw to a 6-mile-wide strip parallel to the Israeli border early in May, which was of course the original objective of the invasion. The Israelis have informed the U.N., however, that further or complete withdrawal will not take place unless south Lebanon remains exclusively under the control of the U.N. forces and the Lebanese armed forces. No PLO troops are to be allowed to return to the area.

But what if the PLO decides to infiltrate back? Weizman said in an interview that "if the UN does not carry out its task the Israeli defense force will go back to resume its task."

Others argue that it would be politically very difficult to send the tanks rolling over the Norwegian or Swedish U.N. units, and the Nepalese Gurkhas or the French might even fire back.

Therefore Israel has put itself into the position where the tacit cooperation of the PLO has become essential and if and when the Israelis withdraw completely, they will have less control of the border region than they did when they were supplying and occasionally helping the local Christians. The U.N. is not likely to allow the Israelis the same freedom of action across the border as was possible before.

About 3,800 of the promised 4,000-man United Nations force are now in southern Lebanon and more will be arriving in early May. Both Israel and the U.N. command hope to boost the U.N. presence to 6,000 men.

But in the meantime a new Security Council resolution—425, demanding Israeli withdrawal from yet another piece of Arab territory—has joined the lexicon of similar resolutions. Israel is temporarily stuck with a conquest it cannot and does not want to keep but no one can say when Israel will finally withdraw.

Therefore many Israelis worry that Israel's leaders have become drawn into a situation they cannot control and from which it will be difficult to withdraw.

But just as important, in the minds of Israelis like Prof. Sternhal, is the damage done to "our own image in our own eye." ●

LAKEWOOD HIGH SCHOOL SINGING SPARTONES INVITED TO SING ON CAPITOL STEPS

HON. C. W. BILL YOUNG

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. YOUNG of Florida. Mr. Speaker, Members of Congress, their staffs, and visitors to the Capitol will be treated to a performance by the Lakewood High School Singing "Spartones" of St. Petersburg, Fla., on Wednesday, May 3.

It has been a pleasure to arrange through your office for the appearance of these young people on the House steps of the Capitol Building beginning at 10 a.m. Also, by special invitation, the Spartones will make their second Washington appearance in the grand foyer of the Kennedy Center at 11:30 a.m.

It is indeed an honor for each of these young people to be selected as a member of the Lakewood Spartones. Lakewood High School is the second smallest of seven public high schools in Greater St. Petersburg. It has a student population of 2,100 with classes on double sessions. The members of the Spartones are selected by audition and meet for 50-minute classes every day on a 6-day modular scheduling cycle. The singing group is one of five choirs at Lakewood with classes offered in theory, appreciation, three bands, wind ensemble, drill team, and humanities.

It is my hope that as many of my colleagues as possible will take time from their busy schedules to join the Capitol visitors who will be listening to the excellent program the Spartones have been rehearsing for us. They will present a program selected especially for their Washington audiences. They have performed a variety of musical programs in Florida. For example, they have performed major classical works with the Florida Gulf Coast Symphony and their benefit performances include the United Fund Campaign, Television Telethon, and Toys for Tots. They have appeared before audiences at the St. Petersburg Bayfront Center entertainment complex, Museum of Fine Arts, Symphony Guilds' Golden Baton Ball, San Carlo Opera Co., local banks churches, nursing homes, civic clubs, chambers of commerce, Rotary, Kiwanis and Optimist Clubs, St. Petersburg Festival of States, the St. Louis Cardinals, Disney World and Sea World. They have entertained company representatives from all over the world at the Innisbrook Convention Center. They received from the mayor of St. Petersburg the honor of being officially proclaimed the city's "Sunshine Ambassadors." For 2 consecutive years, they were invited to sing at the Florida State Senate in Tallahassee, and in 1977 they performed for the Mississippi State Choral Conductors Conference. The Spartones performed when the Tampa Bay Rowdies soccer team hosted the Russian team in St. Petersburg. From this list, Mr. Speaker, you can see that a wide range of audiences have been delighted by the enter-

tainment these young Americans provide.

The trip to Washington means a great deal to each and every member of the Spartones. With their many performances, averaging over 120 per year, the members must maintain a B scholastic average to remain in the group. Many have part-time jobs, but they still have the time to practice and keep up with their academic studies. Recently, the Spartones have been busy with fundraising projects to pay for their trip to the Nation's Capital.

The Spartones will be under the direction of Mr. Fred R. Eshleman, the chairman of Lakewood High School's Music Department. Mr. Eshleman was chosen as 1976 "Outstanding Educator of the Year," an award presented by Mr. Ralph Turlington, Florida Commissioner of Education. Mr. Eshleman's undergraduate work was done at Lebanon Valley College and he received his master's degree from Temple University, and his administration and supervision certification from the University of South Florida.

Wednesday, May 3 is Sun Day throughout our country and I feel it is most appropriate for the "Sunshine Ambassadors" to be in Washington, D.C., on that day to share their talent with us.●

SOCIAL SECURITY FOR NEW FEDERAL EMPLOYEES

HON. RICHARD A. GEPHARDT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. GEPHARDT. Mr. Speaker, today I am introducing together with Mrs. KEYS and Mr. GIBBONS a bill to provide that future Federal employees will be covered by social security and may elect not to be covered by the applicable Federal employees retirement system and that current Federal employees may elect to be covered by social security and, if they so elect, may elect to discontinue being covered by a retirement system for Federal employees and have retirement credits under any such system transferred to social security. A companion bill (S. 2880) has been introduced in the other body by Senator GAYLORD NELSON.

Last year when we considered mandating coverage of all Federal, State, and local government employees as part of the Social Security Financing Amendments Act, H.R. 9346, there was much uncertainty over how existing Federal employees retirement systems would be merged into social security. I fear that such uncertainty, especially with respect to the transfer of what would happen to a Federal employees' existing retirement credits, engendered opposition on the part of some members to universal coverage which otherwise would not have been voiced. This bill sets out a program that hopefully will end that uncertainty by mandating it prospectively and by providing for the transfer of benefits.

I would hasten to state to those who oppose universal coverage or who are still uncertain about this prospect that this bill does not address every question possible; it does not establish a complete system of retirement coverage for public and private employees. But the bill clearly starts us in that direction. Passage of it will place the appropriate House Committees and Congress in a position to address the ultimate question of exactly what kind of comprehensive retirement insurance system can and should we offer all employees.

Senator NELSON's remarks which accompanied the introduction of S. 2880 are recommended to you and they appear in the CONGRESSIONAL RECORD at pages 9583–9584 on April 11, 1978.●

TREASURY DEPARTMENT PROPOSED FIREARMS REGULATIONS

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. RAHALL. Mr. Speaker, I wish to share with my colleagues some alarming information that was made available to me by the National Rifle Association with regard to the Department of the Treasury's proposed firearm regulations as published in the Federal Register, March 21, 1978. This information along with my own convictions concerning gun control prompted me to cosponsor a bill, House Joint Resolution 872, that expresses disapproval with the Bureau of Alcohol, Tobacco, and Firearms' proposed regulation for computerized registration of all firearms.

Since firearms control first became an issue before the Congress and throughout the legislative history of the Gun Control Act of 1968, Congress has rejected the concept of national firearms registration. Now the Department of Treasury is attempting through bureaucratic regulation to usurp the authority Congress has specifically denied it. I see this as an insult to the Congress and a threat to the Nation's gunowners. The NRA information is as follows:

The U.S. Department of the Treasury has published regulations (March 21 Federal Register) to establish a national computerized central firearms registration system.

The regulations, if allowed to go into effect, would require all transactions of all firearms within existing Federally licensed commerce to be reported quarterly to the Bureau of Alcohol, Tobacco and Firearms. Reporting would cover all dealer sales to individual citizens, as well as all transactions between manufacturers, importers, exporters, wholesalers, jobbers, distributors and dealers.

Based on BATF estimates of the 5.2-million new firearms in commerce in fiscal year 1977 and BATF claims that an average of four transactions occur before a dealer sale to an individual citizen occurs, the reporting requirements would conservatively total at least 25-million separate computer entries.

When used firearms are included in the equation, the number of firearms transactions which would be computerized would total between 35 and 40 million.

The system would require 688,000 quarterly reports yearly from 172,000 holders of Federal Firearms Licenses. BATF estimates that the paperwork costs to dealers would be $8-million yearly.

The Treasury Department claims that the startup costs of this massive system would run about $5-million, and, according to Assistant Secretary Richard Davis, funding would neither have to be appropriated nor authorized by Congress, but would be simply "re-directed" from existing BATF funding.

However, that $5-million estimate does not begin to jibe with past BATF firearms registration cost estimates. BATF Director Rex Davis has previously estimated a national handgun registration system would call for a $35 to $100 million startup cost, followed by $20-million per year in operational costs. This proposed registration by regulation would cover all firearms—rifles, shotguns, and handguns.

In both the March 16 Congressional and public briefing on the proposals, Richard Davis, Assistant Secretary of the Treasury declared that the regulations would give BATF authority to call in and computerize all existing Federal form 4473's (which list the name and address of each firearms purchaser) which have been filled out by individual firearms buyers since enactment of the 1968 Gun Control Act. Secretary Davis qualified that declaration in the Congressional briefing by saying that such an action today would be "politically unrealistic."

Assistant Secretary Davis's predecessor, David R. MacDonald, told Congress during 1975 House Judiciary Committee hearings that Treasury should not act to centralize existing dealer records without Congressional authority. Also in 1975, BATF estimated they could trace a firearm in 27 minutes under the existing recordkeeping system if it is a "priority". There can be no justification for the proposed centralization other than expansion of bureaucratic authority and a desire to in fact register firearms.

Although Treasury says the reporting requirements do not include the names and addresses of individual private firearms purchasers, officials maintain they can easily obtain such information under the proposed regulations with a telephone call from BATF to the dealer making such a sale.

The regulations would also order institution of a new "unique" system of identifying firearms with a common 14 digit serial code. With this serial number, which would be required for all firearms manufactured after the regulations are placed into effect, the BATF could computerize information as to make, model, barrel length, caliber and individual number of all firearms. With this information, the Treasury Department could locate the purchasers of any firearms or category of firearm it might declare prohibited in the future. BATF estimates that the cost to consumers would be $5-million for retooling.

Other provisions in the regulations include redefinition of import and export regulations (a detailed summary of this provision will follow), and a requirement that all firearms lost or stolen while in Federally licensed commerce be reported within 24 hours of discovery. Failure to record or report such loss or theft to the satisfaction of BATF would be a felony, punishable by 5 years in prison, and a $5,000 fine. In many instances, the failure to report a theft of a firearm could exact a far harsher penalty on a dealer than on the thief.

There are literally no provisions of these regulations which can be supported by the National Rifle Association, its membership and affiliates.

During the debate of the 1968 Gun Control Act, the issue of national gun registration was raised and soundly defeated by better than a 2 to 1 margin. Since that time, Congress has rejected all national gun re-

gistration schemes which have been proposed. Clearly, Congress has refused to give the firearms control bureaucracy this authority.

This proposed regulation—whether called registration or "reporting"—amounts to the same thing: centralized national firearms registration. It is the very clear policy of the National Rifle Association that we are unalterably opposed to firearms registration at any level of government.

Printed in the March 21 Federal Register, the proposed regulations will be open to public comment until May 22, 1978. Comments must be submitted in duplicate to: Director, Bureau of Alcohol, Tobacco and Firearms; Washington, D.C. 20226; Attention: Regulations and Procedures Division.●

"HOLOCAUST" AND TV VIOLENCE

HON. BARBARA A. MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Ms. MIKULSKI. Mr. Speaker, my colleagues know that I have been a persistent and vocal critic of network television programing. I have been particularly concerned about the number of violent incidents portrayed on network programs, and the impact of these portrayals on our people.

As a member of the House Communications Subcommittee, I have learned that the impact of violent acts on television shows can range from increased use of violence by young people to a self-perception by women of themselves as victims.

I believe, however, that one of the significant aspects of any discussion of violence on television is the context in which violent acts are portrayed. And, although I think that one significant way in which Congress can attempt to improve the quality of network television is by "jawboning," I feel that those who criticize also are obliged to give praise when it is due.

Praise is now due to NBC, for its courageous and thoughtful presentation of the recent miniseries "Holocaust." While one can reasonably debate whether this miniseries, or any television series, can ever fully convey the horrors of the era of Nazi terror in Europe, it is clear that the programing of "Holocaust" marks a major breakthrough in network television.

"Holocaust" was the type of program that we are often told the American people will never accept—that nobody will watch. It made us think, it made us uncomfortable, it made many of us cry. It taught our young people—indeed, it taught all of us—about a reign of death and horror only those who experienced it and somehow survived can perhaps every really understand. We know more now, as a result of seeing "Holocaust," and I hope that we will all be more sensitive to present-day deprivations of human rights as a result. We cannot bring back those who died, but we can, in their memory, strive to make ours a better world for all people.

To let us know of what took place, the writers and producers of "Holocaust" had to depict acts of violence. I believe that they did this with sensitivity and restraint. There was violence at that time, and there is violence—although, thankfully, not on so horrible a scale—in our time as well. I do not, as a critic of television, ask that its portrayals ignore this reality. Indeed, to do so would perhaps be just as damaging to the viewer—showing a world that doesn't exist in reality—as the gratuitous violence of which I have often complained.

I do ask that, as we viewers have gained from watching "Holocaust," the television networks also gain from it a better understanding of the way in which violence can be appropriately portrayed. I thank NBC, and its writers and producers, for the contribution "Holocaust" has made to its viewers and to the television industry.●

PHILADELPHIA SCHOOL OBSERVES 50TH ANNIVERSARY

HON. RAYMOND F. LEDERER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. LEDERER. Mr. Speaker, over the last 50 years, the Richmond Public School located at Belgrade and Ann Streets in my congressional district in Philadelphia has served the community and has provided an education to countless thousands of Philadelphia's children. The school will be celebrating its 50th anniversary on May 25 and 26, and I think it fitting that as the Representative from this congressional district, I bring the inspiring story to the Members of this House.

The history of the Richmond School goes back to 1846, when the first school was erected. This section of Richmond, sometimes called Port Richmond, originally the name of a tract of land on the Township of Northern Liberties, adjoining the Delaware north of Ball Town and south of Point-no-Point is the home of this famous school. The name of Richmond was derived from two county seats in the vicinity—the Richmond Lodge, which in 1808–09 belonged to the Fox family. It was incorporated as a district on February 27, 1847, a year after the school was erected, under the title of "The Commissioners and Inhabitants of the District of Richmond, in the County of Philadelphia." It extended along the Delaware River to a point some distance northwest of the upper end of Petty's Island; then northwest nearly to the point where Frankford Creek makes its most southerly bend; then southwest to Westmoreland Street; northwest along the same to Emerald Street, southwest along the same to a lane running from Frankford Turnpike to Nicetown Lane; along the Frankford Turnpike to the north boundary of Kensington and down the same to Gunner's Run and along the stream to the Delaware River. The area was 1,163 acres. It became part of the city in 1854.

Mr. Speaker, indeed this area is rich in history. Richmond School was the 50th school in the city system. The original price of the structure was $7,597.93, a bargain for the educational return on the investment.

The present structure was erected in April of 1929 and was part of district 7 which now is district 5 of the Philadelphia school system. The cornerstone of the present building was in place in 1928; 50 years this May.

Mr. Speaker, Richmond School is more than an educational institution—it is part of the history and culture of the Port Richmond area. The school is the representation of the strength of the Port Richmond area and its citizens, most of whom have lived there for all of their lives. It is a unique school, with a unique history and a unique spirit. The pride that our people have for their school is a source of real strength to all the residents of the city.●

DECISION OF FEDERAL LAND IN ALASKA

HON. WYCHE FOWLER, JR.

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. FOWLER. Mr. Speaker, the decision about what to do with millions of acres of Federal land in Alaska will be one of the most important wildlife and conservation decisions facing the House of Representatives this year. The issues involved in this case touch on some of the fundamental questions concerning our whole society. How do we resolve the conflicts between economic and environmental needs, between short-term necessity and long-range goals, between spontaneous development and comprehensive planning?

I wish to express my complete support for H.R. 39, the "Alaska National Interest Lands Conservation Act." This bill offers us a unique opportunity to preserve whole areas which have natural, recreational, and wildlife value. The best protection for Alaskan fragile wildlife and wilderness is the establishment of complete ecosystems—boundaries drawn to encompass total habitat areas.

H.R. 39 would turn about 95 million acres into protected parklands within the National Park, National Wildlife Refuge, Wild and Scenic Rivers, and National Wilderness Preservation Systems. H.R. 39 would more than double the size of the country's National Park System, and preserve for posterity some of the world's most extensive wilderness areas.

Some will say that we cannot afford to remove so much land from protective, economic purposes. But the truth is that we probably cannot afford not to set this land aside for ourselves and our children.

It concerns me that we hear over and over throughout this country of parents and teachers complaining that we have almost reached a society where we know the price of everything but the value of nothing. I know of no greater testimony to the values we seek than to preserve

for those who come after us a wilderness area such as this.

In closing, I can only say that because of what we are about in this country, and specifically in Alaska, time is of the essence in the speedy approval of this bill. The construction of the oil pipeline has quickened the pace of development in Alaska, thereby threatening much of the Alaskan wilderness. Seven years have passed since the Alaska Native Claims Act of 1971. Studies have been conducted and legislation has been prepared. Now is the time for action. H.R. 39 would reconcile our economic need for Alaska's resources with our overriding national interest in preserving its unspoiled natural wildlife areas.●

WORLD REFUGEE REPORT SURVEYS REFUGEE SITUATION IN EASTERN EUROPE AND MIDDLE EAST

HON. ROBERT F. DRINAN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. DRINAN. Mr. Speaker, the 1978 World Refugee Report notes that despite some changes in Eastern Europe, overall migration policies have not met the expectations raised by the Helsinki accords of 1975. Travel and migration policies of Bulgaria, Czechoslovakia, the German Democratic Republic, Poland, Romania, and the U.S.S.R. remain highly restrictive. Only Hungary among the Eastern Socialist countries has what is considered to be a "good" record of compliance. The proposed amnesty in Czechoslovakia for those citizens who fled the 1968 Soviet invasion is one hopeful development for refugee family reunion in that country.

In the Middle East there are over 1.7 million Palestinians registered as refugees with the United Nations. Also, 200,000 people remain internally displaced on the island of Cyprus because of the Turkish occupation of almost 40 percent of the territory; and 300,000 Kurds have been forcibly resettled by the Baathist government of Iraq and in Lebanon sporadic fighting has left the refugee problem unresolved, especially for the 400,000 persons who have been displaced within the nation.

Following is the segment of the 1978 World Refugee Report which deals with Eastern Europe and the Middle East.

SEGMENT OF 1978 WORLD REFUGEE REPORT

EUROPE

The refugee situation in Eastern Europe is unique. Most of the emigrants may be considered "voluntary refugees," those who wish to leave their country for political, ethnic, or religious reasons. East Germans as well as ethnic Germans in Poland, Romania and the Soviet Union who migrate to West Germany acquire citizenship automatically. Likewise, Jews from Eastern Europe and the Soviet Union who migrate to Israel obtain citizenship immediately. Many who wish to leave their country are held back, however. Frequently, only those who can claim ties to another nation or who have relatives abroad are allowed to leave permanently.

In 1975, the Helsinki Conference came to some tentative agreement on what the policies concerning migration and freedom of movement should be in Europe. The Final Act of the conference, included, under the Basket 111 section (Cooperation in Humanitarian and Other Fields), provisions for a standard of conduct which was to facilitate the reunification of families and marriages between citizens of differing nationalities.

The Human Contacts section of Basket 111 calls for certain specific steps designed to implement these goals. Among these are: the issuance of travel and exit documents on short delay, the lowering of document and processing fees to a moderate level, reconsideration of refused applications at frequent intervals, and elimination of any discrimination towards those who have been refused exit visas in the past. The Commission on Security and Cooperation in Europe (CSCE) was set up by the U.S. Congress to monitor the implementation of these provisions of the Final Act.[1] The CSCE reports that while the provisions of the Final Act have had some effect on emigration and travel procedures, the countries of the Warsaw Pact have "largely failed . . . to make the Helsinki pledges to facilitate freer movements and contacts, an operative part of their official policies and practices."[2] Indeed, they add that some countries have created further obstacles to travel and emigration.

However, steady, if not publicized, movement of people from Eastern Europe to other nations continues. In 1977, almost 16,000 Jewish emigrants left the Soviet Union bound for Israel, the U.S. and other countries. The 1975 treaty between the Federal Republic of Germany and Poland which has already allowed 48,000 ethnic Germans to emigrate to West Germany allowed another 25,000 ethnic Germans to return to Germany.

As the CSCE has pointed out, US policies too must be in line with the Final Act. If the US encourages freer emigration for the purposes of family reunification, it must maintain an open door to those who wish to immigrate to the U.S. to be with their families or to marry the person of their choice.

In 1977, the Carter Administration moved to give human rights a high priority among its foreign policy objectives. In 1977, the U.S. admitted 5,000 Jewish emigrants from the Soviet Union who were waiting in Rome for entry into the U.S. and plans to accept an additional 4,000 in 1978.

The Belgrade Conference to review compliance with the provisions of the Helsinki Final Act has raised considerable expectations among dissident groups in Eastern Europe and the Soviet Union, by providing an opportunity to compare their government's domestic policies with their international statements. But it is generally believed that the final document produced by the conference will not contain any additional pledges on human rights. It will most likely produce a general statement reaffirming the humanitarian provisions of the Helsinki accords. Although the results may be disappointing to many human rights groups, some diplomatic observers feel that the fact that a review conference was called at all adds weight to the pledges made at Helsinki.

[1] CSCE was created on June 3, 1976 by Public Law 94–304 to monitor the acts of the signatories of the Helsinki Final Act, reflecting compliance or violation. The commission consists of six Senators, six Representatives and one member each from the departments of State, Defense and Commerce.

[2] "Report to the Congress of the United States on implementation of the Final Act of the Conference on Security and Cooperation in Europe: Findings and Recommendations Two Years After Helsinki." August 1, 1977, p. 91.

The Soviet Union

In its review of the implementation of the Final Act of the Helsinki Conference, the CSCE reported that since the signing of the Final Act some adjustments in Soviet emigration procedures have been made, but that on the whole, official conduct has retained its aim of deterring emigration. While the period of waiting between the submission of an exist application and the receipt of a visa has shortened and the number of multiple refusals of visas has dropped, other obstacles remain which make emigration difficult for Soviet citizens.

In order to apply to leave the Soviet Union, for example, one must provide a long list of documents. They include: an invitation from relatives abroad, a declaration form, an autobiography, a certificate from one's work place, permission from one's parents, permission from one's (former) spouse, a certificate from place of residence, copies of certificates of birth, marriage, divorce, death of relatives, and educational diplomas and photographs. Many emigrants report that the collection and submission of these documents is very difficult. Problems range from receiving relative's invitations to refusals of parents to give permission for their children to emigrate. In addition, the cost of emigration can be exceedingly high. A family that wishes to emigrate may have to pay as much as 1,500 rubles (1,750 dollars) in order to leave the country, the equivalent of the average yearly wage of a worker.

Thus, despite the continuous flow of people out of the Soviet Union, it is evident that there are many more persons wishing to emigrate but who have experienced difficulties which seem designed to deter the emigrant from leaving the Soviet Union. The U.S.S.R. was sharply criticized for these impediments at the 1977 Belgrade Conference to review compliance with the Helsinki Accords.

Other Eastern European countries

As in the Soviet Union, the application process for those who wish to emigrate from Warsaw Pact countries is long and complex. Prospective emigrants must obtain exit visas, passports and in at least one case, a frontier control paper.

The documents, which must be submitted to obtain these documents vary from country to country, but in general are numerous and often difficult to obtain. CSCE reports that persons wishing to emigrate may have to furnish documents such as military and police records, certificates of non-indebtedness, promises from Western embassies that entry visas will be granted and even, in Romania, an "application for an application."

Reports from Eastern Europe indicate that emigration policies and practices have not, on the whole, changed significantly as a result of the Helsinki accords. In fact, reports CSCE, some countries have instituted new obstacles to emigration.

Hungary would seem to have the best record of any Warsaw Pact country in responding to the provisions in the Final Act. Hungary has lowered its passport fees, considers renewals of applications at frequent intervals, processes applications relatively quickly, and reportedly does not harass those who apply to emigrate. The Commission on Security and Cooperation in Europe reported to Congress in its annual report of August 1 that Hungary provides a good model" for states wishing to control exits by its citizens, but at the same time wishes to abide by the Helsinki accords.

In contrast to Hungary, Romania, the German Democratic Republic, (GRD) and Bulgaria have reportedly imposed new obstacles to those wishing to emigrate. Romania has instituted the "application for the application" and has attempted, via a media campaign, to discourage emigration. In Bulgaria, it was reported this year by Western embassies that Bulgarian citizens were

being denied access to those embassies. Early in 1977, the Bonn government made a protest to the GDR over the same procedure. The barring of East Germans from the West German Embassy has now reportedly stopped.

A 1975 agreement between the Federal Republic of Germany (FRG) and Poland provided for the emigration of 125,000 ethnic Germans to the FRG over a four year period in return for $950 million in economic aid and credits to Poland. Some 25,000 ethnic Germans migrated from Poland in 1977, a slightly higher number than in 1976. While the number of Germans allowed to emigrate has increased somewhat Polish emigration policies in general remain highly restrictive Emigration from Czechoslovakia is also very restrictive; however, the Czechs are becoming more amenable toward the emigration of ethnic Germans and an amnesty for those who fled the country in 1968 has opened the door to further family reunification.

MIDDLE EAST

The most significant development in the Middle East in the past year was the visit of Egyptian President Anwar Sadat to Israel, opening the way to a long process of a possible negotiated peace in one of the world's most turbulent regions. While the outcome of the negotiations remains uncertain, for the first time in the history of the Arab-Israeli dispute, the parties have sat down, face to face, to discuss their mutual problems. Should there be a settlement, it will have a tremendous impact on the refugee situation in the Middle East.

There are over 1.7 million Palestinians registered as refugees with the United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA). Should a peace settlement come about, these refugees would be able to move out of refugee settlements.

Another significant development this year was the death of Archbishop Makarios, who for more than a decade had presided over the tiny island of Cyprus, an object of international tension since the end of World War II. Makarios was a unifying presence for the island and in particular for the Greek community. But the Turkish Cypriot minority resented his and the Greek Cypriot dominance of the economic and political structures of the island. The 1974 overthrow of Makarios by a Greek Cypriot group favoring union with Greece, resulted in the Turkish invasion and subsequent occupation of 40% of the island in an alleged effort to protect Turkish Cypriot minority rights.

However, the Turkish occupation of the north of the island has resulted in the displacement of some 200,000 Greek Cypriots to the south. They are living in tent villages, unused factories, or unfurnished houses. The U.N. High Commissioner for Refugees has acted as Coordinator for U.N. Humanitarian Assistance to Cyprus in the form of food, housing and medical care. While the relief effort continues, U.N. Secretary General Kurt Waldheim continues talks with both Greek and Turkish Cypriot leaders in an effort to reopen stalemated negotiations on a political settlement.

In Lebanon during the past year, a cease-fire, though marred by sporadic violence, has allowed many Lebanese to return to their homes and begin reconstruction. But a lasting political settlement to the war has been postponed due to continued fighting in Southern Lebanon, which has reportedly caused a number of Lebanese who had returned to the country to leave again. Most observers agree that the surface calm in Lebanon is maintained chiefly by the Arab peace-keeping force, which is said to number 30,000 troops, mostly Syrian.

The status of the human rights of the Kurdish ethnic minority in Iraq has not improved much in the past year. Some of the Kurds who were forced to leave their homes for the southern desert have been allowed to return to the mountains but their number has been offset by others who were deported to the south this year. Included in this section of the 1978 World Refugee Survey Report is a short history of the Kurdish situation.

Palestinian Refugees

Since the Arab-Israeli conflict of 1948, thousands of people from the former state of Palestine have been forced out of their homes and into the areas surrounding the state of Israel. Since 1967, those refugees who live on the West Bank of Jordan and the Gaza Strip have lived under Israeli military occupation. The extent, the duration, and especially the political nature of the problem have made this refugee situation unique. Recently, the Lebanese Civil War has complicated relief efforts even more.

Relief projects for the 1,706,486 Palestinian registered with UNRWA involve not only the United Nations, but the governments in which these refugees reside and a host of voluntary agencies. The United Nations Relief and Works Agency, created in 1950 as a temporary agency in response to the problem of Palestinian Refugees, had a budget in 1977 of 134,000,000 dollars. This money was used to provide three basic services. First, it was used for the continuing education and training of refugees and their children. Secondly, it was used to provide the refugees with low incomes with basic relief measures such as shelter, food and clothing. Thirdly, it was used to provide health care to refugees in need of medical attention. UNRWA's fields of operations were in Lebanon, Syria, East Jordan, the West Bank and the Gaza Strip.

Working with and contributing funds to UNRWA were several voluntary organizations. Among them: American Near East Aid, Inc., ARAMCO, the Canadian Save the Children Federation, the Lutheran World Federation, the Norwegian Refugee Council OXFAM (United Kingdom) Save the Children Federation, Zonta International, and several Japanese business organizations. Several UN agencies have also cooperated in relief efforts. These include UNRWA, WHO, UNESCO, UNDP, and UNICEF.

During the Lebanese Civil War, many of UNRWA's facilities were either destroyed or damaged by shelling, fighting or looting. Losses to school facilities were estimated at 565,000 dollars and all the UNRWA schools as well as the Lebanese schools were suspended during the war. Moreover, several of the school buildings were used as shelters for displaced persons. The damage to shelters, camps and other UNRWA installations dealing with basic aid was severe. Two camps were entirely destroyed, and many others were damaged in the fighting. Several hospitals were also damaged or suffered looting during periods of intensive fighting. Replacing these facilities will strain the already precarious budget of UNRWA. The Lebanese cease-fire, if it remains intact, will allow the rebuilding of many of these facilities. In other areas, operations continue as before. The political situation remains unstable, but negotiations and the recent visit of President Sadat bring hope that peace may soon be forthcoming. Yet, many hopes for peace have come and gone in the Middle East.

The Kurds

The history of the Kurds is a history of domination by foreign powers, war and rebellion and of betrayal by its closest allies, including the U.S. On July 15, 1977, fifteen United States Senators in a letter to Secretary of State Cyrus Vance expressed their concern over the U.S. role in the tragedy of the 1974–75 Kurdish rebellion in Iraq. They said, in part, "We refer specifically to the covert U.S. assistance to the Kurds in their rebellion against the Iraqi regime. This assistance, affirmed through intelligence channels and substantiated by communications with former Secretary of State Henry Kissinger, was abruptly withdrawn and the rebellion crushed when Iran sealed its borders. The Pike Committee Report on the CIA also documents the role of our government in this matter." Their concern over the U.S. role in this matter was well-founded for in March of 1975, the Kurdish forces after having been given assurance of support by the U.S., found themselves beaten and forced to flee to Iran. Since then, the history of the Kurds—pawns of Persian Gulf politics—has been one of flight, deportation, discrimination and incarceration.

The Iraqi Kurds make up only about 20 percent of the total Kurdish population in the Middle East. The 10 million Kurds in the area are scattered among Turkey, Iraq, Iran and the Soviet Union. Throughout their 2000 year history, they have faced opposition from the groups around them. Today, the opposition is bordering on cultural genocide. The Iraqis and the Turks refuse to teach Kurdish in the schools, deprive the Kurds of their rights as citizens and suppress their communications with one another via the press. The Iraqis have taken Kurdish land away from its owners, and have refused to let Kurds own any of the oil-rich lands in Iraq. Since the war, the Iraqis have imprisoned 30,000 former Kurdish freedom fighters despite an Amnesty Law under which they should be free, executed 227 leaders of the Kurdish forces and exiled almost 300,000 Kurds from their mountain homes in the north to the southern deserts of Iraq.

About 35,000 Kurds remain in Iran, afraid to return to Iraq, cut off from other Kurds. In addition to these refugees, there are several hundred exiles living abroad such as the former military leader Mulla Mustafa al-Barzani, in the U.S. About 1500 have been resettled—half in the U.S. and the other half in various European countries. For these people—the exiles, the deported, the incarcerated—there may be no return. The Iraqi government has now set up restrictive belts around several cities in northern Iraq. Entering these area means death for any Kurd who is caught. Further, the Iraqi government has bullozed several Kurdish villages and has allowed Arabs to move into formerly Kurdish areas. Given these sanctions, plus an unwillingness on the part of Turkey or Iran (both of which have large Kurd population) to stir up trouble by working for change, the future for the Kurds in Iraq and for the Kurdish populations of the Middle East as a whole, looks bleak.

Other Middle Eastern Countries

Public attention was focused on political oppression in Iran when the Shah of Iran visited the United States in November of 1977. Many Irian exiles and student groups complained of harassment of SAVAK, the Iranian secret police. Although it is believed that a number of Iranians have chosen to leave their country because of political repression, there are no reliable statistics on their numbers.

Human rights groups have also voiced concern over rights violations in other Middle Eastern countries, including Iraq, Syria, the People's Democratic Republic of Yemen, and Bahrain. But there are no verifiable sources to substantiate the presence of large numbers of refugees from any of these countries. ●

CONGRATULATIONS TO FRANKFORD HOSPITAL IN PHILADELPHIA, PA.

HON. RAYMOND F. LEDERER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. LEDERER. Mr. Speaker, I would like to pause in the business of the House to congratulate Frankford Hospital in

Philadelphia during its diamond jubilee year.

Frankford Hospital has been serving the people of the city of Philadelphia since 1903. During this 75-year period, countless babies were born, and countless people were saved by the outstanding medical and support staff at Frankford Hospital. The hospital has become not only a valued institution in the community but in the entire city of Philadelphia.

On behalf of the people of Philadelphia, I want to thank Frankford Hospital for its fine work in the past 75 years and offer my appreciation for the excellent health care that the hospital will continue to render in the coming years.●

CONTINUED SUPPORT FOR NURSING PROGRAMS IS NEEDED

HON. CHRISTOPHER J. DODD

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. DODD. Mr. Speaker, several weeks ago the chairman of the Subcommittee on Labor-Health. Education, and Welfare held hearings on a critical portion of the fiscal year 1979 Labor-HEW appropriations bill—funding for our Nation's nursing programs. At this point in the RECORD, I would like to insert the text of my testimony outlining my concerns over the reductions which the administration has proposed for our nursing programs.

SUPPORT FOR NURSING PROGRAMS NEEDED

Mr. Chairman: I want to thank you for this opportunity to present my views on the Administration's budget request for fiscal year 1979, which proposes to drastically reduce federal support for nursing programs in this country.

Since the 1930's federal assistance has been provided for nursing programs. Today we have a diversified program of federal support which provides funds to nursing schools for the construction of teaching facilities, capitation assistance to aid education programs, and financial distress grants to help schools maintain programs or meet special needs. Special projects to improve nurse training are also funded. In addition, federal funds allow for grants to be made to nursing schools for advanced nurse training programs and nurse practitioner programs. Student assistance is also available in the form of loans, scholarships, and advanced nurse traineeships.

Claiming that our nation's supply of nurses is adequate, the Administration is seeking to decrease the fiscal year 1978 appropriation for nursing programs of $125 million to $20 million for fiscal year 1979. This budget request will terminate the programs for construction, capitation assistance, financial distress grants, advanced nurse training grants, loans, scholarships, and advanced nurse traineeships. Consequently, support would only be continued for special projects and nurse practitioner projects.

What effects will such dramatic decreases bring? The fiscal year 1978 budget provided funds for 1,100 schools to receive capitation assistance. These schools will not receive this aid if the budget figures are approved. One hundred fifty special project grants were awarded last year. Support in this category would be halved in fiscal year 1979. In fiscal year 1978, 96 graduate programs were aided by grants for advanced training of nurses. Some of these need to be continued this year but would be cut off in midstream if funds are slashed under the Administration's proposal. Under the Administration's proposal nurse practitioner programs would be funded at the fiscal year 1978 level or $13 million. Approximately 17 of the 83 currently funded programs would terminate at the end of fiscal year 1978, making room for a few new projects in this critical category.

Let us briefly examine the Administration's proposal for student assistance. Under student assistance programs last year approximately 28,000 individuals received loans accounting for 15 percent of the nursing students in this country, and 9,000 received scholarships. Schools would be able to continue funding loans from their replenished loan funds, but no federal funds earmarked specifically for nurses would be available. The Administration proposes that undergraduate nursing student financial assistance requirements could be met by the Office of Education loan and grant programs. However, no guarantee exists that nurses will receive loans or scholarships. For one thing, no additional funds have been provided in the budget in anticipation of these nurses seeking assistance from the Office of Education.

These budget cuts will force nursing schools to look to other sources of financial support. A few private schools have even indicated they might have to close.

According to a survey conducted by the American Association of Colleges and Nurses, which represents almost two-thirds of the 300 college nursing programs, the colleges revealed that this possible loss of funds would decrease enrollment, eliminate some programs, and cut back on faculty. For example, according to the Association, 55 to 60 percent of the faculty salaries in these colleges are currently supported by federal funds.

I would briefly like to describe the impact of the President's budget proposal for nurse training programs on the University of Connecticut School of Nursing. The President's budget proposal will have far reaching effects on the University's undergraduate and graduate programs. First of all, the elimination of capitation assistance would result in a reduction of undergraduate students from the current 125 to 108. Loss of capitation funding would result in a loss of funding for teaching assistance in laboratories, and loss of funding for purchase and replacement of laboratory equipment.

On the graduate level, there is a great need to retain the current level of federal support. If capitation funding is eliminated it is expected that only 10 percent of the graduate students would be full time, with the majority being part time. At the present time the ratio of graduate to nongraduate students is 2 to 1. Thus, capitation assistance which provides funding for traineeships is essential in permitting students to continue their education on a full time basis.

At the present time, the University of Connecticut School of Nursing and Yale University School of Nursing combined are graduting 40 nurses in the masters program each year. It is my understanding that both schools are in need of faculty replacements. Nurses trained in the masters program are greatly needed to fill current teaching needs, in addition to meeting future teaching needs.

I would like to explore the alternatives available to our nursing schools, if the proposed budget cuts go into effect. Two immediate sources of potential financial support come to mind, both placing the burden squarely on others—either students or state governments. One source of income would be to seek support from already overburdened state governments.

You will recall that the federal government got involved in the administration of nurse training funding because these measures did not represent the best means of support. For example, the main objective of the Nurse Training Act of 1971 as well as the Comprehensive Manpower Training Act of 1971 was to provide financial support for education in health professions schools by means of a capitation grant for each full-time student. To some degree, capitation assistance evolved as a response to claims of financial distress by health professional scchools in the late 1960's and early 1970's.

In looking at the funding needs for nurse training programs, we must closely examine the role which the nurse is playing in our nation's health care system. I am aware that there are a little over one million nurses in the United States today. However, the majority of these individuals were trained in hospital or associate degree programs. According to the American Association of Colleges of Nursing, less than 14 percent of today's nurses have earned a baccalaureate or advanced degree. In fact, less than one percent have obtained doctoral degrees. This is a critical point because it is the nurse with the advanced degree who serves as a faculty member or engages in the research projects which have been so lacking in the nursing field. In addition, our health care system is placing more and more emphasis on personnel who can provide primary care in health manpower shortage areas. We need the nurse trained in these college programs who can provide such care.

It is essential for us to realize that the nurse training program has addressed the problem of providing personnel to health manpower shortage areas in several ways. The Administration proposes to eliminate the funds to schools which cover the costs of advanced nurse traineeships. However, it is under this program that special consideration is given to applications for traineeship programs which train nurse practitioners who will practice in health manpower shortage areas. That same program also authorizes grants and contracts with various entities including nursing schools which would establish and operate traineeship programs to train nurse practitioners who are residents of health manpower shortage areas and who enter into a commitment to practice in that area.

Congress has opposed previous efforts to drastically limit federal funds to the nursing program. It has acted to restore budget cuts to this program in the past, and it has renewed the program periodically since 1963. I am proud to have introduced legislation in the 94th Congress to extend the nurse training programs for two years. You will recall that this legislation was incorporated into the Health Revenue and Health Services Act of 1975, and was vetoed by President Ford. However, Congress overrode the presidential veto, and the health services legislation became law.

I am hopeful that the 95th Congress will continue to show its support for nurse training programs. Legislation has already been introduced to renew the program. It includes S. 2416, introduced by Senators Javits and Kennedy, and H.R. 10468, introduced by Representatives Rogers and Carter. Both pieces of legislation represent a two-vear extension of existing nurse training authorities with only one revision. The legislation would eliminate financial distress grants because nursing schools have indicated that there is no real need for such a grant as long as they are receiving capitation assistance. The $5 million originally authorized for financial distress grants would be allotted to special projects.

To insure that quality nursing care continues to be provided, I strongly support the nurse training program. In that vein, I recommend restoration of the cut funds to the budget and the passage of the program extension.

Thank you Mr. Chairman for the opportunity you have given me to express my opinion on this most important matter.●

EULOGY TO HUBERT H. HUMPHREY

HON. LES ASPIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. ASPIN. Mr. Speaker, since the passing of the great Senator from Minnesota, Hubert H. Humphrey, many words have been spoken about the kind of life he lived and the kind of man he was. It seems that there are hardly enough good words to describe this man.

However, I recently attended a Democratic Party dinner in Sheboygan, Wis., and listened to a tribute to Senator Humphrey given by a man who knew him well and who knew him as a friend. The man who gave this touching tribute is James Dillman, an attorney and party activist in Sheboygan. The feelings he expressed are very personal, but I think the thoughts he expressed are shared by all of us and I hope you will allow me to take this opportunity to share Mr. Dillman's thoughts with you:

EULOGY TO HUBERT HUMPHREY

In Hubert Humphrey's book entitled, "The Education of a Public Man" he wrote with reference to his 1968 campaign for President of the United States, "I have done my best. I have lost. Mr. Nixon has won. The democratic process has worked its will, so now let's get on with the urgent task of uniting our country".

He went on, "In a lifetime of thousands of speeches and millions of words, those were the hardest ones I have ever had to speak. They came at the end of the longest day of my life, the day during which 73 million citizens cast their ballots for me, or for someone else, for President of the United States. It was a day when every minute lingered, when time was suspended, when suddenly there was nothing more to do after months on a treadmill, when finally fatigue overwhelmed me.

"Yet it was so special and tense a day. It was a day of school boy's dreams, a day almost all men in public life in America include in their fantasies. A day of harshest reality, of total success or total failure. At its end, no matter what the margin, I might be President-elect of the United States or I would be out of public service for the first time in a quarter of a century.

"Election Day, for a candidate, can only be solitary self confinement in the midst of madness, and my thoughts alone, euphoric one moment, depressed the next, kept me company that day".

These words reveal a facet of the man, Hubert Horatio Humphrey, a man destined for greatness, a man destined to become an eminent political leader in this great land of ours, a man, but for the quirks of fate, would have become President of the United States.

I suppose many of you, as have I, have contemplated on how things might have been different if Hubert Humphrey had been elected President in 1968. I know we would have had dynamic leadership of our country, the moral tone of the Presidency would have been of the highest and, instead of connivance and paranoia, we would have had compassion and virtue. We know he was kidded about his great flow of words, his talkativeness and his glibness. Some said that if you asked Hubert Horatio Humphrey a question you got a filibuster for an answer. Or, that he talked at the rate of 125 words a minute with gusts up to 250. But it was the mark of this great man that he could laugh at himself. He was a man of good humor, humility and simple grace and could take comments like these in stride. Gaylord Nelson once voiced doubts to him when he began his political career about running for office with a handle like "Gaylord". He was re-assured by HHH when he replied that if he could be a successful politician with a name like Hubert Horatio, Gaylord certainly had nothing to worry about!

The character of this man is shown by how he accepted his defeat in 1968 and came back to the United States Senate as the *junior* senator from Minnesota. The last time I talked to him he told me he was convinced that if the campaign of 1968 had lasted another 10 days he would have been President of the United States. He was not embittered by the result of the 1968 election. He had an abiding confidence in the American people, a feeling that Mr. Citizen would ultimately make the right decision, given the true facts, and in the principle that the best in America would eventually triumph. He had an ebullient personality and he engaged in the politics of joy. He was often criticized for that, but his was a feeling of eternal optimism for America. He knew, that somehow or other, the best would triumph, and, By Golly, he would do his best to see that it did. And, By Golly, he did! He made a mark on the political life of America equalled by no one else in modern times.

The outpouring of grief and sympathy that occurred before and after his death could not have been greater than if he had been President of our country. He touched the hearts and minds of the average American and they responded by the millions as they watched the funeral services in tears and sympathized with his brave widow, Muriel, and his family. Most Americans, regardless of political persuasions, felt they had lost a real friend, a man, who, regardless of his political philosophy, would listen to him and try to right what was wrong.

Hubert Humphrey believed it the duty of aspirants for public office to inform, to educate, to reason with the people they seek to lead. He believed utterly in democracy and the collective reason of properly informed people. He thought that political campaigns for offices of great responsibility are both an opportunity and an obligation to talk sensibly and truthfully about public questions and their full obligations. He tried to revitalize a basic assumption of democracy—honest political leadership that despises the easy road to popularity and insists on focusing attention on reality and truth, however distasteful. He felt that unless the great political parties and their spokesmen assume responsibility for educating and guiding the American people with constant candor, how can we be sure that the majority rule will meet the test of these searching times. *He was an optimist.* He felt that anyone who has seen the might and majesty of America must be an optimist—the American that asks for nothing for herself except what she has a right to ask for humanity itself.

It was a rare privilege to have known Hubert Humphrey. I knew him. My life and the lives of millions of Americans have been greatly enriched by a wealth no man can measure or define.

What greater epitaph can there be for this great man? ●

PERSONAL EXPLANATION

HON. ELIZABETH HOLTZMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Ms. HOLTZMAN. Mr. Speaker, because I was ill, I was unable to be present for the following votes. If I had been present, I would have voted as follows:

APRIL 24, 1978

Rollcall No. 244, "yes";
Rollcall No. 245, "no"; and
Rollcall No. 246, "yes." ●

TEST-BAN POLICY: DEALING THE PENTAGON OUT

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

Mr. LAGOMARSINO. Mr. Speaker, I would like to bring to the attention of my colleagues the following article by columnists Rowland Evans and Robert Novak which appeared in the Washington Post on April 29, 1978:

TEST-BAN POLICY: DEALING THE PENTAGON OUT

(By Rowland Evans and Robert Novak)

In two mid-April meetings conducted here under strictest secrecy, key officials in the national security bureaucracy agreed with British counterparts not to insist on previous stringent conditions for a total nuclear-test-ban treaty with the Soviet Union.

The extreme secrecy may have been designed to keep news of the meeting not so much from the Russians as from the Pentagon. The new U.S. negotiating posture amounts to accepting Soviet terms for verification of a comprehensive ban of all underground nuclear tests (atmospheric tests were outlawed 15 years ago). That is wholly unacceptable to the Joint Chiefs of Staff and some senior Defense Department officials who had no part in the decision, thus posing direct confrontation between President Carter and the Pentagon.

The president has talked repeatedly of a treaty "to prohibit any testing of nuclear weapons at all." But the Pentagon believes Moscow could easily violate such a treaty by testing small weapons in the 3- to 10-kiloton range, which cannot be identified as a nuclear blast. Since the United States would obey the treaty, that could in time give Moscow significantly higher confidence in the reliability of Soviet weapons and conceivably create U.S. doubt about its deterrent.

Ironically, the drive for a comprehensive test-ban treaty has been viewed by some arms-control advocates as an easy first step before taking the threatened strategic arms limitation agreement to the Senate. Fitting President Carter's dream of a world free from nuclear weapons, the test ban was thought to offer a quick win in the Senate.

Consequently, a major push has been under way for several weeks in Geneva for a test-ban treaty. But Soviet negotiator Igor Morokhov rejected the U.S. proposal that compliance be verified inside the Soviet Union by about 20 new internal seismic stations using sophisticated U.S. equipment guaranteed against Soviet tampering. Simultaneously, the British Cabinet secretly agreed to soften its negotiating position.

That was the situation April 17 when British officials came to Washington for a hush-hush conference with two critically important U.S. officials: Alan Neidle of the Arms Control and Disarmament Agency (ACDA) and Leslie Gelb of the State Department. The Defense Department was not invited to send representatives.

Neidle declared the United States and Great Britain must have a strategy that "finesses" Morokhov's concerns. Abandoning previous U.S. demands, Neidle proposed accepting no more than 12 seismic stations in

the Soviet Union at locations of Moscow's choice. Those stations would be located at existing Soviet facilities, possibly improved by U.S. earthquake-monitoring equipment not specifically designed for test-ban verification.

"The ACDA position," said one inside critic, "seems to be more concerned with obviating Soviet worries than obtaining an adequate verification network." Neidle even suggested that verification details not be worked out in advance but be left to a "joint consultative commission" after the treaty's ratification. The British agreed.

Finally, Neidle told the British the United States no longer insists on permitting some relatively low-level testing, called essential by U.S. weapons experts to maintain the nuclear arsenal. Rather, he said, the U.S. delegation will return to Geneva without any position on permitted testing. Neidle's new position was confirmed to the British two days later, April 19, in another secret meeting by John Markman of the National Security Council (NSC) staff.

Markham also voiced willingness to accept last year's offer from Soviet President Leonid Brezhnev for "voluntary" on-site inspections at Soviet discretion. But in fact, such inspections—voluntary or not—are ineffective, as the Russians well know. It is sophisticated seismic stations that are the most effective, and that is what Moscow objects to.

The secretary of the April 17 and 19 meetings suggests that the State Department, ACDA and the NSC are short-stopping usual interagency review procedures—thus gaging protests. That fits test-ban tactics followed by Paul Warnke, ACDA's shrewd director.

While publicly saying the question is still open, Warnke has argued within the top-secret Security Coordinating Committee (SCC) for a treaty banning all tests, adding that the Geneva talks should otherwise be broken off.

Two members of the House Armed Services Committee—Robin Beard (R-Tenn.) and Sam Stratton (D-N.Y.)—were alerted to Warnke's SCC arguments. They wrote Warnke April 4 asking why ASDA wants a total test ban that cannot be verified against Soviet violations. ACDA replied that the Beard-Stratton letter should be classified, partly because it might embarrass Moscow, then sent an unresponsive reply (classified "confidential").

The biggest question now is the reaction of the Joint Chiefs of Staff, who accepted the role of good soldier on Korean troops, B1 bomber and the neutron warhead. Testifying at closed House hearings March 15 and 26, representatives of the chiefs said they could not support a test-ban treaty that could not be verified; shortly thereafter, intelligence-community witnesses testified a total test ban was not verifiable. What was intended to ease the way for SALT is becoming no small headache in its own right.

HELSINKI COMMISSION TO MEET WITH CELLIST MSTISLAV ROSTROPOVICH

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. FASCELL. Mr. Speaker, famed cellist and National Symphony music director Mstislav Rostropovich will testify before the Commission on Security and Cooperation in Europe on Thursday, May 4 at 10 a.m., in room 1318 of the Dirksen Senate Office Building. The hearing will be Rostropovich's first public opportunity in the United States to discuss the recent Soviet decision to strip him and his wife, Soprano Galina Vishnevskaya, of their citizenship.

In addition to discussing the question of a citizen's right to retain his nationality, Rostropovich is expected to comment on the conditions to which Soviet musicians must submit in order to perform abroad, the restraints on Western performers visiting the Soviet Union and the stance the West should take toward cultural cooperation with the U.S.S.R.

The Helsinki Accord of August 1975, which the independent executive-legislative commission was formed to monitor, provides that the 35 signatory countries, including the Soviet Union, will "respect human rights and fundamental freedoms" and will promote and "develop contacts and cooperation among persons active in the field of culture."

The Commission hearing is open to the press and public.●

SENIOR CITIZEN INTERN PROGRAM

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. LEHMAN. Mr. Speaker, the Subcommittee on Accounts of the House Administration Committee held hearings last week on a resolution to establish a congressional senior citizen intern program. I strongly support this resolution and I would like to include in the RECORD the statement I submitted to the subcommittee.

THE SENIOR CITIZEN INTERN PROGRAM

Mr. Chairman, I am proud to be a cosponsor of H. Res. 675, a resolution to create a Congressional Senior Citizen Intern Program, and I commend the Subcommittee for giving this proposal its active consideration.

The success of the Senior Citizen Intern Program, organized by Congressman Hillis, is well documented. It all began rather informally and grew as more and more senior citizens learned of its existence. I, for example, first heard about the program last year from a constituent who wished to participate. Since then, word of the intern program has continued to spread and numerous senior citizens in Florida's Thirteenth Congressional District have expressed interest in taking part in its activities.

In recent years, I have noted that senior citizen groups have taken a greater interest in legislation which affects them. As senior interns, older Americans can learn to play a more active role in government affairs. They obtain a better understanding of what government can do for them and how they might work to make their needs known.

This is one of those rare opportunities where Congress can establish a program that is already a proven success. Passage of this resolution will enable more Members and consequently more senior citizens to participate at this program. The enthusiasm of both Members and interns for the Senior Citizen Intern Program is the best recommendation for broadening participation in it. With prompt action on the part of this subcommittee, senior citizens from every Congressional District will be able to benefit from this enriching experience.●

TRIBUTE TO DAVID H. ZIMMER

HON. GEORGE E. DANIELSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. DANIELSON. Mr. Speaker, I would like to call the attention of my colleagues to the distinguished services of David H. Zimmer of the city of Montebello in the 30th Congressional District of California, which I am privileged to represent. Dave Zimmer, who retired this past spring as a Montebello city councilman, will be honored at a banquet by the Montebello Chamber of Commerce and Industry on May 19, 1978.

Dave has lived in the city of Montebello with his wife, Carolyn, for more than 20 years. They have four sons and one daughter—Arthur, Stephen, Dave, David, Jr. and Catherine, and two grandsons—Jason and Ryan.

Dave first came to southern California during World War II and began working at the shipyards and later at a truck building firm when he was 19 years old. He became a self-starting businessman in 1957. His ingenuity and determination has made him a success in all of his business endeavors, the Auto and Truck Body Specialty Shop; Zimmer's Truck Shop; Standard Oil-Zimmer Service Center; and currently, with associates, he is forming a new freightliner truck agency.

Meanwhile, Dave has served on the Montebello Planning Commission and 2 years on the police reserve. He was elected to the Montebello City Council in 1962 and served for 16 years, including four terms as mayor. He recently retired, voluntarily, after compiling an enviable record of hard work and faithful service to the city.

In addition, Dave has been active in numerous community organizations. For 20 years he has been a member of the Lions Club (he served as president in 1975–1976, and in 1963 he was voted "Director of the Club" and "Lion of the Year"). Included among his other civic interests are the following: Montebello YMCA; Montebello Explorer Boy Scouts; California Bicentennial-Montebello Community; the Montebello Community Development Committee; Chairman of the Citizens Drive to purchase a bus for the Crippled Children's Society; Chairman of Montebello's 50th Anniversary Celebration Committee; and General Chairman of a campaign to establish the Veterans' Memorial in City Park. On March 21, 1973, he was the recipient of Montebello's Annual All-Service Club's award as "Citizen of the Year."

It is my great pleasure to give tribute today to my good friend and fine community leader, Dave Zimmer.

I join Dave's devoted family and friends of Montebello in wishing him well in the years ahead and giving him heartfelt thanks for his generous and faithful service to his city.●

MALCOLM MUGGERIDGE'S 25 PROPOSITIONS

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

Mr. KEMP. Mr. Speaker, the distinguished British writer and social critic, Malcolm Muggeridge, recently turned 75 and I wish him happiness and Godspeed.

He chose that opportunity to offer 25 propositions on what went wrong in the West and what ought to be done about it. They are profound because they constitute, singularly and collectively, a body of truth which, if taken together and incorporated into public policies, could reverse the decline of the West.

This Congress ought to pay particular attention to the points Mr. Muggeridge raises, because I am fearful that the course herein has succumbed to the fallacies which he so ably depicts both in these propositions and in his two-volume autobiography, "Chronicles of Wasted Time."

The New York Times has done us a service by bringing these 25 propositions of a 75th birthday to their readers' attention. This brings it to the Nation's.

The Times' piece follows:

[From the New York Times, Apr. 24, 1978]

TWENTY-FIVE PROPOSITIONS ON A 75TH BIRTHDAY

(By Malcolm Muggeridge)

LONDON.—1. When mortal men try to live without God they infallibly succumb to megalomania or erotomania, or both. The raised fist or the raised phallus; Nietzsche or D. H. Lawrence. Pascal said this, and the contemporary world abundantly bears it out.

2. Life is a drama, not a process. The Passion of Christ—a stupendous drama—has enormously enriched our Western civilization, spiritually and artistically, whereas the theory of evolution, which presupposes a process at work, has swallowed up all human creativity in the quest for knowledge and material prosperity.

3. Accumulating knowledge is a form of avarice, and lends itself to another version of the Midas story. This time, of a man so avid for knowledge that everything he touches turns to facts. His faith becomes theology, his love becomes lechery, his wisdom becomes science; pursuing meaning, he ignores truth.

4. A God who chose to generate genius capable of producing a *Missa Solemnis*, or a Chartres Cathedral would surely be unwilling to confine His creativity to so banal and mechanistic a procedure as natural selection. It would be as though "King Lear" had come off a conveyor belt, or "Paradise Lost" out of a computer.

5. I never met a rich man who was happy, but I have only very occasionally met a poor man who did not want to become a rich man.

6. Following the course of public events and persons, as a journalist must, constantly confirms the truth of Lord Acton's well-known dictum, that power corrupts and absolute power corrupts absolutely. Blake made the same point more poetically:

"The strongest poison ever known came from Caesar's laurel crown."

7. It follows from this that there can never be a good government; only governments that are less bad than others. The quest for a perfect government ends infallibly in anarchy or the Gulag Archipelago.

8. The three most disastrous inventions of our time have been the birth pill, the camera and nuclear weaponry. The first offers sex in terms of sterility, the second reality in terms of fantasy, and the third security in terms of destruction.

9. The news media now provide the opiate of the masses.

10. Mystical ecstasy and laughter are the two great delights of living, and saints and clowns, their purveyors, the only two categories of human beings who can be relied on to tell the truth. Hence, steeples and gargoyles side by side on the great cathedrals.

11. St. Francis and his friars were always laughing, and Mother Teresa insists that laughter is an essential part of the religious life. The proceedings of the World Bank and the International Monetary Fund, on the other hand, are deadly serious, and the Bank's president, Robert S. McNamara, is, it seems, little given to mirth.

12. God, unlike Mr. McNamara, is a great joker. What, for instance, is the Fall of Man but the old bananaskin joke on cosmic scale? When the gates of heaven swing open, as they do occasionally, along with the celestial music, there is the unmistakable sound of celestial laughter.

13. The most important happening in the world today is the resurgence of Christianity in the Soviet Union, demonstrating that the whole mighty effort, sustained over 60 years, to brainwash the Russian people into accepting materialism, has been a fiasco. In the long run, governments, however powerful, fall flat on their faces before the Word which, 2,000 years ago, came to dwell among us, full of grace and truth. In other words, absolute power collapses when confronted with absolute love.

14. There is no such thing as darkness; only a failure to see.

15. God's ironies are intended for our enlightenment, exposing as they do our follies by demonstrating their reductio ad absurdum. Thus, cupidity is confuted by inflation, carnality by porn, fame by celebrity, learning by sociology, consensus by sloganeering—as was foreseen by Kierkegaard when he remarked that 10,000 people shouting the same thing makes it false even if it happens to be true.

16. Two contemporary notions, of progress and of equality, have proved particularly disastrous. The former elevates change into being in itself desirable, which, as Euclid says is absurd, and the latter is equally fallacious. Human beings are not equal, but they are brothers and sisters, as belonging to one family, and all created in the image of their Creator. All the ruin of Western man lies in the change from Brother to Comrade.

17. Another disastrous concept is the pursuit of happiness, a last-minute improvisation in the American Declaration of Independence, substituting for the defense of property. Happiness pursued cannot be caught, and if it could, it would not be happiness.

18. This will surely be known as the Age of Credulity. Television advertisements, for instance, can safely assume in viewers a fathomless credulity, compared with which the most outrageous superstitions and supernatural manifestations seem credible. Believing nothing results in believing anything.

19. Only atheists never doubt; the moment one believes, one automatically doubts, doubt being an integral part of faith. After all, we can only hope to see the images of truth, not truth itself. But there are true and false images. Jesus is a true image.

20. Aleksandr I. Solzhenitsyn says there are virtually no Marxists in the Communist countries, which I should suppose to be true. On the other hand, they are multiplying in the ostensibly capitalist countries, notably on campuses and in faculties, and among priests and Jesuits, laicized and actual, and media pundits. It would be a splendid case of Fearful Symmetry if on the same day that Marx is finally thrown out of the Kremlin window the Vatican were to issue an encyclical, De Necessitate Marxismi.

21. Growing old is just a process of getting tired. Soon I shall doze off, and then fall asleep. How beautiful to stretch oneself out!

22. I have never doubted that our existence in this world has some sort of sequel. It would seem to me preposterous to suppose that the universe was set up solely to provide a mise-en-scène for the interminable soap opera of history, with its stock characters and situations endlessly repeated.

23. Alas, the terrible inhumanity of the humane! Herod's slaughter of the innocents was negligible compared with the millions of babies being slaughtered under the legalized abortion procedures now existing almost everywhere. Again, as legalized euthanasia gets under way the Nazi performance in this field pales into insignificance. At Nuremberg the Nazi practice of legalized euthanasia was condemned as a war crime. So, it takes 30 years to transform a war crime into an act of compassion.

24. A truly peaceful day from beginning to end is a great rarity in this world.

25. St. Thomas Aquinas in old age got stuck in his Summa theologica on the matter of penance, and felt his courage failing. So, an old biographer records, he hung his harp on the willows by the river because he had caught a glimpse of heaven, I should like this to happen to me.●

MR. BLAINE HAJDUK HONORED AT LOYALTY DAY BANQUET

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. MURTHA. Mr. Speaker, on Saturday, May 6 over 500 veterans and their families will gather to honor a man who truly deserves the attention of all those who care about America—Mr. Blaine Hajduk.

Blaine has been extremely active in the military and with veterans affairs in the area I represent. He was inducted into the U.S. Army in 1953, and served in Korea from 1954 to 1955 with the 703 Ordnance Battalion and the 7th Infantry Division.

He holds the National Defense Service Medal, the United Nations Service Medal, and the Korean Service Medal.

Blaine has also been extremely active in veterans affairs. He held the post of commander of the Lt. William Garfield Thomas, Jr., Veterans of Foreign Wars Post 4963 in Ebensburg from 1968 to 1969. He served as Cambria County commander of the Veterans of Foreign Wars from 1971 to 1972. He has also been the District 26 V.F.W. commander from 1977 to the present time. He has also been appointed a national aide-de-camp to the national commander.

His work with veterans and interest in his Nation has been supplemented by his concern for his family and the honor he receives this week is certainly one they deserve to share.

Since the CONGRESSIONAL RECORD is the history not only of the work of Congress, but of the people and communities of the United States, I believe it is very fitting to honor Mr. Blaine Hajduk who symbolizes so much of the American

spirit, and represents so many of the strengths that have made our Nation the greatest in the world.●

AGAINST ARMS EMBARGO

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. FINDLEY. Mr. Speaker, on April 19, I inserted into the RECORD a series of editorials urging the lifting of the U.S. arms embargo against Turkey that have appeared in newspapers across the country. During the past week, editorial support for the repeal of the embargo has increased. I would like to call to the attention of my colleagues these editorials and the very cogent points they argue.

[From the Louisville Courier Journal, Apr. 12, 1978]

SLIPPERY STRINGS ON U.S. ARMS SALES

The principle behind the law that restricts possible uses of the weaponry the United States supplies to other countries is well worth preserving. We don't want to be the merchant of death who encourages power-hungry governments to go to war with weaker neighbors.

But translating this principle into practice is not quite so straightforward, as is shown by the current disputes over arms supplies to Turkey and Israel. Excessive concern for technical legalities, or concessions to powerful lobbies in Washington, can so distort judgment that America's interests are overlooked.

Until 1974, little attention was paid to the U.S. law requiring that American-supplied arms be used only for defensive purposes. But then Turkey invaded Cyprus, using U.S. weapons. The Turks insisted that this was legitimate. Certainly the Turkish Cypriot community on the island was in grave danger during the upheavals that followed the coup against then-President Makarios. And the Greek Cypriots who led the coup had the backing of the military junta then ruling Greece.

Despite these arguments, the Greek lobby on Capitol Hill, its powers undiminished by the existence of a military dictatorship in Athens, swung into action against Turkey. And members of Congress who might have accepted the initial justification for the invasion were angered by Turkey's subsequent moves deeper into the island. As a result, Congress forced the administration to heed the law and impose a total arms embargo on Turkey.

Turkey's response was to close down its U.S. bases, including important NATO posts for monitoring Soviet activity. Last year when Congress was persuaded to relax the embargo slightly, permitting Turkey some military credits, it was Greece's turn to be miffed and pull its forces out of the NATO command. Ironically, the pressures and counterpressures had done nothing to break the Cyprus deadlock.

That's because Turkey and Greece have long been hostile to each other: they are currently embroiled over Aegean Sea rights as well as over Cyprus. But taking their feud into NATO affairs has dangerously weakened the alliance's defenses in this strategically vital region. U.S. policy toward the two, and particularly the heavy-handed congressional approach to the arms question, has not helped matters.

Congress's attitude toward Israel's use of U.S. arms provides a sharp contrast. In the 1967 war, when Israel was technically the aggressor even though its action against Egypt and Syria was clearly a defensive preemptive strike, not a murmur was heard that Israel might be violating the terms of U.S. law. Israel's invasion of Lebanon can be justified in principle as a defensive move, in response to provocative terrorist attacks across the border which Lebanon has been unable to prevent.

Nevertheless Secretary Vance is correct in suggesting, as he did in a letter to Congress last week, that a technical violation of the law may have occurred. Later, he amplified this suggestion by observing that it was the disproportionate severity of the Israeli attack that raised the question of legitimacy. The use of cluster bombs, in particular, seems to have been excessive.

There isn't much chance, of course, that Israel will be penalized with an arms embargo, even if it doesn't begin to withdraw this week as promised. Israel, unlike Turkey, has many powerful friends in Washington. Moreover, an objective comparison of the two situations would have to take into account Israel's plight, which is more perilous than Turkey's. If war should break out between Greece and Turkey, neither country would face the annihilation in defeat that Israel would suffer in a losing war with the Arabs.

The fact remains, however, that Congress risks appearing to apply a double standard. It has also ignored the very real interest that the U.S. has in maintaining stable and friendly governments in the eastern end of the Mediterranean. (Friends of Israel might also note that the American ability to help Israel in an emergency could be seriously hampered if Soviet influence should extend to Turkey.)

President Carter has now asked Congress to consider lifting the Turkish arms embargo. Imposing the ban didn't do anything to resolve the situation on Cyprus. Lifting it may not be much help either. The roots of the conflict go much deeper than the clashes of the past few years.

But that's not how Congress should approach the arms issue. Nor should the question be decided on legalistic niceties, for either Turkey or Israel. Instead, the aim should be to see where the United States' best interest lies. If Congress sticks to that principle, it shouldn't go wrong.

[From the Cleveland Plain Dealer, Apr. 16, 1978]

AID TO TURKEY

With a little help from Congress there is now a chance that the United States can begin to repair the damage dealt NATO's southern flank by the Greek-Turkish dispute over Cyprus.

Three years after the United States suspended most military assistance to Turkey because of that country's armed intervention in Cyprus, President Carter has proposed a resumption of arms sales and other forms of military aid to Turkey.

But several influential congressmen who have championed the Greek cause in the Cyprus dispute now threaten to torpedo the President's plans. We think that would be a mistake.

True, Turkey's Cyprus intervention on behalf of the Island's Turkish minority could be construed as unlawful and thus a violation of legal restrictions on the use of American supplied weapons. But the 1974 Greek-inspired coup against the island's government did in fact threaten the rights of the minority Turks.

While negotiations to end the Greek-Turkish impasse over Cyprus have yet to succeed, the level of rhetoric on both sides has subsided and the current Turkish government appears more ready than its predecessors to accept a face-saving compromise. The United States should, of course, maintain diplomatic pressure on both countries to resolve their differences.

But in the meantime, a measured resumption of military aid to Turkey with more promised after a settlement would coincide with the value of Turkey's strategic position and her half-million-man armed forces contribution to NATO.

[From the Chicago Sun Times, Apr. 11, 1978]

TO TAME THE TURKS

Greek-Americans, Greek Cypriots and Greeks in Greece are as hot as the Aegean sun over the Carter administration's proposal to lift the 3-year-old U.S. arms embargo against Turkey.

Our sympathies in this quarrel lie with the Greeks, and it is because of those sympathies—not in spite of them—that we hope Congress concurs with the administration.

The background of the issue is this: The Turks invaded Cyprus in 1974 after the junta of colonies that then ruled Greece instigated a coup on the island that Turkey felt imperiled the interests of Turkish Cypriots.

Since then the island's 150,000 Turks have occupied the best 36 per cent of the land, in the north, isolating 500,000 Greeks—including 160,000 refugees—in the south.

Congress imposed the embargo on Turkey to punish it and to twist its arm into undoing this inequity against the Greek Cypriots. Turkey responded by closing the 26 bases from which the United States kept its eyes on the Soviet Union. And since then the Turks, resisting the "insulting" linkage of U.S. arms and a Cypriot settlement, have been impossible to move.

The administration position now is that though coercion of the Turks has failed, stroking might work. And there are signs that a deal for as much is in the works. Sec. of State Cyrus R. Vance told Congress last week that he expects Turkish Cypriot leaders to propose, at mid-month readjustments in the territory Turkish forces hold.

In the meantime, it would be well for the pro-Greek lobby in Congress to cool its rhetoric and for Greece and Greek Cypriots to extend their patience.

Both Greece and Turkey are members of NATO, and the Cyprus affair has so exacerbated their ancient hostilities that NATO's southern flank is in tatters. Greece withdrew its forces from NATO command long since. There is a danger that Turkey will get out of the alliance entirely and turn to the Soviet Union to equip its armed forces if the U.S. embargo is not lifted.

Military sanctions and political loudmouthing have done nothing to help NATO, its two Aegean members, their rleations with the United States or the abused Greek peoples on Cyprus. A little oil on these rolling waters is worth a try.

[From the Kansas City Star, Apr. 17, 1978]

DOOR AJAR ON CYPRUS

The new Turkish Cypriot proposals for settlement of the Cyprus crisis fall short of adequacy, but the mere offering of them—flawed though they may be—is a constructive development. After three years of stand-pat dogmatism, backed up by the guns of occupation troops from the Turkish mainland, the overture suggests that the Cypriot minority may be prepared to deal.

To what extent the move was urged or dictated by Turkey in the hope of influencing U.S. congressional sentiment for an end to the arms embargo against Ankara can only be speculated. In any case it is immaterial. The opportunity has been presented for a resumption of negotiations under United Nations auspices—an opportunity that Secretary-General Kurt Waldheim must quickly seize. At least, now, there is something to talk about.

Aspects of the proposals, as they have been reported, are on their face neither fair nor feasible as a basis for settlement. Provision for the repatriation of Greek Cypriots to their homes in areas under Turkish occupation appears meager. The "readjustment" that is envisioned in the island's territorial division is, to borrow a phrase from the Mideast impasse, inconsequential. Obviously no acceptance can or will be found for a formula that would leave the 20 percent Turkish Cypriot population in possession of nearly 40 percent of the island.

But numbers are negotiable. Basic attitudes—the will to grasp for peace—are not. If nothing else, the new proposals imply that the Turkish community on Cyprus does recognize, however belatedly, that bristling hatred and perpetual foreign occupation are not the foundation stones on which a future can be built.

OLDER AMERICANS MONTH: A SUMMONS TO IMPROVE TOMORROW FOR TODAY'S AGING

HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. PEPPER. Mr. Speaker, on April 13, 1978, President Carter proclaimed May as "Older Americans Month." Carter's proclamation stated in part that—

Older Americans are an invaluable source of talent, skills, and experience . . . their skills and knowledge are important to our economy, and it is important to their lives and health that they be able to remain as self-reliant as possible, through employment and other opportunities, and through necessary supportive services that enable them to live their later years in dignity and self respect.

Like all Americans, they need comfortable and safe places to live, nutritious daily diets and adequate incomes and services to give them freedom to make choices. We all must work together to create these conditions in our communities.

I applaud the President's views and join him in pursuing that objective.

The House Select Committee on Aging, which I have the privilege to chair, is responsible for advising Congress and the American people on methods of meeting the challenges of growing old in America.

Since its creation in 1975, the committee has investigated the social, medical, economic, and legal aspects of aging. As most know, what we have come to realize is the frightening extent to which millions of older Americans are victimized—deprived of their right and ability to function normally in society.

President Carter's designation of next month as "Older Americans Month" confirms the committee's findings and imparts substance to the fact that for millions of aging Americans life is hollow and full of uncertainties, unplesantness, and fear, and we have got to find ways to make life more meaningful and help restore some of the optimism these people had and lost.

The problems encountered in later life are many. Fortunately, the Congress is becoming increasingly aware of the plight of this particular population. The recent passage of the legislation governing mandatory retirement demonstrates that a concerned President, Congress, and Nation, working together, can assure the aged, and so the American people, their right to independence, security and dignity in later life. Let this month—"Older Americans Month" symbolize a recommitment to that mutual effort.

I would like to submit for my colleagues' attention the President's message proclaiming May as "Older Americans Month," in its entirety, at this point in the RECORD:

OLDER AMERICANS MONTH, 1978

(A Proclamation by the President of the United States of America)

When the month of May was first set aside in 1963 in special tribute to our nation's senior citizens, there were fewer than eighteen million Americans over the age of sixty-five. Today, their number exceeds twenty-three million.

Older Americans are an invaluable source of talent, skills and experience. Their sacrifice and hard work in the past have brought us through wars and hard times, and kept our Nation faithful to the values and principles on which it was founded. They are our link with what has gone before, remembering the good things we are in constant danger of losing, as well as the bad things we have overcome, and how it was possible. They can help us understand the mistakes of the past so that we do not repeat them. They can help us gather strength and courage from the wisdom of the past to make a better future for our children.

Their skills and knowledge are imporant to our economy, and it is important to their lives and health that they be able to remain as self-reliant as possible, through employment and other opportunities, and through necessary supportive services that enable them to live their later years in dignity and self-respect. Just as they must not be arbitrarily excluded from contributing to our society, they must not be asked to bear the burdens of society when they are no longer able.

These men and women are a vital part of this Nation. Like all Americans, they need comfortable and safe places to live, nutritious daily diets and adequate incomes and services to give them freedom to make choices. We all must work together to create these conditions in our communities.

Now, therefore, I, Jimmy Carter, President of the United States of America, do hereby designate the month of May as Older Americans Month and I ask public officials at all levels, community agencies, educators, the clergy, the communications media and each American to help make it possible for older Americans to enjoy their later years.

In witness whereof, I have hereunto set my hand this nineteenth day of April, in the year of our Lord nineteen hundred seventy-eight, and of the Independence of the United States of America the two hundred and second.

JIMMY CARTER.●

ST. GABRIEL HIGH SCHOOL WEEK

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. OTTINGER. Mr. Speaker, the week of April 30 through May 7 has been designated as "St. Gabriel High School Week" with special events to celebrate the anniversary of the school. These events include a celebration for all alumnae and former teachers on Sunday, April 30. On Monday, May 1, the present school community will express its gratitude in a concelebrated Mass of Thanksgiving celebrated by the priests from various feeder parish schools. Other activities include a field day on Thursday, May 4; a student talent show on Friday, May 5, and the senior-parent communion breakfast on Sunday, May 7.

The school wants to recognize in a special way the following women who have been the administrators of the school from its beginning in 1927 to the present—Sisters: Miriam Josephine Phelan (first high school principal), Maria Josephine Berrigan, Mary Madeline Duffey, Marie Annette Scanlon, Mary Bernadita Kelly, Inez Rosaire Cummings, Mary Aquinata Adler, Veronica Miriam Burton, Anita Mary Driscoll, Angela Maria Higgins, Mary Sheila Scanlon, Marie Celine Rogers, Eileen Marie Charters, Anne Marie Cleary, Mildred Azevedo, Dominica Rocchio (present principle).

The history of St. Gabriel High School is intertwined with the history of St. Gabriel's Parish in New Rochelle. The parish came into existence through the generosity of Mr. and Mrs. Adrian Iselin, wealthy pioneers of Westchester. Adrian Iselin was a banker, at one time consul to Switzerland, and cofounder of the Metropolitan Opera House. In 1887, 6 years before the parish was founded, Adrian Iselin had a recreation center built for the young people of New Rochelle. This was located on the northwestern corner of Main Street and Centre Avenue, and because of its dignity, was usually referred to as the Lyceum. After 10 years in use as a gymnasium, it was generously donated to St. Gabriels Parish to serve as a parochial school. It opened in September, 1897, with four Sisters of Charity as teachers. It is especially meaningful that the Sisters of Charity came to staff the school. Elizabeth Bayley Seton (the first native American saint), foundress of the Sisters of Charity, was a direct descendant of the founders of New Rochelle: a lateral descendant of the founders of Pelham. As a teenager, she spent many happy days at the home of her uncle, William Bayley. This home was built on shore front land which William Bayley had bought from his brother-in-law, Joseph Pell; it lay overlooking the sound, partly in Pelham and partly in New Rochelle.

The school continued to grow and in 1903, an additional building was erected adjoining the Lyceum. In 1925 the property was sold and the money used to buy property to the west of the church on Washington Avenue. In September 1927, the Adrian Iselin Memorial School (St. Gabriel School), the gift of the sons and daughters of Mr. Iselin, opened with 355 pupils for the elementary grades and 70 for the high school. This high school was coeducational from 1927 until the early 1940's. The boys department was then transferred to what is now Blessed Sacrament High School on Shea Place.

To date, St. Gabriel High School has graduated 46 classes of young people who

are serving the community in many and varied professions. From its very start, the spirit of the school has been one that has stretched out to meet the needs of the community. The Sisters of Charity who were so instrumental in its foundation (and who still staff the school) were and are ever mindful of the charism of their foundress whose vision of education is seen in the parochial school system and whose love for the poor caused her sisters to establish child caring institutions and hospitals. Today there are still dedicated teachers who are preparing the present student body to take their places in society, but whose vision also includes the responsibility to reach out to those less fortunate or simply to share the gift of presence. And so, the school has an excellent community action program in several health and educational agencies in the area surrounding the school.

Its academic excellence is one that enables the school to meet the varied ability levels of its students. With a student-faculty ratio of 15 to 1, the school is a friendly place where students are known by name and where coming to St. Gabriel's is a family tradition—parents and older sisters have graduated from the school. The school offers an honors program as well as remedial classes in reading and math for those students who need more work in these areas. In response to the State education department recommendation encouraging articulation between high schools and colleges, a dual enrollment program in senior year is maintained with Iona College and Elizabeth Seton Junior College. New Rochelle is proud of St. Gabriel's ability to meet the needs of its students and the community.●

THE AFFORDABLE HOME MORTGAGE ACT OF 1978

HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. FRASER. Mr. Speaker, I am today introducing legislation, the Affordable Home Mortgage Act of 1978, which would require the Secretary of Housing and Urban Development to establish a demonstration program to test ways of helping moderate-income families become homeowners for the first time. The program would utilize a system of graduated mortgage payments at interest rates not to exceed 7 percent. These lower-than-average interest rates would be provided through secondary financing by the Government National Mortgage Association (GNMA), which would buy up the original mortgages from both public and private lenders.

My proposal is patterned after a State program operated by the Minnesota Housing Finance Agency. The Minnesota program is similar in that it seeks to expand homeownership opportunities for moderate-income people through variable mortgage payments at below-market interest rates.

In today's inflated housing market, help is needed to enable young families to own their first home. A recent survey by the National Association of Homebuilders indicates that nearly two-thirds of all new homes sold from mid-1975 to mid-1976 were sold to families with incomes over $20,000 and that mosts of those families were able to buy by advantageously trading an older home. First-time homebuyers, particularly those of average or below average income, are being effectively priced out of the market.

The median selling price for a new home in the Twin Cities area is now about $55,000, and the selling price for a previously occupied home is about $10,000 less. The rule-of-thumb used by banks is that the price of a home should not exceed two and one-half times annual income. That would mean that only people with incomes of $22,000 and above could afford to buy a new home.

In the past, monthly interest payments have generally been set at a fixed level for the full term of the mortgage. For young people who can look forward to a steady rise in income, it makes sense to lower their monthly payments when they are starting out on the job and then tailor their monthly payment schedule to their income. The graduated payment feature of my bill would correspond to a family's rising income, which could result both from inflation and improved earning power.

Existing law provides for graduated payment mortgages and for mortgages at below-market interest rates, but does so separately. There is good reason to combine these features into one program as is proposed here.

Private lenders currently provide graduated-payment mortgages at the FHA-insured rate of 8¾ percent. In order to meet the payment schedule under this system, prospective homeowners must expect their income to rise significantly during the early years of the mortgage. Under the lower mortgage interest rates proposed in my bill, young families would be able to meet home payment schedules based on expected increases in income that merely keep pace with the cost of living.

Under the proposed demonstration program, 2,000 first-time homebuyers would be assisted in the purchase of homes each year. At the end of 3 years Congress would have an opportunity to reevaluate the program and to determine whether it had in fact achieved its goal—to make owning a home a realistic possibility for young people starting out in life.

The 1977 Housing Act made it clear that we need to promote homeownership opportunities for moderate-income families. Yet none of the current homeownership assistance programs is geared to moderate-income working people. I am concerned that without a new initiative of the kind I have proposed, the American dream of being able to own a home will remain an unaffordable luxury for too many Americans.

The text of the bill follows:

H.R. —

A bill to direct the Secretary of Housing and Urban Development to establish a program to demonstrate the feasibility of significantly expanding home ownership opportunities for moderate-income families.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Affordable Home Mortgage Act of 1978".

SEC. 2. Title V of the Housing and Urban Development Act of 1970 is amended by adding at the end thereof the following new section:

"TANDEM PLAN DEMONSTRATION PROJECT

"SEC. 511. (a) The Secretary shall establish and maintain a demonstration project, through September 30, 1981, for the purpose of determining the feasibility of significantly expanding home ownership opportunities for moderate-income families by directing the Government National Mortgage Association to provide secondary financing, for mortgages which have graduated rates of amortization corresponding to anticipated variations in family income and which have a below-market interest rate (not to exceed 7 percent per annum). These mortgages may be insured through Federal or private mortgage insurance programs and may be purchased from public or private lenders.

"(b) The Secretary may not permit such Association to purchase or to make commitments to purchase mortgages under this section in an amount which exceeds $80,000,000 for any fiscal year, and no such purchases or commitments may be made unless approved in an appropriation Act.

"(c) Any expenditures with respect to the insurance of mortgages under this section shall be made from the housing insurance fund designated for such purposes by the Secretary. In carrying out this Act, the Secretary may permit such Association to utilize the authorities described in subsections (c), (d), and (f) of section 313 of the Federal National Mortgage Association Charter Act, except that any authority exercised pursuant to subsection (c) of such Act may be exercised only to the extent as may be approved in appropriation Acts.

"(d) The Secretary shall make annual reports to both Houses of the Congress for the purpose of providing a detailed description of the results of the demonstration project carried out pursuant to this section."●

THE SCHOMBURG LEGACY

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. RANGEL. Mr. Speaker, the Schomburg Center is located in my district and was recently recommended by the New York State Board for Historic Preservation to be nominated to the National Register of Historic Places in Washington, D.C.

The followirg article, "The Politics of Being Ready," appeared in the National Black Monitor. I wish to sharc this well written article with my colleagues as it gives an accurate account of the Schomburg legacy.

THE POLITICS OF BEING "READY": DR. JEAN BLACKWELL HUTSON AND THE SCHOMBURG CENTER FOR RESEARCH IN BLACK CULTURE

READINESS TO SERVE

There is a quaint, but helpfully revealing, Nineteenth Century story told of a conver-

sation between a Scottish Presbyterian preacher and an Anglican parish parson. The story has a kind of "ready" meaning for all black Americans and is an appropriate way of beginning a story about "the Schomburg."

In those bygone days of 100 years or more ago, Presbyterians were said to have preached, debated—and argued—about a doctrine called "pre-election" for sainthood or about being "predestined" for heaven. When a deeply devout and enthusiastic Scottish preacher had spoken with a visiting Anglican (or English) parson on this subject for about the space of an hour, the Anglican parson startled his Scottish host by saying that he had become thoroughly convinced of the truth of every word that his host had said.

"Now you will become one of us!" the Scottish preacher said with a tremendous sense of satisfaction. But the Anglican parson replied, in a devastatingly nonchalant manner, "Why should I? We Anglicans need no 'predestination,' since we have already arrived!"

Both Arthur A. Schomburg, the founder of the Schomburg Collection of black history and art, and Dr. Jean Blackwell Hutson, the Schomburg Center's principal developer and its current Director, have been persons who were more than "predestined" for great things. They both were 'ready," in the deeply significant sense of their both being able—from their early youth—to take advantage of practically every opportunity which moved them toward the realization of their life's goal.

THE SCHOMBURG LEGACY

For Arthur Schomburg, the readiness for the achievement of the monument which he has left for history began as a youngster in the Puerto Rican schools. Arthur Schomburg—a brown-skinned Puerto Rican of African descent—had asked his teacher why nothing was being taught in school about the history of dark-skinned people. The teacher reportedly replied: "The Negro has no history!"

Instead of the remark becoming a stumbling block for Arthur Schomburg, it merely stimulated, in a wholly positive way, what was to become the moving force for the remainder of Schomburg's life. He spent his life and his personal funds disproving his teacher's assertion.

Schomburg searched the book markets of Europe, South America and the United States for every book, artifact or other evidence of the heritage of black people and of their greatness. The rarities and treasures which Arthur Schomburg unearthed established three conclusions.

One was that the black man had been an active collaborator, and often a pioneer, in the struggle for his own freedom and advancement. A recent survey at a major university suggested or revealed that, even among black students, this conclusion may not be generally held even today.

Another conclusion was that black Americans of attainment—and of genius—have been viewed unfairly as "different" or as "exceptions," thus retaining the prevalently held perception of blacks as an "inferior" race. Here again, this crude perceptioin should not be considered startling, since even today in some academic testing circles, it is still seriously debated whether blacks are "sub-standard" or not.

Finally, Arthur A. Schomburg's lifelong collection of records of black achievement documented an experience of black men with more than 600,000 years with civilization, as opposed to a northern European experience with civilization, as we know and define it, of less than 2,000 years!

NO HOLDING BACK

Not only was Arthur A. Schomburg "ready for his lifelong task." So also was his work companion in spirit and principal successor to guide the work of the Schomburg Center, Dr. Jean Blackwell Hutson.

Dr. Jean Blackwell Hutson was born in Summerfield, Florida in 1914 under almost the most inept or unlikely, circumstances possible. Her mother was trained as a school teacher; and her father was an agricultural commission merchant. This latter fact took the Blackwell family to Florida during the summer of 1914 where Dr. Jean Blackwell Hutson's father, as an agricultural wholesale buyer, had become known as a "Florida watermelon king."

When Jean was born—on a farm where her frail mother had to do the cooking for seasonal workers—no doctor could be found. A wealthy white woman who was in partnership with her father offered to help with the baby's delivery. But she had no previous experience with such matters, since her own children had been born under the best medical supervision in Vienna, Austria.

In the area where Jean Hutson was born, medical services were grossly inadequate. There was one doctor for the entire county. Years later it was learned that this doctor assumed that such a premature child would not survive and so made no effort to be present at the delivery.

Dr. Hutson also tells of how her father had been sent to build a pine box for her burial when it seemed that she would be still-born She said that her father was crying so hard that he could not see what he was doing. Meanwhile, Jean arrived and gave a yell. Jean Hutson remarks with a twinkle in her eyes that she has had "something to say" ever since.

As a youngster, Jean's "vocal readiness" expressed itself in her early ability to use words. She became a nuisance to her school teachers, so she relates, because she was so articulate and bright. She finished Frederick Douglass High School as class valedictorian and then began her college studies at the University of Michigan at the age of fifteen.

While legal segregation has always been a human thorn and a societal or social offense, being able to be with one's own people, so Dr. Hutson holds, can be a distinct asset. At least, so she claims, such experiences became a basic part of her "readiness" to undertake the further development of the Schomburg Collection and Center, following Mr. Schomburg's impressive and unexcelled initial work.

Dr. Hutson's mother knew Frederick Douglass and was a friend of Paul Lawrence Dunbar. Langston Hughes was a personal friend of Jean Hutson from the age of fifteen. Dr. Hutson notes that Langston Hughes, the celebrated black poet, was such a sociable or gregarious person that her close acquaintance with him meant an introduction to almost the entire black literary world of the 1920's and 1930's.

When Dr. Hutson went to Africa many years later, she went with letters of introduction to friends of Langston Hughes. This kind of experience—within a kind of "kinship or confraternity of one's own people"—, so Dr. Hutson notes, has made it easier for her to relate materials at the Schomburg Center to people from many walks of life.

"It has often seemed," so Dr Hutson reflects, "that my entire youth was in preparation for—and, in part, the beginning of—the kind of work I do each day here at the Schomburg."

There is no center for black history in the world more comprehensive and more widely used than the Schomburg Center. Thus Dr. Hutson is in daily contact with more students and renowned researchers of black life and culture than perhaps any other individual in the world.

READY RESOURCES

The sense of initiative and responsibility which she derived from her parents, her own amazing facility for absorbing the written word and to comprehend and evaluate its meaning, her familiarity at first hand with Mr. Schomburg, and with most of our present century's celebrated writers, leaders, thinkers and artists, and her early developed love for people—and for justice—all have played a role in making Dr. Jean Blackwell Hutson "ready" for her unique work.

Dr. Hutson smiles good humoredly as she tells of how, in her college years, she often spent more time suing her schools for discrimination against blacks than she spent on her studies. Her law suits were always handled by black America's long faithful friend, the N.A.A.C.P., but with herself as the plaintiff

Becoming a librarian was for Dr. Hutson an unplanned circumstance, at least in a conscious sense on her part. Dr. Hutson had determined that she would be a physician-psychiatrist; and she studied library science, she says, in order to earn enough for her medical school tuition.

Little did she know how small a librarian's salary was in the years of the Great Depression! She now relates revealingly: "I have fulfilled some needs of psychiatry in my work here at the Center. My staff often accuse me of practicing psychology and psychiatry among them. Then, too, the library is one place where disturbed people come in and get attention immediately. Further, some of the pursuits of researchers do really sound like disturbed activities."

A NATURAL PLACE

Dr. Hutson's coming into the New York Public Library system was strange, in a sense, so she relates. Here again, it was a matter of her fighting against discrimination. Only because of her having a highly placed and influential white friend was she able to get into the system and so make her way to what she sees as her "natural place" at the Schomburg.

The Schomburg belongs to the New York Public Library. But the library itself is only "semi-public" and is supported both from public and private funds. It has been Dr. Hutson's task to organize Arthur Schomburg's originally incomparable collection, to expand it to an unprecedented size for its subject matter in the world and to begin to place the Center on what she hopes will be a perpetually self-sustaining financial basis.

All black Americans—and all students of our nation's multi-ethnic culture—should know of the many national and international services performed at the Schomburg. It is a national and world resource; and no matter where one may happen to live, the Schomburg is ready to serve every seeker after answers which the Schomburg is equipped to give.

It has always been this way. During the 1910's and 1920's blacks gathered at the Schomburg to share in the most provocative and scintillating thought. The list of black luminaries who found a home for their ideas and a receptive audience at the Schomburg includes all those whom we associate with the celebrated "Harlem Renaissance."

Then, too, there were others who were unknown who came and always found in the Schomburg . . . and from the almost legendary giant, Arthur A. Schomburg himself . . . a warm welcome, an inspiring word and a helping hand.

Dr Kenneth Clarke, author of "Dark Ghetto," relates: "As a child growing up in the center of Harlem, I had the good fortune to meet Arthur Schomburg . . . when I was about 12 years old, a crucial period in my life.

CONTINUED INITIATIVES

All this has been done under Dr. Jean Blackwell Hutson's initiative in behalf of

her life's work which continues and preserves for posterity the incomparable black historical and cultural collection begun by Arthur A. Schomburg.

Dr. Hutson tells of how materials arrive each day at the Schomburg Center in cardboard boxes, scrapbooks, footlockers and paper bags. Processed items enter international reference directories: the National Union Catalogue of Manuscript Collections, the Dictionary Catalog of the Research Libraries of the New York Public Library and the Schomburg's catalogue of nine volumes and six supplements. As a result of this painstaking process, scholars around the world can refer to the Schomburg Center's unique and unmatchable resources.

Of special interest are the Schomburg's extensive holdings in Caribbean history, society, poetry, fiction and folklore. Dr. Hutson and her most remarkably efficient and highly considerate staff assist researchers of all kinds, from secondary students to those involved in highly technical post-doctoral research.

The Schomburg Center serves as the repository for the 81 volume manuscript volumes of the field notes and memoranda used by Gunnar Myrdal in writing "An American Dilemma"; Claude McKay's manuscripts; the Harry A. Williamson Library of Black Masonry; original volumes by the Eighteenth Century black poet Phillis Wheatley; the Eric de Kolbe Collection of African Art and historical documents on the ancient African kingdoms—Ashanti, Mele, Songhai and Benin.

Arthur A. Schomburg once wrote: "Though it is orthodox to think of America as the one country where it is unnecessary to have a past, what is a luxury for a nation as a whole becomes a prime social necessity for the Negro. For him, a group tradition must supply compensation for persecution, and pride of race the antidote for prejudice. History must restore what (enslavement) took away, for it is the social damage of (human enslavement) that the present generation must repair and offset."

It is in this spirit that the Schomburg Center, under the highly fortuitous leadership of Dr. Jean Blackwell Hutson, who has been uniquely ready for her life's work, seeks to continue to serve our entire nation and world for many generations to come.

Concerning the current needs of support from all of our local churches and civic groups and individuals throughout the country, Dr. Robert Weaver has written as follows:

"The world's most important repository of black literature and art is in jeopardy. . . While the Schomburg's holdings are invaluable to researchers and scholars, their importance goes far beyond scholarship to the very meaning of black life."

WE CAN HELP

Black churches might appropriately hold a special "Schomburg Center" collection. Blacks in black and in white corporations might encourage corporate gifts for the Schomburg.

Through recent efforts spearheaded through Dr. Jean Blackwell Hutson's inspiration, a new multi-million dollar facilty will be added to house the Center's holdings. But the costly work of collecting, storing and locating for ongoing use by many thousands of inquirers from throughout the world continues. In this latter work, all of us—both black and white—are asked to play our part.

As Dr. Jean Blackwell Hutson looks forward to her well-deserved retirement in several years, her main objective is to see the beginning of an Endowment which will guarantee that this priceless and irreplaceable record of the black inheritance will be preserved forever.

Once that goal begins to emerge as a live and early probability, Dr. Hutson, who has been ready to serve, feels confident that she will also be ready, willing and able to retire with the sense that she has kept faith with Arthur Schomburg's legacy and served her people and our nation well.

For information, for inquiries regarding how the Schomburg Center may be of help to you and for sending contributions for the Center's Perpetual Endowment, please simply address: The Schomburg Center, 103 West 135th Street, New York, N.Y. 10030.●

CAMBODIA—THEN AND NOW

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. MURTHA. Mr. Speaker, in 1975 I joined a congressional task force selected by President Ford to survey the situation in Vietnam and Cambodia.

Upon our return we testified before the Senate Foreign Relations Committee, just weeks before the fall of these two countries to the Communists.

In addressing the committee about the situation in Cambodia, I asserted:

There is no question in my mind, after talking to [the soldiers] there were substantial atrocities. There is no question about that. There were substantial atrocities by the Khmer Rouge. . . . They feel very strongly, the men on the ground, that they want a negotiated settlement, but I don't see a chance of any kind of settlement—except uncontrolled atrocities in the city, by the evidence of what they have done in the countryside—if we cut off military aid to the men fighting in the perimeter.

We must continue to learn from the war in Southeast Asia and its aftermath. I am glad that many Members of Congress and journalists have kept alive the fate of Cambodia since the reduced American presence in Southeast Asia. I would like to insert a news article from last week into the CONGRESSIONAL RECORD and urge my colleagues to recall the situation in Southeast Asia then and now as we debate the American role against Communist led forces in other parts of the world today:

AS MANY AS 1 MILLION FEARED DEAD IN CAMBODIAN "HOLOCAUST"

(By Don Oberdorfer)

On the third anniversary of the communist takeover of Phnom Penh, an exiled leader and a U.S. congressman charged that a present-day "holocaust" is taking place in Cambodia.

Song Chhang, who was minister of information in Cambodia before the communist victory, and Rep. Stephen J. Solarz (D-N.Y.) called in a news conference for increased international condemnation of a reign of terror they said is continuing to take place. Chhang advocated an international conference on the subject as a way to bring outside pressure to bear on Cambodia's leaders.

Noting that exact information is unavailable from the isolated country, Solarz estimated that "at the very least" several hundred thousand persons have been killed or have lost their lives as a result of brutal treatment. Chhang, who now lives in Arlington, said 1 million Cambodians have been "slaughtered" and another million "appear to have perished from disease and starvation."

Executive branch officials said yesterday that a death toll of more than 1 million is believed to be a real possibility, in view of reports from recently escaping refugees that purges and killings are still taking place.

Solarz also called on the United States to provide refuge for some 15,000 Cambodians reported to be in camps in Thailand and elsewhere in Southeast Asia, and to make it clear that other escapees would be welcome here. About 7,500 Cambodians have been admitted to the United States in the past several years, he said.

"We are looking at the death of the ancient and proud Khmer civilization," Chhang said. He called reports of a recent invasion by Vietnamese forces "the final assault on the crumbling Khmer civilization."

U.S. official sources said they give little credence to charges by Cambodian Premier Pol Pot last week that his forces repelled large-scale invasion by Vietnamese April 7–10. However, the officials said there are strong indications of Vietnamese attacks last week against Cambodian enclaves inside Vietnamese territory.

In a related development, a Swedish journalist recently in Hanoi reported yesterday that he had been told of continuing border incidents, including tank battles, between Vietnam and China.

Rolf Soderberg, who traveled to Hanoi with Swedish Foreign Minister Karin Soder, attributed the information to "very well-informed foreigners" in the Vietnamese capital. Sources here said there is no confirmation of the reports, which have been heard in diplomatic circles for some time.●

HOW MANY COMPUTERS DOES IT TAKE TO MAKE AN UNEMPLOYED PERSON?

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. STARK. Mr. Speaker, in January of 1978, the Bureau of Labor Statistics (BLS) revised its procedures used to estimate labor force and unemployment levels. In effecting these changes, BLS articulated three goals: to improve accuracy through expanded use of our most reliable statistical tool, the Current Population Survey; to achieve comparability between States; and to reduce the extent of year end revisions in State and local area unemployment statistics. It now appears, however, that two stated goals of BLS are in conflict—increased accuracy against reduced revision—and that, indeed, the accuracy of unemployment statistics for older urban areas throughout the country may be sacrificed by the revisions. Obviously, the relative ranking of these priorities should be based on a very careful examination of the fact, especially as the determination will shape unemployment statistics upon which billions of dollars of Federal assistance are allocated. As the information needed for a careful analysis is not fully available at this time, the CETA legislation pending before the House Committee on Education and Labor should be amended to provide funds to offset losses suffered by those local area prime sponsors as a result of BLS changes which produce unemployment statistics which are untried and, by every indication available, no more accurate than figures produced under the old methodology.

BACKGROUND

Prior to this year, BLS used a number of different methods to compute unemployment statistics within a given geographic area. Statisticians agree, however, that the current population survey (CPS), upon which national unemployment statistics are based, is potentially the most accurate statistical tool available. The current population survey derives statistics based upon interviews of more than 55,000 households in 461 areas throughout the country. As the CPS interviews all members of a household 16 years of age and over, it is particularly useful in capturing uninsured unemployment, labor market reentrants, and encouraged workers—all highly concentrated in urban areas. Thus, the Bureau's efforts to expand the use of the current population survey at the State level is welcomed as important progress toward accurate unemployment statistics.

Local area unemployment statistics, in the case of labor market areas (LMA's) have been based largely on BLS Handbook data. Within LMA's, unemployment figures for cities broke down according to the "census share" method, whereby fixed proportions of population, unemployment, and employment were disaggregated according to their distributions in the 1970 census. Under the "new" methodology, unemployment data will rely almost exclusively on unemployment insurance claims by place of residence. Employment levels will be calculated on the basis of the most current population ratios for areas within LMA's.

BLS, however, used a different method to estimate employment and unemployment for 30 standard metropolitan statistical areas (SMSA's; for the most part multicounty LMA's) and 11 large central cities. BLS considered area estimates derived from the CPS in these areas reliable enough to compute annual averages for employment and unemployment levels. Each month, handbook data for local jurisdictions was adjusted to the CPS annual average. At the end of the year, the estimates were again adjusted to the most recent CPS area estimates. This procedure resulted in sizable annual revisions of unemployment statistics.

Under the "new" procedure, the use of CPS averages will be discontinued. Unemployment and employment levels, moreover, will be disaggregated within an SMSA based on population proportions. The method assumes, obviously erroneously, that the ratio of employment to population is the same for cities and their surrounding suburban communities.

Although the decision to drop the CPS benchmarking procedures resolves the problem of yearend revisions, it threatens to seriously undermine the accuracy of unemployment statistics. This loss will impact most severely on ailing urban areas where unemployment is especially difficult to measure and already consistently underestimated. As Commissioner Shishkin noted of local area unemployment statistics, for example, "the greatest confidence can be placed in those . . . areas which are independently benchmarked to the Current Population Survey."

At this point, the long term impact of the BLS decision to drop the local area CPS benchmark is unknown. Preliminary test, however, run by BLS in eight States reveal a statistically significant trend against cities. What is all the more surprising is that this conclusion was reached despite the fact that, for the most part, those eight States are not areas of highly concentrated unemployment. Not one city losing its CPS benchmark, moreover, was included in the BLS simulation prior to implementation of the new methodology.

Individual cities have run their 1977 unemployment statistics under the new methodology, and the results indicate an artificial drop in unemployment relative to areas outside the central city, an increase in employment for CPS cities and, ultimately, a dramatic decrease in the rate of unemployment. Cities losing their CPS benchmark, moreover, report unexplained variances in employment and unemployment figures from month to month, including unaccounted for growth in the labor force and unemployment levels despite documented population and employment declines. BLS recently released official comparisons of the old and new methods for unemployment statistics in seven central cities. These figures (attached) show startling, inexplicable declines in the employment rates of most cities tested.

Under the new methodology, cities that can least afford it stand to lose millions of dollars worth of Federal assistance. Philadelphia, for example, could have lost over $6 million in CETA allocations for titles II and VI based on new methodology unemployment statistics. No one can argue for the continued use of bad statistics, but the present situation is sufficiently clouded as to leave open the question of whether or not the new method will indeed be more accurate. Without further analysis, it seems unwise to allocate Federal dollars based on unemployment statistics that are untried and, by every indication available, no more accurate than the statistics produced prior to January 1978.

I join with the U.S. Conference of Mayors, then, in urging BLS to continue to collect and analyze data under both the new and old procedure. Further, the recently established Commission on Employment and Unemployment has as its mandate the task of determining more accurate statistical methods and reevaluating our present definition of unemployment. We suggest, finally, as regards the CETA legislation now before the Committee on Education and Labor, that a separate authorization provide such sums as are required to offset the losses suffered by those central cities and SMSA's now deprived of their CPS benchmark. This authorization would be in effect until such time as the Commission on Employment and Unemployment makes its report. In this way, the Bureau of Labor Statistics will have the opportunity to compile the necessary information over a realistic period of time in order to assess the impact of these methodological changes. Such an authorization will, finally, reduce the chances of making our Nation's urban centers the victims of arithmetic ideology whose effects on people and communities are totally undocumented and ignored.●

SOLAR ENERGY: THE NEED FOR COMMITMENT

HON. ANTHONY TOBY MOFFETT

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. MOFFETT. Mr. Speaker, on May 3, citizens throughout the Nation will participate in activities designed to focus attention on the potential of solar energy. Sun Day is a celebration of the benefits of solar energy; it is also a forum for discussion of the history, current status and future of solar power.

Only in this decade have Americans become seriously concerned about the availability and cost of energy. The danger of importing nearly one-half of our oil was made clear as a result of the 1973 oil embargo. The wisdom of our present reliance on domestic oil and natural gas sources must also be seriously questioned. These energy sources are limited—once they run out, there is no replacement. Although oil and gas now account for about three-fifths of the world's energy budget, they will certainly play a much lesser role by the year 2000. And yet, our entire economy is geared to using these fuels.

A year ago, Prsident Carter emphasized the need to find alternatives to oil and natural gas, especially in light of our dependence on foreign oil. Much of the focus has been placed on coal and nuclear power as solutions to our energy problems. While these sources already play a role in the Nation's energy picture, there are serious questions about their future viability. Use of coal, for example, contributes to pollution and increases the concentration of carbon dioxide in the air. This causes a rise in the Earth's temperature, resulting in severe climatic changes. The concerns about nuclear power—disposal of waste materials, potential sabotage or terrorism, cost, and radiation effects—are well known.

Sun Day is designed to highlight the attractiveness of the solar option, which has many advantages over conventional energy sources. Sunlight is abundant, dependable, free, and available to all nations. Each day, the Sun provides 10,000 times more energy than all conventional fuels combined. The sunshine which reaches our country alone provides twice as much energy as the fossil fuels currently used by the entire world. Solar energy is environmentally benign. It can be used in decentralized technologies that fit in well with democratic societies which place emphasis on local initiative, and is labor intensive.

Solar energy also provides the variety and flexibility lacking in conventional sources. Solar power can be centralized or decentralized; it can be used for industrial or residential purposes; it can provide power for electricity or for heating and cooling; and it offers a choice of "active" or "passive" systems to meet finan-

cial or structural requirements. Although many people think of solar power only in terms of capturing direct sunlight, there are many other forms of solar energy. These include wind power, energy from tides, power generated from tapping temperature differences in the ocean, hydropower, and biomass.

Despite its many benefits, solar energy today meets only 1 percent of the Nation's energy demands, although it provides a much greater proportion of energy used in other countries. For instance, 76 percent of Canada's electricity is fueled by hydropower. Although there are only 30,000 solar water heaters in the United States, there are over 2 million in Japan and over 200,000 in Israel.

One reason the United States lags behind in developing solar power is the public perception that it is an unproven technology which, though important for the future, is impractical for today. Nothing could be further from the truth, for solar energy is one of the oldest energy sources. Societies such as the Aztecs and the American Indians used solar designs in construction. The solar collector was first developed in the 18th century by Swiss scientist Nicholas de Sausseur. There were 50,000 solar water heaters in Miami alone in the early 1950's. Use of solar energy declined, however, as cheap natural gas and oil sources were developed.

Today, with skyrocketing fuel prices and uncertain supplies, it would seem natural to return to and further develop solar technology. In fact, the Council on Environmental Quality predicts solar energy will account for one-fourth of our energy needs by the year 2000. Others are more optimistic. For instance, solar advocate Denis Hayes has put forth a timetable which would result in solar energy providing five-sixths of our needs by 2025. But lack of public awareness and Government commitment have impeded the progress necessary to meet these goals. Although a Government commission as early as 1952 urged a crash program to develop solar energy, this source has received less than one five-hundredth of the total Federal energy funding since then.

President Carter seemed to acknowledge that much more can be done when he included in the national energy plan the goal of providing for 2.5 million solar-heated homes by 1985. But now his Secretary of Energy James Schlesinger has downgraded that figure to 1.2 million, even though California alone intends to have that many solar homes by 1985. This is just one sign of Government inaction on solar energy. Further, when factored for inflation, this year's solar budget is $40 million lower than last year's and represents only 3 percent of the total energy budget, and Carter has yet to name a permanent Assistant Secretary for Conservation and Solar Applications. Sun Day also, then, illustrates the public's disappointment in this deemphasis of the solar option and its desire for action, not rhetoric, in this area.

There are, of course, some Federal programs which provide demonstration projects on the practical use of solar heating and electric technology. There has been recognition of the public's desire for more information, as well. For instance, the National Solar Heating and Cooling Information Center (toll-free number 800–523–2929) provides information on Government programs, solar applications, periodicals available, and contractors. And from May 3 to May 6, citizens across the country can call a Sun Dial Information Center (800–225–6110) with similar questions.

But more should and could be done. Although solar energy is economically competitive in the long run throughout the Nation, the initial investment required for installation of solar equipment is high enough to discourage many home owners. The Federal Government could do a great deal to facilitate these kinds of investments by providing assistance to homeowners in the form of low-interest loans. This is the motivation for the Solar Energy Bank bill, which I and many of my colleagues have cosponsored, but which has yet to receive administration support. Other solar incentives—including low-interest loans, tax credits, and a $98 million solar cell purchase program—are in the National Energy Act and, though agreed to almost 6 months ago, have been held up until the conferees agree to the entire energy package. Many of us, including members of the solar industry, have urged that the solar provisions be separated out and immediately enacted, so that solar energy will receive the necessary impetus.

The Federal Government can also do much to help solve the remaining problems which create obstacles to full-scale development of solar technologies. The Government should address itself to the need for greater development of solar electrical generation systems; the need for equipment standards; the need to change building codes which are barriers to solar use; the use of easements in order to insure access to sunlight; and the question of whether solar energy should be used in centralized or decentralized applications.

To a limited extent, individual States are seeking answers to many of these questions. Thirty States, including my own State of Connecticut, provide financial incentives for the purchase and installation of solar energy systems through tax credits, property tax provisions, and exemptions from sales taxes. Six States have laws on solar access. Oregon, for example, requires that planning commissioners recommend ordinances governing building heights for solar purposes.

Sun Day recognizes that a start has been made in adopting solar energy as a viable and welcome energy alternative, but it also demonstrates that progress to date is not enough. What is needed is a full-scale commitment by the Government and the private sector alike to the rapid development and implementation of solar power. Surely this energy source, with its many benefits, is deserving of more attention than it has received thus far.●

SOCIAL SECURITY REFORM

HON. STEVEN D. SYMMS

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. SYMMS. Mr. Speaker, William Agee, chairman, president, and chief executive officer of the Bendix Corp., makes some very striking points about the social security system and the need for reform. The social security system has been bailed out temporarily by the Congress, but Mr. Agee fears the system will be in jeopardy once again within the next decade. To alleviate this situation, Mr. Agee suggests reducing the social security population by giving benefits to those who are truly in need and relying on private pension programs for most of the population. I ask my colleagues to take note of Mr. Agee's proposals which could put the social security system back on the right track.

Mr. Agee is a distinguished alumnus of the University of Idaho School of Business and earlier attended Boise State University.

[From the New York Times, Apr. 8, 1978]

A FEW PROPOSALS FOR REFORMING SOCIAL SECURITY

(By William M. Agee)

SOUTHFIELD, MICH.—Past a certain point enormity boggles the mind. Tell the taxpayer, for example, that the actuaries are disputing whether the Social Security Administration possesses unfunded liabilities of $4.1 or $4.7 trillion and he'll shrug his shoulders. As the current jargon puts it, we cannot "relate" to such sums.

Nevertheless, that was the situation of the Social Security system before the recently enacted law—now in jeopardy—that adjusted the payroll tax to raise some $227 billion over the next 10 years and thereby—supposedly—conjured away the ghost of insolvency.

The new law would put a temporary halt to the alarming rate of net outflow from the trust fund. It would also "decouple" the inadvertent double adjustment for inflation and thus reduce that unimaginable $4 trillion-plus to an equally unimaginable $2 trillion plus. But the ghost is still there.

Conceived as a social-insurance system in which benefits are roughly related to contributions, Social Security has become in fact an income-transfer system through which the young subsidize the old and the working people subsidize the retired or disabled, regardless of need. Whatever one's views of the equity or social utility of such a system, demography and increasingly generous benefits have totally changed its impact on the economy.

In 1947 there were 22 workers for every Social Security recipient. The ratio was reduced to 4 to 1 by 1960 and predictions are that in another few generations it will be 2 to 1.

What can we do? Two things. First, we must bring about radical change in the contributions-to-benefits ratio, or, more simply, change the rate of return on money put into the program. Second, we must alter the nature of contributions, to maximum savings and minimize taxation.

More specifically, we must reduce the Social Security population by adopting the clear perspective of need, and we must encourage private as against Government pension systems. These things cannot be done painlessly but the viability of the system—

and, indeed, of the entire economy—is at stake. We might begin with the following:

1. Reducing or eliminating Social Security benefits for those receiving other kinds of retirement funds.

Many private pension plans, of course, currently reduce their payments by an amount equal to Social Security benefits for their employees. What I am proposing is that the Social Security payments be phased out wherever possible—but gradually, to allow the private sector time to adjust. This could be done either directly or by taxing the Social Security payments at a rate determined by the taxpayers' total income.

Social Security would thus become a kind of welfare program. But that is what it should be—designed to help those who need it. In any event, it simply does not make sense to provide Social Security payments to those who are eligible for substantial private pensions.

2. Expanding concepts such as those embodied in the individual retirement account legislation to provide incentives for retirement savings.

Some provisions of the 1974 Pension Reform Act permit self-employed persons and certain employees to deduct from taxable income part of their earnings, provided the amount is set aside for retirement.

Expansion of these programs should gradually replace Social Security for increasing numbers of Americans, especially for those now under a certain age, perhaps 35. Such pension provisions not only afford incentives to prepare for retirement, they also build up the savings that provide investment capital for the economy as a whole. (Taxation, of course, often has the opposite effect.)

3. Enacting a sliding scale for retirement eligibility for those under 55.

Such a program would dramatically reduce the Social Security population and the financial demands on the system. For example, retirement would be offered to those currently in the age group of 45 to 54 at 66; those now between 35 and 44 at 67; and those under 34 at 68.

4. Eliminating Social Security benefits to those under a certain age—perhaps 35—while alternate proposals are studied.

Many Americans under 35 already have a substantial financial investment in Social Security. To tell them that, as things currently stand, their investment guarantees them nothing may seem unfair—but it happens to be the truth. At the very least, it would produce a salutary shock.

New thinking is desirable and necessary. The present Social Security system is inflationary and inequitable. It builds rigidity into our economy. And now, at huge cost, it has been given a brief renewed lease on life—10 years or less. But the real issue is that it is hopelessly overburdened. Congress has bought a respite—for $227 billion. The major question is what we will do with it.●

DEPUTY CITY COMMISSIONER JACK WELSH TO BE HONORED BY FRIENDS ON MAY 5

HON. RAYMOND F. LEDERER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 1, 1978

● Mr. LEDERER. Mr. Speaker, I would like to pause in the business of the House to share with my colleagues an article printed in a Pennsylvania newspaper about a great Philadelphian, Deputy City Commissioner Jack Welsh:

DEPUTY CITY COMMISSIONER JACK WELSH TO BE HONORED BY FRIENDS ON MAY 5

(By Nat Frank)

It seems like only yesterday but memory turns back more than half a century when the name of Jack Welsh was in the minds of all sports fans, mainly in basketball, football and boxing. Welsh, today the most beloved Deputy City Commissioner, having worked himself up from just another employee climbing every rung until he reached this high post in his almost 40 years of continuous work in the same department, with headquarters in room 5, street floor City Hall Annex, will be rewarded by his friends of long standing with a testimonial in his honor to be held in the Charisma Room, Roosevelt Boulevard and Princeton Avenue, Friday evening, May 5th.

The unusual event, a non-political salute to the likeable man, was the brainchild of many friends from all parts of the city. From downtown to the far northeast, the ones who remember him from his school boy days and as a stalwart for the South Philadelphia High School baseball and basketball championship teams of the late teen years, to his great love of the manly art of self defense, numbering many champions and near champions of the ring, his many charitable organizations, of which he has been a prime worker in helping raise funds for youngsters, elderly, handicapped, veep of the State Boxing Hall of Fame Committee, of which this writer is the president, for the needy and whatever other worthwhile cause, Jack Welsh was also ready not only to help financially but also has been a prime factor in getting others to provide some financial assistance to anyone or institution or charity worthy of his avowed dedication to their causes.

Welsh well remembers his youthful days as a diamond star in the top semi-professional competition, when he and his teammates competed against the super teams as the Renaissance of Harlem. Visitation of Brooklyn and the Cleveland Rosenblooms. He also recalls when he personally met such super major leaguers as George Herman (later to become world famous as Babe) Ruth, when he was a standout pitcher for the Boston Red Sox, Super second baseman Eddie Collins, of Connie Mack's Athletics, and Connie himself, Ty Cobb of the Detroit Tigers and the Bengal's manager Hughey (Hi Yah) Jennings, John McGraw, manager of the New York Giants, Wilbert Robinson, manager of the Brooklyn Dodgers, the famous Tinker to Evers to Chance trio, of the Chicago Cubs, with Chance being the 1st baseman and manager of the Chicubs and many others of fame.

As a basketball player, he competed against such opposition as the original Celtics, namely Davey Banks, Pete Bary, Joe Lapshick, Dutch Dehnert and Nat Holman, probably the greatest cage quintet put together. He was also a member of the Sphas (abbreviation for the South Philadelphia Hebrew Squad). He played from 1929 through 1932 with the 1929–1930 Court Five being the first all Jewish squad winning a professional championship.

In addition, he also played with 4 different teams in the Jewish Basketball League, being a member of the championship Judaic Union netmen. When he quit active competition he coached the Ardmore Ramblers, of the Main Line League. It was here that he met Herb Pennock, the great pitcher for the Athletics and the New York Yankees and then the first General Manager for the Phillies, when Bob Carpenter became the owner, buying the team from Jerry Nugent.

Super ringmen that Welsh knew included Jack Dempsey, Benny Leonard, Lew Tendler, Irish Patsy Cline, Johnny Kilbane, Battling Levinsky, Harry Lewis, Philadelphia Jack O'Brien, Tommy Loughran, the 5 Fighting Moore Brothers and hundreds of others.

He had been cited time and again for his "Behind the scenes work for worthy causes," including citations from such groups as:—

a—City of Philadelphia in 1961.

b—City of Philadelphia in 1964.

c—Jewish League Award in 1966.

d—The Richmond Award by the Old Timer Basketballers in 1970.

e—State Legislature Recognition in 1973.

f—U.S. Naval Coast Guard Reserve in 1974.

g—United Negro Fund Distinguished Award in 1975.

In his span of years of service with the City Registration Department, the honoree of May 5, has served under 7 chairmen, namely Theodore Starr, 1931 to 1941; Kendell Shover from 1941 to 1951; Charles Sweeney from 1951 to 1951; Leon Sachs from 1951 until consolidation in 1952; Maurice Osser, then Frank Patterson and currently Margaret Tartaglione.

Mayors of the City from the time he started almost 40 years ago have been Robert Lamberton, 1 year; Barney Samuel, 11 years; Joseph Clark, 4 years; Richardson Dilworth, 7 years; James Tate, 11 years and currently Frank Rizzo.

Governors who were in office during his service are Arthur James, Edward Martin, James Duff, John Fine, George Leader, David Lawrence, William Scranton, Raymond Schafer, and currently Milton Shapp.

Among the numerous friends, who will pay homage to the highly respected all around sportsman, Deputy City Commissioner, all friends from the City and surrounding, sponsored by the Kensington and Juanita Park residents, the selection of Michael McAllister, Esq., as the toastmaster was a perfect choice. Among the celebrities present will be Mayor Frank L. Rizzo. Marty Weinberg, William A. Meehan, Esq., Congressman Raymond Lederer, Sheldon Albert, State Senator Joseph Smith, Councilman Harry Jannotti, James McIntvre, Common Pleas Court Judge Charles Margiotti, Common Pleas Court Judge Joseph P. McCabe; City Commission Chairlady Margaret Tartaglione, and Jack Welsh's wife, Gertrude, a distinguished worker for charity.

Incidentally, the Welshes are the parents of 2, Barney, an attorney, whose wife, Linda, recently received a Doctorate in psychology; and daughter Evelyn Palat, wife of Dr. Herman Palat. By the way, the Welshes are the grandparents of 4, a son and daughter, to each of the children.●

SENATE COMMITTEE MEETINGS

Title IV of the Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of all meetings when scheduled, and any cancellations or changes in meetings as they occur.

As an interim procedure until the computerization of this information becomes operational the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committees scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, May 2, 1978, may be found in Daily Digest of today's RECORD.

MEETINGS SCHEDULED

MAY 3

9:00 a.m.
Governmental Affairs
Governmental Efficiency and the District of Columbia Subcommittee

Environment and Public Works
To continue markup of proposed legislation authorizing funds for those programs which fall within the committee's jurisdiction.
4200 Dirksen Building

HOUSE OF REPRESENTATIVES—*Tuesday, May 2, 1978*

The House met at 12 o'clock noon.

Dr. Charles A. Trentham, First Baptist Church, Washington, D.C., offered the following prayer:

Ever gracious God, our Father, grant us this day purity of heart that we may see You, clarity of mind that we may comprehend what You are saying to us, and resoluteness of will to translate Your desires for Your human family into action.

Restrain us when our actions would deprive anyone of personal rights which You have desired for everyone.

Show us specific ways by which we may make life a little fuller and freer for those who depend upon us.

Forgive all our failures and sins that we may cease mourning for our past and give all our energies to making today better. Give us, O Lord, the toil and our children the better world through Christ our Saviour. Amen.

CALL OF THE HOUSE

Mr. ROUSSELOT. Mr. Speaker, under rule I, clause 1, of the rules of the House, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Without objection, a call of the House is ordered.

There was no objection.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 268]

Allen	Conyers	Heckler
Ambro	Cornwell	Holland
Andrews, N.C.	Davis	Horton
Applegate	Dellums	Howard
Archer	Dent	Johnson, Colo.
Baldus	Diggs	Jones, N.C.
Bellenson	Dingell	Kazen
Bingham	Dodd	Krueger
Bonior	Drinan	McCormack
Burke, Calif.	Edwards, Calif.	McKinney
Burleson, Tex.	Eilberg	Mann
Burton, John	Evans, Ind.	Mitchell, Md.
Carney	Fountain	Moffett
Cederberg	Frey	Mollohan
Clay	Gammage	Murphy, N.Y.
Cochran	Gudger	Nix

Oakar	Santini	Tucker
Pepper	Scheuer	Weaver
Pettis	Skubitz	White
Pursell	Spellman	Whitley
Rahall	Stockman	Wiggins
Rodino	Teague	Wylie
Runnels	Thone	Young, Alaska
Ruppe	Thornton	

The SPEAKER. On this rollcall 363 Members have recorded their presence by electronic device, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE PRESIDENT

Sundry messages in writing from the President of the United States were communicated to the House by Mr. Chirdon, one of his secretaries.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate agree to the amendments of the House of Representatives to the bill (S. 958) "An act for the relief of Ernesto Garcia, Jr.".

PERMISSION FOR COMMITTEE ON APPROPRIATIONS TO FILE REPORT ON HOUSE JOINT RESOLUTION 873, SUPPLEMENTAL APPROPRIATION FOR DISASTER LOAN PROGRAM OF SMALL BUSINESS ADMINISTRATION

Mr. MAHON. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations may have until midnight tonight to file a report on House Joint Resolution 873, making an urgent supplemental appropriation for the disaster loan program of the Small Business Administration for the fiscal year ending September 30, 1978.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, this is just the disaster loan appropriation, and nothing else?

Mr. MAHON. If the gentleman will yield, just the disaster loan appropriation of the Small Business Administration.

Mr. ROUSSELOT. Mr. Speaker, further reserving the right to object, I wonder if the chairman could tell us about how much money is involved in this bill.

Mr. MAHON. If the gentleman will yield, about $758 million.

Mr. ROUSSELOT. $758 million? Why is this necessary?

Mr. MAHON. It is considerably the result of the terrific winter we had and the bad weather otherwise.

Mr. ROUSSELOT. And these were clearly unanticipated costs and are primarily attributable to the severe winter?

Mr. MAHON. If the gentleman will yield, I think it would be fair to say this was not anticipated.

Mr. ROUSSELOT. Mr. Speaker, I thank the gentleman, and I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

MAKING IN ORDER ON THURSDAY NEXT OR ANY DAY THEREAFTER CONSIDERATION OF HOUSE JOINT RESOLUTION 873, SUPPLEMENTAL APPROPRIATION FOR DISASTER LOAN PROGRAM OF SMALL BUSINESS ADMINISTRATION

Mr. MAHON. Mr. Speaker, I ask unanimous consent that it may be in order on Thursday, or any day thereafter, to consider in the House as in Committee of the Whole, House Joint Resolution 873, making an urgent supplemental appropriation for the disaster loan program of the Small Business Administration for the fiscal year ending September 30, 1978.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

PRIVATE CALENDAR

The SPEAKER. This is Private Calendar day. The Clerk will call the first individual bill on the Private Calendar.

KWONG LAM YUEN

The Clerk called the bill (H.R. 1798) for the relief of Kwong Lam Yuen.

Mr. BAUMAN. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

MORRIS AND LENKE GELB

The Clerk called the bill (H.R. 3084) for the relief of Morris and Lenke Gelb.

Mr. BAUMAN. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

HABIB HADDAD

The Clerk called the bill (H.R. 3995) for the relief of Habib Haddad.

Mr. ROUSSELOT. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

IRENE HOFFMAN

The Clerk called the bill (H.R. 5612) for the relief of Irene Hoffman.

Mr. ROUSSELOT. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

MARTINA NAVRATILOVA

The Clerk called the bill (H.R. 10210) for the relief of Martina Navratilova.

Mr. ASHBROOK. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

BALL STATE UNIVERSITY AND THE AMERICAN ASSOCIATION OF COLLEGES FOR TEACHER EDUCATION

The Clerk called the bill (H.R. 1415) for the relief of Ball State University and the American Association of Colleges for Teacher Education.

Mr. BAUMAN. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

FIRST BAPTIST CHURCH OF PADUCAH, KY.

The Clerk called the Senate bill (S. 422) for the relief of the First Baptist Church of Paducah, Ky.

There being no objection, the Clerk read the Senate bill, as follows:

S. 422

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the First Baptist Church of Paducah, Kentucky, the amount of $207,740 in full settlement for all claims against the United States for damages arising in connection with the failure of the Federal Government to carry out its condemnation of the property of Fifth Street and Jefferson Street in Paducah, Kentucky, as proposed on September 9, 1964, by the General Services Administration.

SEC. 2. No part of the amount appropriated in this Act in excess of 10 per centum thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, any contract to the contrary notwithstanding. A violation of this section is a misdemeanor punishable by a fine in an amount not to exceed $10,000.

With the following committee amendment:

Page 1, line 6, strike "$207,740" and insert "$171,990".

The committee amendment was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and

passed, and a motion to reconsider was laid on the table.

OH SOON YI

Mr. HARRIS. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H.R. 1552) for the relief of Oh Soon Yi, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Page 1, line 7, strike out "Maria Farrow" and insert "and Maria Farrow Prévin".

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

Mr. BAUMAN. Reserving the right to object, Mr. Speaker, I do so only to confirm my understanding that this bill has already passed the House and would simply permit Mr. and Mrs. Previn to adopt a third orphan; is that correct?

Mr. HARRIS. If the gentleman will yield, Mr. Speaker, my colleague is exactly correct. This has to do only with the waiver of the two adoption limitation currently in legislation, probably on outdated requirements; but that is all this does. The only difference in the Senate bill is a clarification of the name.

Mr. BAUMAN. Mr. Speaker, I thank the gentleman from Virginia (Mr. HARRIS), and I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

There was no objection.

A motion to reconsider was laid on the table.

The SPEAKER. This concludes the call of the Private Calendar.

INVITATION TO ATTEND JOHN W. McCORMACK ANNUAL AWARD FOR EXCELLENCE

(Mr. BURKE of Massachusetts asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BURKE of Massachusetts. Mr. Speaker I take this opportunity to cordially invite all Members of the U.S. Congress to attend the John W. McCormack Annual Award for Excellence ceremony on Wednesday, May 3, 1978, at 10 a.m. in the Rayburn reception room in the U.S. Capitol.

Mr. Speaker, the John W. McCormack Annual Award for Excellence Committee was established to honor the 45th Speaker of the House of Representatives for his dedicated service to the House of Representatives, Congress, and his country, by presenting an annual award of excellence to an employee chosen by the committee for extraordinary merit.

This year's recipient is Francis P. Hoye, Journal Clerk of the House for 29 years. Speaker of the House THOMAS P. O'NEILL, JR., will make the presentation; and both the Democratic and Republican leadership will be in attendance, in addition to other Members of Congress, employees, and Mr. Hoye's many friends. Please stop in to honor this dedicated and loyal employee.

AN INSULT TO FREE CHINA

(Mr. RUDD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RUDD. Mr. Speaker, I understand that President Jimmy Carter has ordered Zbigniew Brzezinski as a special envoy to Communist China on a fact-finding mission, commencing on May 28, 1978.

Mr. Speaker, on that very day, Chiang Ching Quo of the Republic of China, son of the late great President Chiang Kai-shek of free China, will be inaugurated as President of Taiwan. Also, Chei Tung Min, a native of Taiwan, will be inaugurated as Vice President.

President Carter has grossly insulted our friends, the free Chinese, by failing to send a special personal envoy for this inauguration compounded by permitting our Ambassador in residence to represent him on this auspicious occasions.

No greater insult could be handed to a foreign nation, diplomatically, than this obvious lack of attention to steadfast ally and friend of the United States, concommitantly with official Presidential Envoy Brzezinski's trip to Red China on the day of Chiang's inauguration.

ELIMINATE BOONDOGGLES IN FEDERAL BUDGET

(Mr. WALKER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WALKER. Mr. Speaker, today we are going to begin consideration of the budget for the upcoming fiscal year. I would like to call to the attention of my colleagues some matters that I hope they will lend their attention to during consideration of the budget. They appear in two publications entitled "Government-Supported Research on Foreign Affairs." Contained in these publications are some prime examples of blatant waste in the Federal budget.

For example, we have paid for funding for a study of linguistic variation in a Creole continuum; a study of Saskatchewan cultural ecology; a study of unintentional influence in dyadic interaction; a study of sociocultural factors in Jamaican fertility; and preparation of an advanced reader in Urdu poetry.

We can reduce this budget, and it seems to me that one of the prime places to start is in these kind of boondoggles.

COUNCIL ON WAGE AND PRICE STABILITY OFFERS ERRONEOUS INFORMATION

(Mr. COLEMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COLEMAN. Mr. Speaker, last Thursday, April 27, the Council on Wage and Price Stability issued a news release attacking two pieces of legislation now pending before the Congress.

You and other Members of the House, as well as Members of the other body, should be aware that the information offered by the Council as it relates to meat import legislation is highly incorrect.

In its press release, the Council said:

It should be emphasized that imported beef, which is used to produce hamburger and other manufactured products, constitutes only 1 percent of domestic meat consumption and does not directly compete with the better quality fed beef primarily produced by American producers.

The Council is offering bad information. The actual percentage of imported beef is closer to 7 percent, not anywhere near 1 percent.

When my office challenged the Council on this inaccuracy, they eventually agreed they had erred, but they refused to agree to issue corrective information. Therefore, I feel you and other Members of the Congress should know the real statistics and not be misled by this highly distorted statement of the administration.

CARTER ADMINISTRATION COMPILING VOTING RECORDS OF MAJORITY MEMBERS

(Mr. RHODES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RHODES. Mr. Speaker, I note with interest that the Carter administration is compiling the voting records of majority Members with implications that those who oppose the President's policies, whatever they may be, will not be "blessed" with his active support during this fall's campaign.

This presents an interesting dilemma, and I sympathize with those who must make this momentous decision. Since most of Mr. Carter's alleged "victories" have been against the wishes of the majority of Americans, there is the question of whether or not passing the President's computerized litmus test is a boon or a bane.

On this side of the aisle, we will watch with great interest the selection of the favored few, and look forward to release of this rubberstamp roster. It is in those districts that we know we stand the very best chance of seeing a new face in the 96th Congress. Meanwhile, I admonish those across the aisle to be careful with their votes. Billy's big brother is watching.

RURAL COMMUNITIES STILL SUFFER POVERTY OF RESOURCES

(Mr. WAMPLER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WAMPLER. Mr. Speaker, I rise in behalf of rural America.

Fifty years ago, over half our population was rural. Then, as now, they were a clean living, hardworking bulwark of our traditional American values. They were also entering an unfortunate era from which they are still striving to recover.

The Great Depression and the growth of capital intensive agriculture forced millions of rural people to seek work in the cities. World War II demands for military and industrial manpower took other millions, as did the post-war surge in manufacturing growth. Between 1930 and 1970, about 30 million rural people left our farms and rural communities.

The result was prolonged depression in rural America. While the cities prospered, rural opportunity languished. Income diminished. Farms and businesses failed. Dwindling local revenues could not provide such basic amenities as water systems, sewerage, and adequate schools.

Recognizing this, Congress stipulated rural eligibility for many programs now available for community facilities, industrial investment, employment, and other development needs. Today, rural communities are sipping benefits long and lavishly enjoyed by the cities. However, thousands still suffer a poverty of resources while hopefully awaiting Federal assistance.

Against this background, I note the President's recent plan for urban recovery which proposes over 150 changes in many programs now funneling about $85 billion per year to State and local governments. These changes would greatly increase the metropolitan share of current programs. He also proposes a new $20 billion urban assistance program which incorporates mechanisms to insure that existing programs favor our major cities.

If approved, Mr. Speaker, the President's proposal would deny rural America a fair share of Federal revenues. This would relegate millions of rural citizens and their communities to the same condition of neglect we have sought to remedy in past years.

FORMER PAGE JODIE GAINES KIDNAPED

(Mr. JONES of Tennessee asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JONES of Tennessee. Mr. Speaker, I rise to make an announcement that has brought sadness to my State, to my congressional district, and to those Members of this body who became acquainted with a young lady who was a page here in the House during the month of March, Miss Jodie Gaines. Miss Gaines was abducted while she was driving to visit some of her relatives. She left her father and mother last Friday night and somewhere between the country club and McKenize, Tenn. She was abducted and has not been heard of since. A ransom has been asked for.

I understand that the sum of $250,000 has been left at some place that was requested for her safe return.

Jodie Gaines was a very wonderful page while she was here on the floor of the House. She served in the well of the House and many of the Members became acquainted with her.

I offer sympathy to the family as I am sure that all of the Members do. It is our prayer that she will be returned safely to her father and mother within a very short time.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. Pursuant to the provisions of clause 3(b) of rule XXVII, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

After all motions to suspend the rules have been entertained and debated and after those motions, to be determined by "nonrecord" votes have been disposed of, the Chair will then put the question on each motion on which the further proceedings were postponed.

SOLAR ENERGY SOURCES LOAN PROGRAM

Mr. SMITH of Iowa. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 11713) to create a solar and renewable energy sources loan program within the Small Business Administration, as amended.

The Clerk read as follows:

H.R. 11713

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SEC. 101. (a) Section 7 of the Small Business Act (15 U.S.C. 636) is amended by adding at the end thereof the following new subsection:

"(l)(1) The Administration also is empowered to make loans (either directly or in cooperation with banks or other lending institutions through agreements to participate on an immediate or deferred basis) as the Administrator may determine to be necessary or appropriate to assist any small business concern in financing—

"(a) plan construction, conversion, expansion (including acquisition of land for such a plant), or startup, and

"(b) the acquisition of equipment, facilities, machinery, supplies, or materials

to enable such concern to design, manufacture, distribute, market, install, or service active or passive solar energy equipment, renewable energy sources equipment, or other item on the Energy Conservation Measures List or contained in an approved State energy conservation plan, the primary purpose of which is the conservation of energy.

"(2) No loan shall be made under this subsection if the total amount outstanding and committed (by participation or otherwise) to the borrower from the revolving fund established by this Act would exceed $500,000: *Provided,* That no such loan made or effected directly or in cooperation with banks or other lending institutions through agreements to participate on an immediate basis shall exceed $350,000.

"(3) No financial assistance shall be extended pursuant to this subsection unless the financial assistance applied for is not otherwise available on reasonable terms from non-Federal sources.

"(4) No immediately participation may be purchased unless it is shown that a deferred participation is not available; and no loan may be made unless it is shown that a participation is not available.

"(5) In agreements to participate in loans on a deferred basis under this subsection, the Administration's participation shall not be in excess of 90 per centum of the balance of the loan outstanding at the time of disbursement.

"(6) The Administration's share of any loan made under this subsection shall bear interest at the same rate as loans made under subsection (a) of this section. The maximum term of any such loan, including extensions and renewals, may not exceed fifteen years.

"(7) All loans made under this subsection shall be of such sound value as reasonably to assure repayment, recognizing that greater risk may be associated with loans made to business concerns in this field: *Provided,* That factors in determining 'sound value' shall include, but not be limited to, quality of the product or service; technical qualifications of the applicant or his employees; sales projections; and the financial status of the business concern: *Provided further,* That such status need not be as sound as that required for loans mare under subsection (a) of this section.

"(8) For purposes of this subsection, the term 'active or passive solar energy equipment' shall include, but not be limited to, solar heating and cooling systems, including storage, solar hotwater systems, solar photovolatic systems, and such other equipment as prescribed by the Administrator. The term 'renewable energy sources equipment' shall have such meaning as prescribed by the Administrator.

"(9) Funds under this subsection shall be distributed as equitably as possible between nonurban and urban areas.".

SEC. 102. Subsection (c) of section 4 of the Small Business Act (15 U.S.C. 633(c)) is amended—

(1) in paragraph (1), subparagraph (B), by inserting "7(l)," after "7(i),"; and

(2) in paragraph (2), subparagraph (B), by inserting "7(l)," after "7(i),".

SEC. 103. Subsection (e) of section 20 of the Small Business Act (15 U.S.C. 649(e)) is amended by adding at the end a new paragraphs as follows:

"(10) For the programs authorized by section 7(l) of this Act, the Administration is authorized to make $30,000,000 in direct and immediate participation loans, and $45,000,000 in guaranteed loans.".

(c) Subsection (f) of section 20 of the Small Business Act (15 U.S.C. 649(f)) is amended by striking the first sentence and inserting in lieu thereof the following: "There are authorized to be appropriated to the Administration for fiscal year 1979 $1,601,750,000 to carry out the programs referred to in subsection (e), paragraphs (1) through (10).".

SEC. 104. Subsection (d) of section 7 of the Small Business Act (15 U.S.C. 636(d)), is amended by inserting "(1)" after "(d)" and by adding at the end of such subsection the following paragraph:

"(2) The Administration is hereby authorized to make grants to qualified organizations for the purpose of enabling such organizations to provide training seminars for small business concerns concerning practical and easily implemented methods for design, manufacture, installation, and servicing of solar energy equipment, and renewable energy sources equipment or other energy conservation measures.".

SEC. 105. Subsection (b) of section 8 of the Small Business Act (15 U.S.C. 637(b)) is amended by striking out "and" at the end of paragraph (14); by striking out the period at the end of paragraph (15) and inserting in lieu thereof "; and"; and by adding after paragraph (15) the following:

"(16) to provide technical manuals on the design manufacture, installation, or servicing of solar energy equipment, or renewable sources equipment, to any small business concern at not more than 50 per centum of the cost to the Administration.".

SEC. 106. This Act shall be effective October 1, 1978.

The SPEAKER. Is a second demanded?

Mr. BUTLER. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentleman from Iowa (Mr. SMITH) and the gentleman from Virginia (Mr. BUTLER), will be recognized for 20 minutes each.

The Chair recognizes the gentleman from Iowa (Mr. SMITH).

Mr. SMITH of Iowa. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 11713, a bill which would establish a new SBA loan program to provide financial assistance to small firms involved in solar energy and energy conservation fields. This bill is the result of extensive hearings conducted by the Subcommittee on Energy, Environment, Safety and Research which is chaired by Congressman BALDUS. He would have been here today to manage this bill on the floor except for the untimely death of a member of his family.

Rather than delay floor consideration o. this measure Congressman BALDUS requested that I manage it for him.

The bill was introduced by Congressman BEDELL and was substantially revised from its earlier version. At the conclusion of my statement, I will yield to him to discuss this matter in detail.

This bill would establish a new SBA program to provide loans to small businesses involved in the fields of solar energy (including heating, cooling, storage, and photovoltaic systems); renewable energy sources as defined by the SBA Administrator; and energy conservation fields including those items on the Department of Energy's energy conservation list or an approved State energy consevation plan. These loans would be available to designers, manufacturers, distributors, marketers, installers, or servicers of such equipment for the purposes of funding plant construction, conversion, expansion, or startups, acquisition of equipment, facilities, machinery, supplies, or materials.

The provisions of the program would be similar to those of SBA's regular business loan program:

A limit of $500,000 per guaranteed loan applicant and $350,000 per direct loan applicant would be established;

Applicants would be required to demonstrate that loan assistance is not available from non-Federal sources;

Applicants may seek direct loans only when guaranteed loans are unavailable; the SBA share of guaranteed loans would be limited to 90 percent;

The interest rate on direct loans would be based upon the cost of money to the Federal Government—currently 6⅝ percent—and on a guaranteed loan at a rate negotiated between the borrower and lender, subject to an SBA maximum—currently 10 percent.

The term of any loan may not exceed 15 years.

The bill also would authorize grants for energy training seminars and for energy manuals to be sold at half cost.

Although I do not believe that solar energy is the only source which will overcome our energy shortage, I do believe that it is one of the sources which should be developed and utilized. It may never be feasible to utilize solar energy in every part of the country for every purpose, but it is feasible today in some areas as a viable alternative to electricity to provide hot water and space heating.

Small businesses in this industry, whether they be designers, manufacturers, distributors, installers, or service technicians, could apply for financial assistance under SBA's regular business loan program. Experience has shown, however, that SBA simply is not approving loans under this program to this type of applicant. Apparently SBA is not approving these loans due to their perception that the solar industry has not sufficiently progressed to a point where there is a sufficient market for this product.

There is a continually growing interest in solar energy. For example in 1977 there were approximately 66,000 residential solar installations.

The State of Iowa, for example, certainly is not a part of the Sun Belt, but solar power is being tried for both domestic hot water and for space heating.

If properly installed, solar energy can be used to provide part of a home's domestic hot water needs at an initial cost of $1,800 to $2,200. It can also provide part of the space heating requirements in a home. The cost of doing so is considerably higher, in the range of $12,000 to $16,000. I believe that we should not deny small businesses the opportunity to participate in it solely because they cannot obtain the needed capital.

I believe that we should establish a loan program as proposed in this bill. Because it is a new industry, loans made to this type of applicant initially may have a greater degree of risk and a somewhat higher loss rate; however, I believe that this is justified in conjunction with our energy problems when it is coupled with the restrictions and safeguards provided in the bill.

Although SBA may not have the present capability to evaluate the technical capabilities of a solar energy system, SBA and the Department of Energy have entered into an interagency agreement so that DOE will do the technical evaluation. I see no reason the Department of Energy cannot cooperate and contribute its expertise on solar energy the same as the Environmental Protection Agency evaluates the technical merits of a pollution control system to facilitate SBA consideration of loan applications under SBA's water pollution control loan program.

I urge the passage of this bill.

Mr. Speaker, I now yield such time as he may consume to the gentleman from Iowa (Mr. BEDELL), to further explain the bill.

Mr. BEDELL. Mr. Speaker, it certainly is proper and appropriate that we should be considering this bill today as we come upon tomorrow which is going to be Sun Day where we look to the possibilities that we have in solar energy. The purpose of this bill is to help make it possible for small business to more actively participate in the efforts to solve our energy problems which the President a little over a year ago declared was the moral equivalent of war.

It is pretty well known that creativity comes not from large corporations but from those smaller operators where they have the individual creativity in order to solve technical problems, specifically I think it is particularly true in a field such as we are getting into of new technologies in this area that lends itself frequently to the small operator as we try to install equipment which will help solve this energy problem.

One of the problems we have as we go through present agencies to try to get help in this matter involving energy is that it is a lot easier for any department today to award a $100 million loan than it is 1,000, $100,000 loans.

So the natural tendency for those agencies in order to hold down their work was to work with the larger firms in trying to solve the problem. Since this is new technology, and since these new businesses do not have a proven track record, because of the fact that it is new, it, therefore, makes it more difficult for small businesses to get the capital they need in order to engage in this particular activity.

The Small Business Administration testified before the subcommittee on March 20 that in the previous 6-month period they had made three loans in the United States to encourage energy-related small businesses which needed their help. So, as we move into this new technology, I think we can expect a great expansion of market availability, and the question is whether the small operator is going to be able to continue to exist or whether big business is simply going to take over and control the entire energy field, with the detrimental effects that I think, at least, we have seen previously.

The financial purposes of this bill are to be limited to plant construction, conversion, expansion, especially for plant startup. The term "startup" refers to the process of establishing a new business or assisting a new business in becoming fully operational; that is, a business that is not yet fully operational for the first time, or one that has been fully operational for less than 2 years.

Other financial purposes of the bill would include acquisition of equipment, facilities, machinery, supplies, or other materials. The loans would be limited to businesses which have as their purpose the design, manufacture, distribution, marketing, installation, or servicing of equipment involved in the fields of active or passive solar energy, renewable energy sources, or energy conservation.

Mr. Speaker, the bill authorizes $30 million in direct loans and $45 million in guaranteed loans. Persons can only get direct loans if they fail to qualify for guaranteed loans. They can only get guaranteed loans if they prove they have been unable to get credit from other sources. It limits the amount of the loan to any one individual, $350,000 on direct loans, $500,000 on guaranteed loans, and the money is loaned at the cost of the money to the Government, plus one-quarter percent, which at this time would be 6⅝ percent for direct loans.

The bill specifically says that the small Business Administration will be able to make loans for solar energy wherein their requirements are somewhat less strict than they have been in their general loan program. The reason for that is because of the importance to our whole society that we move forward to help solve this energy problem, which at this

time and last time drained some $45 billion in terms of export payments for foreign oil.

Mr. BUTLER. Mr. Speaker, will the gentleman yield?

Mr. BEDELL. I yield to the gentleman from Virginia.

Mr. BUTLER. I thank the gentleman for yielding.

What this does is set up a separate loan program, a new separate loan program, under the Small Business Administration; is that a fair statement?

Mr. BEDELL. The gentleman is correct.

Mr. BUTLER. Is there a precedent for doing this?

Mr. BEDELL. I am advised that there is a handicapped loan program, for example, and that there are some others.

Mr. BUTLER. There is a special statutory provision for handicapped loans?

Mr. BEDELL. I am advised that this is correct; yes, sir.

Mr. BUTLER. Can the gentleman think of any other precedents?

Mr. BEDELL. Water pollution control, they tell me; energy shortages; OSHA.

Mr. BUTLER. In these precedents is there the provision that acknowledges, as this one does, that in these particular loans, I think the language is, it is recognized that greater risk may be assumed? Is there that provision?

Mr. BEDELL. No, I think not, because I think, for example, with handicapped people the problem would be a somewhat different problem, and I think this language is meant to address that specific problem with regard to the solar energy problem, which is a problem, as I explained, where there is not already a proven track record.

Mr. BUTLER. I thank the gentleman.

Mr. CARTER. Mr. Speaker, will the distinguished gentleman yield?

Mr. BEDELL. I yield to the gentleman from Kentucky.

Mr. CARTER. I thank the gentleman for yielding.

I would say that another precedent in this area is for minority enterprise. This is not the first step in this field, in a new field, at all.

Mr. BEDELL. I am pleased that the House leadership scheduled consideration of H.R. 11713 for today, May 2. The timing of this proposal is particularly appropriate in light of the fact that tomorrow is Sun Day, a day of national awareness of the potential of solar energy.

I believe that Sun Day will serve a valuable function in focusing national attention on the need for increased investment in solar technologies. It should certainly do much to crystallize the public's perception of the promise of solar energy.

However, to be truly effective, popular support for solar development must be complemented by practical Government action promoting solar technologies, such as increased spending for the Federal solar energy budget and the creation of Government incentives and programs to assist individuals and companies in the development and installation of solar devices. In my view, it is imperative that our Nation, as a matter of public policy, make a stronger commitment to the development and practical application of solar energy.

We are all aware of the severity of our Nation's energy problems, and we are concerned about devising an effective and responsible strategy to deal with them. In the past, solar development has occupied a decidedly low priority in the Federal Government's energy priorities. I think that its status should be upgraded, both by increasing the Federal Government's solar R. & D. activities and by encouraging the private sector to join in the solar development and conservation effort.

The case for solar energy is strong. It is an energy source that is inexhaustible, clean, safe, and secure against boycotts. It can be tapped directly from sunlight, or indirectly from the energy which the sun produces in wind, falling water, plants, and temperature changes in the oceans. On a small scale, solar energy can already heat and cool homes, supply heat for industrial processes, power space satellites, generate electricity, and create liquid fuels like alcohol.

The potential of solar energy is exciting. A recent study published by the Council on Environmental Quality (CEQ) concluded that solar technologies could provide one-fourth of all U.S. energy needs by the year 2000. However, the CEQ report maintains that for this to happen, the Federal Government must plan an active role, speeding up the deployment of today's solar technology and breeding new technology through increased research and development. The report states that:

> It seems clear, that the federal government—for a time—must play a strong role in furthering solar development. It also seems clear that some changes and reforms in federal programs are advisable. . . . The key policy ingredient is an official and personal commitment to solar energy commensurate with its potential for benefiting the nation.

President Carter indicated his support for solar development when he suggested a national energy goal of using solar energy in more than 2½ million homes by 1985. To meet this goal and respond to the growing demand envisioned by enactment of solar energy tax credits, our Nation's solar industry must triple its production capacity in the next 2 years. The emergence of new solar firms and the expansion of existing businesses are required to meet the demands of not only production but also research, testing, marketing, installation, and maintenance of solar equipment.

Many, indeed most, of the present companies involved in the solar energy field, are small businesses. Unfortunately, smaller firms—many with good and promising products to offer—have fallen on hard times due to inadequate financing or improper management, and declining demand pending passage of Government tax incentives.

A recent report by the House Small Business Committee Task Force on Equity and Venture Capital discusses the problems with the present shortage of capital for small businesses and states that any emerging innovative company is doomed without some assistance in the capital formation area. Many of these companies have gone to the Small Business Administration for loans under their regular 7(a) loan program. These companies have been either turned down or so entangled in paperwork, financial costs, and attendant frustration that they have either ended up in bankruptcy or sold out to a large and often monopolistic company. Regional hearings held by the House Small Business Committee supported these findings.

The fact of the matter is that the Small Business Administration has simply not been responsive to the needs of solar companies.

At the same time, larger companies have been interested in both the innovation and achievements of the smaller companies, and this interest has all too frequently resulted in their acquisition by the larger firm. Forbes magazine described the situation in an article on the solar market in their October 1977 issue as follows:

> And when companies like Alcoa, PPG Industries, General Electric, General Motors, Revere Copper & Brass, Exxon, and Owens-Illinois dabble in those waters (they all do), they make waves big enough to swamp most of the little enterprises that, to date, have dominated the field.

I, for one, believe we can and should reverse this trend toward concentration by giving small businesses an opportunity to compete in the solar field. To be meaningful, this opportunity must come now during the early stages of the development of the solar market. Small businesses must be given a chance to compete. Otherwise we will have yet another segment of the energy market controlled by a handful of large companies. Competition is vital to our free enterprise system, and we have a responsibility to preserve it. In my view, the Small Business Administration should play a prominent role in this effort.

The Small Business Administration was created to offer assistance to small companies. In 1953, when Congress passed the Small Business Act, it specifically mandated that the agency was to preserve free competition in the economy by assisting in the establishment, preservation, and strengthening of small business concerns. And loans were intended to be a primary instrument of such assistance.

The bill we are considering today seeks to involve the Small Business Administration in the dual purpose of preserving small business and helping find answers to our Nation's energy needs. Both objectives are worthy of your support today.

Under my bill, small businesses could receive direct or guaranteed loans through the Small Business Administration for the design, manufacture, distribution, marketing, installation, or servicing of solar energy equipment. The bill would cover a wide range of products, including solar heating and cooling equipment, solar hot water systems, solar electric cells, insulation, clock thermostats, and storm windows. The Small Business Administration would be authorized to provide $45 million in 90 percent federally guaranteed loans and $30 million in direct loans, which could be provided only after a business was unable

to obtain a guaranteed loan. Loans could be applied toward construction, conversion, and expansion of a plant, as well as other "start-up" costs involved in getting a small solar or conservation business off the ground.

The bill also attempts to respond to complaints by small businesses involved in solar development who have been unable to participate in SBA loan programs because of that agency's requirement that the applicant demonstrate a track record of repaying loans or making profits. These firms are currently in a Catch 22 situation, since solar energy is a new technology without a solid business history. H.R. 11713 recognizes that greater risk may be associated with solar loans and thus declares that the financial status of solar applicants need not be as "sound" as normally required. The applicant's business qualifications, product quality, sales projections, and financial status deserve equal consideration.

The bill would also authorize grants for energy training seminars and for energy manuals to be sold at half cost.

The promise of solar energy is real, and the need for small business involvement in this area is vital. Your vote to create the program envisioned by this bill will both enhance the solar contribution to our national energy needs and improve small businesses' chance of remaining a viable and productive entity in our economic system.

Mr. BUTLER. Mr. Speaker, I yield 5 minutes to the gentleman from Massachusetts (Mr. CONTE).

Mr. CONTE. Mr. Speaker, I rise in support of the solar energy resource loan program. I believe that the time has come for the Federal Government to put into actions our verbal promises of offering all appropriate incentives to facilitate our conversion to this renewable source of energy.

Mr. Speaker, we have received testimony from numerous witnesses as to the great strides that has made solar energy understandable, accessible, and cost effective. This source holds great potential in my region where our average energy cost is 31 percent above the national average. This proposal attempts to allow the small business sector to enter this expanding energy market, thus allowing this energy technology to be installed by all who desire it. However, the current structure of the solar energy sector demonstrates the need for the small business sector to become an active, independent participant in the commercial development of this exciting energy source. The present financial makeup of the solar energy sector shows that the majority of the small businesses currently in this area are financed, to varying degrees, by the major oil corporations. In turn for this financial support, the oil industry is forcing as a precondition, that they surrender the controlling interest in the company. Thus, while they appear to be small concerns, they are controlled by the major oil corporations, who will ultimately benefit from the success of this energy source. While I commend the major oil companies for their past research in this area, I cannot condone the financial ties they are making with yet another emerging energy industry. I believe that it is time we take positive actions which will allow small businesses to avoid these preconditions in the future.

Mr. Speaker, the data we have seen conclusively demonstrates that the demand for this new source of energy is just beginning to intensify. The small business can, and should have a large share of this exciting market potential. However, these small concerns must have additional financial backing in order to successfully compete with the oil and gas industry which does not suffer from a lack of capital, while the Small Business Administration is already authorized to make these loans, the uncertainties involved in this developing market make it riskier in their eyes; therefore, the need for this legislation: to add emphasis to the program, and to notify the administration of our desires that they intensify their efforts to assist in the orderly development of this emerging energy technology sector.

The proposal before us will mandate that the Small Business Administration provide loans to those who qualify, for up to $500,000 for guarantees, and $350,000 for direct loans. These loans are for small businesses that are engaged in the design, manufacture, distribution, marketing, installation, or services of equipment involved in the fields of active or passive solar energy. The bill also mandates that energy conservation activities, which numerous small businesses have been assuming, be a part of this program.

Both activities, with the passage of this proposal, will accomplish two meritorious objectives. First, they will allow us to develop our solar energy capabilities, by actually assisting in the installation and maintenance of these units rather than just to continue our research efforts, second, this proposal will assist the small business firms in their attempts to share in the successes that will arise out of this exciting new industry. The financial impact on the Federal Treasury should be minimal, limited to the normal defaults that accompany the other loan programs of the Small Business Administration.

Mr. Speaker, the vital necessity of this proposal has been demonstrated. It is needed in order to allow the small businesses, throughout the country, to enter this energy activity, unencumbered by the financial constraints that are the mark of the current trend. I, therefore, urge the passage of this timely proposal.

Mr. BUTLER. Mr. Speaker, I yield 5 minutes to the gentleman from Kentucky (Mr. CARTER).

Mr. CARTER. Mr. Speaker, I rise in support of H.R. 11713, which creates a solar and renewable energy sources loan program within the Small Business Administration.

I would first like to commend the distinguished chairman of the subcommittee, Mr. BALDUS, for his leadership and dedication in bringing this legislation to the floor.

Mr. Speaker, this bill authorizes $75 million for loans to small businesses involved in solar energy or energy conservation. The SBA is permitted to provide direct loans up to $350,000, and is permitted to participate in 90-percent guaranteed loans up to $500,000.

With our Nation's efforts to find alternative sources of energy, I believe that this legislation will encourage the production and marketing of solar and energy saving devices that will ultimately reduce our dependence on foreign oil supplies.

After extensive hearings and several modifications this bill was reported unanimously by the subcommittee and with only two dissenting votes in the full committee.

I believe that the SBA needs to have the clearly expressed intention of the Congress that business enterprises working in these areas are to be assisted, as they unfortunately have not been in the past.

Mr. Speaker, I strongly support this legislation. It is my feeling that small businesses should certainly be encouraged to enter into this field, a new and innovative field which includes the use of photovoltaic cells. That is really a very new mechanism of changing the rays of the Sun into electricity.

This is entirely possible. It is estimated that if one-tenth of the area of the State of Arizona were covered by these cells, we would have enough electricity generated in that area to supply the entire United States.

I submit, Mr. Speaker, that some one of these young entrepreneurs or manufacturers will develop a method of using the rays of the Sun so that we will have an adequate supply of energy and will not have to depend so much upon the OPEC nations for oil as we do at the present time. Not only that, we will be backing up the small businessman who needs our assistance and who has the ingenuity to develop photovoltaic cells and other methods of solar energy generation.

Mr. Speaker, I strongly support this legislation.

Mr. BUTLER. Mr. Speaker, I yield 2 minutes to the gentleman from Indiana (Mr. HILLIS).

Mr. HILLIS. Mr. Speaker, I thank the gentleman from Virginia for yielding me this time.

Mr. Speaker, I rise in strong support of H.R. 11713.

Tomorrow, as we all know, is Sun Day, and for this reason this legislation is most appropriate, not only on this occasion but as we move forward in this area and meet the need to do the things that are necessary to bring this type of energy source to ready availability for all our citiizens.

I note that there are roughly only 40,000 structures, both commercial and residential, presently in this country that utilize solar heat. This compares with 2 million in Japan, and in Israel solar energy and solar heat have been utilized in 1 out of every 5 structures.

This shows us that the technology is here. What we need to do is to get the production of these devices increased and get the cost down so the American consumer can utilize this important energy source. The key seems to be getting the

collector costs down to approximately $20 per square foot. Once that goal has been achieved, solar energy will then become competitive with electric resistance heating. With more production and more competition, I believe that the cost factor will go even lower, to the point where solar energy will be competitive with gas, oil, heat pumps, and other sources particularly as conventional fuel costs rise in the future.

This legislation that encourages and makes possible for small business to get into this field and to develop solar energy and the apparatus that is needed, will make the cost competitive with conventional fuels, particularly as the cost of those conventional fuels goes up.

For that reason, Mr. Speaker, I support the legislation. I point out its importance to the Nation at this time, and I urge my colleagues to join me in support of the bill.

Mr. SMITH of Iowa. Mr. Speaker, I yield 3 minutes to the gentleman from Missouri (Mr. YOUNG).

Mr. YOUNG of Missouri. Mr. Speaker, I rise to strongly support this bill, which I believe could prove crucial to our efforts to upgrade solar energy as a major energy resource.

Because of the high initial cost of solar devices and equipment, many small businesses have been unable to enter the field. Others that have made commitments have experienced financial problems. Some small companies which have shown great promise in the solar field have been forced to close.

The solar industry is in its infant stage, and because of the important contribution it can make in solving our energy needs, it warrants special attention. That attention will be provided, in part, by the direct loans and loan guarantees called for under this legislation.

I believe it is especially appropriate that we are being asked to demonstrate our commitment to solar energy in the midst of the international celebration of Sun Week.

As you know, there are a great many events being held around the country and in 20 other nations to celebrate solar energy. The idea for this international celebration began last year, when a group of citizens decided to name this Wednesday "Sun Day." They formed a nonprofit group, called Solar Action, and began laying the plans for a 1-day salute to solar energy.

Since then, the President, we in the Congress, and a long list of private and public groups have given their support to Sun Day. The response was so great that the whole week has been designated "Sun Week." This week, people are participating in sunrise celebrations, solar fairs, and open-air concerts all over the country.

To show my commitment, I held a 2-day exposition last weekend in St. Louis that included solar exhibits, films and slides, and speakers. Several thousand persons participated, and it was a remarkable success. As a result, I believe the residents of the St. Louis area now have a heightened awareness and interest in solar energy—both in its uses and its potential.

I urge my colleagues to support this important solar loan program.

Mr. BUTLER. Mr. Speaker, I yield myself 5 minutes.

Mr. Speaker, we are gathered on Sun Day eve to pay a $75 million tribute to the twin gods, small business and solar energy. Bear in mind that the Small Business Administration is authorized to make the loans we are talking about today, and be so advised. But what we are doing for the first time is that we are undertaking to select a particular type of business for investment assistance by the Small Business Administration. We do it by candidly recognizing in the legislation "That greater risk may be associated with loans made to business concerns in this field," and then we proceed to carve out a special program for solar energy.

We support the objective to encourage small business to engage in solar and renewable energy sources and support the promotion of capital formation for energy technology advancement. But we think this is an extremely bad policy, because the purpose of the Small Business Administration is to assist the small businesses generally in order to preserve the free enterprise system. Its purpose is not to promote particular industries regardless of how worthwhile they may be or what happens to be in style at the time or how close it happens to fall to Sun Day when the legislation comes to the floor.

We want to help small business generally, but when we substitute the judgment of the Congress of the United States as to what is wise or unwise business investment, then what we are doing is, we are dictating the policy, the lending policy, of this Small Business Administration, when we have committed that policy to their judgment and to their expertise.

So I submit to the Members that we are making a serious mistake. What we are doing is, we are doing the same thing to the Small Business Administration that we have already done to the tax laws. We have the tax laws now riddled with what we call loopholes. But this is the way loopholes arise. It has made a mess out of the tax laws and created a lot of problems. Now we are going to create a precedent for adopting whatever loan program happens to be in style, regardless of the validity of it, and we are taking away the judgment from the Small Business Administration and putting it unto ourselves. I think the Small Business Administration's judgment is better than ours. This is a bad bill.

I think it is a mistake to pass it. We will survive it, of course.

Mr. Speaker, I urge the Members to vote against the bill.

Mr. BAUMAN. Mr. Speaker, will the gentleman yield?

Mr. BUTLER. I yield to the gentleman from Maryland.

Mr. BAUMAN. Mr. Speaker, a few years ago the House considered legislation which would have extended multi-billion-dollar amounts of loans and loan guarantees to various energy companies for the purpose of coal gasification and for the production of oil from oil shale in the West.

I know at the time there were at least two rollcalls on that issue and that several Members, the more liberal Members of the House, joined with many of the more conservative Members in basic opposition to this principle. We did not feel it was the duty of the Government to be subsidizing business in the production of energy, particularly in view of the fact that the private capital resources were available if these companies wanted to develop these types of energy.

Mr. Speaker, it seems to me that despite the fact small business is involved in this loan program, if the private capital is there, it will be made available for these purposes.

Is there any difference in the principle of opposition to subsidies for big business or for small business?

Mr. BUTLER. In the light of the prior decision by the Congress, it would seem to me that that would indicate a "no" vote today on this same principle.

Mr. BAUMAN. Mr. Speaker, I thank the gentleman.

Mr. BUTLER. I appreciate the gentleman's comments.

Mr. CONTE. Mr. Speaker, will the gentleman yield?

Mr. BUTLER. It is a pleasure to yield to the gentleman from Massachusetts.

Mr. CONTE. Mr. Speaker, there was a big difference. If I correctly remember that bill, it was for research and development. This bill does not apply to research and development.

Not only that, but the bill of which the gentleman from Maryland (Mr. BAUMAN) speaks also contained grants as well as loans.

Mr. BUTLER. Mr. Speaker, I will yield to the gentleman from Iowa (Mr. BEDELL) to tell us whether the bill involved research at all for small businesses in this area.

Mr. BEDELL. Mr. Speaker, I thank the gentleman for yielding.

The answer is "No." The answer is that it is not for research. It is loans to small businesses. If a loan were made to a small business and part of their business involved individual research, that would be permissible; but the bill is not directly for research purposes.

The SPEAKER pro tempore (Mr. ROBERTS). The time of the gentleman from Virginia (Mr. BUTLER) has expired.

Mr. BUTLER. Mr. Speaker, I yield myself 2 additional minutes.

Mr. Speaker, I pose this question: Could not small businesses which had a research program leading to "successful enterprise"—and I put that phrase in quotes—qualify for assistance under this legislation? Is that not correct?

Mr. BEDELL. If the gentleman will yield further, no; it is only for commercial operation. Of course, a small business might do some research which might be in line with what they were doing; but the loan is not a loan for research purposes, as indicated by the gentleman from Massachusetts (Mr. CONTE).

Mr. GARY A. MYERS. Mr. Speaker, will the gentleman yield?

Mr. BUTLER. I yield to the gentleman from Pennsylvania.

Mr. GARY A. MYERS. Mr. Speaker, in addressing that subject, the question of loan guarantees for coal gasification plants, were in the same sense a research project as many of the efforts in the solar industry will be, and that will be demonstrating, through the commercial sale of the product, that these technologies do have an effect.

In fact, the loan guarantees for coal gasification and liquefaction were simply to encourage private development and sale of that product in the commercial marketplace of coal gasification products.

Mr. Speaker, if the gentleman will yield further, I have another question which I would like to ask.

The bill has direct loans as well as guaranteed loans, and there are limits on both of those with respect to any one corporation.

Does the bill prevent any one corporation from participating in both a guaranteed loan and a direct loan up to the maximum of both?

Mr. BUTLER. To respond to the gentleman's question, Mr. Speaker, I would yield to the gentleman from Iowa (Mr. BEDELL).

Mr. BEDELL. Mr. Speaker, the answer is that no one can qualify for a direct loan unless he fails to qualify for a guaranteed loan, so that the $350,000 limit on the guaranteed loan would apply if a person could qualify for that, and then they could not get the direct loan.

Mr. BUTLER. Mr. Speaker, I thank the gentleman for his contribution.

I yield myself the balance of my time.

The SPEAKER pro tempore. The gentleman from Virginia (Mr. BUTLER) has 3 minutes remaining.

Mr. BUTLER. Mr. Speaker, the questions that we have been getting here have dealt, on one hand, with natural gas, and on the other hand, with coal gasification.

All of these things illustrate the point which I think is significant here, and that is that we are opening the door. How long do we think it is going to be before everybody with his own energy source and own new technology is going to come in here and try to carve out a separate Small Business Administration loan program for the advancement of that particular idea and is going to be asking Congress to establish priorities as to what is appropriate and what is inappropriate assistance in this area?

Mr. Speaker, that is the sort of thing which I think we ought to stop before it gets started, and that is why I urge a "no" vote on the legislation.

Mr. CARTER. Mr. Speaker, will the gentleman yield?

Mr. BUTLER. I yield to the gentleman from Kentucky.

Mr. CARTER. Mr. Speaker, I believe we referred to gasification and liquefaction of coal.

Would we not be much better off today if we had proceeded then as suggested? Even with the distillation of coal, we could have been in the position of some companies which derive as much as 40 percent of their gasoline from coal, if we had proceeded.

What is more, Mr. Speaker, I submit to my good friend that we must proceed in this area and use solar energy in order to save petroleum which we produce here and import for more serious purposes.

Mr. BUTLER. I thank the gentleman. I am in 100 percent agreement on the need to improve solar energy, but not to vote for this bill.

Mr. GARY A. MYERS. Mr. Speaker, will the gentleman yield further?

Mr. BUTLER. I yield to the gentleman from Pennsylvania.

Mr. GARY A. MYERS. I think it is proper that we recognize what we are doing. We are attempting to help solar energy and small business. The Science and Technology Committee a few weeks ago had testimony from the solar energy industry association representatives, the businesses which are now trying to cope with this problem. They said that the single thing that this Congress could do which would be most helpful to them in their effort to develop solar energy would be to deregulate the price of new natural gas and oil. That is the thing that is holding back solar development.

A Washington Post editorial last week pointed out the same, so proponents of solar energy ought to recognize the drag we are putting on this industry by continuing to regulate the price of natural gas and other energy sources solar competes with below its reasonable market price.

Mr. BUTLER. I say to the gentleman that that is no way to start an argument with me.

● Mr. CLEVELAND. Mr. Speaker, as cosponsor of an earlier version of H.R. 11713, I rise in strong support of this bill to authorize a solar energy source loan program within the Small Business Administration.

This legislation authorizes the SBA to make up to $30 million in direct loans and $45 million in guaranteed loans to designers, manufacturers, distributors, marketers, and servicers of solar energy, renewable energy resources, and energy conservation equipment. There is an individual limit of $500,000 for a guaranteed loan and $350,000 for a direct loan.

As the demand for solar and renewable energy sources increases, I think it is extremely important that small business be able to compete with larger concerns for a fair share of this market. Small businesses are still the backbone of our economy and should be encouraged to develop new and innovative energy technologies and products in spite of the relatively larger drain on their resources.

Because of the capital difficulties incurred by small businesses in attempting to venture into new technological markets, a program of Federal loan guarantees is badly needed. As long as this country intends to demonstrate a national commitment to the development of solar and renewable energy and energy conservation, we have a responsibility to back up that commitment with the necessary funds. The benefits will be enjoyed by all: small businessmen, their employees, and the consumer.●

● Mr. BALDUS. Mr. Speaker, I regret that an unfortunate death in my family makes me unable to be with my colleagues today as they debate H.R. 11713, a bill to create a small business solar energy conservation loan program. I strongly urge my colleagues to support this important piece of legislation.

My Energy, Environment, Safety and Research Subcommittee worked on this piece of legislation for more than 8 months, holdings hearings on it from Washington, D.C., to San Diego, Calif., and points in-between.

The developing solar energy and energy conservation market is a good one for small business to pursue. Its rapid expansion is being recognized by each new report in the field. A recent report prepared under contract for the Department of Energy by a University of California research team reported that we may be only 47 years away from the day when California forsakes big, central power stations fired by oil, gas, coal and the atom for solar energy. This recent DOE report assumes that petroleum supplies will be all but gone by the year 2025 for the State of California. The DOE, in releasing the report, said that its emphasis on dispersed, renewable energy sources would increase substantially in the future.

As emphasis nationally on these alternative energy sources increases, the place for small business in their development must be protected. The subcommittee uncovered a great deal of testimony in its months of deliberations that the role of small business in these emerging technologies was not being protected. While tax credits and other incentives are considered to promote these technologies, and create a market demand for them, this Congress must worry about the nature of the industry we are promoting. If the result of our work in promoting these technologies is to encourage a monopoly in the renewable energy resources field, then the traditions of free competition in this country are diminished accordingly.

This legislation works hard to protect and encourage small business as it struggles to enter the renewable energy resources and energy conservation fields.

Our subcommittee worked hard with the full Committee to report on our work with this piece of legislation. At this point I would like to direct the attention of my colleagues to Report No. 95–1071, on H.R. 11713, as amended, for a thorough discussion of the purpose of this measure, its need, and a discussion of what the bill would do.

EXCERPTS FROM COMMITTEE REPORT NO. 95–1071 ON H.R. 11713, AS AMENDED

PURPOSE OF THE BILL

The purpose of the bill is to provide additional financial assistance to certain small businesses involved in the fields of solar energy, renewable energy sources, or energy conservation. To provide such financial assistance, it establishes a new loan program authorizing the SBA to make loans to such small businesses under criteria and guidelines separate from SBA's regular business loan program; provides for training of such small businesses through grants to qualified organizations; and authorizes the SBA to provide technical manuals to such small businesses on a 50 percent cost-shared basis.

INTRODUCTION AND BACKGROUND

The Subcommittee on the Impact of Energy, Environment, Safety and Research reported H.R. 11713 as a clean bill subject to technical amendments reflecting subcommittee consideration of H.R. 11301 (and its reintroductions as H.R. 11512, H.R. 11551, and H.R. 11796); H.R. 3981 (and its reintroductions as H.R. 5907, H.R. 5908, H.R. 5909, H.R. 5910 and H.R. 7335); and H.R. 3984 (and its reintroductions as H.R. 5921, H.R. 5922, H.R. 5923 and H.R. 6468). Extensive hearings were held on these bills on July 27, September 14, and December 19, 1977, and February 13, 18, and 25, March 20 and 22, 1978.

The full committee considered and amended the bill, and on April 4, 1978, by a vote of 27 yeas, 2 nays, and 1 present, ordered the measure favorably reported, as amended.

NEED FOR THE LEGISLATION

In 1953, Congress passed the Small Business Act to preserve free competition in the economy by assisting in the establishment, preservation and strengthening of small business concerns; loans were intended to be a primary instrument of such assistance. In that act, Congress declared that the preservation of vigorous economic competition through the promotion of small business was fundamental to the economic well being and security of the nation.

Your committee has found that small businesses involved in the emerging but nationally vital fields of solar energy, renewable energy sources and energy conservation are undercapitalized and in need of loan assistance. Existing SBA loan programs as currently administered are of little or no help to small businesses attempting to enter or survive in such fields. Your committee recommends that a separate program, including loan and other assistance, should be established within the SBA to encourage and preserve small businesses in such endeavors.

STATE OF THE ART

Solar energy and energy consevation technologies [1] consist of a mix of separately developing technologies, each at varying stages of technical development, commercial feasibility and commercial readiness. In general, great strides have been made in recent years toward making solar energy understandable, accessible and cost-effective. Solar water heating and building space heating are sufficiently advanced to compete with electric heating in most parts of the country, and to provide a serious option to more traditional energy forms, according to a report of the Office of Technology Assessment. ("Application of Solar Technology to Today's Energy Needs," Office of Technology Assessment, Prepublication draft, June, 1977). These energy forms consist of "shelf item" components and technologies easily understood by laymen.

Additionally, a wide variety of simple but effective energy conservation equipment currently manufactured and distributed has successfully demonstrated commercial viability.

Small business tends to settle into the interstices of an industry—where specialty work, short runs and high quality are at a premium. The energy industry is no exception; lack of capital has prevented small business competition with oil, gas, coal and nuclear energy. Instead, small business has directed its inventive and creative attention to the decentralized, small-scale and low entry-capital energy technologies—including solar energy, renewable energy sources and energy conservation technologies. Small business can claim much of the credit for the commercial readiness of these energy technologies.

INDUSTRY PROFILE

The small business sector of the emerging energy industry based on these technologies consists of four parts: design, manufacturing, service and distribution.

An unknown number of architects, engineers, consultants, and drafters design equipment or applications for equipment based on these technologies. Approximately 180 small businesses are engaged in the primary manufacture of solar energy equipment; an equal number are engaged in the manufacture of energy conservation equipment. The service sector of the industry consists of plumbers, electricians, sheet metal contractors and workers, carpenters, and a variety of other skilled trades people in the process of learning to install and service solar and energy conservation equipment. Distribution is handled largely by a combination of the manufacturing and service sectors, plus a growing number of distributors of traditional heating and cooling equipment who are becoming increasingly cognizant of the business opportunities in these new, emerging technologies. About 500 nonmanufacturing small businesses are involved in some way with solar energy.

As with any new technology, training is required by these businesses entering it. By and large, small business persons are aware of the need for training in these new technologies, both for the protection of the consumer and for themselves.

BUSINESS OPPORTUNITIES

Every available study projecting the mix of future energy sources predicts that reliance on solar energy and energy conservation measures will increase. In 1977, there were approximately 66,000 residential solar installations made nationwide. At the time he submitted his National Energy Act to Congress, President Carter established as his goal 2,-500,000 solar installations by 1987. Based on a detailed study of projected demand, a representative of the Solar Energy Industries Association testified that this Nation has the capacity to triple that goal. The same witness projected a cumulative total of about 4½ million residential installations by 1985. Even conservative estimates of the Department of Energy project no less than 1 million residential installations by 1985. The committee was informed that the annual dollar volume by 1985 for the solar energy industry alone will near $3 billion. Beyond 1985, the contribution of solar to the national energy supply could rise to one-fourth by the year 2000, and to one-half by the year 2020, according to a report of the Council on Environmental Quality. ("Solar Energy, Progress and Promise," CEQ, April, 1978).

These figures indicate that the future profitability of the solar energy and energy conservation business is likely to be substantial.

ADVANTAGES OF SOLAR ENERGY

Several specific economic and social advantages of solar energy (and some energy conservation measures) over traditional forms of energy have caused many to view their promotion by the federal government as in the national interest. Such incentives, if and when they occur, would tend to enhance the likelihood of profitability discussed above.

A prime example of such an incentive is the tax credit for installation of solar energy or energy conservation equipment proposed in the National Energy Act. The tax credit would tend to increase market demand for such equipment by lowering its effective price to the taxpaying customer.

These perceived advantages include the potential for job creation, preservation of the environment, reduction of the nation's dependence on foreign energy sources, ready accessibility to all segments of the economy and an improvement in the balance of trade.

INDUSTRY CONCENTRATION

Larger companies are increasingly aware of the profit potentials of the solar energy and energy conservation fields.

Their participation has served to concentrate a larger and larger market share in the hands of a relatively small number of companies.

In 1975, no single company possesses the capacity to produce greater than 10,000 square feet of solar collectors annually (see chart, appendix A). Six months later, there were 30 such companies. Additionally, five companies produced at a capacity greater than 50,000 square feet annually, producing nearly one-third of the collector area. Within a year, 18 companies accounted for nearly half of the annual collector area production. This dramatic increase in the entry of companies with increased production capacities into solar collector manufacturing is of great concern to the small business community and to your committee; your committee believes it should be of great concern also to the SBA.

CAPITAL SHORTAGE AND REQUIREMENTS

Having brought solar energy and energy conservation technologies to the brink of commercial readiness, and in some cases beyond, small businesses should be assisted so that they can take advantage of the business opportunities that will clearly and foreseeably result from them. Your committee has found, however, through numerous small business witnesses and their trade association representatives, that these small businesses have depleted their limited available capital, cannot proceed without additional capital and have found it virtually unavailable from private sources.

Small business persons readily admit that private capital is available from very large corporations, especially major oil companies; invariably, however, a precondition to the availability of such capital is the surrender of a controlling interest in the small business concern to the large corporation, a condition totally unacceptable to most independent small business persons.

LACK OF SBA LOAN ASSISTANCE

Many small businesses unsuccessfully have sought loans involving these technologies from the Small Business Administration under SBA's regular business loan program. Your committee learned at its hearings that numerous loan applicants, in need of capital for establishment, preservation or strengthening of solar energy or energy conservation businesses, have been turned down by the SBA, and that virtually none have been approved. (Apparently SBA determined that these applicants did not demonstrate the requisite assurances of "ability to repay" the loan, determinations that were based as much on SBA's perception of the state of the art development of solar energy and its marketability as they were on financial considerations.)

A report issued for the Department of Energy by a private contracting firm which carefully studied the problem, found that in the area of solar energy there has been "no effective assistance by SBA." ("Analysis of Small Business Participation in the Photovoltaic Area of Solar Technology," Department of Energy, EG–77–C–01–4055, March 13, 1978).

These findings were confirmed by testimony of the SBA Administrator on March 20, when he informed the Energy Environment, Safety and Research Subcommittee that the SBA had made only three energy-related loans in the past half year.

Your committee found evidence that an important reason for this failure to make loans to such businesses results from the failure of the SBA to administer the regular business loan program criteria requiring rea-

[1] The term "solar energy" is used throughout this report in its broadest sense, and is intended to include wind energy and all other renewable energy source technologies emanating from the sun.

sonable assurances of repayment in a manner consistent with the policy of Congress to encourage and preserve competition, especially in the solar energy and energy conservation industries.

ADMINISTRATIVE SOLUTION

The Energy, Environment, Safety and Research Subcommittee worked with the SBA and the Energy Research and Development Administration (ERDA, now DOE) to arrive at an administrative solution to these problems.

At a hearing on September 14, 1977, SBA and ERDA offered to the subcommittee an Interagency Agreement, for the purpose of facilitating loan assistance to small energy-related businesses through joint efforts of the agencies. SBA agreed under the terms of the Agreement effective September 29, 1977, to forward to ERDA for evaluation loan applications beyond the technical capabilities of SBA personnel, and for which commercial or technical feasibility (or both) might be in doubt. Program moneys of $2 million per agency were allocated to the agreement; the agreement was recommended to the subcommittee by the agencies as a solution in lieu of legislation.

The subcommittee evaluated the effects of the agreement on March 20, 1978, in open hearing. The SBA Administrator testified that subsequent to September 29, 1977, the SBA approved only three energy-related loans nationwide. Additionally, the Administrator testified that no loans resulted from the agreement, since, in fact, these three loans would have been approved whether or not the agreement had been in effect. The Acting Assistant Secretary for Conservation and Solar Applications, Department of Energy, testified that he had personal knowledge of no loans made to such small businesses.

Both witnesses, however, continued to maintain a position favoring an administrative rather than a legislative solution to these problems, stipulating, however, that the problems of these small businesses discussed above do exist, and are in their judgment, critical.

LEGISLATIVE SOLUTION

Based on the evidence obtained at extensive hearings on these matters, your committee finds that a legislative solution to the capital needs of small solar and energy conservation businesses is both necessary and appropriate.

WHAT THE BILL WOULD DO

Creation of a Separate Loan Program

The bill would create a separate and new program authorizing SBA loans to small businesses involved in the fields of solar energy, renewable energy sources or energy conservation.

FINANCIAL PURPOSES

The financial purposes of the loans would be limited to plant construction, conversion, expansion (including acquisition of land for such a plant) especially for plant start-up.

The term "start-up" refers to the process of establishing a new business, or assisting a new business in becoming fully operational, that is a business that is not yet fully operational for the first time, or, one that has been fully operational for less than 2 years.

Other financial purposes of the bill would include acquisition of equipment, facilities, machinery, supplies or materials.

BUSINESS PURPOSES

The loans would be limited to businesses which have as their purpose the design, stallation or servicing of equipment involved in the fields of active or passive solar energy, renewable energy sources or energy conservation.

Energy conservation measures would be defined expressly as items included on the Department of Energy's energy conservation measures list or any item included in an approved State energy conservation plan.

The proposed energy conservation measures list, published in the Federal Register on Monday, July 25, 1977 (Federal Register, vol. 42, No. 142, pp. 37800–37801, includes the following:

a. Ceiling insulation.
b. Wall insulation.
c. Floor insulation.
d. Insulation for hot bare pipes.
e. Caulks, sealants and weather-stripping.
f. Roof insulation.
g. Clock thermostats.
h. Exterior insulation for hot water heater.
i. Insulation for forced air ducts.
j. Extra storm windows.
k. Efficient lighting fixtures or lamps.
l. Mixing valve for a hot water supply line.
m. Flow restriction for hot water lines.
n. Burner for oil fired heating equipment.
o. Individual meters to replace master meters for gas or electricity.
p. New oil burner or boiler controls (commercial).
q. Lighting controls.
r. Automatic HVAC (heating, ventilation and air conditioning) control system.
s. High efficiency electric motor.
t. Whole house ventilation fan.

RESTRICTIONS

This newly established loan program would contain provisions similar to those in SBA's regular business loan program:

The bill would provide for loan ceilings of $500,000 on guaranteed loans and $350,000 on direct loans;

Applicants would be required to demonstrate that loan assistance is unavailable from non-Federal sources;

Applicants would be eligible to apply for a direct loan only when guaranteed loans are unavailable;

The SBA share of any guaranteed loan would be limited to 90 percent; and

The interest rate of these loans would be expressly set at rates identical to those in section 7(a) of the act.

LOAN CRITERIA

The criteria for these loans would be established separately from criteria under the regular business loan program.

Your committee is fully aware that loans made under this subsection to businesses involved in these new and emerging energy fields may be associated with somewhat higher than normal risks. Nevertheless, the committee intends by the express language of the bill to signal clearly to SBA the committee's determination that loans to small business concerns involved in these fields should be made. It is the purpose of the committee to assist small business concern in this area through sound loans, made with as much diligence and care as practicable to assure repayment.

The bill would direct SBA to consider four criteria in evaluating loans to these business concern:

1. Qualifications of the business person or his/her employees;
2. Quality of the product or services;
3. Sales projections; and
4. Financial status of the business concern.

The SBA has the capability of evaluating product or service quality through services of the Department of Energy, contracted for by the agreement of September 29, 1977. It is not the intent of this criterion, however, to require testing of products as a condition of loan approval; rather, the purpose of the language is to encourage the SBA to utilize the results of such testing in cases where it has been performed in evaluating the application's merits.

The committee learned through testimony that several applicants were informed by loan officers that orders in-hand for a product were considered irrelevant to the consideration of assurances of ability to repay. Your committee disagrees. If the product sale price or service adequately covers costs, then strong market demand, as evidenced by market pretesting results, orders in-hand or sales projection studies, serves to assure that a brisk volume of business, generating satisfactory earnings, is likely. These considerations may be necessary in cases of business start-ups where there is little or no past record to evaluate.

In cases where a past record of financial status exists, the SBA would be directed to evaluate it as one factor among others to be considered, keeping in mind that it is the intent of the committee that the SBA make sound loans to such small businesses involved in these energy fields with far greater frequency than it did under the regular business loan program.

DEFINITIONS

The term "energy conservation measures" draws its meaning from the Department of Energy's energy conservation measures list mentioned above, and from state energy conservation plans which have been approved.

The term "active or passive solar energy equipment" expressly would include but not be limited to solar hot water and air conditioning systems, equipment to store from such systems, solar photovoltaic systems, and in addition, other equipment which the SBA Administrator, working with the Secretary of the Department of Energy pursuant to the Memorandum of Understanding of June 23, 1976, and the Interagency Agreement of September 29, 1977, may prescribe.

Definition of the term "renewable energy sources equipment" would be left solely to the SBA Administrator, who again would be encouraged to work with the Department of Energy.

AUTHORIZATIONS

The bill would provide for financing of loans from the business loan and investment fund at program levels not to exceed $30 million for direct and immediate participation loans and $45 million for deferred participation or guaranteed loans in fiscal year 1979.

The total SBA authorization for appropriation would be increased by $36.75 million with $30 million for the direct and immediate participation loan programs and $6.75 million for deferred participation or guaranteed loan programs to cover loss rates up to 15 percent of the program level authorization.

GRANTS FOR TRAINING

The bill would authorize SBA to make grants to organizations to assist in educating small businesses in these energy fields. It is anticipated that these funds will be made available through the $60 million small business development center management assistance program contained in H.R. 11445 passed by the House on April 10, 1978. Hence, no new funds are authorized for this section.

These training seminars would be for the purpose of training small business persons in these energy fields, increasing their competence to deal effectively and profitably with these new, emerging technologies.

COST-SHARING FOR TECHNICAL MANUALS

The bill would authorize use of funds under section 8 of the Small Business Act to provide small business persons with technical manuals on subjects related to these emerging technologies at 50-percent cost.

The manuals are intended to be provided for the purpose of increasing the quality of a product or service related to these emerging technologies and educating the business person in the technical aspects of their design, manufacture, installation, or servicing.

CONCLUSION

The bill is the result of extensive hearings conducted by your committee's Subcommittee on Energy, Environment, Safety and Research over a 10-month period in the 95th Congress. It was considered by your com-

mittee and by a vote of 27 yeas, 2 nays, 1 present, was ordered favorably reported, as amended, with dissenting views.

Your committee concludes that solar energy has developed to a sufficient extent as to be both practically and economically feasible in some areas of the United States as an alternative to other energy sources either as a primary or secondary system. Small firms in the solar industry, either existing or potential, are severely hampered due to a lack of access to equity capital as are small firms in other industries.

Your committee believes that establishment of a separate SBA loan program for small businesses is urgently needed if such firms are to participate in the solar energy and energy conservation fields. The committee recognizes that initially there may be a greater risk of loss in making this type of loan but it believes that a somewhat higher risk is justified when coupled with the restrictions and safeguards provided in the bill.

Mr. Speaker, I strongly urge my colleagues to support this important piece of legislation.●

● Mr. DRINAN. Mr. Speaker, I rise in strong and enthusiastic support of H.R. 11713, establishing a solar and renewable energy sources loan program within the Small Business Administration (SBA).

I was an early sponsor of the legislation before us, and a member of the informal solar coalition which helped generate widespread congressional support for the bill. Last July, I joined the author of the bill, the gentleman from Iowa (Mr. BEDELL), in testifying in favor of his proposal before the House Small Business Subcommittee on Energy, Environment, Safety and Research.

As I stated in last year's testimony to the subcommittee, Congress is faced with a unique opportunity to determine the structure and level of competition within our embryonic solar and renewable energy industry. It was plainly apparent in the 8 days of hearings conducted by the subcommittee that the Federal Government's performance in assuring small business participation in solar development—ranging from the Department of Energy's contracting practices to the business loan policy of the SBA—has been woefully inadequate.

Mr. Speaker, the risk of economic concentration within our emerging national solar energy industry has become all too apparent. In my view, a large part of the American public's overwhelming interest in solar heating and renewable energy sources is the prospect of greater local self-reliance in the production and utilization of energy. This level of independence can only be achieved, however, when small, local firms have the technology and the experience necessary to successfully market, install and service solar equipment. We cannot offer assurances of such a decentralized solar industry under current Federal policy.

H.R. 11713 is a workable response to this problem in several basic respects. First, the bill liberalizes SBA business loan rules with respect to solar energy. to reflect the somewhat above-average risks inherent in the solar industry's early stages of development. Second, the bill requires, as a precondition special Federal startup assistance for small solar and renewable energy firms, that adequate financing assistance not be available from other sources at reasonable rates. Third, H.R. 11713 establishes sound financial, technical and marketing criteria by which SBA can properly evaluate the merits of individual applicants. Finally, the bill requires 10 percent equity on insured loans, to insure that small businesses receiving Federal assistance are confident enough of their products and services to risk a significant amount of their own capital.

Mr. Speaker, I highly commend Messrs. BEDELL and BALDUS for their excellent efforts in refining H.R. 11713 and bringing it to the House floor, and urge my colleagues to grant their their full support to this modest, but vitally needed legislation.●

GENERAL LEAVE

Mr. SMITH of Iowa. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and to include extraneous matter on the bill now under consideration.

The SPEAKER pro tempore (Mr. ROBERTS). Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. SMITH of Iowa. Mr. Speaker, this bill was reported out of the committee by a vote of 27 to 2. I urge passage of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Iowa (Mr. SMITH) that the House suspend the rules and pass the bill H.R. 11713, as amended.

The question was taken.

Mr. BUTLER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 3, rule XXVII, and the Chair's prior announcement, further proceedings on this motion will be postponed.

WATER RIGHTS FOR AK-CHIN INDIANS

Mr. RONCALIO. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 8099) relating to the settlement between the United States and the Ak-Chin Indian community of certain water right claims of such community against the United States, as amended.

The Clerk read as follows:

H.R. 8099

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Congress hereby declares that it is the policy of Congress to resolve, without costly and lengthy litigation, the claims of the Ak-Chin Indian community for water based upon failure of the United States to meet its trust responsibility to the Indian people provided reasonable settlement can be reached.

(b) The Congress hereby finds and declares that—

(1) the Ak-Chin Indian community relies for its economic sustenance on farming, and that ground water, necessary thereto, is declining at a rate which will make it uneconomical to farm within the next few years;

(2) at the time of the settlement of the reservation, it was the obligation and intention of the United States to provide water to the Ak-Chin Indian Reservation, and such obligation remains unfulfilled;

(3) it is likely that the United States would be held liable for its failure to provide water and for allowing ground water beneath the reservation to be mined;

(4) there exists a critical situation at Ak-Chin in that there is not sufficient economically recoverable ground water beneath the reservation to sustain a farming operation until a permanent source of water suitable for irrigation on the reservation can be delivered;

(5) this Act is proposed to settle the Ak-Chin Indian Community's claim for water by meeting the emergency needs of the Ak-Chin community through construction of a well field and water delivery system from nearby Federal lands and by obligating the United States to meet the Ak-Chin community's needs for a permanent supply of water in a fixed amount to be available upon a date certain, in exchange for a release of all claims such community has against the United States for failing to act consistently with its trust responsibility to protect and deliver the water resources of the community; and

(6) it is the intention of this Act not to discriminate against any non-Indian landowners or other persons, but to fulfill the historic and legal obligation of the United States toward the Ak-Chin Indian community.

SEC. 2. (a) For the purposes of this Act, the Secretary of the Interior (hereinafter referred to as the "Secretary") shall undertake engineering and hydrological studies as may be necessary to determine whether there exists, on Federal lands near the Ak-Chin Indian Reservation, a source of ground water which could be taken, on an annual basis, for use in connection with any contract entered into pursuant to subsection (b) of this section, subject to the provisions in (c) (2). Such studies shall be completed and a report with respect thereto submitted to the Congress within twelve months after the date of the enactment of this Act.

(b) Within one hundred and eighty days following the submission to the Congress of the report referred to in subsection (a), the Secretary, if he determines that there exists a source of ground water which can be so taken on an annual basis, shall enter into a contract or other agreement with the Ak-Chin Indian community pursuant to which the Secretary shall agree, on behalf of the United States, to—

(1) furnish, subject to the provisions of clause (2) of subsection (c) of this section, to the Ak-Chin Indian community, commencing within sixty days following the completion of the necessary facilities under clause (2) of this subsection but in no event later than four years from the date of said contract, the delivery to the southeast corner of the lands comprising the Ak-Chin Indian Reservation, on an annual basis, of eighty-five thousand acre feet of ground water from nearby Federal lands covered by such studies;

(2) take such action as may be necessary to begin within sixty days following the date of such contract, to drill, construct, equip, maintain, repair, reconstruct, and operate a well field on such Federal land; and to construct and maintain a delivery system, including canals, pumping stations and other appurtenant works, sufficient to provide for the delivery of such ground water from such Federal lands to the southeast corner of the lands comprising the Ak-Chin Indian Reservation.

(c) (1) The delivery of ground water under clause (1) of subsection (b) shall continue until augmented or replaced by the permanent water supply required under section (3) to be delivered to the Ak-Chin Indian Reservation, except that the obligation to deliver

ground water during any year shall be reduced for that year by an amount equal to the amount of surface water delivered to such community pursuant to such contract during such year.

(2) Notwithstanding the provisions of clause (1) of subsection (b) of this section, the Secretary, if he determines that pumping eighty-five thousand acre feet of ground water annually from nearby Federal lands to the Ak-Chin community would (a) not be hydrologically feasible or (b) diminish the ground water supply in the basin and thereby cause severe damage to other water users; may deliver a lesser amount.

(d) The Secretary is authorized to receive, consider, and pay any claims arising under this Act from water users other than the Ak-Chin Indian community for compensation for any losses or other expenses incurred by such users by reason of the enactment of this Act or actions taken thereunder.

(e) Notwithstanding any other provision of this Act, if the Secretary determines, on the basis of studies conducted pursuant to subsection (a) of this section, that the pumping on an annual basis of any such ground water pursuant to clause (1) of subsection (b) of this section in excess of sixty thousand acre feet is not possible by reason of clause (2) of subsection (c), and the Ak-Chin Indian community does not agree to contract for a lesser amount, the Secretary shall report to the Congress an alternative plan for meeting the emergency needs of the Ak-Chin Indian community. Such alternative plan shall be submitted to the Congress within one hundred and eighty days following the submission of the report referred to in subsection (a).

SEC. 3. In addition, and as a part of the contract referred to in section 2(b) of this Act, the Secretary shall provide for, commencing as soon as possible, but in no event later than the expiration of the twenty-five-year period following the date of the enactment of this Act, the permanent delivery, on an annual basis, to the lands comprising the Ak-Chin Indian Reservation, of eighty-five thousand acre feet of water suitable for irrigation on the reservation.

SEC. 4. (a) As consideration on the part of the Ak-Chin Indian community for entering into any contract or agreement pursuant to section 2(b), the Ak-Chin Indian community shall agree to waive, in a manner satisfactory to the Secretary, any and all claims of water rights or injuries to water rights of the Ak-Chin Indian community, including both ground water and surface water from time immemorial to the present, which it might have against the United States, the State of Arizona or agency thereof, or any other person, corporation, or municipal corporation, arising under the laws of the United States or the State of Arizona.

(b) As further consideration on the part of the Ak-Chin Indian community for entering into any contract or other agreement pursuant to section 2(b), the Ak-Chin Indian community shall agree to waive any and all claims of water rights or injuries to water rights, including both ground water and surface water, arising under the laws of the United States or the State of Arizona, which it might have in the future against any person, corporation, municipal corporation, or the State of Arizona or agency thereof.

(c) Notwithstanding the provisions of subsections (a) and (b) of this section, the community will not thereby waive any claims against the United States for breach, if any, of the contract referred to in section 2(b) of this Act. A failure to deliver water within the times specified in either sections 2(b) or 3 shall be deemed a breach of the contract. The measure of damages for any such breach shall be the replacement cost of water not delivered by the United States.

SEC. 5. There are authorized to be appropriated for the fiscal year ending September 30, 1979, the sum of $500,000, and the aggregate sum of $42,500,000 to be appropriated prior to the fiscal year ending September 30, 1983, for carrying out the purposes of section 2 of this Act. Notwithstanding any other provisions of this Act, no authorization to make payments under this Act, or to enter into contracts, shall be effective except to such extent or in such amounts as are provided in advance in appropriations Acts.

The SPEAKER pro tempore. Is a second demanded?

Mr. CUNNINGHAM. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Wyoming (Mr. RONCALIO) and the gentleman from Washington (Mr. CUNNINGHAM) will be recognized for 20 minutes each.

The Chair recognizes the gentleman from Wyoming (Mr. RONCALIO).

Mr. RONCALIO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 8099 settles the water rights claims of the Ak-Chin Indian Community of Arizona and makes provisions for meeting their temporary and permanent water needs.

The committee report explains the background and justification for this bill in some detail and I will be brief.

The Ak-Chin Indians have substantial, valid claims to the use of water based upon the decision of the Supreme Court in Winters against United States and in subsequent Federal case law.

In general, the so-called Winters doctrine holds that an Indian tribe has a prior and paramount right to the use of water for the purposes of their reservation and that this right dates, in time, from the date of the establishment of the reservation. The right is inchoate in nature and is not lost by nonuse or the passage of time. While the law is unclear as to the exact method of measurement of this right, the Supreme Court has held that one measure is the amount of water necessary to irrigate all the practicably irrigable acres of the reservation.

The United States recognized that right when it created the Ak-Chin Reservation in 1912, by filing notices of appropriation of 70,000 acre-feet of water per annum on behalf of the tribe. The United States has subsequently completely failed to secure that entitlement for the tribe.

Mr. Speaker, it is a long-sought goal for Indian tribes to become self-sufficient through the development of their own natural and human resources and to become independent of Federal appropriations for their benefit.

Through the irrigation of only 5,000 acres of their 20,000 acre reservation, the Ak-Chin have nearly achieved that status. However, this newly won independence faces imminent ruin. Concentrated, severe pumping of groundwater by non-Indian irrigators surrounding the reservation has drastically lowered the water table on the reservation. Within 5 years, it will no longer be economically feasible for the tribe to continue farming.

Mr. Speaker, the tribe has substantial claims arising from the right to the use of water. Their claims against the United States, for default on its trust responsibility, could well run into the millions of dollars.

The United States is prepared to file suit, on behalf of the tribe, against over 200 non-Indian water users for money damages and for an injunction to enjoin further pumping detrimental to the tribe. These suits will have a chilling, disastrous effect on the society and economy of that local community.

It is the purpose of this bill to avoid the chaos such litigation would bring and to provide for the water needs of the Ak-Chin Tribe.

In brief, the bill authorizes the Secretary of the Interior, if he deems it feasible, to enter into an agreement with the Ak-Chin Tribe to provide the tribe with a temporary and a permanent supply of water. The emergency, temporary water supply is to be provided by the Secretary through the development of a water field on adjacent Federal lands and through the construction of a pipeline to deliver the water to the reservation. The permanent supply is to be provided by the Secretary from any available sources.

In return for this agreement, the tribe will agree to waive all of its claims against the United States, the State of Arizona, and all other non-Indian water users.

I realize that some Members are concerned about the cost of this bill as compared with the relatively few members of the Ak-Chin Tribe. While understandable, that view is shortsighted.

The United States will benefit by avoiding possibly costly damage claims and by avoiding the members of the tribe again becoming dependent on the Federal taxpayer.

The State and the local, non-Indian water users will benefit by avoiding the debilitating litigation and the considerable economic threat to the stability of the community.

The tribe will benefit by securing the water necessary to their continued progress toward tribal self-sufficiency and economic independence.

Mr. Speaker, I urge passage of the bill, as amended.

Mr. UDALL. Mr. Speaker, H.R. 8099 authorizes the settlement of the water rights claims of the Ak-Chin Indian community in Arizona.

The Ak-Chin Community is a small Indian Tribe of Papago and Pima Indians residing on a 22,000-acre reservation about 30 miles south of Phoenix, Ariz. The tribe is comprised of about 350 members.

The reservation was established by Executive order in 1912. At that time, the United States filed notices of appropriation of 70,000 acre feet of water annually on behalf of the community for irrigation purposes. No further action was taken by the United States to secure that right for the tribe. All surface water which was once available to the reser-

vation has since been diverted or otherwise appropriated, leaving the tribe dependent on ground water.

From 1912 until 1946, there was little farming development on the reservation. However, beginning in 1946, 10,000 acres of the land was leased to non-Indians for irrigation purposes with little economic return to the community. At that time, the ground water table was at 50 feet and water was readily available for irrigation.

Beginning in 1960, the tribe canceled or refused to renew these leases and began its own farming operation. This enterprise has been outstandingly successful and the tribe has achieved substantial independence from Federal appropriations.

But the tribe's newly won economic independence is immediately threatened with destruction. Heavy mining of the water by the Maricopa-Stanfield irrigation project which surrounds the reservation has lowered the water table to below 400 feet. It is estimated that within 5 years, it will no longer be economical for the tribe to pump water for irrigation and they will once again become a taxpayer's burden.

The tribe is not without the means of relief for this situation.

They have a potentially damaging claim against the United States for its failure, as trustee, to preserve and protect the tribes water rights.

They also have similar damage claims against the surrounding non-Indian water users for pumping ground water detrimental to the tribe's rights and interests. In addition, they have the basis for requesting an injunction against any further pumping by the non-Indians.

Mr. Speaker, such law suits will create havoc and chaos in the economy of this part of Arizona and will pit neighbor against neighbor in racial strife.

This volatile situation must be avoided and H.R. 8099 seeks to do so.

There are those who ask why the United States must bear the burden of settling this dispute. First, the United States defaulted on its trust responsibility to this tribe to secure and protect their right to the use of water and now may well be subject to a costly damage suit by the tribe.

Second, the United States has a legal and moral responsibility to aid this tribe in achieving economic and social self-sufficiency. With little help from the United States, the tribe has done so and now face ruin. It is in the interests of the United States to avoid having these people once again become a charge on the U.S. Treasury.

Finally, through default on its trust obligation to the Ak-Chin Tribe and through other actions, the United States has encouraged and permitted a substantial non-Indian economic community to develop through the use of waters which the Ak-Chin claim.

Mr. Speaker, I would like to make one final comment. I am not unaware of a growing mood in the House against Indian legislation. This mood grows out of a reaction of the non-Indian public to the assertion of rights and claims by Indian tribes.

It is disturbing and disappointing to me that a vote will be cast against a bill not because it is a bad bill, but because it is an Indian bill.

These are not rights or claims created out of whole cloth. These are not rights and claims which are based upon the Indians' law or which grow out of the barrel of a gun.

They are rights and claims which are based upon our laws—on the Constitution and on the promises made and obligations assumed by the United States in Federal treaties and laws. We have incurred longstanding obligations to the Indian tribes and they are now asking that those obligations be met. That the payment of these debts may be costly to us is only a result of our long delay in paying them.

There are those of us who would avoid the payment of these debts by saying that Indians should be free, equal citizens and should not be the beneficiaries of special privilege and rights. I would answer in the words of Felix S. Cohen, a noted scholar of Indian law, history and philosophy in the Roosevelt years. He said:

> If the would be grafters and despoilers of Indian wealth can give (Indian rights) a bad enough name, by stressing the alleged incompatibility of these institutions with full citizenship, then they can claim a high moral purpose in stripping the Indian of the protections which the law affords him and in despoiling him of the property which the law now protects. And all history shows that plunder, to be successful on a large scale, must be able to point to a high moral purpose.

Mr. Speaker, I urge enactment of the bill.

Mr. RUDD. Mr. Speaker, will the gentleman yield?

Mr. UDALL. I yield to the gentleman from Arizona (Mr. RUDD.)

Mr. RUDD. Mr. Speaker, I would like to ask the gentleman from Arizona (Mr. UDALL) a question.

This bill contemplates the establishment of a permanent supply of water for the Ak-Chin Indian Reservation.

The committee report, on page 6, sets out that the permanent supply of water will be composed of certain sources, including so-called additional waters from other sources.

My question is whether or not these "other sources" could include vested water rights of other water users in the State?

Mr. UDALL. This bill does indeed anticipate a permanent and lasting solution to the water and economic needs of the Ak-Chin community. It is definitely not intended that the legally vested water rights of other parties will be taken by the United States to satisfy the permanent needs of the Ak-Chin community.

Mr. RUDD. Mr. Speaker, I thank the gentleman from Arizona (Mr. UDALL) for yielding.

Mr. COHEN. Mr. Speaker, will the gentleman yield?

Mr. UDALL. I yield to the gentleman from Maine.

Mr. COHEN. The Senate Select Committee on Indian Affairs states on page 3 of its report on this legislation that—

> ...S. 1582 is a statement of the Ak Chin water entitlement and the government's obligation to fulfill that entitlement.

Why is such a legislative statement necessary at this time?

Mr. UDALL. The ultimate purpose of the lawsuit which the Department of Justice is preparing to file against the 200 non-Indian defendants is to quantify the water rights of the Ak-Chin Indian community. Since we are legislatively resolving this matter and taking the case out of court, a statement by the Congress as to Ak-Chin's entitlement is necessary and proper.

A statement that the Government is obligated to fulfill that entitlement is also necessary and proper. Under the terms of the bill, the tribe is giving up very valid and substantial claims against the United States, the State of Arizona, and the non-Indians in order to secure water. There can be no question that the Government is committed to deliver water—for which Ak-Chin has paid by waiving these potentially costly claims—in the quantity provided for in the bill.

Mr. COHEN. If this legislation is enacted, would the Ak-Chin Tribe or its members ever be able to assert legal claims for water under the rule of the Winters case at some later date?

Mr. UDALL. No; the practical effect of this bill is to waive the Ak-Chin Tribe's Winter's right and substitute a contractual right. Legal claims for water which the Ak-Chin might advance in the future would occur only if the United States fails to keep its part of the contract. In that case, the claims would be based on a breach of contract and not on the Winter's doctrine.

Mr. COHEN. What is likely to occur if this legislation is not enacted?

Mr. UDALL. H.R. 8099 is needed as a legislative settlement to avoid the costly social and economic disruption of litigation. The Department of the Interior has requested the Department of Justice to institute litigation by the United States on behalf of the Ak-Chin Indian community. Approximately 200 defendants have been identified in that action. If the litigation were to proceed, potentially all non-Indian pumping would be enjoined without compensation. The catastrophic economic consequences on the non-Indian farmer with no water or compensation would reverberate throughout the area. Defaults on loans and other obligations would create economic instability. Even if the tribe were not to prevail, the litigation could take years, during which time all land having water rights would have a clouded title. Banks might be reluctant to capitalize development proposals. In an area where racial tensions are already high, litigation might increase racial animosity. All of these adverse effects would be avoided by enacting H.R. 8099.

Mr. COHEN. If enacted, would this legislation provide the Ak-Chin with a status to bring legal action for water rights, mineral rights, land rights, or any other rights that are not now available to the Ak-Chin or individual Indians of the Ak-Chin Tribe?

Mr. UDALL. No; except for the fact that the bill may result in a substitution

of a contractual water right for the Ak-Chin in place of a Winter's doctrine right, the bill confers no new rights on the tribe.

Mr. COHEN. I am advised that the administration opposes this legislation and that the Office of Management and Budget, the Department of the Interior, and the Department of Justice have testified or have submitted written testimony in opposition to the bill as presently written. To what in the bill does OMB, Justice, and Interior object and how does the committee respond to these objections?

Mr. UDALL. While the administration does oppose the bill as introduced, it does support the concept of a legislation solution to the Ak-Chin water claims.

The administration opposed the bill on the grounds that a feasibility study should be authorized and completed on the construction of the water field and delivery system before any construction is authorized.

The committee agreed that a feasibility study was necessary, but also felt that the emergency water needs of the tribe would not admit of any legislative delay.

As reported, the bill reaches a compromise on this matter. The bill requires that a feasibility study be made. If the study shows that sufficient water is available, the Secretary of the Interior is directed to enter into the agreement with the tribe. If not, the Secretary must report to the Congress and make recommendations for alternative means of meeting the tribe's water needs.

Mr. COHEN. The Solicitor of the Department of the Interior, in a letter to the chairman of the committee, dated September 20, 1977, stated his Department's opposition to this legislation, but emphasized that the Department supports the concept of a legislative settlement of the water claims of five central Arizona Indian tribes—including those of Ak-Chin—in a comprehensive settlement bill. The Solicitor noted that the Department is working diligently on the drafting of such a measure. My question is this: Will the enactment of this bill jeopardize efforts to comprehensively settle these other four claims?

Mr. UDALL. The Department did, originally, oppose the Ak-Chin bill on the grounds that the solution of their claims should be a part of an overall settlement of the water claims of the five central Arizona tribes. The committee rejected this as being impracticable and unrealistic.

The Department has since come around to this viewpoint. In a letter to Senator ABOUREZK of March 24, 1978, Interior Solicitor Krulitz states:

> A single bill . . . is not the way to go. Everyone now agrees that it makes more sense to proceed to work out solutions tribe by tribe.

Mr. COHEN. Mr. Speaker, I thank the gentleman from Arizona for yielding.

Mr. Speaker, the gentleman from Arizona knows there is a lawsuit which may be filed against the State of Maine which involves the same essential principles, that is the threat of tremendous social disruption, economic chaos, and severe restriction of our economy.

I just want to point out that here the Federal Government has measured up to its obligations by accepting the full responsibility for this claim and yet in the case involving the State of Maine the Federal Government through a White House task force has sought to shift the burden to the State of Maine and to a number of large land owners.

I would simply hope that if and when legislation is filed by the White House before the committee that it would extend the same evenhanded approach to the State of Maine and have the Federal Government assume the full responsibility, because it has that full responsibility in my opinion.

Mr. UDALL. Mr. Speaker, I understand the concern of the gentleman from Maine (Mr. COHEN) and we will work with the gentleman and his delegation to try to find the answers.

Mr. CUNNINGHAM. Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. DON H. CLAUSEN).

Mr. DON H. CLAUSEN. Mr. Speaker, I rise in strong support of H.R. 8099.

The need for this legislation arises from the failure of the United States to act on its own stated intention to secure an adequate supply of water for the Ak-Chin Reservation at the time of its creation in 1912. This failure was compounded by inaction in view of the fact that pumping by non-Indian irrigators of ground water from under the reservation was rapidly lowering the water table. The water table, which in 1946 was approximately 40 feet below the surface, is now between 400 and 500 feet and is going down at approximately 20 feet per year. Ground water is the sole source of water for the tribe's successful farming enterprise. If pumping continues at its present rate, the Ak-Chin will be forced out of business in 5 to 8 years. Their tribal enterprise, which can be said to epitomize what is meant by Indian self-determination, would be replaced by the Federal dole.

The Department of Justice is now preparing to file an action against some 200 non-Indian defendants which would enjoin further pumping while litigation to quantify the Ak-Chin water rights goes forward. It is the cost of this litigation and the adverse economic and social consequences which it would entail that H.R. 8099 is designed to avoid.

The proposed settlement is fairly simple. In exchange for the waiver of all its past, present, and future water claims against the United States and the State of Arizona and their neighboring non-Indian irrigators, the Ak-Chin will receive the commitment of the United States to deliver water in the manner and quantity specified in the bill. The cost to the United States of providing this water to the tribe will be high. H.R. 8099 authorizes $43 million for construction of a well field and delivery system. However, this figure is not unreasonable when compared with the potential direct and indirect costs to the United States and other defendants if the Ak-Chin claims were fully litigated.

I believe there is a consensus of those who have been involved with these Indian claims that attempts to achieve comprehensive, across-the-board settlements are unrealistic and impractical. The administration has endorsed a policy of seeking solutions on a case-by-case basis. It is the position of the Interior Committee, and of our colleagues in the other body, who passed a similar Ak-Chin bill by unanimous consent, that out-of-court solutions are the most equitable and workable. The settlement in H.R. 8099 is fair and practical and its cost is not unreasonable. I therefore strongly urge the House to accept it.

Mr. UDALL. Mr. Speaker, I have no further requests for time on our side.

Mr. CUNNINGHAM. Mr. Speaker, I yield myself 5 minutes.

Mr. Speaker, it is with regret that I rise in opposition to the bill because I have the highest respect for the sponsors of the bill and those who are directly involved with the problem. We have just heard someone say that if this bill is not passed that these industrious—and they are very industrious, group of Indians, who have an income that is above the average—will cease to be self-sufficient. About 330 Indians are farming some 5,000 acres of land and they are receiving an income of about $1 million a year, and, as I said, we have heard it mentioned that if this bill is not passed that 5 to 8 years from now they will be put out of business. I would take exception to that on the basis that already within the allocation for the five tribes for the central Arizona project, they are guaranteed for the first 20 years of that project, 58,300 acre-feet of water.

After that first 20-year period they are also entitled as one of the five tribes to either 10 percent of all of the water in the Arizona project or 20 percent of the agricultural allowance, whichever is greater.

It is interesting to note that the U.S. Government has recently just spent $100 million to take out of production 5,000 acres of citrus bearing land in the State of Arizona because it was called poor use of water in that it had a soil classification of 3. There are 5,000 acres within this reservation presently being farmed and nowhere in the report and from no source, have I been able to find, from a good farm management and water management point of view, what the soil classification makeup for that land is.

The other thing that is interesting is these 21,000 acres of reservation were assigned by executive order. These are not treaty rights, and they are totally surrounded by a presently existing irrigation district. Admittedly, all of the neighbors farming the 100-some thousand acres around them are having to pump water harder and go deeper at a greater cost, but these are also U.S. citizens, and that is where I take real exception to this bill because we are asking taxpayers, recognized citizens, to spend $42 million to provide temporary water, not necessarily proven needed yet, for the benefit of 338 reservation members. And why? Because they are holding an alleged gun to our heads, threatening judicial action. I, for one, do not like everything

the courts do, but I am not afraid to go to the courts.

I would hope in all earnestness that we take a good look at this bill, and if in the Members' wisdom they still decide that it is needed, then bring it up either on a Private Calendar or bring it up on general floor debate, but not under a suspension.

Mr. Speaker, I yield 3 minutes to the gentleman from Arizona (Mr. RUDD).

Mr. RUDD. Mr. Speaker, I rise in support of suspending the rules and passing H.R. 8099.

The Ak-Chin Indian community deserves the highest praise. They have made great efforts and achieved much success towards their own self-sufficiency. I believe that the people of Arizona and the Nation want to do what is necessary and right to encourage and continue such self-sufficiency.

However, the achievements of the Ak-Chin, as well as the achievements of non-Indian citizens of the area who developed their lands with hard-earned dollars, are now threatened.

The Ak-Chin have a critical need for a temporary supply of water until a permanent supply is available.

H.R. 8099 will provide the temporary water supply. It also provides the means to make available a permanent supply of water to the Ak-Chin.

Furthermore, this bill will also resolve the conflicting water claims of the Indians and the adjacent non-Indian community.

These conflicts result from a failure of the U.S. Government to perform its duties and responsibilities as required by law to provide a water supply for the Indians.

This bill will settle the conflict over water rights for Indian and non-Indian citizens of the area, allowing them to go forward with their lives without protracted and costly litigation of the issues involved, which would occur without this legislation.

Mr. Speaker, I urge my colleagues to vote in favor of suspending the rules and passage of H.R. 8099.

Mr. DON H. CLAUSEN. Mr. Speaker, will the gentleman yield?

Mr. RUDD. I yield to the gentleman from California.

Mr. DON H. CLAUSEN. I thank the gentleman for yielding.

Discussing the Ak-Chin Indian community and the pending measure before us, it is my understanding that this is all within the confines of the district of the gentleman from Arizona (Mr. RUDD); is this correct?

Mr. RUDD. In response to the gentleman from California, that is correct. This community is within the boundaries of District 4 in Arizona which I am very proud to represent.

Mr. DON H. CLAUSEN. I thank the gentleman.

Mr. RUDD. Mr. Speaker, I yield back the remainder of my time.

Mr. RONCALIO. Mr. Speaker, I yield 1 minute to the gentleman from Arizona (Mr. UDALL).

Mr. UDALL. Mr. Speaker, subsection 2(e) provides that, if the Secretary determines from the feasibility study that it is not feasible to provide the water contemplated in section 2, he shall report to Congress with recommendation for meeting the emergency needs of the Ak-Chin Indian community.

I have been advised that some people in the Solicitor's Office in Interior are reading that language to mean that the Secretary could recommend food stamps for the community or some other handout.

Ak-Chin wants water, not food stamps or handouts.

For the record, it is and was the intent of the committee that the cited language would require the Secretary to recommend alternative means of meeting the emergency water needs of the community.

Mr. CUNNINGHAM. Mr. Speaker, I yield myself such time as I may use.

Mr. Speaker, we have a Constitution that says we have no special class of citizens, that we are all equal. It is interesting to know that under the allocation procedure for the central Arizona project that if you presently are drawing ground water, for every acre foot of water you now take from the central Arizona project, you must give up the right to draw an equivalent amount of ground water. That is not true in this instance. There are four other tribes that have the right to 257,000 acre-feet of water already within the allocation.

My concern is that Congress is tinkering around with a very patchwork approach as to how to best resolve a confirmation of the constitutional values in this country that say we are equal and we have equal opportunity.

My interest stems not from a concern to meddle in the specific problem of the gentleman from Arizona (Mr. RUDD), but after watching what has happened in my own State of Washington where we have through a judicial ruling trying to interpret the words, "in common use", a Federal judge coming out defining that as 50 percent and, as a result in the State of Washington, we today have 2 percent of the population awarded 50 percent of a State asset, in this case, fish.

We have seen the tragedy of one U.S. marshal shooting one U.S. citizen so another U.S. citizen can exercise by judicial ruling a special privilege.

We are seeing further erosions of constitutional justice. In our State we are now seeing formerly owned treaty land which has been sold and recorded within the community of Tacoma, where the tribe is now saying they have the right to determine land use planning and zoning qualifications.

We have seen on our freeways State land that now runs through former reservation lands, being suggested that the Indians have the right to patrol that and arrest U.S. citizens as they drive, instead of the Washington State Patrol.

The problem is not one of anti-Indian. The problem is this country has never had a treaty with its own citizens. The problem is that through judicial interpretation, because the Yakima Tribe has, for instance, not the fishing right, but they have the right to use in common our highways. The white line that goes down the center of the Washington State freeways does not delineate treaty from nontreaty Indian vehicular traffic.

So, Mr. Speaker, with the greatest of appreciation for what the Ak Chin Indians have, I see no reason why Congress today should continue to patchwork what is eventually going to take congressional action to solve the entire problem and to reconfirm the individual rights that we all have, rather than going ahead identifying in a specific interest or situation that we have a problem and then throwing a wad of money at it.

Mr. Speaker, I would in all sincerity and most respectfully ask that the Members think very carefully about voting and reconfirming a special right for one class of U.S. citizens over another, because this bill, while it does authorize $43 million for the seeking of temporary water, should it be determined to be needed, also authorizes the Secretary to pay anyone off the reservation for damages that might be incurred in going ahead and pumping deep-well water.

Mr. Speaker, I have no further requests for time, and I reserve the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Wyoming (Mr. RONCALIO) that the House suspend the rules and pass the bill H.R. 8099, as amended.

The question was taken.

Mr. MOTTL. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 3 of rule XXVII and the Chair's prior announcement, further proceedings on this motion will be postponed.

SECURITIES INVESTOR PROTECTION ACT AMENDMENTS OF 1977

Mr. ECKHARDT. Mr. Speaker, I move to suspend the rules and agree to the resolution (H. Res. 1158) to provide that the bill (H.R. 8331) to amend the Securities Investor Protection Act of 1970, with the Senate amendments thereto, be taken from the Speaker's table, and that the Senate amendments be agreed to with an amendment.

The Clerk read as follows:

H. RES. 1158

Resolved, That upon the adoption of this resolution, the bill (H.R. 8331) to amend the Securities Investor Protection Act of 1970, with the Senate amendments thereto, be, and the same is hereby, taken from the Speaker's table to the end that (1) the Senate amendments numbered 1 through 7 be, and the same are hereby, agreed to, (2) the Senate amendment numbered 8 be, and the same is hereby, disagreed to, and (3) the Senate amendment numbered 9 be, and the same is hereby, agreed to with an amendment as follows:

Strike out the matter proposed to be inserted by Senate amendment numbered 9 and insert in lieu thereof the following:

AMENDMENT TO THE SECURITIES EXCHANGE ACT OF 1934

SEC. 18. (a) Section 11(a)(3) of the Securities Exchange Act of 1934 (15 U.S.C. 78k(a)(3)) is amended by striking out "May 1, 1975" and inserting in lieu thereof "Febru-

ary 1, 1978" and by striking out "May 1, 1978" each place it appears and inserting in lieu thereof "May 1, 1979".

(b) The amendment made by subsection (a) of this section shall be effective as of May 1, 1978.

SEC. 2. The House insists upon its disagreement to Senate amendment numbered 8, insists upon its amendment to Senate amendment numbered 9, and requests a conference with the Senate on Senate amendments numbered 8 and 9.

The SPEAKER. Is a second demanded?

Mr. BROYHILL. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Texas (Mr. ECKHARDT) will be recognized for 20 minutes, and the gentleman from North Carolina (Mr. BROYHILL) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Texas (Mr. ECKHARDT).

Mr. ECKHARDT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the resolution before the House would do four things. First, it would approve H.R. 8331, the Securities Investor Protection Act of 1977, along with seven technical amendments to that act added by the Senate. H.R. 8331 which originally passed the House under suspension of the rules on November 1, 1977, amends the Securities Investor Protection Act of 1970 by streamlining broker-dealer liquidation procedures, providing for more equitable treatment of customers of insolvent broker-dealers, and doubling the insurance for customer cash and securities maintained with a brokerage firm to $40,000 and $100,000, respectively.

Second, the resolution provides for disagreement with Senate amendment No. 8 amending section 3(b) of the Securities Act of 1933. That Senate amendment if adopted would allow the Securities and Exchange Commission to raise its regulation A exemption from $500,000 to $2.5 million. This provision, although supported by the SEC and the business community, has not been considered by the House or, indeed, by the Senate. Accordingly, it would seem prudent to disagree with the amendment at this time and to consider it again during our conference with the Senate.

Third, the resolution amends Senate amendment No. 9 which extends for 6 months, from May 1, 1978, to November 1, 1978 the effective date of section 11(a) of the Securities Exchange Act of 1934. The resolution before us would increase that delay until May 1, 1979, a period of 1 year.

Section 11(a) makes it unlawful for any member of a national securities exchange to effect any transaction on such exchange for, basically, an account for which the member makes investment decisions. As my colleagues will recall, the House granted an 18-month delay for section 11(a) by voice vote on April 4, 1978, in H.R. 11567. A 1-year delay, of course, is a compromise between the delays already granted by both Houses.

Fourth, the resolution provides that the effective date of the section 11(a) extension is May 1, 1979. Yesterday, May 1, 1978, section 11(a) became effective for all brokerage firms and it will probably be a number of days until a delay is enacted. In the meantime, the activities of some brokerage firms and other persons may be violating the provisions of 11(a). By specifying May 1, 1978, as the effective date of the extension, the resolution makes clear that such activities between May 1, 1978, and the date of enactment are not to be deemed unlawful.

The amendments to the Securities Investor Protection Act of 1970 and the compromise delay in the effectiveness of section 11(a) of the Exchange Act are important measures for this Nation's securities industry and are strongly supported by the SEC. I urge my colleagues to vote in favor of the resolution.

Mr. Speaker, I would like to make clear to my colleagues on the floor that we are not attempting in this resolution to foreclose the question of 6 months or 1 year. We have included in the resolution the appointment of conferees. We have also not precluded in the resolution, but have left for conferees, the question with respect to section 3(b) of the Securities Act of 1933. I know that some of my colleagues, primarily the gentleman from California (Mr. Moss), have serious concerns on these two points, and in deference to those concerns, and after consulting with the gentleman, we have offered the resolution as it appears here today.

Mr. BROYHILL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, an unusual parliamentary situation exists here. We are not really discussing anything new in the House today. The House has previous to this day passed two bills, one of which was H.R. 8331, which the chairman has explained, which contains amendments to the Securities Investor Protection Act. We have also passed H.R. 11567, which are amendments to the Securities Exchange Act.

What happened was that the other body put the provision of the two bills together, attaching them to H.R. 8331, and sent them back over to us. If we agree to a conference on just H.R. 8331 and the issue contained therein, what we do is foreclose any debate or any discussion of other issues or other amendments which were contained in the House bill, H.R. 11567.

Therefore, in order to be able to expand the scope of the conference to include those items which we included in the House-passed bill, H.R. 11567, from the parliamentary standpoint, we must pass this resolution.

Mr. Speaker, I would urge that the House agree to this resolution so that we can go to conference and resolve these issues in a conference with the other body.

As the subcommittee chairman has explained, the House would agree to that portion of the Senate amendments which include the provisions of H.R. 8331 dealing with the Securities Investors Protection Act. These amendments will substantially streamline the broker-dealer liquidation procedures.

These are the first substantive amendments to the SIPC Act since we passed it in 1970. The SIPC program has been working well since it was set up, and these amendments will help the act function even more smoothly.

The Senate amendments to H.R. 8331 also would extend for 6 months the effective date of section 11(a) of the 1934 Securities Act. Section 11(a) prohibits brokers from doing the brokerage on an institutional account over which that broker exercises investment discretion and went into effect on May 1, 1978. Several weeks ago the House passed an 18-month extension. Therefore, in this resolution we are merely splitting the difference between the House and Senate positions, and extending the effective date for 12 months.

Because May 1 has now come and gone, it is important that the Congress move quickly to resolve this question, and therefore I do hope that we can pass this resolution, go to conference with the other body and resolve this issue.

Mr. ECKHARDT. Mr. Speaker, I have no further requests for time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas (Mr. ECKHARDT) that the House suspend the rules and agree to the resolution (H. Res. 1158).

The question was taken.

Mr. MOTTL. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 3 of rule XXVII, and the Chair's prior announcement, further proceedings on this motion will be postponed.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Debate has been concluded on all motions to suspend the rules.

Pursuant to clause 3, rule XXVII, the Chair will now put the question on each motion on which further proceedings were postponed in the order in which that motion was entertained.

Votes will be taken in the following order, all by the yeas and nays: H.R. 11713, H.R. 8099, and H. Res. 1158.

The Chair will reduce to 5 minutes the time for any electronic votes after the first such vote in this series.

SOLAR ENERGY SOURCES LOAN PROGRAM

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill H.R. 11713, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Iowa (Mr. SMITH) that the House suspend the rules and pass the bill H.R. 11713, as amended, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 375, nays 17, not voting 42, as follows:

[Roll No. 269]

Duncan, Oreg.	Mollohan	Thornton
Eilberg	Murphy, N.Y.	Tucker
Evans, Ind.	Nix	Weaver
Fountain	Pettis	White
Frey	Pursell	Whitley
Gammage	Rahall	Wylie

The Clerk announced the following pairs:

Mr. Rodino with Mr. Andrews of North Carolina.
Mr. Eilberg with Mr. Fountain.
Mr. McCormack with Mr. Nix.
Mr. Gammage with Mr. Wylie.
Mr. Murphy of New York with Mr. Stockman.
Mr. Carney with Mr. Cochran of Mississippi.
Mr. Burleson of Texas with Mr. Mann.
Mr. Jones of North Carolina with Mr. Runnels.
Mr. Whitley with Mr. Mollohan.
Mr. Weaver with Mrs. Pettis.
Mr. Kazen with Mr. Duncan of Oregon.
Mr. Risenhoover with Mr. Mahon.
Mr. Teague with Mr. Conyers.
Mr. AuCoin with Mr. Frey.
Mr. Baldus with Mr. Pursell.
Mr. Krueger with Mr. Shuster.
Mr. White with Mr. Thone.
Mr. Dellums with Mr. Ruppe.
Mr. Rahall with Mr. Tucker.
Mr. Evans of Indiana with Mr. Thornton.
Mr. Gudger with Mr. Johnson of Colorado.

Mr. SIKES changed his vote from "nay" to "yea."

So (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

The title was amended so as to read: "A bill to create a solar energy and energy conservation loan program within the Small Business Administration, and for other purposes.".

A motion to reconsider was laid on the table.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 3(b)(3) of rule XXVII, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device may be taken on the additional motions to suspend the rules on which the Chair has postponed further proceedings.

WATER RIGHTS FOR AK-CHIN INDIANS

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill H.R. 8099, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Wyoming (Mr. RONCALIO) that the House suspend the rules and pass the bill H.R. 8099, as amended, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 256, nays 138, not voting 40, as follows:

Mr. Ford of Michigan with Mr. Cochran of Mississippi.

Mr. Dellums with Mr. Runnels.

Mr. Conyers with Mr. Gudger.

Mr. Krueger with Mr. Weaver.

Mr. McCormack with Mr. White.

Mr. Murphy of New York with Mrs. Pettis.

Mr. Nix with Mr. Tucker.

Mr. Fountain with Mr. Ruppe.

Mr. Burleson of Texas with Mr. Pursell.

Mr. Baldus with Mr. Thornton.

Mr. Mollohan with Mr. Charles Wilson of Texas.

Mr. Mann with Mr. Thone.

So (two-thirds having voted in favor thereof) the rules were suspended and the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

APPOINTMENT OF CONFEREES ON H.R. 8331

The SPEAKER pro tempore. Without objection, the Chair appoints the following conferees: Messrs. STAGGERS, ECKHARDT, METCALFE, CARNEY, MOSS, DEVINE, and BROYHILL.

There was no objection.

DRESS CODE FOR MEMBERS OF HOUSE OF REPRESENTATIVES

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, I have a question which I would like to pose here to the gentleman from Indiana (Mr. JACOBS), whom I see on the floor. Therefore, I take this time to ask him about this particular question. I know he has been very worried about the matter of a dress code for the Members of the House and whether it should apply equally to both men and women.

Mr. Speaker, I think he may be pleased or may not be pleased to find out that the President has picked up his cause, and as a consequence, has caused me a great problem.

I have correspondence from the President of the United States saying that if I wished to ride on Air Force One to Denver, Colo., tomorrow, I would have to wear a business suit, and I do not have one.

Mr. Speaker, I was wondering whether, if the gentleman from Indiana (Mr. JACOBS) feels strong about a uniform dress code for both sexes, he would be able to find me a business suit for tomorrow afternoon.

Mr. JACOBS. If the gentlewoman will yield, Mr. Speaker, I would suggest to the gentlewoman that I do own one suit, but it is not a spring suit. Also, in the event there was some trouble on the flight requiring a parachute, I would suggest that the gentlewoman wear a spring suit to cushion the fall, or, if the gentlewoman needed a scarf, I would refer her to the Honorable Snoopy.

REPORT ON CONTEMPT RESOLUTION CITATION FOR CLAUDE POWELL, JR.

Mr. STOKES. Mr. Speaker, I call up a privileged report.

The SPEAKER. The Clerk will read the report.

The Clerk read as follows:

RECOMMENDING THAT THE CASE OF CLAUDE POWELL, JR., BE CERTIFIED TO THE U.S. ATTORNEY FOR CONTEMPT OF CONGRESS

1. BACKGROUND TO CLAUDE POWELL'S CONTEMPT OF CONGRESS

The House Select Committee on Assassinations (the committee) was established in the 2d session of the 94th Congress by House Resolution 1540, 122 Congressional Record 24 at p. 31028 (September 17, 1976). The committee was "authorized and directed to conduct a full and complete investigation and study of the circumstances surrounding the assassination and death of . . . Martin Luther King, Junior." House Resolution 222, 123 Congressional Record at p. 3369 (February 2, 1977).

On January 17, 1978, Claude Powell, Jr., was personally served with a subpena to appear before the committee's Subcommittee on the Assassination of Martin Luther King, Jr., in order that the committee might obtain Powell's testimony on an alleged contract for the assassination of Dr. King. The issuance of the subpena was based on the following allegations and information then in possession of the committee:

Leon Powell and his brother, Claude Powell, Jr., have claimed that during the fall of 1967, they were approached in an Atlanta bar by a mutual friend who inquired if they might be interested in making a large sum of money to kill Dr. King. The Powells expressed an interest in the contract, and the friend indicated that he would put them in touch with an individual who could financially back such a contract.

The Powell brothers alleged that they were approached several days later by an individual known only as Ralph. After acknowledging the purpose of the encounter, Ralph displayed to them what he said was $25,000 and stated that if they took the job, there would be $50,000 more when it was completed. The Powells hesitated, at which time Ralph closed his briefcase and left. Neither Leon nor Claude has seen or heard from this individual again.

After the assassination, Leon Powell told his wife Annie (now Annie Campos) about the incident.

In June 1976 Leon Powell went to the FBI in Atlanta with his allegation. The Bureau in turn contacted Claude in Texas.

The FBI spent a considerable amount of investigative time running out the Powell story. Leon Powell was given four polygraph examinations. The results were inconclusive, Claude was tested once and showed indications of "truthtelling" when answering questions about being offered money to kill Dr. King.

After investigating the Powell allegation, the FBI was unable to discredit the story. The case was turned over to the Department of Justice for possible submission to a Federal grand jury. No further action was taken by the Department.

II. POWELL'S REFUSAL TO TESTIFY

Claude Powell, Jr., was personally served with a subpena (attachment No. 1) by staff investigators Floyd Reeves and Robert Walker on January 20, 1978. At that time, he was read and given a copy of the subpena. The return date of the subpena was February 1978.

Leon Powell, Campos, and the "mutual friend" were personally served with similar subpenas on January 20, 1978. In each instance, service was effected in a manner identical to that described for Claude Powell.

On February 6, 1978, the "mutual friend" and Annie Campos appeared and testified before the King Subcommittee. The "friend" specifically denied all material points of the allegation. Campos stated that she had been informed of the plot post assassination but prior to Leon's contact with the FBI.

Both Claude and Leon Powell failed to appear on February 6, 1978, as required by their subpenas. They cited fear for their safety as the reason for their refusal to testify.

After being recontacted by Reeves and Walker on February 7, 1978, Leon Powell appeared and testified on February 8, 1978. Leon reiterated the story he had told the FBI and committee staff.

Claude Powell has remained steadfast in his refusal to appear or testify.

The following is a chronological summary of the contacts between Claude Powell and the committee's staff:

(1) January 18, 1978—Powell was initially contacted by Walker and Webb; at that time, he was afforded an opportunity to discuss his allegation. He refused to talk about the matter and stated that he was afraid of the people behind the King slaying. He was informed that he would be subpenaed. In addition, the fact that the committee would provide him with a ticket and pay him a per diem rate of $50 was explained.

(2) January 20, 1978—Personal service of the subpena was effected by Robert Walker. At this time, the subpena was read to Powell. He was given a copy of the committee's rules, resolutions, and the subpena. Powell was given the names and telephone numbers of two staff attorneys and advised to direct any questions he had about the hearings or subpenas to them. He was told that he could call collect. He was further informed that he would be given a prepaid airline ticket and a $50 per diem allowance for his time in Washington.

(3) January 23, 1978—Walker contacted Powell and afforded him an opportunity to discuss his allegation and the forthcoming hearing. He was also informed that his failure to appear could constitute contempt of Congress. Powell continued in his refusal to discuss the allegation.

(4) January 27, 1978—Walker called the Powell home and spoke with Mrs. Powell. She indicated that her husband did not wish to talk about the matter. In addition, she stated that her husband was afraid for his life.

(5) February 6, 1978—Powell was visited by Walker and Reeves after he failed to appear at the hearing. Powell was once again informed that his refusal to appear could result in his being held in contempt of Congress. Reeves and Walker went over the possible penalties for contempt. Powell was also made aware that a prepaid ticket was waiting for him at the Atlanta airport. Powell was left with a copy of a letter (attachment 2), written by Reeves on Committee letterhead, outlining the travel arrangements and pos-

sibility of contempt. Powell informed the investigators that he would not appear and that the alternative of going to jail was preferable to that of being killed.

(6) February 13, 1978—Powell was contacted by Reeves and Walker. He acknowledged talking with Leon about the latter's testifying. He reiterated his refusal to appear. He indicated that if he was forced to appear, he would lie. He also warned Reeves and Walker not to come to his house again.

III. RECOMMENDATION OF THE COMMITTEE

The committee recommends that the House respond to Mr. Powell's defiance of its lawful process by initiating the statutory procedures for having Powell prosecuted for criminal contempt of Congress (2 U.S.C. 192 and 194). The committee therefore adopted this report, and submits the following resolution (approved by a vote of 7 ayes and 0 nays, a majority of the committee, on February 27, 1978) for adoption by the House:

RESOLUTION OF HOUSE THAT THE SPEAKER CERTIFY THE REPORT OF CLAUDE POWELL'S CONTEMPT OF CONGRESS TO THE U.S. ATTORNEY FOR CRIMINAL PROSECUTION

Resolved, That pursuant to 2 U.S.C. 192 and 194, the Speaker of the House certify this report, detailing the refusal of Claude Powell, Jr., to obey a lawful subpoena of the House of Representatives and to testify before the Subcommittee on the Assassination of Martin Luther King, Jr., of the House Select Committee on Assassinations, to the U.S. attorney for the District of Columbia to prosecute the said Powell for contempt of Congress.

By Authority of the House of Representatives of the Congress of the United States of America

To G. ROBERT BLAKEY, or any assistant designated by him:

You are hereby commanded to summon Claude Powell, Jr., Atlanta, Georgia, to be and appear before the Subcommittee on the Assassination of Martin Luther King, Jr., Select Committee on Assassinations, Committee of the House of Representatives of the United States, of which the Hon. Walter F. Fauntroy is chairman, in their chamber in the city of Washington, on February 6, 1978, at the hour of 10 a.m. then and there to testify touching matters of inquiry committed to said Committee; and is not to depart without leave of said Committee.

Herein fail not, and make return of this summons.

Witness my hand and the seal of the House of Representatives of the United States, at the city of Washington, this 17th day of January, 1978.

LOUIS STOKES,
Chairman,
Select Committee on Assassinations.

Attest:

EDMUND L. HENSHAW, JR.,
Clerk.

ATTACHMENT 1

Subpoena for CLAUDE POWELL, Jr., Atlanta, Ga., before the Subcommittee on the Assassination of Martin Luther King, Jr., of the Select Committee on Assassinations, of the U.S. House of Representatives.

Served by Robert J. Walker, Staff investigator, 4163 Canaby Lane, Dekalb County, Ga., January 20, 1978.

ATTACHMENT 2

SELECT COMMITTEE
ON ASSASSINATIONS,
U.S. HOUSE OF REPRESENTATIVES,
Washington, D.C., February 6, 1978.

Mr. CLAUDE POWELL, Jr.,
Decatur, Ga.

Mr. POWELL: This letter is to serve notice that airline arrangements and hotel accommodations have been made for you to travel to Washington, D.C., to testify before Select Committee on Assassinations Congressional Committee, U.S. House of Representatives.

A pre-paid airline ticket has been left for you at the Eastern Airlines ticket desk. You are instructed to pick up the ticket, board Eastern Flight No. 136, departing Atlanta at 7:02 p.m., and someone will be at the Washington airport to receive you.

Failure to appear in Washington as instructed could result into charges for contempt of the Congress.

FLOYD L. REEVES,
Investigator.

P.S.—Please be sure to board flight today, February 6, 1978.

Mr. STOKES (during the reading). Mr. Speaker, I ask unanimous consent to dispense with further reading of the report.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

RESOLUTION OFFERED BY MR. STOKES

Mr. STOKES. Mr. Speaker, I offer a privileged resolution and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 1159

Resolved, That pursuant to 2 U.S.C. 192 and 194, the Speaker of the House certify this report, detailing the refusal of Claude Powell, Jr., to obey a lawful subpena of the House of Representatives and to testify before the Subcommittee on the Assassination of Martin Luther King, Jr., of the House Select Committee on Assassinations, to the U.S. attorney for the District of Columbia to prosecute the said Powell for contempt of Congress.

The SPEAKER. The gentleman from Ohio (Mr. STOKES) is recognized for 1 hour.

Mr. STOKES. Mr. Speaker, the privileged report I am calling up, and the resolution I am submitting on behalf of the Select Committee on Assassinations, concerns citing for contempt a witness who refused to appear pursuant to subpena before the subcommittee investigating the assassination of Dr. King. Claude Powell has alleged that he and his brother were offered money to kill Dr. King a few months prior to the actual assassination in 1968. They did not take this information to the FBI until 1976, and the Bureau at that time was unable to discredit the story or connect it with the assassination.

Obviously, this matter must be fully explored by the select committee. It is important to determine the truthfulness of the story, and all the individuals involved in the alleged incident. Leon Powell, Claude's brother, was at first reluctant to testify but he eventually did appear before the subcommittee and testify. Claude Powell has remained adamant in his refusal to honor the subpena to appear and testify, despite all the efforts by the committee to obtain his testimony. Indeed, on February 28 I first alerted the House to the possibility that the committee would have to seek a contempt citation. We cannot wait any longer—over 2 months have elapsed and all our negotiations with Mr. Powell have proved fruitless.

Mr. Powell's blanket refusal to appear before the subcommittee constitutes the clearest case of contempt of Congress one can envision. G. Gordon Liddy, the most recent witness who was cited for contempt by the House was cited because he appeared but refused to answer specific questions put to him by the subcommittee. Mr. Powell has had the audacity to refuse to even appear before the committee pursuant to his subpena.

The very integrity and dignity of the House, as well as the select committee's investigation, is at stake. No person should believe they may with impunity simply defy the constitutional and lawful processes of the House of Representatives. In accordance with title 2, section 194 of the United States Code, I urge the adoption by the House of the resolution I have submitted.

Mr. DEVINE. Mr. Speaker, will the gentleman yield?

Mr. STOKES. I will be glad to yield to the gentleman from Ohio for purposes of debate only.

Mr. DEVINE. I thank the gentleman for yielding to me.

Mr. Speaker, I rise in support of this privileged resolution. Without getting into the merits of the testimony that this witness may give, the issue before the House today is the integrity of the right of the House to issue a subpena and have it honored. I think just on that basis alone the House should vote in favor of this resolution, which would refer the matter to the U.S. attorney for the District of Columbia for prosecution for contempt of Congress.

The merits of the subpena, as I say, are unimportant, but for the information of the Members of the House this man is alleged to have been offered substantial sums of money, letting out a contract to assassinate Dr. Martin Luther King, Jr. We are not here talking about the validity of the charge, but merely on the integrity of the right of the House to issue a subpena and have it honored.

Mr. Speaker, I urge the adoption of the resolution.

Mr. STOKES. I thank the gentleman for his remarks.

Mr. MILFORD. Mr. Speaker, will the gentleman yield?

Mr. STOKES. I will be glad to yield to the gentleman from Tennessee for purposes of debate only.

Mr. MILFORD. Mr. Speaker, I thank the gentleman for yielding.

I wonder if there was a Justice Department or FBI investigation made of this incident or is this something the committee itself has discovered?

Mr. STOKES. No. The original investigation was made by the Federal Bureau of Investigation. It was initiated by Leon Powell, Claude's brother, who went to the FBI in 1976 and informed them of the fact that the offer had been made in 1967.

Mr. MILFORD. If there was a potential crime committed, why were not these men brought before a grand jury?

Mr. STOKES. The FBI made a full investigation of the matter. They took statements from both Claude and his brother Leon and other parties who were involved in the alleged offer. After they had completed their investigation the FBI turned the matter over to the Department of Justice, and at that point

the FBI had completed their investigation. The Department of Justice did not take any further action.

Mr. MILFORD. If the gentleman will yield further, has the committee uncovered any evidence separate from the Justice Department or the FBI investigation that would indicate the commission of a crime?

Mr. STOKES. Does the gentleman from Texas mean with reference to Claude Powell?

Mr. MILFORD. I mean with reference to bringing a man before the bar. It seems a bit odd, shall we say, that we are fixing to possibly subject someone to a prison term when there has been nothing to even show that a crime or potential crime has been committed.

Mr. STOKES. If I can answer the gentleman, the question is not whether or not Claude Powell has committed a crime. The question here is whether a lawfully executed subpena, executed pursuant to the powers delegated to this committee by the House, is to be honored or not honored. Claude Powell simply refuses to honor a congressional subpena, and the question here is: Does the House stand behind the power that is delegated to an investigative committee?

Mr. MILFORD. I thank the gentleman for yielding. Will he yield one more time?

Mr. STOKES. I yield to the gentleman from Texas (Mr. MILFORD).

Mr. MILFORD. Mr. Speaker, I do feel before asking someone to vote for a contempt citation, there should be something to show the man is subpenaed and is refusing to appear. While the House has that power, I do feel the House should be informed why this man should be subjected to a prison term other than that the House wanted to talk to him.

Mr. STOKES. The only answer I can give the gentleman is there is no other power available to a committee when a subpena has been issued other than to bring this man under the applicable provisions of the law. As I stated earlier, if the House is serious about conducting an investigation and has delegated to the investigative committee the power to subpena, and the man is refusing to honor that subpena, the question is: Does the House stand behind the delegated authority?

Mr. ALLEN. Mr. Speaker, will the distinguished gentleman from Ohio yield to me for a question?

Mr. STOKES. I yield to the gentleman from Ohio for purposes of debate only.

Mr. ALLEN. Mr. Speaker, can the gentleman from Ohio (Mr. STOKES) tell us why or what reason this witness is giving for not wanting to appear? Has he given a reason?

Mr. STOKES. Yes. I can say to the gentleman the witness has stated his reason for not wanting to appear here. It is that he is in fear of his life.

Mr. ALLEN. Does the gentleman believe that he has reason to be in fear of his life if he appears as a witness?

Mr. STOKES. We have had testimony from his brother, the testimony from his former wife, the testimony from the friend involved in this alleged offer, none of whom have claimed the same reason for not wanting to appear. Indeed, all three of them did appear. He has given our committee no basis for his reasons to fear for his life.

We have, in the event that such a situation were to arise, worked out a situation with the FBI for furnishing protection if any individual believes upon good cause that his life would be in danger. But he has given us no such indication.

Mr. ALLEN. The gentleman has anticipated my next question. In other words, if he does appear as a witness the FBI will throw around him a ring of protection?

Mr. STOKES. I would say that the U.S. Marshal's Office would give him protection under the witness protection law as set forth in the Organized Crime Act.

Mr. BAUMAN. Mr. Speaker, will the gentleman yield for a question?

Mr. STOKES. I would be delighted to yield to the gentleman from Maryland, (Mr. BAUMAN) for the purposes of debate only.

Mr. BAUMAN. Mr. Speaker, I thank the gentleman for yielding. I certainly agree with the gentleman from Ohio (Mr. STOKES) that if a lawful congressional subpena is disobeyed the House ought to support a contempt citation.

The question I would like to put to the gentleman is whether he would not like to use this occasion which is the first occasion in almost a year and a half, to give the House a report on the activities of his committee insofar as they pertain to this investigation regarding which the gentleman is now seeking House approval of a contempt citation? Have you found evidence that James Earl Ray did not, in fact, kill Dr. King, and is this such a crucial contempt citation in the context of all of the evidence you have accumulated, that it takes on special significance?

Mr. STOKES. Again, to answer the gentleman's question, the significance is the lawful process of the House of Representatives. The question is can any subpenaed witness refuse to appear before a House committee that is investigating anything as serious as a murder? And the only thing before us today relevant to the entire investigation is the question of whether or not this witness can avoid the subpena process. And I can say to the gentleman we have had no other occasion for another witness in either investigation, either that of Dr. King's or Kennedy's who has defied the lawful process of the House.

Mr. BAUMAN. If the gentleman will yield further, the gentleman evidently did not understand my question. My question is not about the subpena itself and the principle involved, but rather whether the gentleman would like to use this occasion in view of the fact that a large minority of the Members of the House voted against funds for the gentleman's committee as to what he has accomplished with the millions of dollars and the large staff he has. It is plain to me that the gentleman is refusing to tell the House what he and his committee is doing.

Mr. STOKES. Mr. Speaker, I can look back to February when I first brought this Powell subject to the attention of the House, a short time thereafter the gentleman from Maryland accused the committee of taking this action to assure our continued funding. All I can say is I did not bring in the full investigation before the House, I brought in a matter relating to the subpena power of the House.

Mr. Speaker, I have no further requests for time, and I move the previous question.

Mr. STOKES. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. STOKES. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 367, nays 16, answered "present" 2, not voting 49, as follows:

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. STOKES. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the resolution just agreed to.

The SPEAKER pro tempore (Mr. ROSTENKOWSKI). Is there objection to the request of the Gentleman from Ohio?

There was no objection.

MISS JODIE GAINES, KIDNAP VICTIM, RETURNED UNHARMED

(Mr. JONES of Tennessee asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JONES of Tennessee. Mr. Speaker, I wish to address my colleagues to bring them up to date on developments in the kidnaping of one of our former pages, Miss Jodie Gaines of McKenzie, Tenn.

I rose earlier to let this body know that Miss Gaines, who served as a floor page in this body during the month of March, had been kidnaped. Shortly after returning to my office, I learned that Jodie had been returned to her parents and it has been reported that she was unharmed. I further learned that law enforcement authorities had also recovered the ransom which had been demanded and had taken into custody three persons.

I cannot express my happiness at this most recent development. I am certainly happy for the family and the city of McKenzie, Tenn. which has been very concerned about this incident in their community. I also want to express my congratulations to the FBI for the way in which they handled this very delicate situation.

I know my colleagues who got to know Jodie during her time here will share my relief and happiness.

INTRODUCING RESOLUTION OF DISAPPROVAL REGARDING ARMS SALES TO MIDDLE EAST

(Mr. FASCELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FASCELL. Mr. Speaker, those of us who have been concerned about the arms sales question to the Middle East and who have struggled with the proper approach to give peace a chance to operate without adding a further complicating, irritating obstacle to the whole issue of peace in the Middle East, have finally conluded that what we should do is offer a resolution of disapproval, which I will put in the hopper today. The majority of the members of the Committee on International Relations have agreed to that resolution. The hearings in the committee, I am told, will start sometime next week. We hope that this process will give us reasonable opportunity to reach an accommodation or to settle the issue.

The Members who have signed this, in addition to my self are:

The gentleman from Illinois (Mr. DERWINSKI); the gentleman from Massachusetts (Mr. BURKE); the gentleman from New York (Mr. ROSENTHAL); the gentleman from Florida (Mr. IRELAND); the gentleman from Washington (Mr. BONKER); the gentleman from New York (Mr. WOLFF); the gentleman from Maryland (Mr. LONG); the gentleman from Ohio (Mr. GUYER); the gentleman from Massachusetts (Mr. HARRINGTON); the gentleman from Georgia (Mr. FOWLER); the gentleman from Minnesota (Mr. FRASER); the gentleman from New York (Mr. BINGHAM); the gentlewoman from Illinois (Mrs. COLLINS); the gentleman from Pennsylvania (Mr. YATRON); the gentleman from New York (Mr. SOLARZ); the gentleman from New York (Mr. GILMAN); the gentleman from California (Mr. LAGOMARSINO); the gentleman from Ohio (Mr. WHALEN); the gentleman from Kansas (Mr. WINN); the gentleman from Pennsylvania (Mr. NIX); the gentlewoman from New Jersey (Mrs. FENWICK); and the gentleman from Nebraska (Mr. CAVANAUGH).

ANNUAL REPORT OF FEDERAL COUNCIL ON AGING—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Education and Labor:

To the Congress of the United States:

I am transmitting herewith the annual report of the Federal Council on Aging in accordance with Section 205(f) of the Older Americans Act (P.L. 93-29).

As you know, the Council was created by the Congress to represent older Americans and make recommendations to the President, the Secretary of the Department of Health, Education, and Welfare, the Commissioner of the Administration on Aging, and the Congress on Federal policies regarding the aging and federally conducted or assisted programs and other activities relating to or affecting them. This report describes the Council's concerns and projects as well as specific advocacy positions taken by the Council on Federal policies and programs affecting the elderly.

In my first year in office, the Council has been of great assistance in their unanimous support of strengthened financing of the social security system. As you know the Congress acted expeditiously to enact the 1977 Social Security Act amendments which I signed into law December 20, 1977. These measures will serve to assure a secure income for many older Americans in future years. I hope that the Congress will act this year on the Better Jobs and Income Act in response to the Council's earnest desire for the early enactment of welfare reform which affects many areas of "vital concern to older Americans."

While the Council recognizes that all of the concerns expressed in the report cannot be fully dealt with in the immediate future, I look forward to a continued close working relationship with the Council as evidenced by my appointment of Chairman Nelson Cruikshank as my Counselor on Aging.

In closing, let me assure you that we will continue to carefully consider the views of the Council as social and economic policy affecting the elderly is developed and implemented in the years to come.

JIMMY CARTER.

THE WHITE HOUSE, *May 2, 1978.*

THIRD ANNUAL REPORT TO CONGRESS ON TITLE VI OF THE HOUSING AND COMMUNITY DEVELOPMENT ACT OF 1974 (MOBILE HOMES)—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Banking, Finance and Urban Affairs:

To the Congress of the United States:

In accordance with Section 626 of the National Mobile Home Construction and Safety Standards Act of 1974, I am transmitting the Third Annual Report to Congress on Title VI of the Housing and Community Development Act of 1974 (Mobile Homes).

JIMMY CARTER.

THE WHITE HOUSE, *May 2, 1978.*

REQUEST TO CONSIDER BUDGET AGGREGATES FIRST AND THEN FUNCTIONAL CATEGORIES WHEN HOUSE CONCURRENT RESOLUTION 559 IS CONSIDERED IN COMMITTEE OF THE WHOLE TODAY

Mr. BURGENER. Mr. Speaker, I understand that our distinguished chairman of the Committee on the Budget is about to make a motion relating to the consideration of House Concurrent Resolution 559 in the Committee of the Whole; and I would like to make a unanimous-consent request which directly relates to the consideration of this first required concurrent resolution on the budget.

Mr. Speaker, I would like to read my request and then give a brief explanation.

The SPEAKER pro tempore. Is the gentleman seeking to make a unanimous-consent request?

Mr. BURGENER. Yes, Mr. Speaker; I am seeking to make a unanimous-consent request.

The SPEAKER pro tempore. The gentleman will state his unanimous-consent request.

Mr. BURGENER. Mr. Speaker, I ask unanimous consent that notwithstanding any rule of the House of Representatives or provision of title III of the Congressional Budget Act of 1974 to the contrary, when the House in the Committee of the Whole reads House Concurrent Resolution 559 for amendment under the 5-minute rule that said concurrent resolution shall be read by sections.

Mr. Speaker, I ask unanimous consent further that no amendment in the nature of a substitute shall be in order for House Concurrent Resolution 559 in the Committee of the Whole and all amendments to section 1 of said resolution shall be considered and disposed of prior to the consideration of any amendment to section 2 of said resolution.

Section 301(a)(2) of the law requires that the first concurrent resolution on the budget shall set forth—

(2) an estimate of budget outlays and an appropriate level of new budget authority for each major functional category, for contingencies, and for undistributed intragovernmental transactions, *based on allocations of the appropriate level of total budget outlays and of total new budget authority;*" (emphasis added).

I, therefore, submit that our present law was intended to require the House to consider its priorities of spending among the major functional categories based on those determinations of the appropriate level of total budget outlays and new budget authority which the House would have previously determined to be appropriate to suit the immediate fiscal situation. In this manner we would first consider our fiscal policy, then determine the allocation of expenditures among the major functional categories. This is absolutely necessary since the appropriate Federal fiscal policy at a given point in time is completely independent of, and indeed, often completely opposite of, what we as politicians would like to spend on each of several thousand Federal programs.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

Mr. GIAIMO. Mr. Speaker, reserving the right to object, and before I object, I would like to get a clearer explanation of this unanimous-consent request from the gentleman. I wonder whether the gentleman would give us that explanation.

Mr. BURGENER. If the gentleman will yield, Mr. Speaker, I appreciate the gentleman's reservation, and I would be very pleased to explain briefly what I am proposing. The gentleman can then decide whether or not to object, based on my explanation.

The whole idea of this procedure which I am suggesting is consistent with the current provisions of the Congressional Budget Act of 1974.

I submit that if we do not consider section 1 of this concurrent resolution first in its entirety, we are demonstrating that we really have no budget procedures that provide any restraint on spending or taxing. I think that either partly or largely to blame for this fact that we do not have any real budget restraint are our present budget procedures. As I will explain in a moment, we could correct this situation.

Mr. Speaker, I think the present procedures provide no protection and no real budget restraint.

I think the evidence is rather clear, Mr. Speaker, that as recently as 1974 when we began this budget process—and that is only 4 years ago—the public debt was $486 billion. Now in the new budget resolution our committee recommends some $856 billion. In the 5 years before the Budget Act, spending grew at an annual rate of 7.1 percent; since 1974, however, spending has been averaging yearly increases of over 13 percent.

Therefore, I think point one is quite clear, that we really and truly have no budget restraint.

My second point, Mr. Speaker, is that I maintain our present budget procedures are largely to blame.

Let me explain what I mean by this. Under the current system, in the deliberations of our committee, we first consider revenues in the aggregate. How do we consider revenues? We take the present body of tax law, assuming it is not going to be changed soon, and then we make some educated guesses about the performance of the economy and, therefore, what the revenues are likely to be. That is not too tough.

Once that is done, we then do what we should not do, in my humble opinion. We go down the "wish" list of the 19 spending categories. Then having done that, we add up our spending decisions on each of these functions, and call these totals the appropriate levels of budget outlays and budget authority. This process, we make believe, is how fiscal policy is currently made.

I submit, Mr. Speaker, that we have placed the cart before the horse; and if we adopt my unanimous-consent request or, in lieu of that, a bill that I have cosponsored (H.R. 12345), it would oblige us to follow the initial intent of the Budget Act, which was first to consider the revenues and spending in the aggregate to decide what the national economic goals ought to be and then fix them. The committee would debate it at length, I am sure; and finally, aggregates would be decided upon for revenues and spending. Then, and only then, would we go down the 19 spending categories one by one: defense, health, income security, and so on, under the restraint already adopted by the committee. We would do this with the realization that if we added to one category, we would have to take away from another.

Mr. Speaker, this system is the same basic and elementary system which we use to operate our family budget, and it is the same way in which we operate business in this Nation—that is, at least, successful businesses, and the way most State and local governments have to operate.

Therefore, really, Mr. Speaker, this would require a two-step process for our consideration of our budget for any given fiscal year.

I call it the "two-step" instead of the present system, which I would call the "hustle" because, really, we have no restraint. A good case can be made for any one of those 19 spending categories. Indeed, I myself do not come in with totally clean hands. I have added to the budget over in that committee, but if this process were adopted I would be constrained, and could go back to special interests and say, "You are only going to get 80 percent of what you asked for, or 90 percent, because I have already

voted for a ceiling. The national economy dictated that."

The SPEAKER pro tempore (Mr. ROSTENKOWSKI). Is there objection to the request of the gentleman from California?

Mr. GIAIMO. Mr. Speaker, reserving the right to object, while I understand and sympathize with the concerns of the gentleman, I believe that it would be improper and impractical to consider the budget aggregates before we have had an opportunity to look at the components that make up the budget.

As many of the Members of this body know, budgets are developed by looking at both overall fiscal policy considerations and specific budgetary considerations. When the Budget Committee or OMB prepares budgets, we have in our minds relatively clear ideas of what the size of the budget should be given fiscal policy demands. At the same time we proceed from the bottom up looking at what programs and activities will need to be funded. We always meet somewhere in the middle, tailoring, program demands to conform to fiscal policy needs while maintaining a certain degree of flexibility with respect to the functions of the budget when legitimate program needs justify it.

But if we attempt to set overall budget limits without going into the specific functional categories and taking into account programs and activities which may be funded, we will be proceeding in a factual vacuum. Suppose the gentleman from California proposes to reduce outlays by some figure, say $10 billion. A number of Members might like to support such an aggregate figure. But how are we to know where the cuts are to come? Will they be in defense? Will they be in human resources, urban programs? Or will they be in public works? In short, there is no way for us to know what the implications of such a procedure would be for various programs.

Secondly, setting budget aggregate figures which are different from those proposed by the Budget Committee and without corresponding changes in functional categories would necessitate rewriting the entire budget resolution. For if we do not know the impact of changes in budget aggregates on the functional categories, then we must go through each function and rewrite it in order to reach the desired aggregate result. This means that the House sitting as the Committee of the Whole will also sit as the Budget Committee rewriting from the very beginning the entire Federal budget.

Mr. Speaker, I believe that this procedure is unworkable and unwise. Therefore, I am constrained to object.

Mr. BURGENER. Mr. Speaker, will the gentleman yield so that I may respond briefly?

Mr. GIAIMO. I yield, briefly.

Mr. BURGENER. I am merely asking that we obey the present law, because a careful reading of it says that we will adopt all these categories after the spending outlays have been adopted.

Mr. GIAIMO. Let me say that I think we are obeying present law. It well may be in the future that we will have to refine it in some way, but at present I think the gentleman's proposal would be unworkable.

Therefore, I must object.

The SPEAKER pro tempore. Objection is heard.

GENERAL LEAVE

Mr. GIAIMO. Mr. Speaker, I ask unanimous consent that all Members may be allowed to revise and extend their remarks, and include extraneous matter, during consideration of House Concurrent Resolution 559.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

FIRST CONCURRENT RESOLUTION ON THE BUDGET—FISCAL YEAR 1979

Mr. GIAIMO. Mr. Speaker, pursuant to section 305(a), title III of Public Law 93–344, the Congressional Budget Act of 1974, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the concurrent resolution (H. Con. Res. 559) setting forth the congressional budget for the U.S. Government for the fiscal year 1979.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Connecticut (Mr. GIAIMO).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the concurrent resolution (H. Con. Res. 559), with Mr. NATCHER in the chair.

The Clerk read the title of the concurrent resolution.

By unanimous consent, the first reading of the concurrent resolution was dispensed with.

The CHAIRMAN. Pursuant to section 305(a), title III, Public Law 93–344, of the Congressional Budget Act of 1974, the gentleman from Connecticut (Mr. GIAIMO) will be recognized for 5 hours, and the gentleman from Ohio (Mr. LATTA) will be recognized for 5 hours.

The Chair recognizes the gentleman from Connecticut (Mr. GIAIMO).

Mr. GIAIMO. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in strong support of House Concurrent Resolution 559, the first budget resolution for fiscal year 1979.

The resolution is designed to achieve two primary objectives: First, to sustain the economic recovery, now in its fourth year, without accelerating inflationary pressures, and second, to provide adequate funding to help meet important national needs. It recognizes inflation as a major problem with great potential for economic disruption. It also recognizes unemployment, particularly persistently high unemployment among certain groups in our society, as a continuing problem which demands our concern and action.

In a $2 trillion American economy, the fiscal policies of the Federal Government alone cannot solve either problem. But Federal actions clearly have significant impacts. Clearly they send signals to the business community and to consumers, and they affect private sector decisions, both directly and indirectly.

Adoption of this resolution and adherence in our subsequent actions to the spending and revenue targets it establishes can help move our economy in the right direction. It can keep the economy firmly on the path of recovery, while helping to halt the dangerous growth in the rate of inflation.

The tax and spending policies included in the resolution would help promote a healthy calendar 1979 economic growth rate of 4.4 percent. We project an unemployment rate by the fourth quarter of 1979 of 5.8 percent compared to 6.2 percent in March of this year. And we project an inflation rate, as measured by the consumer price index of 6 percent. Without the stimulus of the tax cut, the forecast is for an unsatisfactory growth rate of 3.6 percent, and no reduction whatever in either the unemployment or inflation rates.

SUMMARY OF RESOLUTION

The first budget resolution for fiscal year 1979 sets targets for aggregate spending and revenue levels and for spending in the 19 functional categories of the budget. I include the recommended aggregates and budget authority and outlay figures for the functions to be printed in the RECORD at this point:

Budget aggregates

[In millions of dollars]

Revenues	$443,279
Budget authority	568,152
Outlays	501,358
Deficit	58,079
Debt subject to limit	856,279

Functional categories

[In millions of dollars]

	Function	Budget authority	Outlays
050	National defense	127,439	115,679
150	International affairs	10,990	6,600
250	General science, space, and technology	5,216	5,027
270	Energy	9,494	9,252
300	Natural resources and environment	13,464	12,013
350	Agriculture	12,297	12,188
370	Commerce and housing credit	6,000	3,700
400	Transportation	20,298	17,809
450	Community and regional development	15,251	10,291
500	Education, training, employment, and social services	34,090	31,429
550	Health	52,282	49,505
600	Income security	192,750	159,339
700	Veterans' benefits and services	20,711	20,471
750	Administration of justice	4,200	4,214
800	General government	4,022	4,059
850	General purpose fiscal assistance	9,098	9,237
900	Interest	47,000	47,000
920	Allowances	1,050	1,000
950	Undistributed offsetting receipts	−17,500	−17,500

The aggregate targets differ slightly from the President's recommendations. The deficit in the resolution is $58 billion—$2.5 billion below the deficit in the President's proposals. The target for budget authority is $568.2 billion, roughly the same as the President's recommendation. The outlay target is $501 billion, about $1 billion above the President's recommendation.

The lower deficit in the resolution is largely due to a proposed net tax deduction of $19.4 billion, rather than the $24.3 billion proposed by the President. The components of the recommended tax cut are as follows:

A reduction of $7.5 billion in social security taxes;

New reductions in individual and corporation income taxes of $10.7 billion; and

Other tax measures, including the House-passed energy bill, which result in a reduction in revenues of $1.2 billion.

In addition, the resolution recommends extension of the temporary provisions of the Tax Reduction and Simplification Act of 1977 (including the employment tax credit), which reduces revenues $9 billion below current law.

We believe the recommended tax cut, while avoiding the inflationary pressures of a larger reduction, is necessary to sustain the economic recovery. We are recovering from a deep recession. But the recovery has been modest. Unemployment remains higher and business investment remain lower than we would like. While overall unemployment is coming down, the rate of minority youth unemployment is 39 percent. The jobless rate for all blacks is nearly as high as a year ago. And while older people show comparatively low rates of unemployment, they tend to be out of work for much longer periods and to have a particularly high share of discouraged workers.

In short, the economy still needs help. The recommended tax cut will help the economy maintain a healthy rate of growth and move us closer to full utilization of manpower and resources.

We believe the $7.5 billion social security tax reduction is an important component of the tax package. It would be directly anti-inflationary by reducing business costs. It would relieve the tax burden on those who most need help—low- and middle-wage earners, which includes that group of workers earning too little to pay income taxes, but paying social security payroll taxes at the same rate as high income earners. Finally, it would provide relief for many State and local governments as well as colleges and universities.

On the spending side, the resolution reflects restraint. Spending is substantially below the amounts requested by House committees in their March 15 views and estimates—below by $49 billion in budget authority and $22 billion in outlays. If all committee requests had been accommodated, the projected Federal deficit could be nearly $86 billion.

INFLATION PROVISIONS

The resolution addresses the need to control inflation in a number of ways:

First, in the size and the composition of the tax cut. Not only would the lower total reduction help reduce inflationary pressures, but the $7.5 billion social security tax reduction would directly help hold down prices, since the employers' share of payroll taxes is traditionally passed on to consumers.

Second, in the lower projected deficit and general restraint in spending. While economists may differ about the ultimate impact of high Federal deficits and spending on the elusive factor called "business confidence," there is little question that what we do sends a message to the business community. If we expect reasonable restraint on prices and wages in private sector decisions, clearly the Federal Government must set the tone. No one can be certain how effective the anti-inflation policies recently proposed by the President will be. But we can be sure that without the example of Federal restraint, the anti-inflation effort will be seriously jeopardized.

Third, in proposing legislative reforms such as hospital cost containment, reforms in wage board salary levels and dual compensation, and changing inequities in social security benefits. The legislative reforms recommended in the resolution would result in spending reductions of $2.3 billion in fiscal year 1979. Even more substantial are the 5-year savings that would result since failure to change current law will automatically result in incremental additions to outlays. The cumulative 5-year savings from hospital cost containment alone would total $26 billion. If we are serious about inflation and about high Federal spending and high deficits, we believe the Congress must enact reforms in these programs. which now inequitably benefit special groups or special interests at the expense of other taxpayers and consumers.

While the resolution reflects spending restraint, it continues the congressional commitment to jobs stimulus and to meeting priority needs at adequate funding levels.

It provides $15 billion in budget authority and outlays to attack unemployment problems, including an increase of $2 billion over the President's budget for a third round of job-creating accelerated local public works; and a $1 billion labor-intensive "soft" public works program. It also recommends continuing CETA public service employment at the 725,000 job level and restoration of the summer youth employment program at the fiscal year 1978 level of 1.2 million jobs. In recognition of persistently high unemployment among minorities, the elderly, and young people, the committee report strongly urges that CETA programs, in particular, be better targeted to reach the structurally unemployed.

The resolution addresses both urban and rural needs. It includes all of the funds requested by the President for urban initiatives. The committee also recommends $5 billion more than the President's budget in outlays for agriculture, including $2.5 billion for new legislative initiatives to respond to the current farm situation.

In addition, the resolution provides for major increases in education programs, for a strong national defense, and for the National Energy Act programs both as passed by the House and as tentatively agreed to by House and Senate conferees.

In short, while the resolution is restrained, it is responsive to national needs—strategic, economic, and social.

There will be those who will not be satisfied with the resolution in every particular, for no two people see national priorities in precisely the same way. But I urge restraint on amendments which would add to the already high level of Federal spending. I ask that we remember that any increase in outlays and any increase in the amount of the recommended tax cut will add to the deficit. We have been saying for several years that the recent high deficits were due primarily to the state of the economy. Yet after 2 years of substantial economic growth, the deficit in this resolution, while lower than the President's budget, remains high. Congressional restraint is imperative. Otherwise, the deficit will continue at levels that I believe will be difficult to defend before the American people.

I ask also that we keep in mind that this is not a line item resolution. It sets target spending ceilings in the aggregate and in the functional categories as well as a target floor on revenues. To be sure, there is language in the committee report discussing specific programs, and, in some cases, making program recommendations. Such references are both necessary and proper, for budget totals mean little unless we know what assumptions underlie the components that make up the total.

As you know, however, it is the responsibility of the authorizing committees and the appropriations committee to make specific recommendations on specific program levels. Alterations by these committees of the assumptions within the overall target ceilings in this resolution are entirely consistent with the Budget Act and the budget process.

I ask that this be carefully borne in mind as we consider the resolution. If we adopt line item amendments, let us not delude ourselves that we are adopting the line items, we may, in fact, be engaging in empty and meaningless gestures by accommodating in the spending totals—and driving up the resolution's deficit in the process—programs that have no chance of approval by the legislative committees of the House.

Finally, I would like to pay tribute to the members of the Budget Committee who have worked hard to develop a responsible budget resolution. Among our membership are men and women with outstanding expertise and special concern for national needs in energy, in defense, in agriculture, in veterans affairs, and in other particular budget areas. They have resisted the temptation to cater unfairly to special concerns or individual constituencies in order to produce a balanced and consistent set of budget priorities. I commend them for their diligence, their dedication and their support. I owe special thanks to the ranking minority member, Mr. LATTA, of Ohio. While we have differed on policy questions, we share a common commit-

ment to the budget process, a commitment which I know the House also shares and has repeatedly affirmed.

Mr. Chairman, I urge adoption of the resolution.

Mr. LATTA. Mr. Chairman, I yield myself 12 minutes.

Mr. Chairman, at the outset let me commend the committee and especially the chairman for the many, many hours of hard work that they put in preparing this resolution. I know they have worked very, very hard in bringing it to the floor today. As the chairman has indicated, we certainly have disagreed on various items in the budget. That does not mean that we disagree on the process, because without the process, who knows, we might have a much greater deficit than that proposed in this resolution.

Mr. Chairman, I was sorry to see at the outset that we were not going to consider the fiscal aggregates for spending, taxing, and the deficits, because I definitely think they would have served as a cap, because all we do actually is to put in all these figures one at a time and add them up and say, well, this is our total. If we would start with total figures and say we were not going to exceed them, we would end up in a much better position. This has already been decided, Mr. Chairman, so I do not want to keep anyone in suspense.

So let me say at the outset that I am unalterably opposed to this first budget resolution and will urge my colleagues, Democrat and Republican alike, to vote against final passage unless it is substantially reduced. As presented, this resolution reveals a calloused disregard for all hard-working, taxpaying Americans. If enacted it would perpetuate the legacy of higher and higher taxes and would speed us toward runaway inflation. I would note here that according to the most recent Consumer Price Index, inflation is now running at an annual rate of 10 percent. Let me quote from last Saturday's Washington Post:

. . . the cost of living rose 0.8% in March, a 10 percent rate of inflation if sustained and compounded for a year, the Labor Department said yesterday.

It is a budget which restrains neither taxes nor spending; it gives added impetus to that relentless march toward a $1 trillion public debt by increasing, for the third consecutive year, the budget deficit. It is a budget which continues the strategy of turning us into a Nation where half the people work and pay taxes to support programs designed for the major benefit of the other half. In short, once the true dimensions of this budget resolution are understood, I will not be surprised to see it suffer a defeat similar to that of the first budget resolution last year.

For the past several years, during these annual debates on the budget resolutions, I have expressed my deep concern that the congressional budget process was not performing its proper functions. At the time I said that the House's cavalier rejection of attempts to control spending and reduce the deficit could eventually lead to the abandonment of the budget process altogether. My thinking was that those in support of the budget process would eventually throw in the towel when it became clear that the big spenders in Congress had no intention whatsoever of listening to the call for reduced spending.

I see now that this dire prediction is unlikely to come true, but for the wrong reasons. Rather than being a threat to the big spenders, the budget process has been converted into big spenders biggest ally. Look at what really is happening: The President sends up his shopping list, the spending committees in Congress project how much they want to spend, and then the Budget Committee puts its good-housekeeping "seal of approval" on the whole thing by adding to—rather than subtracting from—the total package. The committee described this budget resolution as being "lean and tight," but for anyone who watched them put together this resolution knows full well that the committee acted like an adding machine without a subtract button. The Budget Committee encourages more spending by putting its blessing on many social welfare proposals so inflationary that the House, left to its own devices, would probably not approve many of them.

For anyone who doubts my assertion that the Budget Committee has served to increase spending over what would have occurred in the absence of the budget process, I suggest that the following statistics speak for themsleves:

From 1969 through 1974—the period just before passage of the Congressional Budget Act—Federal spending increased 7.1 percent each year, on the average.

Since the passage of the Budget Act, annual spending increases have averaged 13.3 percent—or almost double the pre-Budget Act rate!

For the past three budget years—1977 through 1979—spending has increased annually at a rate of 11.1 percent even though we are in the midst of a strong economic expansion. Even the most liberal economist would have to admit that spending growth ought to slow when the economy is strong and growing.

What bothers me just as much as these enormous spending increases is the fact that the Budget Committee does not seem to take cognizance of the fact that they are taking place. If one believes the report accompanying the resolution now before us, the Budget Committee's deficit for 1979 will be $2½ billion lower than the President's. This gives the appearance that the Budget Committee actually showed some—albeit small—restraint in putting together the first resolution for 1979. But in fact the committee has proposed a deficit which is $6.1 billion higher than that which would have occurred under the President's budget submitted last January. Briefly let me explain the real numbers:

The President's January budget had a deficit of: $60.6 billion.

In March, President Carter revised this downward to: $59.6 billion.

CBO and the House Budget Committee have subsequently estimated that actual spending under the Carter budget will be $7.6 billion less than anticipated by the President in January; this puts the Carter deficit at: $52.0 billion.

Contrast this figure of $52 billion with the deficit in the first budget resolution of $58.1 billion and you can see that the committee has added more than 10 percent to the deficit we could have expected if the Carter budget had been accepted without change. Now let me make it clear that I find a deficit of $52 billion almost as objectionable as one of $58.1 billion, and would under no circumstances vote for a budget with a deficit remotely near this figure. But the point I want to make is that the Budget Committee's resolution is full of far more spending and contains substantially lower tax cuts than the President's.

Furthermore, I think we all ought to take note of the fact that the Senate—that body long considered to be the more liberal of the two Houses in Congress—has already passed its first budget resolution for 1979, and it contains a deficit and spending total $2½ billion lower than called for in the House resolution before us today. Note that the Senate is already $2½ billion below us and we have not even started the amendment process yet; as you know, billions more could be added on the floor. I find it hard to believe that the House is willing to relinquish leadership to the Senate when it comes to saving taxpayers' money, yet that is just what we are going to do if some major downward surgery is not performed on this resolution before it leaves the House.

If the budget process has accomplished nothing else, it has made some of our colleagues much more sophisticated when it comes to justifying their pet spending programs and enormous deficits caused by them. It used to be that these big social welfare schemes were defended on the grounds that they benefited large numbers of their constituencies. Now we hear that it is all these fancy econometric computer models which require all the extra spending. These models—or at least those used by the Budget Committee—all have one thing in common: They all predict that the economy will collapse if we do not run bigger deficits. When we are in a recession, more spending is needed to pull the economy out of its downward path; when we are in a recovery, larger deficits are needed to repair the damage done by the recession; and when the economy is operating near its capacity, more spending and bigger deficits are required to prevent another recession which the models always see around the next corner. These models seem to bestow an official blessing on the spending the planners had already decided on in the first place.

Mr. Chairman, the only tool the Budget Committee seems to be lacking is a computer which will print out irrevocable ways to reduce spending. Every day I hear more of my colleagues telling me what I have known all long: the people in this country are concerned about three things: Inflation, taxes and big deficits. Common sense would dictate that Congress do something about all three of these problems, and what better vehicle to accomplish something towards this end than to use the Federal budget process. Yet look at what the first budget resolution does:

Provides for the second largest budget deficit in history, during the fourth full year of economic recovery;

Increases Federal spending by 11% over this year, then calls this increase modest and non-inflationary;

Reduces the size of the President's proposed tax cut by one-quarter.

This sort of irresponsibility simply cannot be allowed to continue. Simple common sense mandates that the budget resolution we adopt for fiscal year 1979 be based on the following principles:

First. Significant tax relief to offset rising inflation and Social Security taxes.

Second. Real restraint on the growth of Federal spending.

Third. Cutting the deficit to a level where it becomes feasible to balance the budget in the foreseeable future.

We have spent far too many years agonizing over whether we were being fair to every group in this country except the American taxpayer. I propose we make 1979 the Year of the Taxpayer, and as the first step in observance of this unique event, I urge the House to reject this first concurent resolution for the fiscal year 1979 budget.

Mr. GIAIMO. Mr. Chairman, I yield 7 minutes to the gentlewoman from New York (Ms. HOLTZMAN).

Ms. HOLTZMAN. Mr. Chairman, I would like to begin by complimenting the distinguished chairman of the Committee on the Budget, the gentleman from Connecticut (Mr. GIAIMO), for the extraordinary leadership that he has provided. I appreciate his fairness and his concern for the interests of the Members.

As Chair of the Budget Committee's Task Force on State and Local Government, I would like to point out the important provisions contained in the budget resolution dealing with the concerns and needs of distressed cities.

This budget resolution goes a long way in acknowledging the central importance of cities; it recognizes that the economic health of America requires the economic health of its cities. For that reason, the budget resolution merits the attention and support of Members of the House.

The House Committee on the Budget provided a total of $8.6 billion in budget authority and $2.7 billion in outlays in new spending for a variety of urban programs. These amounts will not only fully fund the administration's urban policy, but will cover programs the administration did not include or fund in its urban policy. These amounts added by the committee are vitally important to the distressed cities of this country.

In this resolution, the President's urban policy will be funded at its full level—that is, $5.5 billion in budget authority and $1.7 billion in outlays. These amounts will cover such items contained in the administration's policy as the National Development Bank, a "soft" public works program, increases for title XX, State incentive grants, countercyclical revenue sharing, section 312 housing, and urban parks and recreation.

It is important to note, however, that the Committee on the Budget went beyond the administration's urban proposal in several key areas. The committee added a total of $3.1 billion in budget authority and $1 billion in outlays for programs that are essential to the economic survival of the cities of this country.

One of the most important items added by the House Committee on the Budget and contained in this resolution is $400 million in budget authority and outlays for fiscal relief for State and local governments to help pay for their staggering welfare burdens. These funds are included to allow the Federal Government to pay for a larger share of local welfare costs. The amounts contained in the House budget resolution will pay for the implementation in fiscal year 1979 of the fiscal relief provisions contained either in H.R. 7200 or in the administration's welfare reform proposal.

The administration included a provision for immediate fiscal relief for State and local governments in its urban policy, but failed to request funds for it. The House budget resolution properly corrects for this omission.

The House budget resolution also adds extra funds for the upgrading of mass transit systems—$675 million in budget authority and $345 million in outlays. Decent mass transit, as we all know, is central to the survival of cities.

In addition, the House budget resolution funds a third round of the accelerated local public works program. The original funds for this program have already been obligated, and the amounts contained in the resolution will allow for new public facilities to be built and for assistance to hard-hit local governments to be continued. The amounts contained in the resolution are $2 billion in budget authority and $300 million in outlays.

The committee also adds $50 million in budget authority for the important title XX program, which funds senior citizen centers and daycare centers. This is in addition to the $150 million in budget authority requested by the President in his urban policy, and provided in the budget resolution.

The committee does not include in the budget resolution the administration's investment tax credit proposal for new industrial structures. At hearings held by the Task Force on State and local government, many witnesses testified that this proposal, on balance, would cause economic harm to the cities by encouraging businesses to leave. The committee's omission of this proposal increases overall revenues by $2.4 billion.

The actions of the House Committee on the Budget with respect to full funding of the administration's urban policy and with respect to the other items I have mentioned constitute a very necessary first step in the effort to revitalize our Nation's distressed cities and assure their economic survival.

For these reasons, Mr. Chairman, I support the budget resolution and strongly urge my colleagues to do likewise.

Mr. LATTA. Mr. Chairman, I yield 6 minutes to the gentleman from Illinois (Mr. MICHEL).

Mr. MICHEL. Mr. Chairman, back in 1974, when we enacted the "Congressional Budget and Impoundment Control Act" our national debt was around $450 billion. It is now approaching $860 billion. To say the least, our 4 years experience with this new congressional budgetary process has not resulted in responsible and effective control over Government spending and our national budget.

Let us face it, the procedure we are going through today was born out of the frustration of one impoundment after another during President Nixon's administration. It is a little bit ironic, I think, as I recall the sequence of events, that it was a $250 billion debt ceiling that President Nixon threatened to veto that really served as the mechanism for bringing about our current budget process. The President at that time thought that the ceiling was too high, and he wanted it lowered to justify those impoundments and, frankly, to serve as a restraint on Federal spending.

Well, the compromise was a $250 billion debt limitation being enacted into law to which we had added a provision creating a Joint Study Committee on Budget Control. That study committee, of course, recommended that we have the budget process under which we are now operating.

Now, the way it was supposed to work, as I recall that debate, was that we were all going to be much more responsible here in the House and in the Senate. We were going to mend our spending ways by being very conscious of the fact that when we increased an allocation here or there we would be responsible and eventually have to require some reconciliation. We would have to go back to the Ways and Means Committee and say, "Well, we have just got to have more money to make up for those increased expenditures."

The way this thing has finally evolved is that the majority party has continued to increase the spending over and over again, and has never come back to the Ways and Means Committee and asked for a tax increase to make up for those increased expenditures. Quite to the contrary, all the efforts before the Ways and Means Committee in recent years have been, "How can we determine ways of giving the people a tax reduction?" We should seek to reduce the tax burden of the American people, but the other side of the equation has really never been followed as we originally intended when we enacted the Congressional Budget Act. In my judgment, that is why this budget process has failed.

Mr. Chairman, our distinguished colleague, the gentleman from California (Mr. BURGENER), made a very significant point back in the House when he asked unanimous consent for a procedural change for the consideration of the pending budget resolution. While the chairman of the Budget Committee (Mr. GIAIMO) understandably could not summarily agree to the proposed procedural change, I am pleased that he has indicated there might be some merit in the proposal and that he would give it careful consideration. I am sure the gentleman from Connecticut (Mr. GIAIMO) recognizes that our congressional budgetary process is not working as it should,

and it behooves us to improve the process.

To this end the gentleman from California (Mr. BURGENER) and the gentlewoman from Maryland (Mrs. HOLT), both members of the Budget Committee, and myself have introduced a bill (H.R. 12345) to make a procedural change in the way in which the House considers its budget resolution.

Stated very simply, the procedure we propose is to divide the budget resolution into two distinct parts. We first consider what is to be our fiscal policy, and make a determination as to the aggregate revenues and the aggregate outlays and the related surplus or deficit which is appropriate to suit the immediate fiscal situation. Members will have opportunity to offer amendments to this part and after determination has been made on this part, we proceed to the second part where a determination is made as to the allocation of the expenditures in the specific major functional categories.

In other words, in the consideration of the budget resolution there would be no amendments in the nature of a substitute and the entire bill would not be considered as read and open to amendment at any point. Rather we would debate and amend the bill on a two part or two step basis. By adopting this procedure we would be setting aside the rule that was adopted when this Congress was organized and many rule changes were then put into effect without many Members, particularly the freshmen on the majority side, knowing their real import.

What we are actually proposing is a revision of the procedures for the handling of floor amendments to the first budget resolution. We are seeking to establish a conscious coordination between the outflow side of the budget and the income side of the budget. We are seeking a practical procedure by which the Congress actually fixes fiscal policy and then determines priorities.

I cannot but feel confident that the vast majority of this House, both Republicans and Democrats, wanting to do that which will best serve our national economic well-being, will recognize the merits of this procedural change and will give their support to the bill we have introduced (H.R. 12345). For the convenience of the Members I am inserting in the RECORD as a part of these remarks a copy of the bill, and two documents that will assist members in knowing the exact nature of the proposal.

Mr. Chairman, the copy of the bill and the two documents follow:

H.R. 12345

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Two-Step Budget Process Act of 1978".

TITLE I—AMENDMENTS TO THE CONGRESSIONAL BUDGET ACT OF 1974

REQUIREMENT THAT A FIRST CONCURRENT RESOLUTION OF THE BUDGET CONTAIN TWO SEPARATE TITLES

SEC. 101. Section 301(a) of the Congressional Budget and Impoundment Control Act of 1974 is amended to read as follows:

"SEC. 301. (a) ACTION TO BE COMPLETED BY MAY 15.—On or before May 15 of each year, the Congress shall complete action on the first concurrent resolution on the budget for the fiscal year beginning on October 1 of such year. The concurrent resolution shall set forth in two separate titles the following:

"One title shall set forth—

"(1) the appropriate level of total budget outlays and of total new budget authority;

"(2) the amount, if any, of the surplus or the deficit in the budget which is appropriate in light of economic conditions and all other relevant factors;

"(3) the recommended level of Federal revenues and the amount, if any, by which the aggregate level of Federal revenues should be increased or decreased by bills and resolutions to be reported by the appropriate committees;

"(4) the appropriate level of the public debt, and the amount, if any, by which the statutory limit on the public debt should be increased or decreased by bills and resolutions to be reported by the appropriate committees.

"The concurrent resolution shall set forth in a separate title—

"(5) an estimate of budget, outlays and an appropriate level of new budget authority for each major functional category, for contingencies, and for undistributed intragovernmental transactions, based on allocations of the appropriate level of total budget outlays and of total new budget authority; and

"(6) such other matters relating to the budget as may be appropriate to carry out the purposes of this Act.".

TWO-STEP CONSIDERATION OF A FIRST CONCURRENT RESOLUTION ON THE BUDGET IN THE HOUSE OF REPRESENTATIVES

SEC. 102. (a) Section 305(a) of the Congressional Budget and Impoundment Control Act of 1974 is amended by striking the word "Consideration" from subparagraph (3) and inserting the following: "Except as otherwise provided in subparagraph (3) of this section, consideration".

(b) Section 350(a) of the Congressional Budget and Impoundment Control Act of 1974 is further amended by inserting the following new subparagraph (3) immediately following subparagraph (2), and redesignating the succeeding subparagraphs accordingly:

"(3) Consideration of any concurrent resolution on the budget referred to in section 301(a) by the House of Representatives shall be in the Committee of the Whole, and such resolution shall be read for amendment under the five-minute rule by titles in accordance with the application of rule XXIII of the Rules of the House of Representatives. No amendment in the nature of a substitute shall be in order for such resolution in the Committee of the Whole. All amendments to that title containing the level of Federal revenues, the level of total budget outlays, the level of total new budget authority, or the appropriate amount of the surplus or deficit in the budget, as set forth (pursuant to section 301(a)) shall be considered and disposed of prior to the consideration of any amendment to that title containing the levels of new budget authority and estimates of budget outlays for each major functional category (pursuant to section 301(a)(5)).".

TITLE II—MISCELLANEOUS PROVISIONS

EXERCISE OF RULEMAKING POWERS

SEC. 201. The provisions of this Act are enacted by the Congress—

(1) as an exercise of the rulemaking power of the House of Representatives and the Senate, respectively, and as such they shall be considered as part of the rules of each House, respectively, and such rules shall supercede other rules only to the extent that they are inconsistent therewith; and

(2) with full recognition of the constitutional right of either House to change such rules (so far as relating to such House) at any time, in the same manner, and to the same extent as in the case of any other rule of such House.

CHANGES IN EXISTING LAW

In compliance with clause 3 of rule XIII of the Rules of the House of Representatives, changes in existing law made by the bill are shown as follows: (existing law proposed to be omitted is enclosed in brackets, existing law is in small type, new matter is quoted).

ADOPTION OF FIRST CONCURRENT RESOLUTION

[SEC. 301. (a) ACTION TO BE COMPLETED BY MAY 15.—On or before May 15 of each year, the Congress shall complete action on the first concurrent resolution on the budget for the fiscal year beginning on October 1 of such year. The concurrent resolution shall set forth—

[(1) the appropriate level of total budget outlays and of total new budget authority;

[(2) an estimate of budget outlays and an appropriate level of new budget authority for each major functional category, for contingencies, and for undistributed intragovernmental transactions, based on allocations of the appropriate level of total budget outlays and of total new budget authority;

[(3) the amount, if any, of the surplus or the deficit in the budget which is appropriate in light of economic conditions and all other relevant factors;

[(4) the recommended level of Federal revenues and the amount, if any, by which the aggregate level of Federal revenues should be increased or decreased by bills and resolutions to be reported by the appropriate committees;

[(5) the appropriate level of the public debt, and the amount, if any, by which the statutory limit on the public debt should be increased or decreased by bills and resolutions to be reported by the appropriate committees; and

[(6) such other matters relating to the budget as may be appropriate to carry out the purposes of this Act.]

"SEC. 301. (a) ACTION TO BE COMPLETED BY MAY 15.—On or before May 15 of each year, the Congress shall complete action on the first concurrent resolution on the budget for the fiscal year beginning on October 1 of such year. The concurrent resolution shall set forth in two separate titles the following:

"One title shall set forth—

"(1) the appropriate level of total budget outlays and of the total new budget authority;

"(2) the amount, if any, of the surplus or the deficit in the budget which is appropriate in light of economic conditions and all other relevant factors;

"(3) the recommended level of Federal revenues and the amount, if any, by which the aggregate level of Federal revenues should be increased or decreased by bills and resolutions to be reported by the appropriate committees;

"(4) the appropriate level of the public debt, and the amount, if any, by which the statutory limit on the public debt should be increased or decreased by bills and resolutions to be reported by the appropriate committees.

"The concurrent resolution shall set forth in a separate title—

"(5) an estimate of budget outlays and an appropriate level of new budget authority for each major functional category, for contingencies, and for undistributed intragovernmental transactions, based on allocations of the appropriate level of total budget outlays and of total new budget authority; and

"(6) such other matters relating to the budget as may be appropriate to carry out the purposes of this Act."

PROVISIONS RELATING TO THE CONSIDERATION OF CONCURRENT RESOLUTIONS ON THE BUDGET

SEC. 305. (a) PROCEDURE IN HOUSE OF REPRESENTATIVES AFTER REPORT OF COMMITTEE; DEBATE.—

(1) When the Committee on the Budget of the House has reported any concurrent resolution on the budget, it is in order at any time after the tenth day (excluding Saturdays, Sundays, and legal holidays) following the day on which the report upon such resolution has been available to Members of the House (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the concurrent resolution. The motion is highly privileged and is not debatable. An amendment to the motion is not in order, and it is not in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

(2) General debate on any concurrent resolution on the budget in the House of Representatives shall be limited to not more than 10 hours, which shall be divided equally between the majority and minority parties. A motion further to limit debate is not debatable. A motion to recommit the concurrent resolution is not in order, and it is not in order to move to reconsider the vote by which the concurrent resolution is agreed to or disagreed to.

"(3) Consideration of any concurrent resolution on the budget referred to in section 301(a) by the House of Representatives shall be in the Committee of the Whole, and such resolution shall be read for amendment under the five-minute rule by titles in accordance with the applicable provisions of rule XXIII of the Rules of the House of Representatives. No amendment in the nature of a substitute shall be in order for such resolution in the Committee of the Whole. All amendments to that title containing the level of Federal revenues, the level of total budget outlays, the level of total new budget authority, or the appropriate amount of the surplus or deficit in the budget, as set forth (pursuant to section 301(a)) shall be considered and disposed of prior to the consideration of any amendment to that title containing the levels of new budget authority and estimates of budget outlays for each major functional category (pursuant to section 301(a)(5))."

"(4)[3] [Consideration] "Except as otherwise provided in subparagraph (3) of this section, consideration" of any concurrent resolution on the budget by the House of Representatives shall be in the Committee of the Whole, and the resolution shall be read for amendment under the five-minute rule in accordance with the applicable provisions of rule XXIII of the Rules of the House of Representatives. After the Committee rises and reports the resolution back to the House, the previous question shall be considered as ordered on the resolution and any amendments thereto to final passage without intervening motion; except that it shall be in order at any time prior to final passage (notwithstanding any other rule or provision of law) to adopt an amendment (or a series of amendments) changing any figure or figures in the resolution as so reported to the extent necessary to achieve mathematical consistency.

"(5)[4] Debate in the House of Representatives on the conference report or any concurrent resolution on the budget shall be limited to not more than 5 hours, which shall be divided equally between the majority and minority parties. A motion further to limit debate is not debatable. A motion to recommit the conference report is not in order, and it is not in order to move to reconsider the vote by which the conference report is agreed to or disagreed to.

"(6)[5] Motions to postpone, made with respect to the consideration of any concurrent resolution on the budget, and motions to proceed to the consideration of other business, shall be decided without debate.

"(7)[6] Appeals from the decisions of the Chair relating to the application of the Rules of the House of Representatives to the procedure relating to any concurrent resolution on the budget shall be decided without debate.

H.R. 12345—THE TWO-STEP BUDGET PROCESS ACT

BUDGET TWO-STEP MODEL: FIRST CONCURRENT RESOUTION ON THE BUDGET

H. CON. RES. —

Resolved by the House of Representatives (the Senate concurring),

TITLE I

(Step 1: Amendments to this title shall be considered and disposed of first. No amendment in the nature of a substitute for the entire resolution is in order.)

That the Congress hereby determines and declares, pursuant to section 301(a) of the Congressional Budget Act of 1974, that for the fiscal year beginning on ————

(1) the recommended level of Federal revenues is ———, and the amount by which the aggregate level of Federal revenues should be decreased is ———;

(2) the appropriate level of total new budget authority is ———;

(3) the appropriate level of total budget outlays is ———;

(4) the amount of the deficit in the budget which is appropriate in the light of economic conditions and all other relevant factors is ———; and

(5) the appropriate level of the public debt is ———, and the amount by which the statutory limit on such debt should accordingly be increased is ———.

TITLE II

(Step 2: Amendments to this title would be considered and disposed of after the completion of all amendments to Title I. No amendment in the nature of a substitute for the entire resolution is in order.)

Based on allocations of the appropriate level of total new budget authority and of total budget outlays as set forth in paragraphs (2) and (3) of the first title of this resolution, the Congress hereby determines and declares pursuant to section 301(a)(5) of the Congressional Budget Act of 1974 that, for the fiscal year beginning on ————, the appropriate level of new budget authority and the estimated budget outlays for each major functional category are as follows:

(1) National Defense (050):
(A) New budget authority, ———;
(B) Outlays, ———.
(2) International Affairs (150):
(A) New budget authority, ———;
(B) Outlays, ———.
(3) General Science, Space & Tech. (250):
(A) New budget authority, ———;
(B) Outlays, ———.
(4) Energy (270):
(A) New budget authority, ———;
(B) Outlays, ———.
(5) Natural Resources & Environment (300):
(A) New budget authority, ———;
(B) Outlays, ———.
(6) Agriculture (350):
(A) New budget authority, ———;
(B) Outlays, ———.
(7) Commerce and Housing Credit (370):
(A) New budget authority, ———;
(B) Outlays, ———.
(8) Transportation (400):
(A) New budget authority, ———;
(B) Outlays, ———.
(9) Community & Regional Development (450):
(A) New budget authority, ———;
(B) Outlays, ———.
(10) Ed. Training, Empl. & Social Services (500):
(A) New budget authority, ———;
(B) Outlays, ———.
(11) Health (550):
(A) New budget authority, ———;
(B) Outlays, ———.
(12) Income Security (600):
(A) New budget authority, ———;
(B) Outlays, ———.
(13) Veterans Benefits and Services (700):
(A) New budget authority, ———;
(B) Outlays, ———.
(14) Administration of Justice (750):
(A) New budget authority, ———;
(B) Outlays, ———.
(15) General Government (800):
(A) New budget authority, ———;
(B) Outlays, ———.
(16) General Purpose Fiscal Asst. (850):
(A) New budget authority, ———;
(B) Outlays, ———.
(17) Interest (900):
(A) New budget authority, ———;
(B) Outlays, ———.
(18) Allowances (920):
(A) New budget authority, ———;
(B) Outlays, ———.
(19) Undistributed Offsetting Receipts (950):
(A) New budget authority, ———;
(B) Outlays, ———.

Mr. GIAIMO. Mr. Chairman, I yield 15 minutes to the gentleman from California (Mr. LEGGETT).

Mr. LEGGETT. Mr. Chairman, I do not know whether I am going to take the 15 minutes or not. This is an interesting time in this 10-hour vigorous debate on the most important legislation to come before the House of Representatives, to wit, the budget. As opposed to debate, it seems to me that we have very interesting monologs that are taking place and a tremendous audience here to listen. I hope the television cameras are working very well so that all of this information is getting back to all the Members instantaneously.

I heard what the distinguished minority whip has just said. I think there is a lot in the recommendations. There have to be some changes in this budget procedure because, as I see it, we are in large part shadowboxing. We are setting targets one day and we are obliterating those targets the next day. We are trying to rationalize what we have done at the end of 4 or 5 months with a second resolution.

We start out with a resolution that neither the Democrats are satisfied with nor are our so-called flat-earth people we have on the other side or conservative side.

I think we all ought to be opting for a balanced budget. I do not think we get it necessarily through the Rousselot procedure. I do not think we get there through primarily targeting toward a deficit which is pre-agreed upon. I do think we need to show some control over this procedure which today the Congress has not been able to establish.

We intended to have, I believe, an awareness of the overall deficits and, as the gentleman has indicated, we have shown an awareness of deficits of $500 billion or $600 billion or $700 billion, and now $800 billion, now some $860 billion is going to be the net product of a vigorous action of an independent Budget Committee working very hard. I think the chairman of the Budget Committee

this year has done an extraordinary job in keeping the system together but I believe that our basic procedure leaves a lot to be desired.

Frankly what I would like to see in this last year that I am in the U.S. Congress is a procedure that perhaps everybody could acclimatize to, and that would be perhaps keeping the discipline of the budget program where we report out authorization bills and appropriation bills by various dates for a budget for the majority.

Let us iron that out in the Democratic caucus. Let us try to stay with it. Let us be responsible for whatever deficiency we have. Let the minority side argue out their program. Then when bills come up we can argue whether or not a particular bill of a certain magnitude is within or without the target that we have set on our respective sides. Then we have done something. Then we have got something we can talk about.

The way we have the procedure now structured we do really nothing to control the overall deficit. We come up with a figure that generally everybody is ashamed of, either too big or too small, depending on the eye of the beholder, and we rationalize at the end of the procedure. Then everybody goes home and ignores the total process.

Mr. Chairman, as we begin consideration of the first resolution for fiscal year 1979, it may be appropriate to recall the legislation that established the new congressional budget process states:

The Congress declares that it is essential to establish national budget priorities.

In my judgment, this is a mandate to the House to examine carefully this resolution in the light of priorities it sets for Federal spending. This resolution provides a guide to what the Nation can afford this year and what it cannot.

The events of the past 8 months have produced an economic picture very different from that which we examined in preparation of the second budget resolution for fiscal year 1978. This is understandable. Further changes are possible during the next 4 months and the committee will monitor conditions closely between now and September when the House will be asked to make its final decision on a budget ceiling.

It is with this background in mind that I ask you to consider the recommended budget authority and outlay targets for national defense. As a member of the Armed Services Committee for some 14 years, I have seen and acted on the rise of defense budgets from $50 billion in fiscal year 1963 to the administration's spending request for fiscal year 1979 of $118 billion. Defense budget requests, seem to some, to be sacrosanct and inviolable. This is not the case. We do not need to dig up the old graves of the ABM system, the B–70, and other misguided programs which were touted as being absolutely necessary for the defense of this great Nation.

The Budget Committee in the first concurrent resolution recommends $127.4 billion in budget authority and $115.6 billion in outlays for national defense in fiscal year 1979. These funding targets are $9.3—plus 8 percent—billion in budget authority and $10.3 billion in outlays over the current—plus 9 percent—level for fiscal year 1978.

This increase represents a real growth, above inflation, of $2.2 billion in budget authority and $3.9 billion in outlays. Total defense spending, recommended in this resolution after providing for inflation, is up by over 3 percent.

I would like to put the defense budget and its relationship to NATO into recent historical perspective. During the period 1967 through 1974 when we were involved in Vietnam, the defense budget was primarily a consumption budget, that is, we were simply replacing equipment and ammunition which was being consumed in Vietnam. During this period because our military and civilian leaders were preoccupied with events in Southeast Asia, there is no doubt that we let our NATO posture deteriorate to a large degree, modernization was delayed, stocks were depleted, and troop morale and training were at a low ebb.

After the fall of South Vietnam in 1975, things began to change rapidly, defense budget, for fiscal years 1976, 1977, and 1978 were increased in real purchasing power. Much of this increase was directed to NATO oriented forces and programs. For instance, funding for our ammunition programs were doubled.

The fiscal year 1979 budget again contains a substantial real increase of about 3 percent for NATO oriented programs. The total in the resolution for fiscal year 1979 is $127.4 billion. This is a very controversial recommendation as always.

This year there seems to be more than the usual attempts to increase certain programs. However, in view of our overall national deficit of $58 billion or better, the proposed DOD target will provide enough to maintain a secure deterrent and a stable strategic balance. We will also maintain both military and political credibility within NATO. All within the framework of a new national debt of $865 billion and an interest expense, not of 9 billion when I came to Congress, but $47 billion.

The $127.4 billion funding level continues the real growth in defense spending initiated in fiscal year 1976. The decision to increase the number of Army divisions, to increase the number of tactical air wings, to accelerate the cruise missile program and the modernization of conventional weapon systems, and to improve the readiness of military units for combat have and are being funded by the Congress.

The funds provided by this Congress for the fiscal year 1979 defense budget are estimated to be 23 percent of total Federal spending. This is actually an illusion. The real costs of our defense establishment should also consider our foreign military assistance, the benefits provided to veterans who have served with the military, and the retired pay of the civil servants previously employed by the defense department. When these costs are considered the total spending for defense in fiscal year 1979 will approach $143 billion.

We must remember the defense spending is funded out of general revenue funds only, not through trust funds or other contributory programs. After interest on the public debt, some $47 billion this upcoming year, is subtracted from the total of general revenue funds, the amount remaining for all other available programs is less than $246 billion. Thus, the real percentage of taxpayers funds utilized by defense programs is 58.1 percent rather than the often quoted 23 percent.

The budget authority target recommended is $1 billion lower than the President's request. This reduction is related to the slow down is scheduled deliveries of the Trident submarine. It is clear from available information that the first five Trident submarines now under construction will be delivered 7 to 17 months later than scheduled. Construction and delivery dates for the recently awarded sixth and seventh submarines are not firm but will be significantly later than the dates originally planned. Based on the current situation, funding for a Trident submarine in fiscal year 1979 would be premature. I might add, this reduction does not affect the $0.2 billion request for procurement of critical long lead items for the eighth Trident required to maintain production continuity.

In the area of outlays it may appear the defense budget has been cut by $2.1 billion. This is not true. The national defense outlay target of $115.6 billion is a reestimate of the President's fiscal year 1979 outlays which reflects the recent historical trends of outlay shortfalls and a reevaluation of defense procurement spending. As I stated earlier, even with this reestimate, in real terms, outlays are actually $3.9 billion over the fiscal year 1978 level.

This increase in outlays must also be considered in light of the continued increase in Defense Department unexpended balances. Unexpended balances are those funds which have been authorized and appropriated by the Congress in this and previous years which have not yet been spent on defense programs. Just 3 fiscal years ago, at the end of fiscal year 1975, the unexpended balances available to the Department of Defense were $44.0 billion. By the end of this upcoming fiscal year these balances are estimated to reach some $83 billion, an increase of over 88 percent.

There are certainly valid reasons for the Defense Department having unexpended balances. The reasons have been thoroughly discussed by the committee, the Congress, the GAO and the OMB. It is clear, however, that these balances have continued to grow at such a rate that reasons other than management practices and full funding of programs are at the root of this issue. The Congress must direct the Defense Department to spend more time on executing the programs currently authorized and funded and less time on planning and justifying new programs and budgets.

Considering current defense spending plans and in light of the economic trends, fiscal policy, and spending priorities, underlying this resolution, I believe this to be, an appropriate and adequate funding level for national defense.

I urge my colleagues to support this first concurrent resolution and target for national defense.

Mr. LATTA. Mr. Chairman, I yield 12 minutes to the gentleman from New York (Mr. CONABLE).

Mr. CONABLE. Mr. Chairman, I would like at the outset to thank the distinguished chairman of the Committee on the Budget and the gentleman's majority colleagues. Chairman GIAIMO has exhibited wit, grace, and patience in a difficult task. I regret that I do not like the product of the gentleman's committee better.

Rising inflation, rising taxes, rising spending—that is a recipe for fiscal disaster. That is also what the cooks in the Committee on the Budget have dished up for fiscal year 1979.

What is a responsible Member to do? I suggest the following:

First, try to amend the budget resolution to bring it into line with the demands of today's inflationary economy.

Then if such amendments are voted down, vote against the budget resolution, send it back to the committee, and hope that the next resolution will not threaten to put the country and its citizens into an economic tailspin.

If you are trying to be responsible, then do not vote for House Concurrent Resolution 559 in its present sorry state.

In 5 fiscal years experience with the new budget process, our grip on the fiscal throttle has weakened, not tightened. Under the budget process, we have been running out of control. Our hungry Government is devouring more and more.

Republicans plan to offer two motions tomorrow to slow this dangerous momentum:

My tax cut of $10 billion more than the cut in the pending resolution, and the proposal of the gentlewoman from Maryland (Mrs. HOLT) to force the House to consider budget aggregates—spending and taxing totals—before fine tuning amounts for the 19 functional categories.

A few statistics illustrate how badly the Budget Act has failed in restraining surges in spending and taxing.

First, spending is out of control. Let us consider these statistics:

Average annual rate of spending growth from 1969 to 1976, including two recessions, was 9.5 percent.

The average annual rate of spending growth for fiscal years 1977 to 1979, that is with strong economic recovery and with a Democratic President and Democratic Congress, the spending growth was 11.1 percent.

The average annual rate of spending growth in the 5-year history of the budget process was 13.3 percent, a record for a 5-year period.

The average annual rate of spending growth for 5 years before the Budget Act was only 7.8 percent—think of that, 7.8 percent, as opposed to the spending growth after the Budget Act has gone into function.

Mr. Chairman, I think that illustrates that spending is out of control.

Let us look at taxing. Taxing is out of control also. The average annual rate of receipts growth from 1969 to 1976 was 9.1 percent; the average annual rate of receipts growth from 1977 to fiscal year 1979 is 13.3 percent and climbing. The average annual rate of receipts growth for the 5-year history of the Budget Act was 10.88 percent, and the average annual rate of receipts growth for the 5 years before the Budget Act was 7.3 percent.

We are entering the fourth year of an economic recovery, and we are already at a point in the economic cycle when Keynesian theory would dictate fiscal restraint. Instead, the deficit continues to climb. In 1977 it was $45 billion; in 1978, according to current figures, it is $53 billion; and in 1979 it is projected to be $59 billion.

Does this sound "lean and tight"? President Carter thinks so. We are certain it is not.

It is no surprise that inflation rates are also shooting higher. The Consumer Price Index bounced up 0.8 percent last month, a rate that would bring us to double-digit inflation compounded over a 12-month period.

The resolution pending before us is based on an ostrich-like belief that the 1978 inflation rate will be only 6 percent. To reach that goal, we could average no more than 4.9 percent inflation during the remaining 8 months in 1978. Wishing will not make that happen.

Mr. Chairman, what is wrong with the budget process? It was supposed to keep these alarming numbers under control. Instead, it has sanctioned them, given them an aura of responsibility they would not otherwise have had.

The budget process has become an arithmetic procedure—simply tallying the cost of the majority party's "wish list."

Our priorities and procedures have been reversed. We should first look at the aggregates that will give us the healthiest economy, and, second, and only then, look at how to allocate spending. Instead, we have been letting taxes rise precipitously, spending the revenues on down payments for new and expanded programs, and cranking up a deficit that tests the breaking point of the economy.

Where is the 5-year plan the Budget Act requires? House Congressional Resolution 559 has a 5-year projection, but these are not real numbers. The committee report says:

> These projections are not forecasts of future budget decisions of economic conditions. They are in no sense a plan for fiscal policies for future years.

Without a 5-year plan, Mr. Chairman, the Budget Act has been helping the Democrats with their spending and taxing. In the last 2 years under the Democrats, Federal income tax burden has jumped 10 percent, from 11.3 cents to 12.5 cents out of every dollar of personal taxable income. If revenues increase at the same rate as they have under the Carter administration, total Federal taxes will climb to 22 percent of gross national product by the year 1983.

The Republicans have a 5-year plan: Balance the budget in 5 years at a tax burden level equal to 18.6 percent of GNP. The Democrats are headed toward balancing taxes and revenues at 24 percent of GNP after 6 or 7 years, if we extrapolate along the current curves.

My tax cut, Mr. Chairman, is a key part of the Republicans' plan to balance the budget. I propose a cut of $10 billion deeper than the one in the pending resolution—a total cut of $38.7 billion. I am going to break that figure down for the Members in a minute.

Assuming 7-percent inflation in 1978, as opposed to the budget assumption of 6 percent—and I think this is realistic in the light of the last CPI figures—my cut would result in $440.1 billion in revenues.

For comparison, the pending resolution proposes 6-percent inflation, a tax cut of $28.4 billion, and revenues of $443.3 billion. At 7-percent inflation, the committee tax cut would yield revenues of $449.8 billion. The revenues floor does not specify what items the tax cut must comprise.

As we have seen in the past, a parliamentary point of order lies against only the piece of legislation that would cause revenue to fall beneath the floor.

For the purposes of illustration, however, let me indicate some of the items that could be contained within a $38.7 billion tax cut:

A $25 billion income tax cut that would accommodate the Kemp-Roth plan or alternative individual/corporate cuts of comparable dimensions; and a $9 billion continuation of existing tax cuts which would otherwise expire.

I think, under any circumstances, it is expected that we would enact such a cut because otherwise we would have a tax increase—$3.2 billion to check the new growth of social security taxes; $1 billion for tuition tax credits, something which I think most Members of this House expect; and $0.5 billion for various smaller measures, miscellaneous, if you like.

This is not a drastic tax cut. It is realistic. It is responsible. It actually reduces the taxpayers' burden.

Under the President's tax cut, income taxes next year would be higher in real terms than they have been in seven of the past ten years.

The Budget Committee's tax cut is $4.2 billion smaller than the President's. I think taxpayers will reel under such a burden.

Inflation and social security tax increases next year will push taxpayers into higher tax brackets unless we enact a cut of the magnitude I am proposing.

Without the tax cut, taxpayers will lose. and the Government will benefit from an inflationary tax base.

With the trend evident under the Democrats, taxes are rising faster than income. Projecting current trends from 1978 to 1982, taxable personal income would increase by 14 percent but personal income taxes would increase by 16.5 percent.

This means that under the implicit 5-year plan of the pending resolution, assuming there is a 5-year plan, many families can expect that for every 1 percent increase in their incomes, they will have to pay about 1.5 percent more in taxes.

Families between $8,000 and $20,000 income in 1978 will suffer between 3 and

4 percent loss of real income by 1982 after taxes and inflation, unless we do something about it.

The Republican 5-year plan calls for tax cuts through 1983—1979, $38.7 billion; 1980, $29 billion; 1981, $29 billion; 1982, $24 billion; and 1983, $21 billion.

These cuts will gradually bring tax levels back down to their historic total Federal tax burden of 18.6 percent of GNP.

Coupled with restrained spending, these tax cuts are fundamental to our plan for sustained economic growth without fiscal drag or inflation.

Mr. Chairman, I urge my colleagues to vote for this tax cut, for a budget procedure that works, for a well-balanced, noninflationary economy in the future.

Mr. Chairman, this is an earnest moment in the life of the Congress always when we consider the blueprint for the coming year. I regret that earnestness has not translated itself into attendance on the floor, but I hope my colleagues will consider with great seriousness the responsibility of the two-party system to present further alternative proposals, alternative blueprints, and a plan which will give the American people some choice between sound fiscal policies and a government out of control.

Mr. DERRICK. Mr. Chairman, I yield 8 minutes to the gentleman from Maryland (Mr. MITCHELL).

Mr. MITCHELL of Maryland. Mr. Chairman, this will end up my fourth year on the Budget Committee. I have seen some very interesting changes take place. I want to compliment the chairman and the members of the Budget Committee for doing some things that I was not necessarily in agreement with, but things that were a part of the mandate in the law that created us.

There were very few, if any, additions made in the markup on the first budget resolution. Very little increase was made, as compared with previous years. That seems to me to indicate the kind of sense of responsibility that should and does permeate the committee.

There are some good things in the budget. I think President Carter was very wise. He gave more money for education than his two predecessors. Not enough, but it shows our concern about education.

I am pleased that we have added on something in the area of public works. This program does work and does provide jobs.

However, then we come to a dilemma, and here is the dilemma which I, as one Member, confront and the dilemma which I think other Members confront. It is very simply this: While a part of America has begun to recover, another large segment of America has not been affected by that recovery. The dilemma lies in the fact that we have a ceiling that we have to impose.

There is a limit on the amount of money we can spend, and yet we have to recognize that there is human need out there that has to be met.

Mr. Chairman, let me put it as simply as I possibly can. One of the great tragedies to me in being caught up in this dilemma is that while white America has been put back to work, black America is still unemployed. There is no doubt but that white, adult, male employment is now at 4 percent. That is the target we set for full employment. On the other hand, black, male, adult unemployment is still close to 11 percent, more than double the white rate.

In all good conscience, how can we begin to cut from the stimulus programs that are needed to bring another large segment of our society back to work?

I will be quite candid. If the private sector had done its job—and it has not—in terms of providing work for that large segment which is still disproportionately unemployed, I would be the first in asking for cuts in the various stimulus programs. However, it has not done its job.

For that reason, the members of the round table have been meeting to discuss how we can begin to address this problem. For that reason, the recognition that the private sector has not done its job, even now the National Alliance of Businessmen is reforming again; but until the private sector can absorb those who are unemployed—and they are mostly black and mostly members of minorities—it is incumbent upon us, it is our duty, and it is our responsibility to provide an opportunity for work for people.

Coming back to the dilemma, Mr. Chairman, we now face the situation where we do not want to add onto the budget. There are still unmet human needs in jobs and in education and in health. We do not want to try to do anything to hurt anyone. We do not want to see people hurting. Yet, at the same time we are guided by those constraints.

For that reason, Mr. Chairman, to try to resolve the dilemma, I have put in the record today the transfer amendment that I will offer during the work of the House tomorrow. What I propose to do is to take some money from the military and transfer it over to meet human needs programs. We are talking about $4.8 billion in budget authority and $2.3 billion in outlays, not a large sum at all. Further, as one of my colleagues, the gentleman from California (Mr. LEGGETT), indicated earlier, there is nothing sacrosanct about the military budget.

Mr. Chairman, I think most of the Members of this House are men and women of good will who do not want to see people hurting because of a disfunctioning of the economic system.

Let us deal with some of the unobligated funds in the military budget, a paltry sum of $2.3 billion in outlays, and move to address the area of human needs which I think should be addressed.

Mr. Chairman, let me make one or two further observations.

I want to support this first budget resolution. I want very much to support it. I would hope that my transfer amendment passes, and that would certainly enhance by desire to support the first budget resolution. But, I also want to give notice to the House that if any attempt is made to add on to a military budget that is now bloated way out of proportion—if we add on to that budget, then I pledge you that I will do everything that I possibly can, as one Member, to defeat the first budget resolution.

I would hope that we would not add on. I would hope that we would transfer money out and put it into human resources. Sooner or later, my colleagues, we are going to achieve a balanced budget which the Members over here so eloquently speak about. We are going to achieve that, but I would submit to the Members that we cannot achieve a balanced budget at the price of human misery. We just cannot do that.

The sensible way to do it is to bring the total resources of this country together, the private sector, the public sector. Let us gear in on the areas of human want and human need, address those in as forceful and positive a fashion as we can, and inevitably we are going to reduce Government spending.

I again hope that there will be no add-ons for the military. I again am going to fight and plead for support of my transfer amendment, and I hope that the Members will give careful and serious reflection on what I have attempted to say here today in a very ineffective manner.

Mr. Chairman, I rise to praise the efforts of the chairman of the Budget Committee in his attempt to establish national priorities through the budget process. I must also take this opportunity to serve notice to this body that I will offer an alternative budget in the form of a substitute to House Concurrent Resolution 559. My substitute budget, commonly referred to as the transfer amendment, seeks to transfer $4.8 billion in budget authority and $2.8 billion in outlays from the military function of the budget to human services, employment creating and skill development programs. The human services area is underserved in the committee budget due basically to an 11.9-percent increase in the national defense and international affairs functions. This increase, over what this body voted for in the fiscal year 1979 budget resolution, provides a budget illusion of security through increased arms. Pentagon propaganda has again prevailed. The effective utilization of fear and insecurity has been a tool of Pentagon public relations in the past and will continue to be its foundation in support of nuclear proliferation and Federal budget waste. Intercontinental missiles, which we now employ, have the potential of destroying the world fivefold. In 2 years these systems will be obsolete, scrapped, and written off the Federal budget as a preservation of peace. I submit that an overindulgence of military muscle does not preserve peace, but instead dictates an international climate of hostility and paranoia.

I offer consideration for the transfer amendment because the 6-percent unemployment rate projected by House Concurrent Resolution 559 translates into 15 percent in the black community, 18 percent in the rural poor community, 17 percent in the teenage sector—38-percent black teenagers—and a disproportionate share of unemployment in the elderly sector. The transfer amendment

addresses these human services neglects directly through increased funding.

I include the following:

In accordance with the Congressional Budget Act of 1974, pursuant to section 301 (A) I hereby declare that for the fiscal year beginning on October 1, 1978—

(1) the recommended level of Federal revenues is $443,279,000,000;

(2) The appropriate level of total new budget authority is $567,810,000,000;

(3) The appropriate level of total budget outlays is $501,358,000,000;

(4) The amount of deficit in the budget which is appropriate in the light of economic conditions and all other relevant factors is $58,079,000,000; and

(5) The appropriate level of the public debt is $856,279,000,000, and the amount by which the statutory limit on such debt should accordingly be increased is $104,279,000,000.

Based on allocations of the appropriate level of total new budget authority and of total budget outlays as set forth above, I hereby determine and declare pursuant to section 301(a)(2) of the Congressional Budget Act of 1974 that, for the fiscal year beginning on October 1, 1978, the appropriate level of new budget authority and the estimated budget outlays for each major functional category are as follows:

(1) National defense (050):
(A) New budget authority, $122,611,000,000;
(B) Outlays, $112,854,000,000.
(2) International affairs (150):
(A) New budget authority, $10,990,000,000;
(B) Outlays, $6600,000,000.
(3) General science, space, and technology (250):
(A) New budget authority, $5,216,000,000;
(B) Outlays, $6,600,000,000.
(4) Energy (270):
(A) New budget authority, $9,494,000,000;
(B) Outlays, $9,252,000,000.
(5) Natural resources and environment (300):
(A) New budget authority, $13,364,000,000;
(B) Outlays, $12,013,000,000.
(6) Agriculture (350):
(A) New budget authority, $12,297,000,000;
(B) Outlays, $12,188,000,000.
(7) Commerce and housing credit (370):
(A) New budget authority, $6,300,000,000;
(B) Outlays, $3,900,000,000.
(8) Transportation (400):
(A) New budget authority, $20,798,000,000;
(B) Outlays, $17,834,000,000.
(9) Community and regional development (450):
(A) New budget authority, $16,651,000,000;
(B) Outlays, $10,491,000,000.
(10) Education, training, employment and social services (500):
(A) New budget authority, $36,262,000,000;
(B) Outlays, $33,301,000,000.
(11) Health (550):
(A) New budget authority, $52,302,000,000;
(B) Outlays, $49,728,000,000.
(12) Income security (600):
(A) New budget authority, $192,844,000,000;
(B) Outlays, $159,589,000,000.
(13) Veterans benefits and services (700):
(A) New budget authority, $20,711,000,000;
(B) Outlays, $20,471,000,000.
(14) Administration of justice (750):
(A) New budget authority, $4,200,000,000;
(B) Outlays, $4,214,000,000.
(15) General government (800):
(A) New budget authority, $4,022,000,000;
(B) Outlays, $4,059,000,000.
(16) General purpose fiscal assistance (850):
(A) New budget authority, $9,098,000,000;
(B) Outlays, $9,237,000,000.
(17) Interest (900):
(A) New budget authority, $47,000,000;
(B) Outlays, $47,000,000,000.
(18) Allowances (920):
(A) New budget authority, $1,050,000,000;
(B) Outlays, $1,000,000,000.
(19) Undistributed offsetting receipts (950):
(A) New budget authority, —$17,500,000,000;
(B) Outlays, —$17,500,000,000.

Mrs. HOLT. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I too, commend our chairman and our ranking minority member, and all the members of the committee. We have worked hard; it has been a hard job.

Mr. Chairman, it is too bad that we are not more concerned about the economic health of our country and the well-being of our people. Mr. Chairman, we must have an alternative to the 1979 budget recommended by the House Budget Committee.

The $19.4 billion tax cut proposed by the committee majority is woefully inadequate to offset the economic damage wrought by inflation and the inflationary rise of taxation.

The committee majority has recommended an 11-percent growth rate of Federal spending in 1979 with a $58 billion deficit which is highly inflationary.

There is nothing in the committee's budget that addresses the critical need for capital formation and investment in production and the creation of productive jobs. There is nothing that promises relief for middle-income taxpayers.

Mr. Chairman, with expert help from the excellent Budget Committee staff, I have spent weeks working on an alternative budget that I will offer as a substitute for the committee's product. It provides for a bigger tax cut and a lower deficit.

It would slow the growth rate of Federal spending to a moderate 7.7 percent, but it provides sufficient funds to carry current Federal programs through 1979.

If we accept the Budget Committee's recommendation, Federal spending will have increased at an average annual rate of 11 percent in a 3-year period. This represents a rapid acceleration from the average growth rate of 9.5 through the previous 7 years.

The Budget Reform Act of 1974 has not provided discipline, because discipline can be achieved only if Congress demonstrates self-restraint, which it has utterly failed to do. Before the Budget Reform Act, Federal spending was increasing on an average of 7.1 percent a year. Since then, we have experienced a double-digit growth rate.

My budget recommendation provides for ample growth and in true zero-base budgeting new programs can be funded by drawing money from ineffective programs.

My budget assumes tax reductions of $29.7 billion, which is enough to provide some real relief to taxpayers and stimulate healthy economic activity. The prime sponsor of the tax reduction package is our colleague from New York (Mr. CONABLE), the ranking minority member of the Ways and Means Committee and an extremely valuable member of the House Budget Committee.

The deficit in my stubstitute budget would be $48 billion, which is some $10 billion less than the deficit in the committee budget.

Mr. Chairman, this Congress has a habit of extravagant spending that stimulates consumer demand, but ignores the need for investment in production and the creation of productive jobs. That is a formula for high inflation and high unemployment.

A major tax cut across-the-board however, not only leaves taxpayers with more spendable income, but also leaves them with more money to save and invest. That is the most critical need of our economy.

We should also understand that a lower budget deficit relieves pressure on the capital markets and produces lower interest rates. A moderation of interest rates is essential to stimulate industrial modernization and construction of new plants.

But achieving these things will require discipline in the Congress. We must have the discipline to take less from the private sector to promote strong and noninflationary economic growth.

I do not believe the Federal budget process was created to add up wish lists. We enacted the Budget Reform Act of 1974 because we wanted to discipline our spending habits.

I commend my colleague, Mr. BURGENER, for his efforts to get this committee to consider aggregates. I urge my colleagues on both sides of the aisle to support our legislation H.R. 12345 to assure two-step consideration.

Mr. Chairman, on both sides of the aisle are many who will reject any attempt to restrain spending. They will reject even a responsible and moderate budget.

And my own side of the aisle includes many who would be content to just rant against and vote against the committee budget without offering a responsible alternative.

I believe the economic crisis in our country is too serious for politics-as-usual. That is why I am offering an alternative to the committee budget, as a start on a downward trend toward a balanced budget within 4 years with lower taxes, as Mr. CONABLE said at 18.6 percent of GNP. I heard Mr. Strauss, the President's inflation fighter, say that we have to break the spiral of inflation, we have to stop the climb.

This substitute budget would be a terrific beginning.

Just last week Chancellor Helmut Schmidt of the Federal Republic of Germany said it was time for the United States to assume the responsibility of leadership in the world economy.

I am open to criticism from some sources because my budget does not promise an abundance of tax dollars for new or expanded programs. I am criticized from others because I do not offer an immediate balanced budget, although I am moving in that direction.

We have been hearing for years about plans to balance the Federal budget in 3 or 4 years. The Budget Act requires a 5-year plan, but we never seem to move in that direction. The balanced budget is always out there in the future some-

where. I would like to do it in 1 year. It cannot be done, but now is your chance to slow the growth of Government. The budget can be balanced if we start now.

It is nice to promise something, but we only gain credibility when we start to fulfill the promise. Tomorrow I will offer this substitute budget below, which offers the chance for a start:

[In billions]

	House Budget Committee	Holt substitute
Revenues	$443.3	$440.1
Budget authority	568.2	546.8
Outlays	501.4	488.3
Deficit	58.1	48.2

I urge the support of Members for this budget.

Mr. GIAIMO. Mr. Chairman, I yield 10 minutes to the gentleman from Ohio (Mr. STOKES).

Mr. STOKES. Mr. Chairman, at the outset I would like to take this opportunity to commend the gentleman from Connecticut (Mr. GIAIMO), the chairman of the full Committee on the Budget, for what I believe has been an outstanding job in guiding the full Committee on the Budget through some very difficult times in terms of the budget. I think he has done an exemplary job in that respect.

Mr. Chairman, as chairman of the task force, I rise to explain the provisions of the first budget resolution for fiscal year 1979 for programs in the physical and community resources areas.

A number of the most difficult programs and the most challenging opportunities contained in the budget for 1979 are within these two areas. For example, the budget resolution considers our agricultural programs within the physical resources area. The budget for agricultural programs has posed more significant problems for this year and last than any other area. We have seen the budget for agriculture rise from an initial estimate of $2.3 billion only a little over a year ago: today, the agriculture budget may be as much as $12.2 billion, although we hope to be able to reduce that figure to about $10.5 billion. In any event, the agriculture budget is almost five times our estimate of a year ago. Members are familiar with these problems. In the community resources field, the Budget Committee has met some of its greatest opportunities. The President presented his program for urban initiatives only a month ago. The Budget Committee has determined, Mr. Chairman, to include in its recommendations to the House the full amounts of budget authority and outlays proposed by the President: $4.4 billion of budget authority and $732 million of outlays. In addition, the committee recommendations include funds for fiscal relief to States and local governments in connection with the President's recommendation for welfare reform. I would like to outline for the benefit of Members the major provisions of the recommended budget resolution in each functional area in the physical and community resources field.

PHYSICAL RESOURCES

FUNCTION 250. GENERAL SCIENCE, SPACE, AND TECHNOLOGY

For function 250, general science, space, and technology the budget resolution provides $5.2 billion in budget authority and $5.0 billion in outlays. These levels are substantially the same as recommended by the President and reflect modest increases in real resources over fiscal year 1978. I commend the President and my colleagues on the Budget Committee for recognizing that a strong investment in this area is essential to maintaining our dominant technological position in the world.

FUNCTION 270. ENERGY

For function 270, energy, the resolution provides $9.5 billion in budget authority and $9.3 billion in outlays. In general terms, the Budget Committee continues to consider this area to be one of the highest priorities in the budget. The resolution provided substantial funding to accommodate current efforts by the administration and Congress toward minimizing our dependency on foreign oil during the course of the debate. A more detailed explanation of this area will be offered by my colleague from Ohio, Mr. ASHLEY.

FUNCTION 300. NATURAL RERSOURCES AND ENVIRONMENT

For function 300, natural resources and environment, the resolution provides $13.5 billion in budget authority and $12.0 billion in outlays. I would like to highlight some of the areas within this function for which the House has demonstrated a particular interest.

First, in the area of water resources, the resolution recommends an allowance of $400 million in budget authority and $200 million in outlays above the President's budget. This allowance restores budget authority for these programs to approximately the 1978 level and is generally in line with the views and estimates of the committees having jurisdiction over these programs. In recommending this allowance, the committee recognizes that the executive branch and Congress have conflicting philosophical approaches to authorizing and funding water resources programs. We hope these differences can be worked out. The President's forthcoming water resources policy recommendations may be an appropriate starting point toward this end.

Second, the resolution provides $300 million in budget authority and $200 million in outlays above the President's recommendation for agricultural conservation and forestry programs. Presidents over the last two decades have proposed termination or reducing the various agricultural conservation programs. In each case, however, the Congress restored funding and indicated strong support for these programs. Judging from the March 15 views and estimates from the House committees, the President's proposed reductions in the year's budget are not likely to be approved.

In the area of forestry, the Budget Committee noted that the Resource Planning Act (RPA) requires an annual assessment and recommendation with respect to resources needed to achieve sustained yields and to meet other national forestry objectives. For fiscal year 1978 the Congress increased the funding for forestry programs to 85 percent of levels recommended in the RPA study. The President's proposed fiscal year 1979 funding is significantly below the amounts necessary to maintain this level of effort.

Third, the resolution provides a general allowance over the President's budget of $100 million in budget authority and $50 million for other natural resources and environmental programs. The committees having jurisdiction over the programs in this functional category recommended allowances for several legislative initiatives that are in various stages of consideration, as well as for increases above the President's budget for ongoing programs. The resolution allowance will accommodate some, but not all of these new initiatives and other increases above the President's budget. Let me point out that this rather modest allowance is not intended to foreclose the further consideration of any of the particular programs suggested to us by the various committees. To the contrary, the allowance is intended to provide with the framework and the flexibility for the House to determine its priorities and fund those initiatives of highest priority.

FUNCTION 350. AGRICULTURE

For function 350, agriculture, the resolution provides $12.3 billion in budget authority and $12.2 billion in outlays. I think we are all aware of how volatile the estimates in this function have been in recent years. Later, my colleague from Illinois, Mr. SIMON, will offer a more detailed explanation of the resolution recommendations in this area.

COMMUNITY RESOURCES

FUNCTION 370. COMMERCE AND HOUSING CREDIT

For commerce and housing credit programs, the Budget Committee recommendations include $6 billion of budget authority and $3.7 billion of outlays.

The committee carefully considered the President's recommendations in connection with Government-assisted mortgage financing for low- and middle-income housing. The President recommends a $2 billion program of low-income housing mortgage purchases by the Government National Mortgage Association through a new targeted tandem approach. In order to fund this program—which has begun this year—the President recommended an additional $1.5 billion in budget authority. There would be almost no outlays associated with this program in the first year, because of the time lags inherent in the mortgage financing process. Taking into account the recommendations of the Banking Committee and the Appropriations Committee—both of which endorsed the President's program—the committee recommends that funding for the program be derived from repayments and other credits to the GNMA fund rather than from new budget authority. There should be sufficient funds available in the revolving fund to carry out the $2 billion targeted tandem program during fiscal years 1978 and 1979 without any net additions to the budget.

The committee recommends that funds be included for the proposed system of national consumer cooperative banks, consistent with House passage of the authorizing legislation late last session. We understand that the Senate is actively considering this bill. The President has indicated his support for the bill and it seems certain of enactment.

One of the potentially most useful of the energy initiatives incorporated in the forthcoming conference report on energy legislation is the proposal for low-interest-rate loans to homeowners who have less than median incomes in order to help them install energy-saving methods and materials in their homes. The energy legislation will authorize a $3 billion loan program. The recommended budget resolution will provide a first $500 million installment for these loans.

The budget resolution provides $1,830 million for subsidies to the U.S. Postal Service. This is the full amount authorized under existing law. It includes the special subsidies to certain second-, third-, and fourth-class mailers to assist them in accommodating to increasing postal rates. The committee recommendation does not provide for new postal subsidies.

One further area in the commerce and housing credit function deserves mention. The recommended resolution provides additional funds for the business-loan programs of the Small Business Administration at the amounts recommended in the President's budget. I would be less than candid, Mr. Chairman, if I did not indicate that I am personally disappointed in this specific recommendation for SBA. The program of the President anticipates placing increased reliance upon the use of guaranteed private bank loans to small businesses, with lesser reliance upon direct loans. Although guaranteed loans may make good sense when dealing with long-established businesses with acceptable credit ratings, they are less well suited to the special needs of young, struggling small businesses, especially those with minority owners. To my mind, these are the small businesses most in need of Government technical and financial assistance and the SBA program should be primarily directed to their needs.

FUNCTION 400. TRANSPORTATION

In the area of transportation, the House Budget Committee recommendation for function 400 provides $20,298 million in budget authority and $17,809 million in outlays. This reflects an increase of $1,725 million in budget authority and $410 million in outlays over the President's request.

The recommended increases reflect essential program needs and the impact of inflation, particularly in the major construction programs.

The largest increase recommended is $675 million in budget authority and $345 million in outlays for mass transportation. This recommendation includes funding for the Washington Metro system which the President failed to include in his request. The President's request also failed to include funding for the commuter subsidy program which was approved by the Congress earlier this year. In addition, the increase recommended by the committee would provide additional Federal support of mass transportation capital and operating programs. The President's proposed level of funding would have restricted new capital starts to one additional city and would have frozen the current level of operating aid despite the heavy impact of inflation and the expansion of services allowed by increased operating aid. This year, the Budget Committee's task force on community and physical resources, which I chair, held hearings on the Federal highway and mass transportation programs. The mass transportation funding recommendation of the full committee recognizes the importance of mass transportation as an energy-efficient mode, as an alternative means of transportation for the poor, the elderly, the young and other nonautomobile owners, and as a key to providing balanced, land, economic, and transportation development between cities, suburbs, and surrounding areas. The Federal mass transportation programs have reversed years of declining patronage and service levels. We can continue these efforts and fulfill the national transportation policy goal of a balanced transportation system, but only if we provide the necessary funding.

In the Federal highway area the committee recommends a modest increase of $300 million in budget authority. This increase would allow for some program expansion to provide for the basic construction and maintenance needs of our national road and bridge network. The proposed increase recognizes the growing maintenance needs of our roads and bridges due to the aging of our facilities, severe winter weather effects and greatly increased usage. Although proposals have been made for multi-billion funding increases for road and bridge work, the committee recommendation reflects the limitations placed on the program by the availability of revenues from the highway trust fund. The committee believes that sound budgetary practice requires that program expansions be directly related to known available revenue sources. The committee also recommends increased spending for enforcement of truck safety and weight statutory requirements and enforcement of the 55 miles per hour national speed limit to enhance the safety of our citizens and to maintain and protect the massive Federal commitment to date for roads and bridges.

The committee is also recommending $570 million in budget authority and $510 million in outlays for railroad programs with the bulk of the funds earmarked for ConRail and Amtrak. The failure to provide adequate funds for ConRail could well result in the general breakdown of rail service in the Northeast and Midwest, with disastrous economic effects and substantial Federal financial liabilities. Insufficient funding for Amtrak would likewise result in severe service curtailments with parts of the country having no rail passenger service whatsoever.

The transportation increases recommended by the committee are absolutely essential if we are to provide adequate and safe transportation facilities and programs for the Nation. The failure to provide adequate funding for our national transportation needs can only result in disastrous economic dislocations and substantially greater future expenses to recreate neglected and lost services.

FUNCTION 450. COMMUNITY AND REGIONAL DEVELOPMENT

The committee's recommendations for community and regional development programs provide $15.3 billion in budget authority and $10.3 billion in outlays.

Mr. Chairman, I want to immediately bring to your attention the fact that the committee has incorporated all funding for new or expanded urban programs in this function. This was merely a convenient way to treat a group of proposals that have not yet been considered by the House. My colleague from New York (Ms. HOLTZMAN) will speak further on this issue.

The recommended level of spending will allow the Congress to fully fund the President's request for $4.4 billion in budget authority for urban initiatives. The committee also recommends an additional $400 million to provide continued welfare fiscal relief to States.

The committee recommendation includes $2 billion to continue the (accelerated) local public works program in order to provide continued job stimulus. Mr. Chairman, this $2 billion is in addition to the $1 billion proposed by the President for a "soft" public works program.

The committee's recommendations provide increases above 1978 funding levels for economic assistance programs, rural and regional development programs and for the community development block grant program. I am not fully satisfied with the committee recommendation in rural development programs and support any efforts made to boost its mark.

FUNCTION 750. ADMINISTRATION OF JUSTICE

The committee recommends $4.2 billion in budget authority and $4 billion in outlays for programs in this function. The recommendation provides funding increases for all Justice Department programs requested by the President. These increases will allow the hiring of additional FBI, drug enforcement, and other crime prevention staffs. Funding for the law enforcement assistance administration is included at the $641 million level requested by the President.

The committee recommendation provides increased funds for the Legal Services Corporation ($304 millon) and for the Equal Employment Opportunity Commission ($115 million).

FUNCTION 800. GENERAL GOVERNMENT

The Budget Committee's recommendations in the general Government functional area are $4,022 million of budget authority and $4,059 million of outlays.

In this area, Mr. Chairman, the Budget Committee determined that a cut of 2 percent in requested appropriations would be possible. Almost all of the funds provided in this functional area go to salaries of Federal employees. The committee believes that the Appropriations

Committee, in their usual painstaking review of agency estimates, will find ample opportunities within this function for marginal reductions in the number of Government employees and thus in the funds needed for salaries and expenses. Indeed, Mr. Chairman, I understand that the tentative subcommittee mark-ups within the Appropriations Committee are doing as we expected.

FUNCTION 850. GENERAL PURPOSE FISCAL ASSISTANCE

The committee recommends $9.1 billion in budget authority and $9.2 billion in outlays for activities in this function.

Major activities funded are the general revenue sharing program at $6.9 billion and antirecession fiscal assistance funded at $660 million. The committee includes an additional $400 million in function 450 to fund the proposed supplementary fiscal assistance program at $1.04 billion if required.

FUNCTION 900. INTEREST

In the interest functional area, the committee's recomendations are for $47 billion of budget authority and outlays.

The principal item in this area is, of course, the interest on the national debt. The interest bill in 1979 is estimated to be $53.2 billion, based on the budget deficit recommended in the resolution and upon an assumed interest-rate structure incorporating a 6.5-percent interest rate on short-term Treasury securities. Anticipated interest payments into the Treasury by other Government agencies, in connection with their borrowings to support loan programs and similar activities, reduce the interest function on a net basis to $47 billion.

FUNCTION 920. ALLOWANCES

For convenience, the funds that will be required for higher salaries for employees of civilian agencies are presented on a consolidated basis in function 920, allowances. The amounts recommended in the resolution are $1,050 million of budget authority and $1,000 million of outlays.

The estimates and recommended totals in this resolution are sufficient to provide for a 6-percent pay increase. After the Budget Committee had finished its work this year, the President announced that he intended to propose a 5.5-percent pay increase rather than the 6 percent indicated in his January budget submission. I understand that one of my colleagues on the Budget Committee, the gentleman from Texas (Mr. MATTOX) expects to offer an amendment to reduce the amounts in the resolution to reflect a 5.5-percent pay cap.

I should point out, Mr. Chairman, that this function includes one of the Budget Committee's recommended savings through new legislation. The budget resolution, again this year, endorses the President's recommendation, that the system for setting pay of Federal blue-collar workers be revised. This will, of course, require introduction of appropriate legislation, hearings by the Post Office and Civil Service Committee, and the framing of a suitable bill for our consideration here on the House floor. I understand that hearings have been held in the Post Office Committee, but that the committee is not yet in a position to report a bill.

FUNCTION 950. UNDISTRIBUTED OFFSETTING RECEIPTS

A number of items which cannot reasonably be distributed to the other functional areas are treated in the aggregate within the unified budget, referred to as undistributed offsetting receipts. The committee's recommendation includes net receipts of $17.5 billion for these items, which act to reduce the aggregate total of budget authority and net outlays.

For two of these items, agency payments to retirement funds and interest earned by trust funds, the amounts are included here to avoid double-counting within the unified budget as a whole.

The third item, rents and royalties from the Outer Continental Shelf, represent the receipts into the Treasury from oil and gas development off our Atlantic, gulf, and Pacific coasts. The estimates have been prepared by the Congressional Budget Office based upon the administration's announced schedule, and taking into account the effects of pending Outer Continental Shelf legislation.

Mrs. HOLT. Mr. Chairman, I yield such time as he may consume to the minority leader, the distinguished gentleman from Arizona (Mr. RHODES).

Mr. RHODES. Mr. Chairman, the Democrats have observed the letter of the law but have completely ignored the spirit of the Congressional Budget Act of 1974. The budget resolutions sponsored by the Democrats have always been reported out in the proper format and on the proper dates, but they have not once attempted to comply with the most essential requirements of the act; namely, those of establishing the appropriate fiscal policy for the Government and then setting spending and taxing priorities.

In the past the Republicans have attempted to alter bits and pieces of the budget resolutions, often resorting to complete substitute resolutions in an attempt to alter the business-as-usual approach of the Democrat controlled Congress. This year, however, we are refusing to play the game according to their rules. Instead we are demanding that the original rules—those set forth in the Congressional Budget Act—be adhered to throughout the deliberations on the first concurrent resolution on the fiscal year 1979 budget. This means that the Congress will be called upon to first set the Nation's fiscal policy (that is, the desirable levels of revenues and spending), then turn to the matter of setting priorities by debating how to distribute the preestablished spending limitation among the various functional categories. Moreover, we will abandon the 1-year-at-a-time budgeting of the Democrats and propose inclusion in the budget report of a detailed 5 year plan which will result in both a balanced budget and significant tax relief. Our plan represents Republican goals for spending and taxing over time; the plan shows clearly where our party would go if in power. The Democrats have no goals; indeed, they have no meaningful budget process.

THE DEMOCRATS' PROBLEM

The primary justification for creating the new congressional budget process was the widespread realization the Congress was making its spending decisions in a piece-meal fashion, with each spending bill being considered separate without any regard to fiscal policy and with absolutely no idea of how much Congress would eventually end up spending in a given year. New programs—especially so-called entitlement programs—were passed with low first year costs but with enormous costs in future years which future administrations and Congresses are helpless to prevent. There was, in effect, no congressional budget whatsoever; indeed, appropriations bills for some fiscal years were not passed until well into the year, so the fiscal year was nearly over before it could be determined what total Government spending would be. Government spending decisions most certainly had a sigificant fiscal impact, but this impact was not intentional, merely accidental.

The new congressional budget process was supposed to fix all this. Well before the next fiscal year was to start, and in advance of all the appropriations bills for that year, the Congress was to study the expected condition of the economy and then set a fiscal policy that would mesh most closely with the needs of the economy. A tentative floor on revenues and a ceiling on expenditures would be set at that time, and the agreed-upon spending total would then be allocated among the functional spending categories. As Republicans we applauded this approach at the time the Congressional Budget Act of 1974 was being considered, and to this day we believe it is in the best interest of this country.

Unfortunately in every year since the passage of the act, the Democrats have refused to live up to the mandate of the law. While the periodic appearance of budget resolutions on the House floor give the appearance that things have changed, in fact, spending decisions are being reached in exactly the same way they always were. In short, the Democrats have abdicated their responsibility to set fiscal policy.

To the Democrats in Congress, budgeting requires only an adding machine without a subtract button. Nowhere in the Democrat-engineered budget process does a fiscal policy appear. Instead, they first vote seriatim on how much they would like to spend in all the major governmental programs; they then add up this wish list and take the resulting total and call that the appropriate level of Federal spending. By working backward like this, the Democrats deny the Congress the right to establish a fiscal policy. Moreover, by starting with how much they would like to spend, it is not surprising that they impart an ever increasing momentum to spend more and more. For example, the rate of increase in Federal spending from 1969 to 1974 (pre-Budget Act) was 7.1 percent; since adoption of the congressional budget process, the annual rate of increase in spending

has averaged 13.3 percent. If one takes the budgets for fiscal years 1977–79, all years of economic recovery, we see spending has increased at an annual rate of 11.1 percent. Accordingly, the size of the deficit has gone from $45 billion to $53 billion to $58 billion, even though the most ardent Keynesians admit the deficits should be declining to reflect the strong growth of the private sector.

The Democrats' dilemma is understandable: every Federal spending program is favored by a majority of House Members (otherwise it would not exist), and as a consequence there will never be enough votes to do anything but increase funding for each and every program. The only way to break out of this vicious cycle is to decide first how much the Government will spend in total, then work out how much of this total will go to each and every spending program; this is fundamental to any budget. The average family prepares a budget by first determining how much it can spend, then it divides up that amount among all the various elements in their budget. The Federal Government is no different; it must decide how much it should spend for the good of the economy (that is what we mean by fiscal policy); only after it has set this total can it realistically determine how much should be allocated to any one program or function. Sadly, the Democrats have yet to realize this. The result has been that Federal spending and Federal taxes have actually accelerated since the Congressional Budget Act has been in existence. The Democrats do not set priorities (priorities are set by dividing up a fixed resource among many competing demands; the Democrats keep expanding the size of the resource—tax dollars and borrowed dollars—so they are not forced to choose between competing demands) and they do not set fiscal policy (their "fiscal policy" is merely a byproduct of their individual spending decisions).

THE REPUBLICAN PLAN

Part 1. Fiscal policy and spending priorities: We will first demand that the House commit itself to establishing a fiscal policy in advance of considering any of the functional spending categories. This means setting the levels of revenues, budget authority, outlays, deficits or surplus, and national debt which are most appropriate for the state of the economy in the coming year. Once these five aggregate categories are accepted, the spending levels for each of the functional categories must be made to conform with the aggregates. In the past, the Democrats have done it backward, making the aggregate fiscal policy measures conform to the spending functions. For the first time Members of Congress would be required to do what they were elected to do: make hard, tough, and agonizing decisions between many valuable, worthwhile programs. We Republicans will bite the bullet; the Democrats are not even willing to lick it. Perhaps we can force them to do so.

Part 2. Agenda for the future: Along with our demand that the House first set fiscal policy, then set spending priorities, we will set forth a 5-year program which will lead the country to a balanced budget and significant tax relief. These two items must go hand in hand. Under the Democrats, the Federal income tax burden has jumped 10 percent—from 11.3 cents to 12.5 cents of every dollar of personal taxable income—in just the past 2 years alone. Coupled with this we have had rapidly escalating Federal spending and growing deficits. The Democrats tell us they want to balance the budget, but only by increasing the tax burden on the American taxpayer. Our plan to return economic sanity and sustained economic growth to this country relies on three goals:

First. Gradually returning the Federal tax burden to its historic level of 18.6 percent (revenues as a percent of gross national product);

Second. Restraining the growth in Federal spending; and

Third. Balancing the budget at the desired level of taxation.

CHOICE NO. 1—REPUBLICAN PROGRAM FOR THE FUTURE

Ideally we would like to be able to present a budget for 1979 that was both in balance and provided for substantial tax relief. Unfortunately the Democrats have created a budget which is literally out of control, and it will take Herculean efforts to wrestle it down to size. We are therefore proposing a program, starting in 1979, which will systematically lead to both a balanced budget and much lower tax rates 4 years later. This program, which is depicted on charts I, II, and III, involves holding spending increases to an annual average of 6 percent coupled with annual tax reductions aimed at bringing the overall tax burden on the economy back to 18.6 percent of the gross national product—the rate which prevailed from the end of the Korean war through President Ford's last year in office—under President Carter, the Federal Government has increased its tax take to 19.4 percent of GNP.

Restraining the growth of Federal outlays to 6 percent a year will require that many tough, but not impossible or unrealistic, decisions be made. Basically it will require that obsolete or inefficient programs be phased out to provide funding for new or expanded initiatives. It will mean that we cannot routinely grant cost-of-living increases for every Federal program. Nonetheless, a 6-percent growth rate is sufficient to cover increases in programs which are indexed or mandated by current law with enough left over to provide generous funding increases for other high priority national programs and missions.

The growth we forecast in gross national product is roughly equivalent to current GNP projections being made by the major econometric models. It is a growth rate consistent with the goal of reducing unemployment to below 5 percent by 1983; likewise we project that inflation would fall from the current 7 percent range to below 5 percent during this same period.

Finally, we would provide annual tax cuts of the magnitude necessary to carry out the objectives of the Kemp-Roth concept, to wit:

Tax cut

[Dollars in billions]

Fiscal year:	
1979	$38.7
1980	29.0
1981	29.0
1982	24.0
1983	21.0

These continual tax cuts are fundamental ingredients in our blueprint for renewed and sustained economic growth. Inflation has succeeded in pushing all Americans into progressively higher tax brackets, with the effect being to actually reduce the real purchasing power. This has not only been an increasing drag on the economy, but it has discouraged the investment, initiative, and risk taking necessary to produce the substantial real growth necessary to reduce unemployment to acceptable levels. We are convinced that the prospects and promise of large, annual tax cuts will have a strong stimulative impact on the economy, and will, in turn, lead to an increase in Government revenues.

Charts I, II, and III—not reproduced—also present a probable scenario should the Democrats continue to control both the Congress and the White House through 1983. The GNP projections are based on the so-called high growth path as set out in appendix B of the report on the first concurrent resolution for fiscal year 1979. The outlay and revenue projections are based on the average growth rates of these functions during the 3 fiscal years for which President Carter has submitted, or revised, budgets (fiscal years 1977, 1978, and 1979). During this period receipts are expected to grow at an annual rate of 13.3 percent. Built into this projection is the assumption that very modest tax cuts—like the 1977 cut—will be enacted every 2 or 3 years. Although the rate of revenue increase is substantial—due to the impact of inflation and the progressive tax structure—it will not be sufficient to bring the budget into balance by 1983 if the growth in outlays continues at the rate it has during the current economic recovery.

Based on the current spending rates for fiscal years 1977–79, outlays can be expected to increase 11.1 percent each year through 1983. There is good reason to expect that this rate of increase to be at the low end of what is probable since this is a rate which has been maintained during 3 years of strong economic recovery—a period which should show the lowest rate of spending increases. Moreover, during this 1977–79 period, total available budget authority—the total of new budget authority enacted each year plus unexpended budget authority carried over from previous years—has been growing at an annual rate of 13.4 percent. This figure is substantially higher than the 10.2 percent annual increase in available budget authority we have averaged since 1963. While this may appear to be very technical, what we are saying is that since Mr. Carter became President, the authority for Federal agencies to spend money—"budget authority"—has been growing 31 percent faster than it did before he became President. And based

on past experience, any time the growth in available budget authority exceeds the historical average, actual spending—"outlays"—will increase markedly a year or two after. It is not unreasonable, therefore, to expect that under a Democratic President and a Democratic Congress, spending will continue into the future at as fast a pace as it has during the past several years.

The impact of a continuation of these Democratic taxing and spending policies can be seen on the accompanying charts. Under the Democrats, taxes will grow to the point where they absorb 22.1 percent of GNP in 1983 even with periodic tax cuts of the magnitude they are considering this year. This is a record-high tax burden—remember, the Republican program will result in a return to the historic average tax burden of 18.6 percent of GNP—but even so it will not result in a balanced budget because by 1983, outlays will equal 23 percent of GNP. The resulting deficit in 1983 will be $33 billion if the Democrats continue along their present course.

One final note: As Republicans we cannot condone the $49 billion deficit which would occur in 1979 under the Republican program, and we are not pleased that a balanced budget is not achieved until 1983. However, the budgetary decisions made by the Democrats during the 1970's, and especially the last 2 years, have created a juggernaut which simply cannot be brought under control in 1 or 2 years.

[Dollars in billions]

	1979	1980	1981	1982	1983
Republican 5-year alternative:					
Fiscal year GNP	$2,261	$2,514	$2,783	$3,053	$3,327
Growth rate	10.2	11.2	10.7	9.7	9.0
Receipts	$440	$479	$522	$569	$619
Percent GNP	19.5	19.1	18.8	18.6	18.6
Growth rate	9.8	9.1	9.0	9.0	8.8
Outlays	$488	$517	$548	$581	$616
Percent GNP	21.6	20.6	19.7	19.0	18.5
Growth rate	7.7	5.9	6.0	6.0	6.0
Deficit	−$48	−$38	−$26	−$12	+$3

	1979	1980	1981	1982	1983
Democratic 5-year path:[1]					
Fiscal year GNP	$2,261	$2,514	$2,783	$3,053	$3,327
Growth rate[2]	10.2	11.2	10.7	9.7	9.0
Receipts	$443	$502	$569	$645	$731
Percent GNP	19.6	20.0	20.4	21.1	22.0
Growth rate	10.5	13.3	13.3	13.3	13.3
Outlays	$501	$557	$619	$688	$764
Percent GNP	22.1	22.2	22.2	22.5	23.0
Growth rate	10.6	11.1	11.1	11.1	11.1
Deficit	−$58	−$55	−$50	−$43	−$33

[1] Democratic path spending and taxing growth rates are based on the 1977–79 historical average.
[2] GNP growth rates over the 5 years average 4 percent in real terms and are basically similar to the projections made by the Carter administration, the Democratic majority on the House Budget Committee, and privately sponsored macroeconomic models.

Mr. STRATTON. Mr. Chairman, will the gentleman yield?

Mr. RHODES. I yield to the gentleman from New York.

Mr. STRATTON. Mr. Chairman, the gentleman indicated there would be a tax cut in the gentleman's program this year of $35 billion and in the following year a tax cut of $29 billion?

Mr. RHODES. It would be $38.7 billion in fiscal year 1979.

Mr. STRATTON. Is that $38.7 billion?

Mr. RHODES. $38.7 billion in fiscal year 1979.

Mr. STRATTON. Do I understand that at the end of the 5-year program, then, we would have a total reduction of something over $100 billion?

Mr. RHODES. It adds up to over $100 billion, that is correct.

Mr. STRATTON. If the gentleman will yield further, according to the very eloquent and distinguished gentleman from New York (Mr. KEMP), the idea is, as was the case in 1964 and 1965, a reduction in taxes will produce an increase in revenue.

Mr. RHODES. That is correct.

Mr. STRATTON. Suppose that increase for some reason or other does not come about in calendar year 1979 or does not come about in 1980 and, therefore, we are faced with an increasingly greater deficit. Does the gentleman suggest that we should go further into the red, and does the gentleman have any assurance, any evidence, that would indicate that this response that occurred back in 1964 and 1965 will in fact occur in 1979 and 1980?

Mr. RHODES. I say to my good friend, the gentleman from New York (Mr. STRATTON) that, of course, there is no assurance that anything will happen. I could not even assure the gentleman that the Sun will come up tomorrow. But we have to look at these things in the light of the experiences that we have had. The gentleman has already mentioned the tax cut which occurred in the Kennedy administration. I think the gentleman will recall at that time many of us, including the gentleman from Arizona, said that this was not responsible, that there should not be a tax cut in the face of a budget deficit. I have to admit that I was proved to be wrong, because the very first year of the Kennedy tax cut the revenues actually did increase. There never was a dip in revenues.

We think that the economic situation now is so similar to that of the period of 1963 and 1964 that, almost without doubt, but certainly probably, the phenomenon or, rather, I should say, the normal projection which the gentleman from New York (Mr. KEMP) has so ably set forth will occur, and we will find that we will not only work toward a balanced budget, but toward an economy which is going, hopefully, full blast.

Mr. STRATTON. If the gentleman will yield to me again, since the gentleman from Connecticut has indicated to us that something like 75 percent of the budget cannot readily be adjusted and is not subject to appropriations, would it not perhaps be wiser for the gentleman to suggest a tax cut in one year but make the tax cut that he is proposing in subsequent years contingent upon whether the so-called increase in revenues does develop? Otherwise we are going to see what the Senator from Tennessee, Mr. BAKER, said on television a couple weeks ago, we are going to see a really bruised deficit that we are going to have to live with. And I do not think the gentleman from Arizona would want that any more than I would.

Mr. RHODES. Of course not. And I think my good friend from New York is well aware that we cannot offer this plan as an amendment. There is no way one Congress can bind Congresses 5 years in the future. What we are doing is offering a plan. We wish the majority would offer a plan. So far as we can tell, the majority members of the Committee on the Budget have not offered any kind of a 5-year projection. There are some iffy remarks, but then in one part of the report they deny that they have actually made a projection. We wish they would. We think that it is important that the people of the country know where they are going. We think the gentleman is absolutely correct. If it turns out that our plan were to be adopted—and I am sure the gentleman is no more naive than I am; I know it will not be adopted because we do not have the votes—and it turned out to be a debacle, and I am sure it would not, but if it would, I am sure we will have to look to the future and make plans accordingly.

Mr. STRATTON. Mr. Chairman, I thank the gentleman.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. RHODES. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, I appreciate my minority leader's yielding.

I would like to respond to the question raised by the gentleman from New York (Mr. STRATTON) because I think it is an important question. That is, on the basis of the Kemp-Roth bill, would there be the kind of feedback adequate enough to recover the revenues potentially lost?

I think that Prof. Walter Heller answered that very succinctly before the Joint Economic Committee, of which I am a member, as you know. He was the Chairman of the Council of Economic Advisers during the Kennedy Administration.

Commenting on the effects of the 1962–64 Kennedy tax cuts, he said:

> What happened to the tax cut in 1965 is difficult to pin down but insofar as we are able to isolate it, it did seem to have a tremendously stimulative effect, a multiplied effect on the economy. It was the major factor that led to our running a $3 billion surplus by the middle of 1965 before escalation in Vietnam struck us. It was a $12 billion tax cut which would be about $33 or $34 billion in today's terms, and within one year the revenues into the Federal Treasury were already above what they had been before the tax cut . . . Did it pay for itself in in-

creased revenues? I think the evidence is very strong it did.

Mr. Chairman, I do not think anybody would accuse Professor Heller of being a right-wing conservative economist. However, I think he spoke directly to the same question raised by our distinguished colleague, the gentleman from New York (Mr. STRATTON).

Mr. RHODES. Mr. Chairman, I thank the gentleman from California (Mr. ROUSSELOT) for his participation, and I agree with him.

Mr. STRATTON. Mr. Chairman, will the gentleman yield?

Mr. RHODES. I yield to the gentleman from New York.

Mr. STRATTON. Mr. Chairman, I wonder whether the gentleman from California (Mr. ROUSSELOT) could tell us whether Professor Heller, who has given a pretty good historical analysis in the section that was read to the Members, ventured any guess as to whether the economic situation that we have today parallels the economic situation that existed in 1964?

Mr. ROUSSELOT. If the gentleman will yield further, Mr. Chairman, before the Joint Economic Committee Professor Heller had stated that there were many similarities. For example, as I mentioned earlier, he stated that that $12 billion tax cut would be about $33 or $34 billion in today's terms. Obviously there are new factors in the budget that were not present between 1962 and 1965; but I think his statement is a pretty accurate analysis.

By the way, he is not the only economist who has so testified. We are having more and more all the time who have testified as to the potential feedback of an across-the-board tax cut as incorporated in the Kemp-Roth bill, which, by the way, about 165 Members of the House have now endorsed.

Therefore, I think that that feedback effect, that is the revenue coming back, cannot be discounted. Moreover, I think my distinguished colleague, the gentleman from Arizona (Mr. RHODES), has tried to elaborate on that very point in his remarks. I think the gentleman from New York himself made a major contribution in bringing that point to the attention of the Members.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. RHODES. I yield to the gentleman from Georgia.

Mr. LEVITAS. Mr. Chairman, I thank the gentleman for yielding.

I am inclined to agree with the economic concept as to the Kennedy tax cut proposal and with respect to the effect that it had as it has been incorporated in the Kemp-Roth bill, which the gentleman from Arizona (Mr. RHODES) has referred to, in terms of the long-term impact that this would have on the economy.

However, what I do not understand fully—and I have tried to follow the gentleman's explanation—is what impact it would have on the budget deficit this year.

In other words, if we reduced the revenues in this proportion or to this extent by a significant tax cut, as the gentleman has outlined, then we would have a larger deficit unless we eliminate certain of the outlays that are being projected.

I wonder whether the gentleman would explain whether or not he would intend to reduce the outlays; and if so, where; and if not, how could we take in less revenues and keep the outlays at the same level?

Mr. RHODES. Mr. Chairman, I thank the gentleman from Georgia (Mr. LEVITAS) for his question.

The Republican plan calls for a deficit—and I have already apologized for it— of $49.7 billion in fiscal year 1979.

This, of course, is somewhat less by about $9 billion than the majority of the committee would ask for. The reason that we can do this is beacuse if we had the authority to eschew the raises which occur in the outlays in the committee resolution, we would certainly do so, but also it occurs because we feel that, as in the Kennedy years, there will not be a loss of revenue because of the tax cut. There will be probably the same amount of revenue, or perhaps even a little more.

I will be the first to admit that if we are wrong, there could be an increase in our projected deficit. If there had been a mistake in the projection of the Kennedy administration, there would have been an increase in that year. It did not happen that way, and we feel that the situation—the scenario—this year is so similar that it probably would not happen again.

I just call to the attention of the gentleman from Georgia one very similar factor to the 1963–64 situation. President Kennedy was elected for many reasons. One reason was because of the fact that he convinced the American people that there was unused industrial capacity in the economy which should be used; that there was a stimulus needed, and he proceeded after he was elected to provide that stimulus. I suggest that there is unused industrial capacity in the economy today which can and should be used, and probably will be used if stimulus is provided.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield further?

Mr. RHODES. I yield to the gentleman from California.

Mr. ROUSSELOT. Another good feature, a very excellent feature of the Kemp-Roth concept, which Mr. CONABLE will offer at the appropriate time, is a stimulus directed toward that industrial capacity to try to stimulate the private sector to build more plants, to provide better machinery, to increase the efficiency of that industrial plant capacity. It addresses itself, as the gentleman from Arizona has indicated, to creating jobs in that area.

Mr. RHODES. I thank the gentleman from California.

Mr. GIAIMO. Mr. Chairman, I yield 5 minutes to the gentleman from New York (Mr. STRATTON).

Mr. STRATTON. Mr. Chairman, I take this time to advise the House that during the 5-minute rule I intend, on behalf of myself and several other members of the Armed Services Committee and the Appropriations Committee, to offer an amendment to the resolution that would increase the defense part of the resolution by $2.4 billion in budget authority, but with no increase in outlays.

I do this because those of us who are joining in offering this amendment feel that the military situation which confronts us today requires some greater flexibility than is contained in the recommendations of the Budget Committee's resolution. The President, as the Members know, submitted his budget back last January, and the defense part of that budget represented a figure of $128.4 billion.

Over the past 2 years, military experts have assured us that if we really want to keep up with the Soviet Union, with its massive and steady increase in defense expenditures, we need to incorporate into our own defense budgets an annual increase in real terms of 2 percent, discounting inflation.

The budget that the President sent us in January just barely incorporated that 2 percent figure. The President also had previously promised the North Atlantic Council, our NATO allies, in an effort to get them to increase their own national budgets for NATO defense, that he would support a U.S. defense budget which had a 3-percent increase; and he encouraged the other members of the alliance to do the same.

Well, Mr. Chairman, the Budget Committee comes before us now, having reduced the President's budget by $1 billion. That means that the defense spending figure recommended by the Budget Committee is below the 2-percent increase which is the bare minimum that anybody who knows anything about defense has told us must be incorporated annually in our defense budget if we intend to try to stay even with our competitors in the Soviet Union while we continue to talk with them about the possibility of limiting and reducing armaments by diplomatic means.

The Budget Committee's resolution not only drops the budget below the 2 percent, it also removes it well below the 3 percent figure too. If the Budget Committee's figure is allowed to stand the only way that the President can avoid the charge that he failed to deliver on his promise to the NATO Council, would be to say he was talking about a 3-percent increase in expenditures for NATO, not a 3-percent increase in the overall defense budget. But that would be just a little bit too cute and just a little bit too smart for our NATO allies.

It is no secret of course to anyone in this Chamber that events that have taken place since President Carter sent up his budget message to the Congress last January have further complicated our defense problems and have made it perfectly clear that we need greater flexibility in the field of defense to protect our national interests. I can cite only a few of these: elimination of the B–1 bomber, so that we no longer have a "bomber" leg in our great TRIAD; deferral of the neutron bomb, one of the great defensive weapons that could enhance the protection of our NATO allies; still no resolution of many basic issues in

the SALT II negotiations; and increased Cuban and Soviet penetration into Africa.

So there can obviously be no justification for cutting back on the President's defense figure, as the Budget Committee has done. And there is instead a real need to provide a greater margin of safety in defense that will take us through the next 12 months.

Fortunately the Senate, which has already adopted its own budget, shows us an easy way to go. The Senate increased the President's defense recommendation by $2.4 billion, up to a figure of $129.8 billion. I think this is a very sensible figure and one we ought to adopt for a number of reasons.

First of all, because the Senate figure represents a legitimate 3-percent increase over last year. So we not only have the 2 percent which we need to maintain for our own safety, but with the Senate figure we also have the 3 percent which the President promised to NATO.

Second, because it avoids the back-and-forth hassle that we would otherwise get into in the conference committee between the House and the Senate over defense. If we accept the Senate figure now we do not have to worry about that any further and we can proceed promptly to develop the details of our fiscal year 1979 defense program.

In fact, the House Armed Services Committee has already recommended a bill that constitutes a bare minimum in terms of weapons and R. & D. yet is well over the President's budget cost, particularly in meeting our most urgent shipbuilding needs for the Navy.

The Appropriations Committee is also expected to increase the President's recommendation by over $1 billion. The amendment I intend to offer would increase the President's recommendation by $1.4 billion, so my amendment would accommodate the anticipated action of the Appropriations Committee.

In short, Mr. Chairman, this is a safe and sane increase, particularly in a world that continues to represent a dangerous one. By supporting this increase the House will be indicating to the country, to our allies, and to any potential enemies, that we are solidly determined to back our President in the statements he made recently at Wake Forest University, that he did not intend to allow the Soviet Union to become superior to us in defense capabilities, and did not intend to permit a situation in which their superior strength could be used to blackmail us, in Africa or anywhere else.

So we have an opportunity, my colleagues, not to only to back up the President of the United States in these matters but also to achieve harmony with the other body on defense matters. Where, I ask you, could we "strike" a better bargain, for such a modest price?

Mr. REGULA. Mr. Chairman, I yield such time as he may consume to the gentleman from Ohio (Mr. BROWN).

Mr. BROWN of Ohio. Mr. Chairman, this budget proposal is a disaster.

Never has the Committee on the Budget been so insensitive to the wants of the citizens of this country.

Every major newspaper, news magazine, and television news program talks of a growing taxpayer revolt in this country. The taxpayers are asking for more control of Federal spending, lower deficits, and above all, a reduction in their Federal taxes. And yet the majority on the committee chooses not to listen. Instead, the majority gives the taxpayer the same old song—uncontrolled spending, more deficits, and higher taxes. And now the economy and the taxpayers are supposed to shuffle to their tune. That tune might be called the "Washington Hustle."

The actions of the majority on the Budget Committee do nothing to stem the tide of uncontrolled spending in Washington. This budget crosses the half trillian dollar threshold. If past expansions of spending are any example, the next benchmark—$1 trillion—is only a few years off. It took the Nation 186 years to get to its first $100 billion annual budget in 196. It took only 9 years to double that to $211 billion in 1971. And now only 7 years later, the Budget Committee is proposing a $500 billion spending package with a $58 billion deficit.

Though the people of this country want controlled Federal spending, the majority on the Budget Committee recommends the usual 10-percent increase in spending. Ten percent has been the average spending increase over the past few years; and yet the majority of the Budget Committee applauds itself for "exercising overall spending restraint."

The people of this country elected Jimmy Carter partly on his pledge to balance the budget. And what has happened? In his first full year in office, the deficit will be approximately $53 billion. The President then submits a 1979 budget with a deficit of over $60 billion. The majority on the Budget Committee pats itself on the back for "cutting" this deficit to $58 billion. But even this tiny cut is achieved only after miraculously finding that the President has overestimated spending by $8 billion.

Does the majority then allow this "savings" to reduce the deficit? No, it spends the savings before any of us know if the savings will ever be realized. Ironically, this ludicrous accounting makes us all hope that no further "savings" can be found.

Recent polls show that almost 90 percent of the American people feel that they need to have their income tax reduced. The majority pretends to cut taxes, but its tax cuts are even less than the insufficient Carter tax cut. The majority's reasoning for those token tax cuts is that they feel that larger tax cuts would increase the deficit and increase inflationary pressures in the economy.

There are three crucial observations that need to be made on the tax cut provisions in the majority's budget proposal.

First, this small tax cut does not offset inflation and the other tax increases imposed by the majority and President Carter on the taxpayers. If we add together the increases in taxes due to inflation, social security tax increases, and energy tax legislation passed by this body, they will be approximately $6 billion greater than the majority's proposed tax cut. And it gets much worse in later years. This is a perfect example of tax legislation where a tax cut is not really a tax cut at all.

Second, the majority says it is worried about inflation and therefore cannot cut taxes by a larger amount. Where was the majority's great concern about inflation when social security legislation was before this House? Where was the great concern for inflation when the minimum wage bill was being debated? Or the labor reform bill? It has been estimated that these three pieces of legislation will add approximately 3 percentage points to the CPI in 1979.

Only now, when we can do something to aid the taxpayer in this fight against inflation, does the majority concern itself with inflation. And the result of this so-called concern is that the budget proposal says "no" to the taxpayers of this country.

Third, the majority decision not to propose sufficient tax cuts because they fear an increasing deficit is amazing. On one hand the majority spends the country into a deficit, and then on the other hand says that because of the deficit, it cannot lower taxes. In essence, the majority is telling the American people that it can spend their money in a better manner than the taxpayers can. The majority has traded tax cuts for deficit spending. It could have traded government waste for bigger tax cuts.

The majority believes that the large deficits result in a stimulus to the economy. While this may be so in a small sense, the truth is that large deficits are a very inefficient stimulus. When the Government runs a deficit, it will have to sell Treasury securities to finance the deficit. Mostly what takes place is that Government spends the dollar that the private sector would have spent anyway. Little new demand is created, few new jobs are created, and little additional growth occurs. Government sector jobs are substituted for private sector jobs. Which type of job puts more goods on the shelves and more food on the table?

The majority believes that it makes no difference how money is returned to the public; the economic stimulus is the same. Their thought is that rebates, marginal rate cuts, or increased Government spending all have the same effect as long as the aggregate amounts are equal. However, modern economic facts paint a very different picture.

Dr. Michael Evans, president of Chase Econometrics, has recently stated that reductions in the marginal tax rates on individuals and businesses are almost twice as stimulative as increased Government spending. Data Resources Incorporated, the operators of the DRI econometric model, have recently published a report that shows that different types of tax cuts result in different revenue estimates. Modern economic thought is shifting to the belief that marginal tax rate reductions are very important to the solution of economic stagflation.

The majority and the President could have done a great deal to reduce the deficit, reduce taxes and yet maintain adequate social services for the public if they

would allow for larger tax cuts. It is important that these tax cuts center around marginal rate reductions for all individuals and businesses. It is marginal income, the last few hundred dollars of income, that is taxed at higher rates. By reducing marginal tax rates, we change behavior. If people know that additional income earned by additional work or more savings and investment will not be heavily taxed, they will work and invest more.

There is historic evidence that by substantially reducing the marginal tax rates on individuals and business, the deficit can actually be reduced because individual taxpayers will work, invest, and save more. These increased incentives will lead to an increase in economic growth. The additional growth expands the tax base which works to increase tax revenues and reduce the deficit. President Kennedy cut marginal tax rates substantially in 1962, and federal revenues increased in the next few years by $54 billion over revenues anticipated at higher tax rates.

In today's economy so much depends on psychology. We hear of consumer optimism, business pessimism, taxpayer sentiment, investor reluctance, and Presidential jawboning. It is because Government has come to occupy a strategic position in today's economy that how this body acts on the budget proposal will have a significant effect on the economic thinking and behavior of these groups.

Is there anyone in this Chamber who doubts that a significant reduction in the deficit would have a greater effect on inflation than the President's vapid program?

Is there anyone in this Chamber who doubts that a cut in Federal waste, reflected by only small spending increases, would do more to increase the public's confidence in Government than all the promises of politicians?

Is there anyone in this Chamber who doubts that the poor and unemployed would be aided more by real productive private sector jobs than by public jobs supported by the Government dole?

Modern economic theory is providing us with an opportunity to reduce the deficit, reduce taxes, increase employment and yet provide the Government aid that is needed by the poor in our society. Congress must take the bold step to embrace this new, but proven, economic program.

By reducing marginal tax rates and striving to achieve the goals—controlled spending, lower deficits, and reduction of Government waste—that the public has set for us, we can do great things for this economy and for the people of this country.

Mr. REGULA. Mr. Chairman, I yield 5 minutes to the gentleman from California (Mr. ROUSSELOT).

Mr. ROUSSELOT. Mr. Chairman, as a member of the Committee on the Budget I have spent a good deal of time in dealing with many of these total budget figures. I am very supportive of the budget process and believe it could be an excellent discipline if we would follow the intent of the original act. Unfortunately, I do not think we have accomplished that since the budget resolution was adopted in 1974.

I felt that there was substantial hope that we would bring a new discipline to Congress on the overall restraints that would be based on spending. I felt that we would begin to look more clearly for ways to change the taxing and spending policies which are such a tremendous burden on the 130 million taxpayers of this country.

Basically, I have endorsed the views of the minority members of the committee. I would encourage my colleagues to glance through them before we get to the various amendments tomorrow.

Additionally, Mr. Chairman, I would like to comment a little further on what I consider to be the two most important areas on which the full committee did not focus enough attention—restraints in Federal Government spending and permanent across-the-board cuts in tax rates.

The current tax rate structure in the United States more than any other single factor has contributed to the problems our economy has experienced over the last several years. It has acted as a disincentive to economic growth and production, discouraged entrepreneurial activity and stood in the way of vigorous economic activity. Today, in the United States, marginal tax rates go from 14 percent on incomes above $2,200 for a single person up to 70 percent on incomes above $102,200. Thus, as an individual's income rises, whether through inflation, real growth in the economy or through hard work, the tax system takes progressively more out of each dollar earned. In other words, as we work harder and longer, the Government takes an ever-increasing portion of our earned dollars.

I would like to again comment on this issue of a permanent tax reduction, if we could learn from the history of the 1962–64 Kennedy tax cuts. In a colloquy with the gentleman from New York (Mr. STRATTON) and the minority leader the gentleman from Arizona (Mr. RHODES) we have just discussed the testimony before the Joint Economic Committee by Dr. Heller. I would like to review the statement by the former chairman of the Committee on Ways and Means, Wilbur Mills during debate in this Chamber on those 1962–64 tax cuts. His constructive comments still have great meaning for all of us today.

The former chairman of the Committee on Ways and Means, the gentleman from Arkansas, Mr. Mills, had this to say:

> Many believe we can spend our way to prosperity. On the other hand, I am firmly convinced that if Congress adopts a tax reduction and revision bill of the type which is before this body today, we can also achieve this more prosperous economy by loosening the constraints which the present Federal tax system imposes upon our free enterprise system. These tax reductions will bring about a higher level of economic activity, fuller use of our manpower, more intensive and prosperous use of our plants and equipment, and with the increase in wages, salaries, profits, consumption, and investment, there will be increases in Federal tax revenues.

Chairman Mills turned out to be right and history can be repeated if we put into effect the Kemp-Roth concept.

The CHAIRMAN. The time of the gentleman has expired.

Mr. REGULA. Mr. Chairman, I yield 3 additional minutes to the gentleman from California.

Mr. ROUSSELOT. Second, I should like to comment briefly on the lack of restraint on spending increases found in House Concurrent Resolution 559.

I have placed in the RECORD a very important statement from Senator WILLIAM PROXMIRE, a colleague of mine on the Joint Economic Committee. In the 1978 Joint Economic Committee report, he criticizes the excessive deficits that are added to the budget year after year. Therein he states:

> Both the President's proposal for a $500 billion budget—and this committee's estimate—of expenditures of $500 billion to $505 billion are too high. These expenditures represent an enormous burden on American taxpayers. They should be cut by a minimum of $25 billion and, better yet, by $35 billion in order to provide a freeze on Federal outlays of about $465 billion.

It is good to know that Senator PROXMIRE agrees with me. Because I believe we can meet the challenge laid down to us by the Senator, I will offer a balanced budget resolution tomorrow which calls for an expenditure level of $464.648 billion. My substitute amendment assumes a tax rate reduction of $38.7 billion and also restrain spending. In doing so, it maintains Federal outlays slightly above their fiscal year 1978 level.

In summary, Mr. Chairman, my substitute calls for a solution that is simple and straightforward—reduce tax rates and restrain increases in spending for fiscal year 1979. I invite my colleagues to carefully consider the positive elements of such a course of action.

Mr. GIAIMO. Mr. Chairman, I yield 10 minutes to the gentleman from Illinois (Mr. SIMON).

Mr. SIMON. Mr. Chairman, it may be that our colleague, the gentleman from California (Mr. LEGGETT) was correct when the gentleman said we were not engaging in a dialog, but a series of monologs here.

I recall the other evening having a gentleman from the State Department visit us.

Mr. GIAIMO. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield to my distinguished chairman.

Mr. GIAIMO. Mr. Chairman, having great confidence in this body, I am sure they will correct that tomorrow.

Mr. SIMON. Mr. Chairman, I am sure that is the case and I think there has been dialog here today and I will also be involved in it tomorrow.

A distinguished visitor from another country was with a State Department official recently and visited one of our sessions and came away somewhat confused. He observed:

> It is a strange procedure. Someone talks, no one listens, and everyone gets up and disagrees with him.

There are times when I think that is a pretty apt description of what goes on here.

I have enjoyed serving on the Committee on the Budget as much as any committee or commission I have ever served on. It has been a hard-working body. I want to commend my chairman and all my colleagues on both sides for their good work.

Let me add one thing, however, speaking candidly, since we are in dialog. One of the things that has been missing in the House, and I do not mean this with disrespect to my colleagues on the Republican side of the aisle, but one of the things that has been missing is the kind of relationship they have in the Senate between Senator BELLMON and his GOP colleagues and Senator MUSKIE, and his Democratic colleagues with a good result on both sides. I do not know why that has been lacking over here, but it is a deficiency that has not added to the budget process here in the House.

Mr. Chairman, our colleagues, the gentleman from California (Mr. BURGENER) said that here on the floor we should first begin with the gross figures and then move into section 2 of the budget resolution.

My colleagues, the gentleman from Illinois (Mr. MICHEL), and our colleague, the gentlewoman from Maryland (Mrs. HOLT) have suggested they are proposing that by way of legislation. I do not have to think that may be wise on the floor. It may be that in the Committee on the Budget itself we should use such a procedure and that we could in the process of doing that, perhaps, save $1 billion or $2 billion or $3 billion.

Rather than get into the kind of division suggested by Mr. BURGENER on the floor, I would sooner see a division into entitlements and controllable items. Then maybe we could get at some of these things.

I also believe we should heed the advice of my colleague, the gentleman from South Carolina (Mr. DERRICK) who has suggested that we bring the off-budget items into this whole picture, because while we are debating $58 billion, or some other figure for a deficit, we have agenices that can simply increase indebtedness, issue bonds, without any control by this body.

Another suggestion that has been made by a freshman Member of this body on the Republican side of the aisle, the gentleman from Michigan (Mr. STOCKMAN), is that we gear our totals to a percentage of the GNP, an idea that at least ought to be studied.

The budget proposal, as a whole, certainly is a sound one. If we do not exercise fiscal restraint, if we do not vote against some of the Christmas trees that are going to be presented tomorrow, then we face almost certainly this option that the Federal Reserve Board is going to exercise restraint through monetary policies.

It is much wiser for us to exercise that restraint here ourselves. I think this resolution does that. The budget cut of $19.4 billion is wise. I would have preferred one which is $2 or $3 billion lower than that.

And there are areas in which I would have liked some changes. I would like to see more done in the area of structural unemployment. Our colleague, the gentleman from Maryland (Mr. MITCHELL), who spoke about some of those problems, was hitting one of the issues on which we really have not moved with this Government and with this political process as much as we ought. I hasten to add that if we do not change our committee limitations and we lose the gentleman from Maryland (Mr. MITCHELL) from the Committee on the Budget, that is going to be a real loss to the committee.

To my colleagues who say we have exercised no restraint, I would simply repeat the figures the chairman of the committee gave us earlier. We have cut the budget authority from the request of our committees by $49 billion, and we have cut outlay $22 billion. I would suggest that is substantial restraint, and I think we can be proud of the job the Committee on the Budget has done.

Let me touch on one other area, particularly because it is an area of controversy. It is an area in which some of us have been subjected to some criticisms back home because a few weeks ago we defeated a farm bill.

All of us recognize there are problems in the agriculture area. Farm income in 1977 was 5 percent below farm income in 1976, and when we add the inflation factor, we are talking about roughly an 11.5-percent drop. So there is a problem.

However, we have in this budget resolution authorized $2.5 billion for additional help for agriculture, which covers the $700 million that the conference committee report is asking for on Thursday, plus $1.8 billion for optional programs by the administration.

We have provided a series of other improvements. Here we also have an area where we can have a cutback with no impairment, a cutback that has been agreed to by the administration. I will be offering an amendment tomorrow which will cut back roughly $1.7 billion in the commodity reestimates, because under current law and under current policies that have been promulgated by the administration the estimates of what will be needed will be about $1.7 billion less than was anticipated.

There are a great many things, including $100 million for additional agriculture research and a number of other programs, that we have considered in the Budget Committee resolution for the benefit of the agriculture sector. We have provided some flexibility, and we will provide an opportunity for the agriculture sector of our economy to come back into the mainstream of the economy of the Nation and become a healthier portion of our national economy.

Mr. Chairman, I hope our colleagues tomorrow will exercise restraint. Finally I hope that tomorrow we will adopt this first budget resolution.

Mr. Chairman, I want to offer some observations on the 1979 budget targets for education and health programs—two important areas in which most of us share concerns and a commitment to assure adequate national resources to the disadvantaged.

I. EDUCATION

This is an unprecedented budget year for education programs. Not since President Johnson's tenure in office have we seen a budget proposal so fully responsive to the needs of this Nation's handicapped and poor students. I think we can put behind us now most concerns over education funding deficiencies, improperly targeted dollars, gaps in service to eligible needy children, and the ability of middle-income parents to pay spiraling college expenses for their children.

This budget resolution includes a 24-percent increase for education programs overall. And I tell you candidly that this increase was not decided arbitrarily or capriciously; the Budget Committee carefully considered the unmet needs of our disadvantaged students.

In the title I elementary and secondary education program alone, there are possibly 9 million eligible students and yet little more than half of them now participate in this program. Inadequate funding levels in the past meant that school districts were forced to arbitrarily make cutoff points leaving eligible students wtihout service. This program is targeted to increase by $643 million, with $400 million of this increase to be concentrated on 900,000 unserved eligible poor children attending rural and urban schools. The low tax base typical in rural districts, and the high maintenance and operating costs in urban districts, create special needs. Prior title I allocations to these areas have been inadequate to meet program costs. About 3,500 rural and urban districts, in which 69 percent of all eligible title I children are concentrated would receive these additional funds.

This resolution also includes the President's proposed increase of $349 billion to raise the Federal subsidy to States to help pay excess costs involved in educating handicapped children. States, as you know, are under considerable pressure imposed by a Federal mandate and court decrees to identify and serve each and every handicapped child in this Nation. At present millions of disabled chldren are either excluded from public schools or do not receive an adequate education. This increase will allow States to more nearly meet their obligations to handicapped students.

I also applaud my colleagues on the decision to include $1.4 billion in budget authority to accommodate the House version of the Middle-Income Student Assistance Act. During this economic period in which each of us is experiencing shrinkage in our own dollars, we can understand the strife of middle-income families who struggle to pay college costs. We recommended funding this legislation instead of the President's proposal or tuition tax credits because it provides a more generous grant to middle-income students than either of the other two proposals. This bill would actually concentrate funds on middle-income students. Under the BEOG proposal 1.3 million students from families with incomes between $16,000 and $25,000 would be eligible for average grants ranging from $600 to $800.

II. HEALTH PROGRAMS

The committee's recommendation for the first budget resolution provide $52.3 billion in budget authority and $49.6 billion in outlays for the health function. These totals are $5.8 billion in budget authority and $5.2 billion in outlays above the amounts currently estimated for fiscal year 1978.

The bulk of the spending increase, 85 percent, is required to finance the higher medical prices that medicare and medicaid must pay for services to the aged, disabled and poor. We have hopes that hospitals and physicians will achieve their objectives of reducing the rise in hospital costs from the 16 percent experienced in 1977 to 14 percent in 1978 and 12 percent in 1979. If the voluntary effort succeeds or if the standby legislation is triggered, the savings to the Government and to privately insured persons will be calculated in the tens of billions over the next 5 years.

In addition, in medicaid and medicare, the committee's recommendation provides funds for significant legislative initiatives designed to expand benefits to the aged, children, and pregnant women. The legislation would:

Permit expansion of home health benefits for the aged and disabled under the medicare program;

Provide health screening and followup treatment to 2 million additional children not now covered by medicare; and

Provide prenatal delivery and postnatal care and services to about 125,000 women annually who are not now eligible for medicaid.

For programs other than medicare and medicaid, the committee recommendations provides $8.7 billion in budget authority and $8.5 billion in outlays to support health service programs, manpower training programs, and biomedical and mental health research programs. This total is $250 million in budget authority and $100 million in outlays above the President's request.

While agreeing with the President that the time has arrived to begin reducing Federal support for programs to train professional and paraprofessional health personnel, the committee believes the President's reductions are too precipitous. The committee includes funds to expand the number of disadvantaged and minority students receiving professional training, continue programs of graduate nurse training and continue Federal commitments to students now receiving training.

For biomedical research programs, the committee recommendation would accommodate increases in basic research and high priority targeted research efforts. The committee believes that the national institutes for health can find additional funds for other new research projects through tighter management controls and more intensive examination of the merit of ongoing research projects.

Overall, Mr. Chairman, the committee recommendations in health aim at continuing and expanding programs which have demonstrated their effectiveness, while tightening programs which no longer have high priority, and programs which have not demonstrated a high level of operational efficiency.

For both the areas of education and health, the committee's recommendations are sound and reasonable. I urge the House to adopt them as reported.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield to my distinguished colleague, the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, I thank the gentleman for yielding.

Do I understand that my colleague, the gentleman from Illinois (Mr. SIMON), is going to offer some kind of an amendment tomorrow to trim or restrain the increase in agriculture programs by $1.7 billion, because it is not needed? Is that what the gentleman said?

Mr. SIMON. It is just under $1.7 billion that in fact is not now going to be needed, because of some changes in market prices and in part because of changes in policies that were announced by the administration at the end of March.

Mr. ROUSSELOT. So that would change the outlay figure for the funds needed by agriculture?

Mr. SIMON. The gentleman is correct. It would also reduce the deficit by that amount.

Mr. ROUSSELOT. It would reduce the deficit by that amount?

Mr. SIMON. That is correct. I hope that my colleague, the gentleman from California (Mr. ROUSSELOT) will support my amendment.

Mr. ROUSSELOT. Does the gentleman think he can hold his side together on that?

Mr. SIMON. I believe I have the support of the chairman of the committee, and I believe a majority of the committee members will support my amendment. I hope a majority of the Members of the House will support it.

Mr. ROUSSELOT. Mr. Chairman, I thank the gentleman.

Mr. REGULA. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, first, I would like to compliment the chairman of the Committee on the Budget for taking a Presidential budget characterized in press releases as lean, tough, austere, and reducing it, however slightly. Also, I would tell my colleagues that the chairman has been very evenhanded. The minority had every opportunity in the budget hearings to state their case, to have equal time. I find it a great privilege to serve on this committee with our colleague, the gentleman from Connecticut, as chairman.

Although I am disappointed with the results, I continue to strongly support the concept of the budget process. My disappointment in the process is over our inability to evaluate programs in terms of good management and cost effectiveness. The only question seems to be which program gets the largest percentage of increase. In other words, we continue the age-old process of throwing money at problems.

The Washington Post on Sunday contained an article, which I quote:

Professor to Devise Readability Test.

A University of Virginia professor has received $137,935 in federal money to develop a standardized way to judge the readability of essays.

In the proposal, the professor says that—

A text's intrinsic effectiveness is the proportion between its effectiveness and that of a synonymous version which is optimally effective.

Effectiveness is in turn defined as an inverse measure of reader effort: All other things equal, more reader effort means less writing effectiveness.

This is what the taxpayers are going to pay $137,935 to find out about. I wonder how this expenditure of Federal funds would have grabbed beleaguered taxpayers on April 15.

This proposed budget is best described as "more of the same." It takes the programs that have not worked and adds more money to them. The much-publicized idea of zero-based budgeting is ignored. There should be dismay at the lack of results from zero-based budgeting but the wealth of rhetoric about it.

When the Office of Management and Budget Director James McIntyre testified before the committee in February he could not cite one Federal program that had been abolished or even substantially reduced due to the President's implementation of zero-based budgeting. On the other hand, there are, neatly tucked away, substantial program increases, such as 27 percent for function 500, education, training, employment, and social services, and on the other hand, ludicrously low estimates such as in agriculture.

The budget before us has an overall increase of approximately 11 percent for Government spending, while we propose to give our senior citizens a 6.5 percent cost-of-living increase under social security.

The ultimate goal of Government should be to create a climate that will stimulate the private sector, the only source of real growth in permanent, enhanced employment opportunities.

The budget before us does not hold out the hope of dramatic tax cuts and spending restraints that could trigger a dynamic up surge in the national economy.

I regret that the budget does not demonstrate the fiscal restraint that would give a clear signal to our citizens that the increasingly oppressive burden of the Government is about to be eased.

The legend over the door to the House Dining Room on the floor below us says this:

Man is not made for the State, but the State for man, and it derives its just powers only from the consent of the governed.

I doubt very much if the governed, if asked, would give that consent to a budget which sends 22.1 percent of their Nation's gross national product or in effect takes away 1 day out of 5 of all that they earn.

Mr. GIAIMO. Mr. Chairman, I yield 5 minutes to the distinguished majority leader, the gentleman from Texas (Mr. WRIGHT).

Mr. WRIGHT. Mr. Chairman, I think the Committee on the Budget has done a thoroughly professional job. I commend the budget to our colleagues. It is not a perfect instrument. I cannot conceive of any situation in which fallible human creatures who serve on the Committee on the Budget would be able to create an instrument of perfection.

Every Member of this House can find some particular in which his own personal predilections would differ from those represented in this budget resolution; but the resolution is a sound, earnest attempt to address the two problems which confront the country: to promote continuing the economic recovery, and to abate inflation.

As has been pointed out, this budget represents a deficit forecast $2.5 billion below that recommended by the President. In total authority, it is $49 billion below the composite requests of the various committees of the House. It is $22 billion below those requests in outlays.

Therefore, Mr. Chairman, nobody can honestly say that it does not represent an honest attempt at a lean and effective budget.

Let me urge that Members resist the temptation to vote various adornments in the form of morsels that would add to the deficit. In the past, some Members have been tempted to vote for more expenditures, which have the effect of increasing the deficit, and then to oppose the budget on the ground that the deficit is too high.

Members also should resist the temptation to try to regard this process as the work of an authorizing committee. The Committee on the Budget is not an authorizing committee. It never was intended to be. Its purpose, as all of us surely should understand, is to try to set a package of priorities which will serve the Nation.

Before the budget process was set into place 3½ years ago, no attempt at anything like a comprehensive review and analysis of our overall fiscal policy was successful. In the middle 1940's, Congress tried a Joint Committee on the Budget, and that did not work. Later, we tried putting everything into one appropriations bill, and not only did that not work; it bordered on disaster. Yet, everyone knew that Congress as an institution was playing less and less a role as the years went by in the formulation of the economic policies of this country.

In an effort to reassert its prerogatives, Congress in 1974, on its own initiative, created the budget process. It has been my agreeable task from the very beginning to play a direct role in the development and formulation of spending and revenue targets for the Congress.

Today, once more, I am asking Members of this body to set aside what may be their own personal preferences and predilections and cast a yea vote for this resolution. The targets set forth in this resolution are specifically designed, with all of the precision we could muster, to sustain our economic recovery and reduce inflationary pressures. The targets are flexible; they are not binding; yet they provide the basis for meaningful decisions through self-discipline.

The question continues to arise, however: Why do we need a budget resolution? Why is it important to have guidelines? Why don't we return to the good old days when Members did not have to cast a vote on the deficit or the level of Federal expenditures, or what our tax policy should be? In brief, why are we doing this?

I wish the answers were easy and simple, but they are not. And this is true for several reasons:

First, budgets are not ever really popular documents, whether they be family, business, or public. They are instruments of restraint and confinement. They impose discipline because they are designed to control and plan for future actions. But the Congress no longer wishes to make its decisions by merely shooting into the dark and that is why budgets are necessary.

Second, budgets, if they are any good at all, must reflect reality. They must deal with economic circumstances as they exist, or their implementation will bring about no effective change. Reality is sometimes difficult for all of us to face. But unless we face reality, we perform a disservice to the American people.

Third, we would not need budgets if our resources were unlimited. We could just go on our merry way and spend whatever amount of money we thought was necessary. But, obviously, this is ridiculous, because resources are limited, and it is our job under the Constitution to allocate them.

This being the case, then, how should we allocate resources? How should we target our future expenditures? We could, of course, turn it all over to the President and just rubberstamp his decisions. There is not a single Member of this body who would endorse that. We could simply respond to the pleas of the special interests and let them decide what we should or should not spend, and pray that this did not lead us to economic disaster. No one wants that either.

What we can do, perhaps not perfectly, is what we are doing here today. We are examining the relationship of the gross national product to our tax policies. We are targeting expenditures in an effort to prevent a rise in the Consumer Price and Wholesale Price Indexes. We are attempting to balance the need for defense spending against the need for human resources programs. We are planning our future decisions in such a way as to reduce unemployment and control inflation.

We cannot accomplish everything we would like in 2 or 3 years; we have only begun to get a handle on the Federal budget. The budget process is a long-term process. Each short-term decision must be carefully designed to contribute to the long-term goal of effective management of Federal expenditures. I believe strongly that this resolution makes that kind of contribution. I urge you to join me in voting for its adoption.

Mrs. HOLT. Mr. Chairman, I yield 4 minutes to the gentleman from Iowa (Mr. GRASSLEY).

Mr. GRASSLEY. First of all, Mr. Chairman, I want to associate myself with the remarks made by the gentleman from California (Mr. ROUSSELOT).

Second, Mr. Chairman, I want to say that in this morning's mail I received what is commonly referred to as a "Dear Colleague" letter from a member of the majority party. The fact that he is a member of the majority party was suitably emphasized by appropriate underlining and capitalization.

The letter I am speaking of is entitled "majority party needs majority budget target." It urges the House to pass the first budget resolution for fiscal year 1979. One line of the letter was especially intriguing:

> After three and one-half years, I'm convinced, as a Democrat, that the Republicans support the budget process only as an arena in which to harass and embarass the Majority.

As a Republican, I take exception to the above statement. As a member of the temporary minority party I beg to differ. As one individual who is concerned with such outdated notions as "fiscal integrity," let me say that I support the budget process. I believe that it should be used as a means of controlling Federal spending and eventually wiping out multi-billion-dollar deficits.

If, in the process of speaking up for the beleaguered American taxpayer, we Republicans inadvertently harass or embarass the majority party, then I am sorry. But it is not our fault. Republicans do not want a deficit for fiscal year 1979 in excess of $58 billion. Republicans do not believe that, and I quote from page 2, line 1, of House Concurrent Resolution 559—

> The appropriate level of total budget outlays is $501,358,000,000.

Republicans do not want every manner and method of appropriations increased. But I would submit that a majority of my colleagues on the other side of the aisle, the majority party—they want all of these and more. Just look at the RECORD. Look at the votes cast, not just on this particular bill but rather on all authorizations and appropriations.

Suffice it to say that I will vote in favor of an amendment in the nature of a substitute to be offered tomorrow by the gentleman from California (Mr. ROUSSELOT). His balanced budget amendment is legendary and almost qualifies as a rite of spring just as does the Cherry Blossom Festival. The Rousselot substitute assumes a $38.7 billion tax cut which, incidentally is greater than tax reductions advocated by the President or Budget Committee. The Rousselot amendment, if adopted, sets as a target a fiscal year 1979 deficit of exactly zero dollars.

I expect that we will probably fail again this year to balance the budget. But it is one way of showing our concern and just about all we in the minority party can do right now. Those who vote for a deficit of $58 billion are harassing the productive and, therefore, taxpaying segment of American society.

They are really just embarrassing themselves.

Mr. GIAIMO. Mr. Chairman, I yield 10 minutes to the distinguished chairman from South Carolina (Mr. DERRICK).

Mr. DERRICK. Mr. Chairman, I would like today to state my firm conviction that independent of the numbers in the budget resolution before us today, the budget process itself has been successful.

During the past 2 years in which I have served on the Budget Committee, I have seen many changes in the way we approach budgeting in Congress which I believe have led to a more honest and comprehensive approach.

Because of the timetable set down in the Budget Act, authorizing committees have started planning ahead in a more comprehensive and coordinated way. Appropriations bills, with few exceptions, have been enacted before the beginning of the fiscal year. This is of great benefit to State and local governments who now find it easier to plan ahead with an indication of amount and timing of Federal resources.

The President is required to submit reestimates of budget authority and spending included in his budget several times a year which leads to better analysis and tracking of numbers.

We have begun to focus on total spending including those elements of the Federal budget which are outside of the unified budget, such areas as tax expenditures, off-budget agencies and the credit budget. This year off-budget agencies total $12.5 billion and tax expenditures $137 billion. For the first time last year we included a special analysis in our Budget Committee markup materials and report on tax expenditures, for the first time this year we included a similar approach on credit activities.

We have seen both housing for the elderly and the Ex-Im Bank brought back on budget and strong efforts are underway to also bring the Federal Financing Bank on budget. I believe all this means Congress has begun making better and more reasoned choices not only on the amount but the method of financing which is chosen for a particular program.

We have improved the information base which is used by Members of Congress in making their budgeting decisions. The Members Budget Information System is a computerized budget information system to which 200 Members of Congress currently have access in their offices. This includes several tables of information, both historical and current, on the budget resolution and the President's budget. We hope to expand this in coming months to provide a weekly report on that week's scheduled spending bills in order to inform Members of the impact of their spending actions.

We have a computerized scorekeeping report which is maintained by CBO and updated every Monday morning to track the spending and revenue actions which Congress has taken to date and to compare them with the assumptions in the President's budget or the budget resolution.

In addition we have begun to focus on the consequences of the type of financing techniques which we choose for new programs. A good example is full funding of construction and procurement projects which means requesting the full budget authority required for a multiyear project in the first year. This not only saves overall costs but helps Congress focus on the extent of a commitment which will be made over a period of time.

Another example is financing of revolving funds. As chairman of the Budget Committee Budget Process Task Force, we have had several comprehensive studies completed which focus on various areas of budget controllability. One of these studies showed that because of the way some revolving funds are currently accounted for in the Federal budget, the total amount of Government activities was understated by $28 million in fiscal year 1978. I believe this is an area which must eventually change.

In addition, many backdoor financing techniques have been eliminated by a section of the Budget Act which makes new contract, borrowing and entitlement authority subject to amounts in appropriations bills. Traditionally each year major new programs have been funded in ways which either eliminate any discretion by the Appropriations Committee as to the amount appropriated or which commit the Congress to long-term financial obligations without focusing on the implications of the total cost.

I believe we are gradually making an inroad into understanding the implications of these financing techniques and where necessary modifying their operation. There is a long way to go but the first steps have been taken.

A legislative oversight act bill has been introduced which is designed to improve congressional oversight of Federal programs and activities. It now has over 110 cosponsors. This legislation would require greater specificity in setting program objectives as well as periodic review of all new authorizations and tax expenditures. I think this is another step in the right direction.

We tend to stand up here and argue about the size of numbers in the budget resolution but we never really focus on the improvements in the process which led to those numbers.

We are all constantly criticized by the public, particularly our constituents, for runaway spending—and we find ourselves responding to those criticisms. But I believe the real complaint voiced by the public is lodged not in the totals themselves but the fact that they believe the numbers are irresponsibily derived, that spending continues to increase with no reason. This is not true—we are making better, more careful decisions based on a better understanding of the numbers and the long-term consequences. We deserve to have that fact understood.

Thank you Mr. Chairman.

Mr. GIAIMO. Mr. Chairman, I yield 5 minutes to the gentleman from Mississippi (Mr. MONTGOMERY).

Mr. MONTGOMERY. Mr. Chairman, I would like to thank the gentleman from Connecticut (Mr. GIAIMO) the chairman of the Committee on the Budget, and all of the members of that committee for their hard work in bringing this budget resolution to the floor of the House.

Mr. Chairman, I hate to be one who supports an amendment to increase the budget and I hope there will be an amendment I can vote for tomorrow that will reduce the budget resolution. However, the chairman of the full Committee on Veterans' Affairs, and other members of the House Committee on Veterans' Affairs, as well as myself, feel that the budget recommendations for the veterans' program is too low. Therefore, Mr. Chairman, the gentleman from Texas (Mr. ROBERTS) who is our distinguished chairman, will offer an amendment raising the budget authority by $1,019 million and outlays amounting to $844 million over what the budget resolution has been reported out with.

I might say that the gentleman from Texas (Mr. ROBERTS) certainly has been fair and diligent in heading the Committee on Veterans' Affairs. He is greatly respected by all the veterans' organizations and by the veterans themselves, and these groups support this amendment which will be offered.

Briefly, Mr. Chairman, I would like to explain why we feel we need to increase the budget resolution.

Last year when we had the pension bill up calling for a cost-of-living increase for veterans of 6.5 percent, that was voted unanimously. When we had that bill up last year a number of the Members said to us on the floor that something needed to be done with the veterans' pension program.

We are getting a lot of complaints from our veterans, mainly pertaining to those veterans drawing social security and also veterans pension checks also about a number of the veterans who are at the poverty level. Also a number of the veterans who are drawing pensions dating back to World War I are having their problems as they reach their twilight years.

So our committee has voted out a reform pension bill for 1978, and this means a cost increase in the budget.

Let me briefly explain what this bill does.

A number of the Members have asked us about when a veteran pensioner receives a social security cost-of-living increase then when he gets his pension check, his pension check has been reduced by a like amount that he received from the social security cost-of-living increase. In other words, we give it to the pensioner in one hand and take it away from him in the other hand.

In the pension reform bill we have corrected this situation so that no longer when a veteran receives a social security increase will he have his veterans pension check cut back because of the social security increase. And, yes, Mr. Chairman, this costs a lot of money.

A number of our veterans are living below the poverty level and I feel that

we should take care of the veterans under our veterans pension program and not have these veterans below the poverty level. So we are raising these limits for veterans and dependents on pensions and this costs money.

The gentleman from California (Mr. GLENN ANDERSON) has been, as you know, very active and concerned about the World War I veterans. We have 800,000 of these veterans left. They are in their twilight years. Mr. ANDERSON has been very active in trying to pass legislation to further help these World War I veterans.

We think in this veterans reform bill that we will be able to further help the World War I veteran on pension who is most in need. In some cases under this bill that will be brought to the Congress in the near future we have increased the pension check for these World War I veterans by as much as 135 percent. This also costs money.

Other things that we have done in our committee, we have asked for a 6.5-percent cost-of-living increase for the service-connected veterans. We are trying to get a small increase for dependent parents. We have some veterans who are drawing a 40-percent disability pension that should be drawing more, and we have added to the dependency allowance.

We have increased the pension for Medal of Honor winners also. We have 273 Medal of Honor winners who are still living. Sixty percent of these Medal of Honor winners are 60 years of age. A number of the Medal of Honor winners are living at the poverty level. We have raised their monthly pensions from $100 a month to $200 a month. We think that this is very, very worthy. Also, as I say, it costs money.

We are improving the housing programs and raising the guaranteed loans. We are increasing the funeral expenses for veterans from $250 to $350 burial expenses.

The CHAIRMAN. The time of the gentleman has expired.

Mr. GIAIMO. Mr. Chairman, I yield 1 additional minute to the gentleman from Mississippi.

Mr. MONTGOMERY. I would like to say that we have added funds in other areas that would eliminate cutting out hospital beds in the veterans' hospitals.

I believe the chairman of this committee will agree that the Committee on Veterans' Affairs has tried to show some fiscal responsibility. As the gentleman recalls, last year we did get a high budget authority, and we did not use these funds. We feel now that we have dire needs, and I hope the gentleman understands why we have made this request.

Mr. GIAIMO. Mr. Chairman, will the gentleman yield?

Mr. MONTGOMERY. I will be glad to yield to the gentleman from Connecticut.

Mr. GIAIMO. I thank the gentleman for yielding.

I certainly commend the gentleman from Mississippi and the chairman of his committee, the gentleman from Texas (Mr. ROBERTS), and others on that committee. I know the work they do for veterans. We just have a very difficult situation here. As the gentleman from Mississippi well knows, we all want to do the best we can for veterans. The question is in this day of tight money and tight budgetary restraints how much is enough. Our committee put in substantial sums of money over the President's recommendations, and I know that the gentleman is talking about the necessity for additional money. Our argument is that we just have to try to hold the line on some of these new initiatives and new starts. It is not that they are not worthwhile ideas; they are, but we do not think that this is the year to do anything other than is absolutely necessary because of a budget deficit that is already too high. This is the reason why the Committee on the Budget rejected the idea of going along with the additional $1 billion that I understand the gentleman's committee is recommending.

Mr. ROBERTS. Mr. Chairman, will the gentleman yield?

Mr. MONTGOMERY. I yield to the gentleman from Texas.

Mr. ROBERTS. I thank the gentleman for yielding.

I agree with everything the Chairman said. Where all of the trouble came in was the estimate by the Bureau of the Budget of $915 million less than the expenditures were last year. That is where our problems all arose, and that misled the Chairman, it misled the committee, and it certainly misled us. They underestimated last year's expenditures by $915 million.

Mr. Chairman, we thank the Chairman for being patient with us. We feel we have to take care of these veterans. I want to thank my chairman of the Subcommittee on Compensation, Pension, and Insurance, the gentleman from Mississippi (Mr. MONTGOMERY) for the job that he has done.

Mr. MONTGOMERY. I thank the gentleman.

Mr. GIAIMO. Mr. Chairman, I yield 5 minutes to the gentleman from Florida (Mr. LEHMAN).

Mr. LEHMAN. Mr. Chairman, I rise in support of House Concurrent Resolution 559, the first budget resolution for fiscal year 1979.

The Budget Committee, and especially our distinguished chairman, have worked hard on the targets in this resolution. We have striven to provide economic stimulus and reduce our still-unacceptable rate of unemployment without aggravating inflation. We have tried to meet vital domestic needs without diminishing too much our ability to respond to the needs of other peoples or to the requirements of adequate national security. We have done our best in balancing the competing goals and needs of all the groups and interests who look to the Federal Government for assistance and support.

This is not a perfect budget; indeed, no budget could be perfect. It has been said before, with a good deal of truth, that, if we produced a budget which a majority of the Members could support wholeheartedly, we would have to be doing something wrong.

Our job is not to please all or most of the Members. Rather, it is to impose discipline on the Federal budget; to match the amount of Federal fiscal activity to the needs of the economy; to balance competing needs within the limits of the overall budget; to identify areas where legislative action might reduce waste, duplication, and inefficiency in Federal spending activities.

I believe this budget meets those requirements. Yet, Mr. Chairman, as I have talked with many of our colleagues, urging them to support the committee's budget targets without additions, I have sensed a growing frustration, much of it aimed at our resolution.

It appears that some of our colleagues, feeling that the regular processes of the House and its committees are denying them the opportunity to have legislation important to them reported or voted on, would like to use the budget resolution as the vehicle for being heard. They would like to force the House to vote yes or no on matters which otherwise may not come up at all this session.

The budget resolution, however, is not the place to do this. Neither the Budget Committee nor the resolution can force or even instruct a committee to report specific legislation or specific funding levels. The Budget Committee, of course, has based its recommendations on certain assumptions about policy, legislation, and funding levels, but it is the responsibility of the authorizing and appropriating panels, to set priorities for matters under their jurisdiction, and to make the actual program and funding decisions.

A vote on an amendment to the budget resolution may indicate support for a program, but it may also deceive our constituents into believing that the House has taken action more decisive than is really the case.

There is also frustration with wider issues, with the difficulty of making substantial changes in our overall priorities and in the operation of our Government. We seem unable to deal effectively with programs which do not provide the services they are meant to provide; to phase out "temporary" programs once they have developed a constituency which has come to depend on them; to reduce the massive duplication and inefficiency even in "unified" programs to deal with such problems as revitalization of our cities or assuring adequate supplies of energy at reasonable cost.

But again, these are not issues to be dealt with in this resolution. A vote against the resolution on the basis of such concerns is irresponsible. A vote for the resolution, on the other hand, will help to preserve and further strengthen the process which, over time, will help us deal with the major questions. It is vital that we continue to look at the entire Federal budget, not just at its pieces, to get a better feel for the problems which cut across functional lines, and a better idea of solutions.

Again, Mr. Chairman, I urge all my colleagues, as I have urged some of them individually, to support this resolution.

Mr. GIAIMO. Mr. Chairman, I yield 5 minutes to the gentleman from California (Mr. MINETA).

Mr. MINETA. Mr. Chairman, I rise in support of House Concurrent Resolution 559, the first concurrent resolution on the budget for fiscal 1979.

First, let me join my colleagues on the committee in congratulating our able and distinguished chairman, the gentleman from Connecticut, Mr. ROBERT N. GIAIMO. He worked long, hard hours leading the committee in drafting an excellent set of recommendations for the first budget resolution.

Mr. Chairman, as others have explained, this resolution is designed to accomplish two primary tasks:

First, to maintain the current momentum of our economic recovery; and

Second, to provide sufficient funding to meet critical national needs.

One of the central components of the budget policy the committee is recommending is the suggested revenue floor of $443 billion. Compared to current law that is a $28.4 billion tax cut. That will mean substantial tax relief to overburdened taxpayers, and sufficient stimulus to the economy to insure the continuation of the current recovery.

The $28.4 billion cut is comprised of two major components:

First, an extension of the 1977 temporary tax cuts—$9 billion for fiscal 79; and

Second, additional reductions in income and social security taxes of $19.4 billion.

While the precise shape of the tax cut will be determined by actions we take later this summer, the figures suggested by the Budget Committee will provide excellent guidelines and deserve widespread support among all of my colleagues.

Particularly important in this regard is a suggested $7.5 billion reduction in social security taxes. This recommendation recognizes the importance of providing relief from rapidly rising payroll taxes.

I would remind my colleagues that payroll taxes are the fastest growing source of Federal revenues. As a percent of total receipts, payroll taxes have grown from 15 percent in 1959 to a projected 32 percent in 1979. If we do not take some action, the payroll tax—one of the most regressive forms of taxation—will soon become the major source of Federal revenues.

Mr. Chairman, reducing social security taxes will also have a beneficial impact on prices. By reducing the employer share of payroll taxes, the cost of doing business is decreased, and prices will be held down. This conclusion is supported by a study I requested from the Congressional Budget Office which compared the economic impact of a cut in payroll taxes and a cut in income taxes.

The issue of social security financing is an extremely volatile one, one which is far from resolved. Nonetheless, I am sure my colleagues will agree that some action should be forthcoming. Clearly, it is appropriate that the committee's recommendation be adopted in order to accommodate such action.

In addition to the $7.5 billion reduction in social security taxes, the committee is recommending a $10.7 billion reduction in individual and corporate income taxes. This reduction is an important element of a fiscal policy designed to keep consumer demand strong and to provide incentive for business investment.

Mr. Chairman, in my opinion, the tax package the committee is recommending is perhaps the most important feature of the budget policy we are suggesting. It will serve as a guideline for action that will reduce taxes of overburdened taxpayers, and suggests a concrete opportunity to both stimulate the economy and to fight inflation.

Without this tax cut we run the risk of halting our current modest recovery dead in its tracks. Unemployment, which rose from 6.1 percent in February to 6.2 percent in March, is still too high. Business plans for capital investment are still not showing signs of the dynamic upswing necessary to keep the economy growing.

Economic growth declined in every quarter in 1977, from 7.5 percent in the first quarter to 3.8 percent in the final quarter. Preliminary estimates for the first quarter of 1978 show that the value of total output was actually below the previous quarter by 0.6 percent.

Without the tax cut committee is recommending, GNP would be reduced by $20 billion in calendar 1979 and by $42 billion in 1980. Over the same 2-year period, personal income would be reduced by $53 billion and corporate profits by $18 billion.

Obviously, the difference between a $20 billion tax cut and no tax cut is the difference between improving the economic outlook and barely keeping the economy moving.

The committee's economic policy is designed to achieve a real growth rate of 4.4 percent in 1979 and 4.1 percent in 1980. That growth rate would be sufficient to continue the recent improvement in the unemployment rate—reducing it from 6.3 percent in the final quarter of 1978 to 5.6 percent in the final quarter of 1980. Without the tax cut, growth would be about 3.6 percent for both years, and unemployment would remain 6.1 percent and 6.3 percent.

I would also point out to my colleagues that inflation will not be appreciably affected by reducing the size of the tax cut. In fact, inflation would only be slowed by one-tenth of 1 percent if we had no tax cut other than extending the 1977 temporary cuts.

I hope my colleagues will agree that a tax cut is needed in fiscal 1979. The taxpayers deserve it, and the economy demands it. Clearly the prudent course of action is to establish a target revenue figure which will accommodate significant tax relief.

My remarks have focused on the revenue recommendations we on the Budget Committee are making. Others will explain in more detail the actions we are recommending with regard to direct spending in such areas as jobs, education, defense, urban programs, and others. I urge all of my colleagues to examine these recommendations in detail, I am confident you will agree that these recommendations will serve as excellent guidelines for our spending decisions over the summer. The total package is a prudent and responsible balancing of the thousands of diverse demands made on the budget of the U.S. Government.

Finally, Mr. Chairman, in urging all my colleagues to support this first concurrent resolution on the budget for fiscal year 1979, I wish to remind them that these revenue and spending targets are estimates of what will be needed during the upcoming year. As the course of the economy for fiscal 1979 becomes more certain during the summer, adjustments may become necessary. These can—and no doubt will—be made in the second concurrent resolution next fall. It is truly one of the virtues of the Budget Act that it allows us the necessary flexibility to make such changes. Yet in making those changes, the Budget Act forces us to acknowledge on a macro level what our micro level changes add up to. And that is really what the congressional budget process is all about—requiring the Congress to state explicitly what its fiscal policy is—to move us away from the "de facto" fiscal policies of the past to an open, explicit procedure where the full Congress must assume the responsibility for the total fiscal consequences of our various spending decisions.

Thus, Mr. Chairman, I would strongly urge all my colleagues to join with me and vote "aye" on final passage of House Concurrent Resolution 559.

Mr. GIAIMO. Mr. Chairman, I yield 4 minutes to the gentleman from Missouri (Mr. VOLKMER).

Mr. VOLKMER. Mr. Chairman, I, too, wish to commend the Committee on the Budget for the many hours of work and the time it spent in putting together this budget.

However, I do have some reservations, not only as to this budget but to others that we considered last year. My concerns are with the basic committees of Congress, the authorization and appropriation committees, as much as with the Committee on the Budget.

In the short time that I have been here, it has appeared to me that if we are ever to have a balanced budget, there must be more commitment from the Members of this body for that purpose. We must be willing to take reductions in programs that we feel are absolutely necessary and needed if we are to reduce spending to the point where we can have a balanced budget.

I have seen, in committee and on this floor, amendments offered or programs supported by Members who vow they want to reduce spending and balance the budget, and these programs are supported on the assumption or on the statements that they are absolutely necessary and needed.

I have also heard some of the more conservative Members speak on issues or programs or requests of departments and express the feeling that we must

spend the money for those purposes and, as a result, increase our spending on programs while professing to want to balance the budget and reduce spending.

As a result, I have come to the conclusion that in order to gradually effect a reduction, it will be necessary that every Member be willing to take a reduction in every program that we think is absolutely necessary, including some of our "favorite charities," as the saying goes.

As a result, I plan to offer an amendment tomorrow which will reduce by 2 percent across the board for those controllable items in the budget. At this time I do not think that it is wise to even attempt any reduction in noncontrollables. I feel, though, that it is incumbent upon the authorization committees to review that legislation by oversight that requires those entitlements so that we may possibly have a reduction in those programs that are not absolutely necessary or at least to slow down the increase in growth on those programs. I know that this has been called a meat ax approach, and it has not rhyme or reason, so far as what it attacks, the good as well as the bad. But I personally feel that it is an absolute necessity, or else I do not see the day that this Congress will ever have a balanced budget.

Mr. GIAIMO. Mr. Chairman, I yield 5 minutes to the gentleman from Missouri (Mr. ICHORD).

Mr. ICHORD. Mr. Chairman, today we commence debate of the most important measure of the year, the first budget resolution. This resolution will set spending priorities and will serve as the guide for authorization and appropriation actions to follow. I commend my colleagues on the Budget Committee and their distinguished chairman for their exercise of restraint and for their proposal which projects a deficit less than postulated by the President in his budget request.

However, despite the efforts of the committee, there is an area which remains underfunded with respect to the needs of the country and that is the area of national defense. I would point out to my colleagues that the President's request for national defense is $8 billion below the level projected by the previous administration. While this fact has little relevance to what is the appropriate level of defense spending, it is important to understand how that reduction was achieved. First, it was accomplished by reducing the size of our active forces by 36,000 below the level authorized by the Congress last year, this constitutes the equivalent of two Army divisions. Second, it was accomplished through a series of program termination and program deferrals. While the former represents ultimate savings, the latter merely increases the ultimate cost to the taxpayer of buying the same equipment without any enhancement of our defense capability.

To cite just a few examples:

Reduction of F–18 procurement from nine to five will increase program cost by over $500 million;

Reduction of F–14 procurement from 36 to 24 will increase costs by $1 billion; and

Deferral of the Army's Infantry Fighting Vehicle, $38 million, will add $0.6 billion to the cost of that program. Pennywise for this year but pound foolish for next year and the year ahead.

We cannot afford the luxury of these cosmetic reductions which look good in balancing the checkbook in 1979 but ultimately degrade our defense posture by buying less for the same amount later on or buying the same amount and paying more. Budget considerations must project beyond the current fiscal year.

Turning now to the adequacy of the fiscal year 1979 defense request, I would point out to my colleagues that our strategic forces are funded at the same level as in fiscal year 1978 despite continued Soviet buildup and the absence of any progress in SALT. Our procurement of military hardware is at the same level as in fiscal year 1978, and efforts to relieve equipment shortages in the Army were met by reducing the Navy shipbuilding program. From what was done it would appear that this country cannot afford both an Army and a Navy. Such action is ludicrous.

The only growth in the President's budget is in the operations and maintenance account, a total of $1 billion. This certainly is not adequate to reverse the adverse trend in military capabilities of the United States vis-a-vis its potential adversaries.

I have just returned from the Soviet Union where I was told repeatedly that they, in reference to the 1962 Cuban crisis, do not intend to be second again. I believe them. However, I also believe that this country has the resolve and the resources necessary to insure that we are never second. President Carter in his address at Wake Forest University committed this administration to such a course.

Tomorrow, an amendment will be offered to increase budget authority for National Defense to $129.8 billion, the level approved by the Senate last week. This increase of $2.4 billion above the level recommended by the Budget Committee and $1.4 billion above the President's request provides flexibility in meeting contingencies identified relative to SALT and the Navy shipbuilding program. It also permits adequate funding for such programs as the F–14, the F–18 and the infantry fighting vehicle, with the cost avoidance associated with these programs, over $2 billion in the out years, more than offsetting this modest increase in fiscal year 1979.

This amendment will not affect outlays or the deficit level in fiscal year 1979, it constitutes a demonstration of resolve commensurate with that voiced by our Commander in Chief and warrants your careful consideration and support.

Mr. GIAIMO. Mr. Chairman, I yield 5 minutes to the gentleman from California (Mr. PANETTA).

Mr. PANETTA. Mr. Chairman, I rise out of deep concern for the budget, out of frustration, out of a deep desire and hope to make this budget process work.

I want to commend the chairman and the committee for what they have done. Within the limits of the Budget Act, I believe the work of the chairman and the Budget Committee have, indeed been admirable. To deal with a budget of some $500 billion in the few short months allocated you after the receipt of the President's budget is a massive of not impossible task. No one envies you your work load, but we all appreciate your great efforts.

House Concurrent Resolution 559 is the product of a long and difficult process that tries to balance the needs of social programs and defense. It is a tough assignment. But I rise to speak here as a freshman Member who is, indeed, frustrated by the process that we face. I have the responsibility to evaluate a massive budget that includes budget authority in excess of $568 billion, includes outlays of more than $501 billion, and provides for a deficit of some $58 billion. It is frustrating because I do not think any Member can ever adequately understand these sums of money or all of the programs that make up the Federal Government.

Mr. Chairman, I think we find ourselves in a double bind as we consider House Concurrent Resolution 559. Each of us knows that there is waste and excessive spending in the Federal budget. We know this from our own experiences with the bureaucracy and from the occasional reports in the press and elsewhere documenting fraud and waste. At the same time, finding this waste, making responsible reductions in the budget that do not jeopardize legitimate programs, is truly like looking for a needle in a haystack. Even though we know there is waste, we cannot find it, so we give every program just about what it got the year before, plus a little more for inflation, plus a little more for new initiatives, plus a little more for good measure. We wind up with $38 billion more in outlays this year than in last year's budget by this process.

As many of you know, I have introduced legislation to switch Congress to a 2-year budgeting system. So far, 36 Members have cosponsored this bill. I urge consideration of biennial budgeting because I believe that the fundamental problem we face in trying to get a grip on the budget is the fact that we do not have enough time to review the performance and budget requests of the various agencies and departments. Every year, we go through this hurried, frantic process of taking 3½ months to review the President's budget, and taking 2 days to consider the committee resolution. A few months later, we do the same thing all over again and come up with the second budget resolution, which we then amend to take care of excesses in appropriations.

In this process, which is squeezed into so little time, at no point do we actually look at the track record of these programs or at the way the executive branch spends its funds. We only review somebody else's budget review.

A 2-year budget system would allow the authorizing committees the time they need to conduct effective oversight. Of the two committees on which I serve, I would estimate that in the past year and a half, only a total of 3 days was spent on oversight for programs totaling billions of dollars. Oversight would allow us to eliminate out-of-date or ineffective programs. It would allow the Budget and Appropriations Committees time to focus more on how money is being spent, not just on how much should be provided.

We are talking a lot today about the need for zero-based budgeting. We are talking about the need for sunset and sunrise bills. But if these approaches are going to be done effectively, we have to give time to the process. It means that committees are going to have to find the time to really review these programs in far greater detail than they do now. Is there any committee that feels it now has the free time to devote to this process? I doubt it and that is why we must have the additional oversight time that biennial budgeting will provide us.

But no matter how persuasive I am about the merits of biennial budgeting, the fact is that this year we are dealing on an annual budget basis. Despite the fact that we do not, under this system, really have the time for effective oversight, we are being asked by our constituents and by many of our colleagues to make some modest across-the-board cuts in the budget.

Mr. Chairman, I would like to raise a point for consideration of the chairman of the Budget Committee and for others. How can we find a way to pinpoint waste in the framework of our annual budgeting system? Do we ask the executive branch to be more forthcoming as far as detailed expenditures? Do we establish arbitrary efficiency guidelines to apply to each program and agency, asking, for example, for the percent of program benefits administered per agency employee, or some other such yardstick that will enable us to say "This agency needs tightening up" or "This agency is doing a good job and should not face budget cutbacks"? Do we simply require the authorizing committees, before the second budget resolution, to come back with lists of cuts that can be made equal to some agreed-upon dollar figure or percentage?

Once again, I am not sure which of these approaches might work the best, but I do think each one deserves some consideration, if we are to avoid both a tremendously larger budget this year and an ill-considered cutback of each and every program and department. What we are talking about are simple, basic accounting and cost-benefit analyses that are used every single day in the business world. These approaches should not be ignored by Congress, if we are ever to subject our budget to some sound, objective analysis.

I appreciate the time constraints and the severe political pressures that face the Budget Committee. You have done the job you were called upon to do, balancing the many conflicting demands and needs encompassed in the Federal budget and in this Congress. But I would urge you to give some thought to new approaches to getting the budget under control, not to rule these ideas out or to use "scare tactics" to kill them. Each of us bring the same concerns about Federal budget to bear, as we debate the resolution. The need for fiscal restraint and a balanced budget is not at issue, merely the means to achieve that end. Finding those means is part of the task of the Budget Committee and of the House as a whole. Proposals to cut the budget by 2 percent are a part of that search and deserve consideration and debate, as do other approaches such as biennial budgeting, sunset and sunrise legislation, and zero-based budgeting.

I believe many of these broader reforms are necessary, because if we are really going to do a job with this budget, we are going to have to take time to look at programs, determine their effectiveness by some rational, objective standards, devote some real time to consideration of the budget, and make some hard choices in every aspect of the budget. We owe this to the Congress, to our people, and to the Nation, as part of our responsibilities as elected officials.

I might close by noting that it was not long ago that people scoffed at the notion of budget resolutions, Budget Committees, and the other reforms contained in the Budget Act of 1974. But that act, like the one that preceded it, is not written in stone, it is not perfect, but it is merely a starting point for better ideas, better approaches to developing an effective budget process for the Congress and for the Nation.

I appreciate the work of the Budget Committee, and I hope that we can improve that process, because the budget process ought not to be just good budgeting. It ought also to be good management.

Mr. GIAIMO. Mr. Chairman, I yield myself 1 minute.

Mr. Chairman, there has been considerable confusion about what is provided in the resolution for veterans programs. I would like to take this opportunity to explain our provisions.

The resolution includes $20.711 billion in budget authority and $20.471 billion in outlays for veterans programs. These amounts are more than $1.6 billion in budget authority and $1.2 billion in outlays above amounts recommended by the President.

The additions to the President's budget include the following:

A total of $929 million in budget authority and $511 million in outlays for reestimates of the costs of veterans compensation, pension, and GI bill benefits;

A total of $500 million in budget authority and outlays for liberalizations of veterans entitlement programs above and beyond the cost-of-living increases in compensation and pension benefits proposed by the President;

A total of $50 million in budget authority and $45 million in outlays for medical research. These amounts also are sufficient to prevent the hospital bed closures proposed by the President, although, based on extensive analysis by various sources, we are not opposed to the bed closures because the closures would increase the efficiency of the VA health care system and would not result in reduced service levels; and finally

A total of $158 million in budget authority and outlays because we did not believe that savings requiring legislation proposed by the President would be achieved.

The Members can clearly see from this list of add-ons to the President's budget that the Budget Committee has not proposed program cuts. We have not proposed to reduce the number of people receiving medical care. We have not proposed cutting back the pension benefits that people now receive—in fact, we have proposed increases in pension benefits.

We, too, would like to end the complaints from our veterans pensioner constituents when social security increases are nullifield by cuts in their pension benefits. But it does not require such a costly pension bill as is being proposed to end these complaints and to improve the pension program in other ways. It does not require a bill that will cost $3.2 billion above current law by 1983. And it does not require benefit increases of 104 percent for a veteran with dependents.

The issue is not whether all of us in this House are for or against veterans. The issues are how much in any given year is enough, and whether we should expect and demand the same efficiency in VA health care as we do in other public and private health systems.

I submit that the resolution amounts for veterans programs are generous and fair. If adopted, they would go a long way toward providing more adequate benefits for our Nation's veterans.

● Mr. JOHNSON of California. Mr. Chairman, I would like to offer the following with reference to House Concurrent Resolution 559 as it pertains to the programs of the Committee on Public Works and Transportation.

The budget resolution, in many instances, is substantially under the dollar expectations of the other committees of the House on a functional basis. This of course is understandable because of the Budget Committee's desire, at this stage of the budget process, to provide the House with its view of achievable funding targets which, at the same time, permit Federal spending and revenues to meet reasonable goals.

In our view the aggregate goals of this year's target resolution are within reason and thus believe the House should make every effort to meet or certainly approach these overall targets. On the other hand, we are gratified that the Budget Committee is much more explicit regarding the target nature of a first budget resolution. For example, in discussing the committee recommendations for "other natural resources and environmental programs," the report on the resolution stated:

> The committee does not intend to foreclose the further consideration of any of the particular programs suggested to it by the various committees. Instead, the allowance provides the House with the flexibility to determine its priorities and fund those initiatives of highest priority.

Obviously, this philosophy is equally applicable to all of the recommendations. Again, while discussing a proposed amendment to the transportation function, the chairman cited the difficulty of establishing a "realistic target" at that time and further indicated that after the House and Senate had completed action the final resolution could be adjusted at that time.

One final point I would like to make relates to the committee's action which provides for the President's urban initiative. While we essentially agree with the sense of such action, we do not as yet have an administration proposal and therefore could very well have a problem with the May 15 reporting deadline.●

● Mr. KRUEGER. Mr. Chairman, as we begin our yearly task of enacting the first resolution on the budget, there are encouraging signs that the congressional budget process may finally achieve its goal. President Carter submitted a relatively lean budget to the Congress for its consideration, and the House Budget Committee has improved upon his suggestions. The resolution which we consider today would result in a deficit $2 billion less than the President's proposal.

The discipline of the balanced budget has disappeared from Congress and executive branch in recent years, and little time remains to reverse the dangerous trend towards larger federal budgets with increasing budget deficits. Each $50 billion-plus budget deficit carries with it an increase in inflation, and we must act quickly and forcefully to hold Government spending down in order to reduce the deficit and the concomitant inflationary spiral.

The President and Budget Committee are to be commended for their efforts in this direction. However, I believe that the Members of the House can improve upon their recommendations by establishing even stricter budget targets in this first resolution. Remember, the first resolution on the budget sets goals in light of which subsequent legislative activity is to be conducted. Our goals should be challenging, and we can go farther to eliminate increased Government expenditures than the Budget Committee has recommended.

A ready guidepost for enacting a slimmer budget is contained in the current policies budget prepared by the CBO. This budget reflects expenditures necessary to carry on current programs and services, with adjustments for inflation. It does not include any real growth in programs or services.

Because of the serious nature of our present fiscal difficulties, the Federal Government cannot afford at this time to create expensive new programs or expand upon existing programs and services. (There are three exceptions, however, and I will discuss them later.) We need to keep very close to the current policy budget in order to put an effective ceiling upon Federal expenditures, reduce the deficit and eliminate the greatest cause of inflation.

This is no radical approach, but it would represent the first real action to cut down on the increasing size and cost of Government. By eliminating unnecessary Federal expenditures it would promote more efficient use of Government dollars, freeing more capital for investment in the private sector, the best source of meaningful employment. Yet, at the same time, policymakers in the Congress and elsewhere would have wide latitude. We would merely be imposing ceilings upon the various functional categories of the budget, allowing those most familiar with the subject areas to choose where to make cuts, or whether to maintain all programs and services at last year's level. This is a relatively painless method of restoring discipline to the budget process, and I think the Congress should try it.

I have drawn up a suggested proposal which follows closely the so-called current policies budget. The new budget authority and outlay levels recommended for fiscal year 1979 would be those contained in the current policy budget, with no allowance for real increases in spending. There are exceptions in only two instances. First, in a few cases the House Budget Committee recommended targets for spending which are less than those required under the current policies budget. I have incorporated the committee's recommendations in these instances, achieving a further savings over the current policies budget. Second, there are three areas of the Federal budget in which real spending increases are justified to promote national goals: National defense, agriculture, and energy.

Many Americans are as concerned as I about the defense capabilities of the Nation, and a real increase in defense spending is necessary to match the Soviet effort. At the same time we should provide increased assistance to the Nation's farmers to maintain a secure domestic food supply, and promote research into energy technology and supply to achieve greater energy self-sufficiency in the future. My suggested first budget resolution incorporates the committee recommendations in these three budget functions, each of which represents real growth over the fiscal year 1978 spending level.

This modified current policy budget represents a considerable improvement over the across-the-board cut proposed by some Members of the House. An across-the-board cut sacrifices all areas of the Federal budget, regardless of national priorities. I assume that other Members, like myself, may oppose the across-the-board cut because it results in decreased defense expenditures at a crucial period in our national defense effort. Cutbacks in the agriculture and energy functions are also inadvisable at this time. Congress has the responsibility to set national priorities, and enactment of an across-the-board cut is a dereliction of this important duty.

My modified budget targets assume the same level of expenditures as does the committee, because I wanted to stress the importance of spending reductions. Other Members will offer amendments which would adjust the revenue assumptions contained in House Concurrent Resolution 559, and I leave this area to them. We must, however, eliminate wasteful Government expenditures if we are ever to beat inflation, and my proposal complements tax initiatives currently before the Congress because of this fact.

I urge my colleagues to join in discussion of our budget priorities for fiscal year 1979, and ask that you consider my suggestions as a means of advancing our budgetary goals. We have made significant progress thus far in our consideration of the budget for fiscal year 1979, but this fact should not deter us from making further advances. By following my modified current policies budget we can signal the Nation that Congress recognizes the burden which Government spending has placed upon our citizens, that we look upon it with disfavor, and that we are determined to eliminate it. The plight of the American taxpayer and the decline of the dollar abroad require that we do no less.

I include at this point two graphs comparing my proposal to the budget recommendations of the House Budget Committee, the President, and the unmodified current policies budget; a copy of my suggested substitute for House Concurrent Resolution 559 also follows:

AN AMENDMENT IN THE NATURE OF A SUBSTITUTE TO HOUSE CONCURRENT RESOLUTION 559, OFFERED BY MR. KRUEGER

"Strike all after the resolving clause and insert in lieu thereof the following:

"'That the Congress hereby determines and declares, pursuant to section 301(a) of the Congressional Budget Act of 1974, that for the fiscal year beginning on October 1, 1978—

"'(1) the recommended level of federal revenues is $443,279,000,000, and the amount by which the aggregate level of federal revenues should be decreased is $28,400,000,000;

"'(2) the appropriate level of total new budget authority is $552,174,000,000;

"'(3) the appropriate level of total budget outlays is $496,282,000,000;

"'(4) the amount of the deficit in the budget which is appropriate in the light of economic conditions and all other relevant factors is $53,003,000,000; and

"'(5) the appropriate level of the public debt is $851,203,000,000, and the amount by which the statutory limit on such debt should accordingly be increased is $99,203,000,000.'

"'SEC. 2. Based on allocations of the appropriate level of total new budget authority and of total budget outlays as set forth in paragraphs (2) and (3) of the first section of this resolution, the Congress hereby determines and declares pursuant to section 301(a)(2) of the Congressional Budget Act of 1974 that, for the fiscal year beginning on October 1, 1978, the appropriate level of new budget authority and the estimated budget outlays for each major functional category are as follows:

"'(1) National Defense (050):

"'(A) New budget authority, $127,439,000,000;

"'(B) Outlays, $115,679,000,000.

"'(2) International Affairs (150):

"'(A) New budget authority, $10,100,000,000;

"'(B) Outlays, $6,600,000,000.

"'(3) General Science, Space, and Technology (250):

"'(A) New budget authority, $5,200,000,000;

"'(B) Outlays, $5,000,000,000.

"'(4) Energy (270):

"'(A) New budget authority, $9,494,000,000;

"'(B) Outlays, $9,252,000,000.

"'(5) Natural Resources and Environment (300):

"'(A) New budget authority, $13,464,000,000;

"'(B) Outlays, $12,013,000,000.

"'(6) Agriculture (350):

"'(A) New budget authority, $12,297,000,000;

"'(B) Outlays, $12,188,000,000.

"'(7) Commerce and Housing Credit (370):

"'(A) New budget authority, $5,700,000,000;

"'(B) Outlays, $3,500,000,000.

"'(8) Transportation (400):

"'(A) New budget authority, $15,900,000,000;

"'(B) Outlays, $16,700,000,000.

"'(9) Community and Regional Development (450):

"'(A) New budget authority, $8,700,000,000;

"'(B) Outlays, $8,900,000,000.

"'(10) Education, Training, Employment and Social Services (500):

"'(A) New budget authority, $30,600,000,000;

"'(B) Outlays, $30,200,000,000.

"'(11) Health (550):

"'(A) New budget authority, $52,282,000,000;

"'(B) Outlays, $49,550,000,000.

"'(12) Income Security (600):

"'(A) New budget authority, $192,750,000,000;

"'(B) Outlays, $158,800,000,000.

"'(13) Veterans Benefits and Services (700):

"'(A) New budget authority, $20,500,000,000;

"'(B) Outlays, $4,000,000,000.

"'(16) General Purpose Fiscal Assistance (850):

"'(A) New budget authority, $9,098,000,000;

"'(B) Outlays, $9,100,000,000.

"'(17) Interest (900):

"'(A) New budget authority, $47,000,000,000;

"'(B) Outlays, $47,000,000,000.

"'(18) Allowances (920):

"'(A) New budget authority, $1,050,000,000;

"'(B) Outlays, $1,000,000,000.

"'(19) Undistributed Offsetting Receipts (950):

"'(A) New budget authority, −$17,500,000,000;

"'(B) Outlays, −$17,500,000,000.'" ●

Mr. ROUSSELOT. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. GIAIMO. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly, the Committee rose; and the Speaker pro tempore, Mrs. BOGGS, having assumed the chair, Mr. NATCHER, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the concurrent resolution (H. Con. Res. 559) setting forth the congressional budget for the U.S. Government for the fiscal year 1979, had come to no resolution thereon.

A MEMORIAL TO THE LATE J. EDGAR HOOVER

(Mr. McDONALD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.

● Mr. McDONALD. Mr. Speaker, 6 years ago today our country suffered a great loss in the death of J. Edgar Hoover, who for almost half a century, steadfastly and faithfully served the American people as the Director of the Federal Bureau of Investigation. I believe that today, on the anniversary of his passing, we should pause to consider the unique contribution that he gave to us.

J. Edgar Hoover created in the FBI an effective and a respected law enforcement apparatus that for many years protected our country from foreign subversion and communism, established a professional standard in modern criminal investigation, and built up an organization which achieved a worldwide reputation for excellence. From the same in 1924 when Mr. Hoover took over as Director of the Bureau, he established traditions of excellence, integrity, and accomplishment. With his death a void was created that has been impossible to fill.

Mr. Hoover was both eloquent and forthright in his defense of the principles underlying our national life against the attacks of those who would seek to bring about the destruction of our Republic. Under his guidance the FBI became a bastion in the fight against crime,

communism, terrorism, and attacks from the desperate elements of society. He protected our country from its enemies, from within and without, and in all his actions sought to implement the Constitution, to "establish justice," and "insure domestic tranquillity."

Duty came first with John Edgar Hoover. He was a great patriot. His memory may perhaps be well served by our remembering the last message that he issued, on May 1, 1972, in which he stressed—

Unless we honor and obey the rule of law, the tyranny of extremists may inevitably result.

MESSAGE FROM THE DIRECTOR—TO ALL LAW ENFORCEMENT OFFICALS

MAY 1, 1972.

Extremists of all stripes in our society ceaselessly attempt to discredit the rule of law as being biased and oppressive. They have no conception of—or purposely choose to ignore—its role and history. It is not surprising that these divisive elements concentrate their abuse on the law enforcement officer. Above all, he stands firmly in the path of mindless actions that would reduce our government of laws to mob rule or the whims of lawless men.

To permit such attempts to damage the reputation of our government by law is, of course, a necessary condition of democracy. While it must tolerate the lawfully expressed views of extremists, its citizens cannot through their own ignorance be entrapped with sympathy for bankrupt doctrines that would lay waste the foundations of their Nation.

In observing Law Day, USA, this May 1st, we have an opportunity to view our laws in their proper perspective and appreciate the role they have played in developing our Nation. This day is also a time to renew our obligation of support to law enforcement officers, 126 of whom selflessly gave their lives last year in upholding the law.

Our greatest democratic heritage is the rule of law. It is the foundation for and the guardian of the rights, liberties, and orderly progress we enjoy. It is also the soil that has nurtured the "American dream" implicit in the Declaration of Independence pledge to provide ". . . Life, Liberty, and the Pursuit of Happiness" for all our citizens.

The tests of time and challenge in our Nation's history have more than proven the majesty of the law. Were this not so, our country would not have endured its strife to now stand before the nations of the world as a model of freedom and accomplishment. This is not to say the law has always been right, but that it has been organized to ultimately seek justice. Recognition of its power for good is not merely the experience of our nearly two centuries of democratic government. The struggle to insure the right of the individual and his social organizations by written decree has roots which reach far back into antiquity. The authors of our Constitution were mindful of this legacy when they drafted that historic document.

Nor was the importance of a definitive rule of law lost to the general public of our infant Nation. Worn by the ravages of the Revolutionary War, our expectant forefathers appealed for and got amendments to the Constitution which formed the Bill of Rights—specific guarantees of law that responded to the heart of their grievances. Together the Constitution and the Bill of Rights gave birth to our rule of law and it is the flesh and blood of our Nation.

The law is dynamic because it responds to change as it did for those who argued for and received the Bill of Rights. And our Nation's history has been a chronicle of change. But the process of change in a democracy requires discipline and responsibility that will not unleash unrestrained forces that would rip the fabric of our freedoms. That fabric derives its strength through the warp and wool of laws that orderly guide the process of change by defining our individual and corporate duties. Change in our society would otherwise simply result from those who could impose their will on others without regard for the validity of their arguments or the rights of those who do not share their views.

Law Day honors an indispensable commitment of a free society: that democracy be dynamic but not self-destructive. If we do not value this commitment by both honoring and obeying the rule of law, the tyrrany of extremists may inevitably result.

JOHN EDGAR HOOVER,
Director.

[From the News American (Baltimore, Md.), May 7, 1972]

J. EDGAR HOOVER—PATRIOT

(By Bob Considine)

J. Edgar Hoover's troubles with the political leftists rested, I suspect, on the fact that they were always catching him redhanded, holding high the American flag.

That, they didn't particularly like nor understand.

The man was an uncompromising patriot, as increasingly unused word which is still, however, not marked archaic in Webster's Collegiate Dictionary. "One who loves his country and zealously supports its authority and interests."

He was proud to be one. He resolutely opposed organizations and individuals he felt were out to do us in, or fracture the law. It must have been especially cold comfort to go after the Berrigans, for he was basically a deeply religious man. But there was the evidence, delivered by a scoundrelly informant, and Hoover felt he must act.

(His FBI was also required to prosecute hunters of certain Canadian fowl during their migrations across the U.S., and a relatively dormant racket slavery.)

For the better part of half a century, Hoover never stopped hammering away with righteous indignation at public enemies (and private foes) ranging from Communists to car thieves. Bundists to baby-snatchers. Black Panthers to Mafia Godfathers. A tough cop isn't in the business to make friends.

Toward the end of a long interview the late Frank Conniff and Marianne Means had with President Lyndon Johnson we asked him to name the man he considered to be the greatest living American.

The President looked briefly into his Dr. Pepper, rocked his heavy White House rocking chair, and said "J. Edgar Hoover."

We must have looked slightly surprised, for LBJ continued in his best John Wayne manner, "Without Hoover, this country would have gone Communist 30 years ago."

Other Presidents in a position to know more about Hoover than either his friends or enemies must have felt the same way about it as Johnson did. Conservative Herbert Hoover found his director of the Federal Bureau of Investigation indispensable, as did a liberal of the magnitude of Franklin Delano Roosevelt. John F. Kennedy's first act of office—as he brought youth into national politics—was to urge Hoover to remain at his post even though he was then beyond the retirement age for civil servants.

I don't recall that either Gallup or Harris ever took a head count on Hoover's friends and foes. But listening to him, as I had the privilege of doing from about 1930 until last week's King Features Syndicate Banshees luncheon for visiting publishers and editors, Hoover always gave more personal attention to his enemies. They were, of course, legion. He rated muckraking Jack Anderson among what might be called his personal Ten Most Wanted. Anderson, apparently impishly spoofing the great G-Man's passion for picayune detail, once dispatched a leg man to sift through the garbage and trash behind Hoover's house and find out what kind of whiskey was being consumed by the director and/or his guests.

The matter of his enemies came up, as an aside, in what turned out to be one of his last appearances before the House Appropriations Committee (which always gave him what he wanted in the way of appropriations.) Hoover told the congressmen on the panel, "I have a philosophy. You are honored by your friends and are distinguished by your enemies. I have been very distinguished."

He had more friends than enemies, of course. They just didn't make as much noise. You saw them marching by his bier in the Rotunda, paying tribute to the first Civil Servant ever to rest in that hallowed place.

Hoover could take it as well as dish it out. Years ago, when accused of being a desk dick, he drew a gun and went after one of the toughest of the cornered hoodlums of the time. He was waiting, a few yards away, when Lepke Buchalter gave himself up to Walter Winchell in which could easily have been an ambush. He could talk tough and write tough. He wrote a monthly column for The FBI Law Enforcement Bulletin. What may have been his last one started:

"A special kind of killer haunts many of our communities today. He is the cowardly jackal who murders law enforcement officers. For many of his victims, he will be forever faceless because the fatal assaults are at the officers' backs and they have no opportunity to defend themselves."

John Edgar Hoover, one of the rather rare public figures ever born in Washington, D.C., put in a full day's work, the last day of his life. When he entered what became his FBI it was corrupt enough to employ that ultimate scoundrel, Gaston B. Means. When he left, against his will, it was the world's most towering symbol of law enforcement . . . his imperishable monument.●

VIGIL OF FREEDOM

(Mr. KOSTMAYER asked and was given permission to address the House for 1 minute and to revise and extend his remarks)

Mr. KOSTMAYER. Mr. Speaker, as a participant in today's "Vigil of Freedom" I am honored to have the opportunity to speak on behalf of Mr. Isaak Shkolnik. It is especially gratifying because last year I "adopted" Mr. Shkolnik and spoke on the House floor about his plight.

Today, I would like to briefly summarize his fight for freedom and bring my colleagues up to date on Mr. Shkolnik's status.

Isaak Shkolnik has been imprisoned since 1973 when he was convicted of spying for Israel. But, the Soviet Union did not convict a man who was guilty of a crime. Instead, it sentenced a man who attempted to emigrate to a country where he could live and worship freely.

Mr. Shkolnik, a radio technician, was first charged with spying for Great Britain and passing secrets to British engineers in 1968. The charges were changed, though, from spying for Great Britain to spying for Israel after British officials denied having any connection with Isaak Shkolnik.

After 9 months of maintaining his innocence at his trial in 1973, Mr. Shkolnik changed his plea to guilty after being

informed that the death sentence was sure to follow if he were convicted. He was sentenced to 10 years imprisonment, which was later reduced to 7 years at hard labor.

I join with my colleagues today in urging the Soviet Union to live up to the promise of the Helsinki agreement, which is dedicated to the spirit of human freedom. One of the most basic freedoms is the right of every person to leave a country, including his own, in which he is not happy.

I have repeatedly asked the President of the Soviet Union to grant Mr. Shkolnik that right. Today, he remains in Perm No. 35 while his wife and daughter live without him in Israel. He is one of the many Jews living in a country which does not recognize simple justice.

I have also written to Isaak Shkolnik during the year, and have corresponded with his wife Feiga, who lives in Jerusalem. Therefore, I was most disappointed to learn that a letter from Isaak to his wife indicated that Soviet authorities were not allowing him to receive any parcels or packages mailed to him, or letting him purchase needed commodities from the prison commissary.

He asked his wife to send him a Hebrew book so that he may study his religion, but a prison official intercepted the letter and attached a note informing Feiga Shkolnik not to send the book—Isaak would never get the opportunity to read it.

Mr. Speaker, while today we condemn the Soviet Union for its injustice, we also express the hope that Isaak Shkolnik will one day be free again, and join his family in Israel. Over the past year, the statistics have become more encouraging for prisoners of conscience, their families, and all Jews wishing to emigrate. During the past 10 months more than 13,500 Jews have been allowed to emigrate from the Soviet Union, nearly 30 percent more than during the same period a year earlier.

Still, this is not enough. Today, I join with my colleagues and with all Jews everywhere and ask that the Soviet Union release Mr. Shkolnik and recognize this injustice. Until all the prisoners of conscience are released, we in Congress must continue our vigil of freedom on their behalf.

So long as I am here, Mr. Speaker, I shall continue to speak out on behalf of those Jews in the Soviet Union and elsewhere who continue to be denied the right to emigrate to Israel and live in freedom.

PROMISES, PROMISES: CARTER AND THE VETERANS

(Mr. HAMMERSCHMIDT asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. HAMMERSCHMIDT. Mr. Speaker, I do not enjoy recalling the parade of broken promises made by President Carter during the 1976 campaign, but in light of the difficulties the Veterans' Affairs Committee has had with this administration's budget proposals, I thought it might be appropriate to recall a few.

As I and Chairman ROBERTS have communicated to the Members of this body, the Veterans' Administration budget for fiscal year 1979 is woefully short, so short in fact that it threatens to destroy the VA medical program as we now know it, and to do grave damage to other programs designed to aid the men and women who answered our country's call during times of crises. There are insufficient funds for pension reform. There is no provision at all for a cost-of-living increase for GI bill students.

If we recall the promises made by Candidate Carter, again and again during the 1976 campaign, it is not surprising that the veterans of this Nation feel betrayed by the present administration. Below are just a few of them:

Candidate Carter on the VA medical system:

I will begin by strengthening the VA Hospital system to make it capable of delivering the finest health care available . . . the sick and disabled are forced to wait weeks and even months for treatment in overcrowded and understaffed VA hospitals. The average VA hospital has only half the doctors and support personnel found in the average community hospitals.

President Carter, rather than strengthening the VA hospital system, has threatened to all but destroy it. This administration has proposed a mere 2.6-percent increase in budget authorization for VA hospital and medical care, while proposing to increase HEW health care programs by more than 10 percent. Hospitals which he termed overcrowded and understaffed only 2 years ago have suddenly become underutilized to the point that the administration believes it can eliminate some 3,100 beds—the equivalent of closing down 6 hospitals. Medical research programs, which serve as perhaps the most attractive recruitment incentive for highly skilled physicians, will be eliminated or reduced in some 64 hospitals. This, of course, is especially ironic in light of the Nobel Prizes recently awarded two VA researchers. We have already heard from some of our most qualified VA physicians that they are now being forced to consider other employment, for the sake of their careers rather than remaining in a VA system that limits their professional diversity. If these cuts are allowed, Mr. Speaker, I greatly fear that the VA hospital system, rather than being second to none, will take a back seat to all. The administration's proposal is a giant step toward turning the VA hospital system into little more than a long-term geriatric care service, staffed by foreign medical school graduates.

Candidate Carter on Compensation, Pension, and Education:

Veterans and widows living on pensions find themselves existing on a pittance as inflation cuts the value of their benefits. The Administration has been willing to let inflation reduce this even further by not recommending cost-of-living adjustments in veterans benefits. As President, I will protect veterans benefits—pensions, VA hospitals, and the GI Bill—what we need is a square deal for those who gave a great deal.

President Carter, however, has budgeted only $110 million for a pension reform package that will cost eight times that much, has recommended a cost-of-living increase for service-connected disabled veterans far below the increase in the cost of living, and has not even budgeted a cost-of-living increase at all for our Vietnam-era veterans in school under the GI bill.

Candidate Carter on Veterans Preference:

The laws that mandate this special preference in hiring should be rigorously enforced.

President Carter placed a man at the head of the Civil Service Commission who annonuced, on his first day in office, that he would attempt to do away with the veterans preference concept as we know it.

Candidate Carter on veterans employment:

The unemployment rate for our young Vietnam-era veterans is a disgrace. . . . The poor record of government bureaucracy has been especially bad in programs intended to help recent veterans find jobs. Men who have endured so much suffering, so bravely, fighting in a far-off land, should not now suffer anew in their own country at the hands of insenstitive bureaucrats and indifferent politicians.

President Carter appointed an individual as the Assistant Secretary of Labor for veterans employment who had absolutely no experience in either veterans affairs or in employment programs. It is no wonder that the President's widely publicized HIRE program, which was to produce 100,000 reimbursable hire jobs in the private sector over a 1-year period, produced a grand total of 442 jobs.

Candidate Carter on his relations with the veteran:

If I become President, the American veteran, of all ages, all wars, is going to have a friend, a comrade and a firm ally in the White House.

President Carter, has demonstrated this "Camaraderie" by pardoning those who refused to serve in our military during Vietnam, by seeking not only to excuse the acts of those who deserted or served less than honorably, but to reward this service with veterans benefits, by seeking to do away with the time-honored concept of veterans preference, by using the veterans employment area as a dumping ground for rewarding political favors, and now, by offering a Veterans' Administration budget that is distressingly inadequate. If these are friendly acts, Mr. Speaker, I shudder to think of what this President might now be proposing if he decided to become hostile.

EXTENDING NEW YORK CITY SEASONAL FINANCING ACT FOR 3 YEARS

(Mr. STANTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. STANTON. Mr. Speaker, I am introducing H.R. 12502, a bill to extend the New York City Seasonal Financing Act of 1975 for 3 years, with a gradual reduction in the loan amount during the 3-year period. In 1975, New York City

was on the brink of bankruptcy. With the passage of the 1975 Seasonal Financing Act and the tremendous cooperation of New York City in fulfilling 90 percent of the requirements of that act through personal sacrifice, cuts in services, and hard decisions, the city has been able to survive.

Senator PROXMIRE has indicated that, today, New York City does not require any further Federal assistance to maintain its solvency. I am convinced, however, that although the city's financial situation is not as grave as it was in 1975, there is a need for additional Federal assistance if the city is to avoid bankruptcy.

As I did in 1975, I maintain the belief that the most appropriate Federal assistance is a seasonal loan program. Such a program is in keeping with the extent of Congress responsibility, that is, maintaining the solvency of New York City. Any other approach runs the risk of establishing a dangerous precedent.

My proposal for a phased out extension of the seasonal loan program is based on my observation that the real solution to New York City's financial problems rests with the city's administration, not the Federal Government. Additionally, I disagree with long-term assistance because it would destroy the relationship that has been established between the city and Federal Government during the past 200 years. It is the city's responsibility to establish stringent budget controls and take other necessary steps to enable them to reenter the capital markets. Based on Mayor Koch's performance in Congress, I have every confidence in his ability to take these steps.

It should be clear that my bill is not an alternative to or in competition with the committee legislation. It is my intent that if Congress fails to accept long term assistance, we should have before us some other means of assuring the city's solvency. Finally, this bill is not a Republican alternative. I hope all Republicans will weigh the facts of the New York City financial situation and vote as their conscience dictates realizing both their obligation to keep New York City from bankruptcy as well as their obligation to their constituency.

ADDRESS BY HON. DON H. CLAUSEN BEFORE NORTH COAST COUNTIES SUPERVISORS ON NORTH COAST WATERSHED MANAGEMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DON H. CLAUSEN) is recognized for 10 minutes.

● Mr. DON H. CLAUSEN. Madam Speaker, the recordbreaking drought of 1976 and 1977, followed by intense rains which caused considerable flooding in much of the West again focused attention on the need for total management of what is coming to be recognized as one of our most valuable resources—water. Too often in the past we have zeroed in on a single aspect of the problem, such as pollution-free water, while ignoring other aspects like an adequate water supply, or flood control, or streambank and erosion protection.

I believe my colleagues will be interested in the approach being adopted by the principal counties of origin in the Eel-Russian River basins; namely, Sonoma, Mendocino, Humboldt, and Lake Counties in northern California, which is outlined in remarks I recently made to the North Coast Counties Supervisors Association of the Redwood Empire Association.

These counties are moving with dispatch to address the pressing problems of their area and I am pleased and proud to be associated with and supportive of their efforts.

CONGRESSMAN DON H. CLAUSEN'S SPEECH BEFORE THE NORTH COAST COUNTIES SUPERVISORS AND REDWOOD EMPIRE ASSOCIATION ON APRIL 20, 1978, ON NORTH COAST WATERSHED MANAGEMENT

It is a great pleasure for me to be able to address you today during the formal adoption of the joint-powers agreement for the implementation of the Eel-Russian River Watershed Conservation and Development Program. The representatives of the four counties of origin who will be partners in the agreement have done an excellent job in shaping and advancing it and you are all to be commended for your constructive efforts.

In the statement of purpose of your agreement you have indicated that your objective is to promote proper watershed conservation and flood control recommendations and to provide measures to achieve proper economic stimulus and development in the Eel and Russian River watersheds. In my remarks to you today, I would like to share with you some of my thoughts about water management and conservation, current trends in water policy, and also offer some ideas on the direction that your program might take as well as the level of support and assistance that I would be able to lend to your efforts.

In the past, we have tended to think of all or nothing, total solutions in dealing with our water related problems. This has certainly been the case when we look at the Eel River. After the tumultuous flood of record in 1964, the dominant public opinion favored a structural solution. The Corps of Engineers response to the public was the Dos Rios project in conjunction with levees in the Eel River Delta. That alternative was not supported or advanced by the State and others because of environmental, economic and engineering factors. Now we have the Eel River in the State Wild Rivers system, yet the problems of flooding, low-flow in summer, stream bank and watershed erosion, and the dimunition of the fishery resource are still with us.

The lessons of this experience are significant and must not be forgotten, and there are some basic facts of life that cannot be ignored. First, I think it should be clearly understood that no structural alternative will go forward unless the state and our counties of origin are in full agreement. The counties of Lake, Sonoma, Mendocino and Humboldt individually or collectively could not finance the local share let alone the full costs of a project of the scale of a Dos Rios or an English Ridge. In all probability, the State of California and/or other water agencies would have to agree to contract for the water supply for any project or combination of projects. In addition, none of us in elected office will support any project that would result in the flooding of Round Valley. Where this leaves us is problematical. We still have many people who favor structures on the Eel. . . . others who favor structures higher-up in the watershed . . . . others who favor dry dams . . . others who favor non-structural alternatives . . . . others who oppose all structures. In the final analysis, the answer may very well be a combination of structural and non-structural methods in conjunction with an extensive reforestation program which would add to the retentive capacity of the watershed and enhance the tree growing capacity of the lands. I think one of the primary goals of your four-county agreement will be to address yourselves to these problems on the Eel. These problems cannot be properly addressed if you begin by making either/or assumptions about the need for structures. You must obtain all information possible and then make decisions based on where the facts have taken you.

First and foremost, though, I think that it is imperative that you have an up-to-date, comprehensive and accurate natural resource data base on which to develop management and policy decisions. This is an area where the federal government, and I as your elected representative, have aided in the past and will continue to assist at your request.

In proposing the idea of a North Coast Watershed Conservancy Program in 1971, my thinking then, as it remains now, was predicated on four factors:

1. That the North Coast, which contains 40 percent of California's water, is a region of hydrological extremes. Within very short periods of time we can and have been subjected to very severe drought and very severe flooding.

2. The recognition of the interdependence of all natural resources of North Coast and the dominant role of water in this interdependence. This means total water management of the ground and surface water supplies and an inventory of our total supply in the Eel-Russian Basins. The anticipated completion of Warm Springs in conjunction with Coyote and ground water reserves will definitely assist in meeting the immediate needs for our newly negotiated water agreements. But we also need a projection of the future needs of our four counties of origin and a projection of the potential needs of our immediate neighboring counties, such as Marin, Napa, Yolo, Solano, etc.

It also means a Basin watershed conservancy and management plan—one that is designed by local people and your respective counties and fully reflects the desires, concerns and resource management objectives of the people of the area and ratified by your Basin Commission.

Intensified forest management and fish and wildlife enhancement must be given top priority as you develop your land and water management plans.

With the emphasis on defining water needs for farms, forests, flood control and fisheries, proper management will provide unlimited opportunities for tourism and recreation.

I certainly believe you would be well advised to establish legal, engineering, water and resource management, and environmental advisory task forces that could aid in developing and coordinating the input to your Commission.

3. The third factor, that the rivers of the North Coast should be divided into two categories—natural river systems and managed river systems—as I view it, all of our rivers in the North Coast should be retained as natural rivers except the Mad, the Eel and the Russian, which now have structures on them and should be placed in a managed river system category for purposes of addressing the flood control, erosion and water management problems known to all of you.

4. Given our previous experience with major flood control structures, we must simultaneously explore the non-structural alternatives available to us.

Through my position on the House Water Resources Subcommittee, I have advanced

legislation which provides the vehicle for establishing integrated resource and environmental data on the natural and managed rivers as well as other North Coast watersheds and tributaries. The investigations and surveys we have underway are:

Northern California Streams.

The Humboldt Bay Baseline Survey.

The Russia River Basin Comprehensive Investigation.

The Eel River Streambank Erosion Demonstration Project.

Eel River Delta Alternatives to Levees.

The Eel River Comprehensive Basin Investigation.

The latter study and the Russian Comprehensive were unique in that it provided the Corps a new role in water resource planning and assistance. These basin resolutions direct the Corps to investigate all facets of the watershed, from forestry and fishing to water quality and flood control.

For the Eel Delta, we've authorized the Corps to evaluate and develop non-structural flood control alternatives such as flood proofing of buildings, possible relocation, dredging, channel stabilization and cattle evacuation plans. While it would not control a major flood such as in 1964, it could minimize damage and afford some protection and security from the lesser floods that occur.

In Lake County, there has also been a concentrated effort to deal with the water quality and supply problems at Clear Lake with nonstructural alternatives. In this endeavor, EDA, EPA, Bureau of Reclamation and the Corps have all been involved.

These ideas of a new and more flexible role for the Corps are being accepted. Recently, Lt. General John Morris, Chief of Engineers, in a speech to the Water Resources Congress, entitled "Where are We Headed" noted, "Water resources problems will continue to arise from population growth, economic expansion and unpredictable natural events will force more effective national water conservation measures supported by a proper blend of structural and non-structural solutions which are well engineered and developed. The key to resolving water resource problems is the formulation of clear, comprehensive national water policies which are in tune with today's public and national objectives." These changes in thinking by the Corps are indicative of the re-evaluations of National Water Policy currently taking place in the Congress and the Administration. One administration report advises the President to propose laws and adopt procedures that would require federal and state planners to consider much more carefully the building of huge government-financed water projects. This same report also recommends that states should be required to pay in advance 10% of the cost of the new water projects that they want built. Of course, Congress would have to assist and/or approve the establishment of any new water policy.

This Congress has approved our committee's new "clean water" program which authorizes comprehensive waste water management and includes my new innovative technology incentives amendments for communities that develop re-cycling, re-use and land treatment management alternatives.

The implications of all of this are far-reaching. For sure, it points to the need for building a cohesive political support group in the North Coast that will be able to articulate representative and clearly defined positions on the water related issues that affect you. I believe that your joint-powers agreement is the first step toward meeting that objective. Your program is a program *of, by* and *for* the areas of origin on the North Coast . . . you have perceived the potential for action by other interests in the state and you are taking early-on action to make sure that our interests are protected. It is not a narrow, parochial, "them versus us" interest, but the legitimate interest in seeing that you have a say in what affects our communities . . . and the North Coast.

Your joint-powers agreement is properly predicated on the strong role that local government should and must play in determining public policy that you will establish and implement and I totally support the fundamental concepts of your agreement. The real challenge to all of us will come when we develop the specifics of our plan of action.

The Miami and Muskingum watershed conservancy programs in Ohio are excellent examples of what can be done by local units of government joining together to address common water resource related problems. These organizations were initially formed to control the tremendous floods that used to frequent the Miami and Muskingum Valleys in Ohio. Over the years, they have matured into multi-purpose water management organizations whose primary goal was flood control and the maintenance of water quality in their regions. They are actively involved in waste management, flow-augmentation, stream appearance, recreation facilities and other problems that affect water quality. I would strongly recommend that those who will be immediately involved in directing your joint-powers agreement look to the Miami and Muskingum programs as models of what can be done.

The Corps will cooperate with you in developing its studies and resource inventories. Last week in Washington I met with Colonel John Atsid, of the San Francisco District. We talked of this joint-powers agreement and he re-affirmed his commitment to provide support. He also indicated that Charlie Elmore, whom most of you know and who is here today, would be designated as the Corps' liaison person to work directly with you. I think the Corps is the best federal agency to provide coordination in this area because of its long-standing knowledge of our region and its water resources.

We also have in our own area tremendous talent and human resources that you can tap in developing your information base. I have discussed with the Presidents of Humboldt State, Sonoma State and the Community Colleges in the North Coast the idea of involving their forestry, fishery, remote sensing, environmental science and biology departments in your efforts. They have all expressed a ready willingness to participate.

Given such a broad-based support effort we can continue to work at the Federal level to provide a mechanism to consolidate the tremendous amount of information that would be forthcoming. Several ideas that I have in mind might be the construction of a hydrology model of our North Coast, similar to the San Francisco Bay Model that the Corps operates in Sausalito. Or a computer simulation model of the region, like the one used to monitor water quality in the Miami Conservancy Program.

Only after the establishment of such a data base and resource inventory will you be in a position to make the kinds of management and policy decisions that you envision in your joint-powers agreement.

So, in conclusion, let us restate our purposes and objectives.

As I stated in my 1971 speech advocating the Basin Watershed Conservancy concept, "The challenge to the North Coast is to strike a balance between conservation and development of our natural resources. The present and future economy of our area is tied directly to the way in which we meet this challenge."

I want to assure you that I fully support your actions to date and I believe we are in unison toward meeting this challenge.

The purposes of the Watershed Conservancy program is to provide information, direction and expertise necessary for the continued management, development, use and treatment of the surface and ground water of the Russian and Eel Basin so as to meet the water quality standards set by the State and approved by the federal government under our "Clean Water" program.

Simply put, our objectives are to say that the waters of the Russian and Eel Watersheds must be suitable for all uses at all places at all times.

Water quality is everybody's business.

Water management is our mutual responsibility.

Water is one of this nation's treasures. We cannot survive without it.

A nation is no more than the sum of its natural resources and its people and only when the people and their governments properly manage their natural resources can they or the nation survive.

Working together, we, on the North Coast of California, can demonstrate to our people the kind of enlightened leadership required to meet this challenge. The people we are privileged to represent have a right to expect the best from all of us. Give us at the state and federal level a vehicle to work with and maybe we can supply some of the fuel. But, you the elected representatives of the North Coast will be in the drivers seat.

In addition to the water management I've discussed, I look forward to working with you on transportation and economic development programs that will revitalize and diversify the economies of our area.●

PENSION PLANS OF CHURCHES AND CHURCH-RELATED ORGANIZATIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York, (Mr. CONABLE) is recognized for 10 minutes.

● Mr. CONABLE. Madam Speaker, I wish to discuss a bill, H.R. 12172, which I recently introduced to amend the Internal Revenue Code of 1954 to permit a church plan to continue after 1982 to provide benefits for employees of organizations controlled by or associated with the church and to make certain clarifying amendments to the definition of church plan. The major church denominations of this country all agree that they are seriously affected by the definition of church plan we provided in section 414(e) of the Internal Revenue Code.

For many years our church plans have been operating responsibly and providing retirement coverage and benefits for the clergymen and lay employees of the churches and their agencies. Some of the church plans are extremely old, dating back to the 1700's. The median age of church plans is at least 40 years. Churches are among the first organizations to found retirement plans in the United States.

In 1974, when we enacted the Employee Retirement Income Security Act of 1974, popularly called ERISA, we exempted church plans from the provisions of the act to avoid excessive Government entanglement with religion in violation of the first amendment to the Constitution. We provided that a church plan is a plan established and maintained for its employees by a church or by a convention

or association of churches which is exempt from tax under section 501. At the same time we provided that a church plan, if it were to continue to be identified as such, could not provide coverage to employees of church agencies not participating in the plan in 1974, nor could it provide coverage for employees of any agencies after 1982.

Mr. Speaker, I believe that our definition of church plan should be revised. It does not take into account the special needs of our churches, ministers, and lay persons, or the structural differences of our denominations.

Under the existing definition of church plan, the churches must by 1982 divide their plans into two parts, one covering employees of the church and one covering employees of church agencies. Present law fails to recognize that the church agencies are parts of the church in its work of disseminating religious instruction and caring for the sick, needy, and underprivileged. Estimates of the intial costs of the division of church plans that have been in existence for many years and of the additional continuing costs of maintaining two separate plans are so significant that reduced benefits may result.

Some of these additional costs must of necessity be shifted to the local churches and agencies. Churches and church agencies are often very small and operate marginally, being staffed by two or three persons who work at a personal sacrifice. Plan contributions for churches and agencies are generally dependent upon tithes and offerings. There is virtually no way to pass on higher plan costs to the consumer as businesses can. If forced by the 1982 deadline to establish a retirement plan separate from the denominational plan and to comply with the paperwork and other requirements of ERISA, many of the agencies might decide to abandon their retirement plans.

Mr. Speaker, the division of the church plans will also hurt the work of our churches. The churches consider their agencies as an extension of their mission. A significant number of ministers and lay employees move frequently from church to agency and back in pursuance of their careers. A church may ask a rabbi to serve in an agency where his services are most needed. The rabbi may then return to pulpit work. The present definition of church plan does not satisfy the unique need of our churches to cover continuously their employees in one plan. If ministers and lay persons cannot be continuously covered by one plan, gaps in coverage will result, and they will not be free to pursue their work for the denomination as they should.

Also, many ministers serve their faith outside of the denominational structure as chaplains in prisons, universities, hospitals, and elsewhere. In some cases the employment relationship is not easily discernible or does not exist. For example, evangelist ministers may have no employer. The present definition of church plan could be interpreted to exclude them from coverage either now or in 1982.

One of the most important binding influences within a religious denomination is the pension and welfare benefits program. The division of the church plans may lessen the unity of the church. Some churches fear that division of their plans will destroy the sense of oneness within the church and weaken the dedication of agency employees to the denomination.

Moreover, in a congregational denomination, if the plan covering the agencies is required to comply with ERISA, the denomination would not be able to require an agency either to join in the plan or to observe the requirements of ERISA. In the congregational type of denomination, the local churches and agencies are self-governing. Unlike corporate structures, no lines of authority exist from the denomination.

The existing definition of church plan has also created many technical problems. The large majority of church plans of the congregational denominations are administered by a pension board, a unit separate from, but controlled by, the denomination. It is not clear whether a plan administered by a pension board of a congregational church is a plan established and maintained for its employees by a church. A pension board is usually incorporated because the church does not want the funds set aside for retirement purposes to be subject to the general creditors of the church.

This structure raises a question whether a plan maintained by a pension board is maintained by a church. In the congregational denominations, ministers and lay employees are considered employees of the local churches and other units, rather than of the denomination. As mentioned, congregational churches have little control over local churches and agencies. Some differences in plan provisions, therefore, necessarily occur, and the question is also raised whether the plan is maintained by the church (denomination) for its employees or by a local church for its employees.

Under section 1 of the bill, effective as of January 1, 1974, a church plan may continue after 1982 to cover the employees of its church-associated organizations, both those participating in 1974 and those that begin participation after 1974. This recognizes the special nature of church agencies and of their special problems in complying with ERISA. It also recognizes the unique needs of ministers and denominational employees to move about within the denominational structure and still stay within the church plan.

The bill achieves this result by retaining the basic definition of church plan as a plan established and maintained for its employees by a church or by a convention or association of churches exempt from tax under section 501. The term "employee", however, is redefined to include: First, a duly ordained, commissioned, or licensed minister of a church in the exercise of his ministry; second, an employee of an organization which is exempt from tax and which is controlled by or associated with the church; and third, certain former employees who participated in a church plan before separation from service. Under the bill an organization is "associated" with a church if it shares common religious bonds and convictions with that church.

For purposes of section 414(e), all such employees are deemed to be employed by the denomination. The combined effect of these provisions is to treat both hierarchical and congregational denominations in the same manner for purposes of the church plan definition. The bill, thus, accommodates the differences in beliefs, structures, and practices among our religious denominations.

By including ordained ministers within the definition of employee without requiring an employment relationship, the bill permits a church plan to continue to cover a minister who serves in the exercise of his ministry outside of the denominational structure. Thus, a minister serving as a prison chaplain or teaching religious studies in a university could receive coverage. An evangelist minister who has no employer would also be entitled to participate in the church plan.

The bill provides that a church plan will not have to remove from its rolls an employee who has left the denominational group but may retain his accrued benefit or account for the eventual payment of benefits under the plan. Some denominations continue to accept plan contributions for disabled employees and, temporarily, for employees who have separated from service.

A typical example would be a minister or lay employee who reaches a point in his career where he wants time to decide whether he will spend the rest of his life in the service of the denomination. During such a transitional period, the denomination may permit the individual to continue to be covered by the church plan for a time even though he has separated from service.

The bill would permit a church plan to continue to receive contributions for an individual who is a participant in a church plan at the time of his separation from service, but only for a period of 5 years. No such time limit is placed upon employees who are separated from service because of disability.

The bill also recognizes pension boards as acceptable funding media for church plans. A plan or program funded or administered through a pension board, whether a civil law corporation or otherwise, will be considered a church plan, provided the principal purpose or function of this organization is the administration or funding of a plan or program for the provision of retirement or welfare benefits for the employees of a church.

The organization must also be controlled by or associated with a church exempt from tax under section 501(a). It is intended that no church plan administered or funded by a pension board would be disqualified merely because it is separately incorporated or merely because of variations in plan provisions among the local employers.

The bill also corrects a very harsh position taken by the Treasury Department

in its proposed regulations defining church plan which provide that once a church plan fails to meet the requirements of a church plan it can never thereafter be a church plan. This rule requires perpetual disqualification of church plan status for the smallest violation of rules that are not now clearly understood and that will take years to resolve.

My bill provides a mechanism whereunder a church plan will be disqualified as such only after it receives appropriate notice that it has violated the church plan requirements and does not within a certain period of time correct its default. The term "correction" as used in the bill is not intended necessarily to require a church plan to undo the default completely or to put itself and other parties in precisely the same position they would have been in had the default never occurred. The degree of correction required should depend upon the equities of the situation.

For example, a possible violation of the church plan requirements would be the coverage of an impermissible number of individuals who are not defined as employees. A complete correction of this type of default would require the plan to refund to these individuals all contributions made on their behalf. Such a correction may cause the distributions to be included in the incomes of innocent persons and, hence, work a hardship on them.

In this type of situation, the default should be considered corrected if the church plan were permitted to retain the accrued benefits or accounts of these individuals for the eventual payment of benefits upon their death or retirement. But the plan should accept no further contributions with respect to them.

Mr. Speaker, I believe that when we enacted ERISA, we required far more of our churches than we intended. We certainly did not in 1974 intend to draft a definition of church plan that fails to take into consideration the way our church plans are operated or that is disruptive of church affairs. Our 1974 legislation requires the church plans to reconstitute their plans after decades, even centuries, of responsible experience.

The problems the churches face are immediate. They are concerned today that their plans may be presently disqualified as church plans. This is a matter we must not put off until 1982.

Therefore, Mr. Speaker, I urge my distinguished colleagues to support this measure, and I ask unanimous consent that the bill be printed in the RECORD.

The bill follows:

H.R. 12172

A bill to amend the Internal Revenue Code of 1954 to permit a church plan to continue after 1982 to provide benefits for employees of organizations controlled by or associated with the church and to make certain clarifying amendments to the definition of church plan

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTON 1. Section 414(e) of the Internal Revenue Code of 1954 is amended to read, as follows:

"(e) CHURCH PLAN.—

"(1) IN GENERAL.—For purposes of this part the term 'church plan' means a plan established and maintained (to the extent required in paragraph (2)(B)) for its employees (or their beneficiaries) by a church or by a convention or association of churches which is exempt from tax under section 501.

"(2) CERTAIN PLANS EXCLUDED.—The term 'church plan' does not include a plan—

"(A) which is established and maintained primarily for the benefit of employees (or their beneficiaries) of such church or convention or association of churches who are employed in connection with one or more unrelated trades or businesses (within the meaning of section 513); or

"(B) which includes individuals less than substantially all of whom are described in paragraphs (1), (3)(B), or (3)(E) (or their beneficiaries).

"(3) DEFINITIONS AND OTHER PROVISIONS.—For purposes of this subsection—

"(A) A plan established and maintained by a church or by a convention or association of churches shall include a plan established and maintained by an organization, whether a civil law corporation or otherwise, the principal purpose or function of which is the administration or funding of a plan or program for the provision of retirement benefits or welfare benefits, or both, for the employees of a church or a convention or association of churches, if such organization is controlled by or associated with a church or a convention or association of churches.

"(B) The term 'employee' of a church or a convention or association of churches shall include—

"(i) a duly ordained, commissioned, or licensed minister of a church in the exercise of his ministry, regardless of the source of his compensation;

"(ii) an employee of an organization, whether a civil law corporation or otherwise, which is exempt from tax under section 501 and which is controlled by or associated with a church or a convention or association of churches; and

"(iii) an individual described in paragraph (3)(E).

"(C) A church or a convention or association of churches which is exempt from tax under section 501 shall be deemed the employer of any individual included as an employee under paragraph (3)(B).

"(D) An organization, whether a civil law corporation or otherwise, is associated with a church or a convention or association of churches if it shares common religious bonds and convictions with that church or convention or association of churches.

"(E) If an employee who is included in a church plan separates from the service of a church or a convention or association of churches or an organization described in clause (ii) of paragraph (3)(B), the church plan shall not fail to meet the requirements of this subsection merely because it—

"(i) retains his accrued benefit or account for the payment of benefits to him or his beneficiaries pursuant to the terms of the plan; or

"(ii) receives contributions on his behalf after his separation from such service, but only for a period of five years after the employee's separation from service, unless the employee is disabled (within the meaning of the disability provisions of the church plan or, if there are no such provisions in the church plan, within the meaning of section 72(m)(7)) at the time of such separation from service.

"(4) CORRECTION OF FAILURE TO MEET CHURCH PLAN REQUIREMENTS.—If a plan established and maintained for its employees (or their beneficiaries) by a church or by a convention or association of churches which is exempt from tax under section 501 fails to meet one or more of the requirements of this subsection and corrects its failure to meet such requirements within the correction period, the plan shall be deemed to meet the requirements of this subsection for the year in which the correction was made and for all prior years. If a correction is not made within the correction period, the plan shall not be deemed to meet the requirements of this subsection beginning with the date on which the earliest failure to meet one or more of such requirements occurred. The term 'correction period' means the period ending with the later of the following: (1) 270 days after the date of mailing by the Secretary of a notice of default with respect to the plan's failure to meet one or more of the requirements of this subsection; (2) such period as may be set by a court of competent jurisdiction after a determination that has become final that the plan fails to meet such requirements, or, if the final court determination does not specify such period, a reasonable period depending upon all the facts and circumstances, but in any event not less than 270 days after the determination has become final; or (3) any additional period which the Secretary determines is reasonable or necessary for the correction of the default."

SEC. 2. The amendments made by this Act shall be effective as of January 1, 1974.●

HALL PEOPLE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. MICHEL) is recognized for 15 minutes.

● Mr. MICHEL. Madam Speaker, yesterday I inserted in the RECORD a Washington Post article that gave a disturbing and enlightening look at Washington, D.C., education. Today I am going to offer the second in that series. This time we follow the aimless wanderings of a student called "Frank." Frank wants to be famous, rich, and successful. But he feels he should not be asked to work or study or in any way make any serious effort to accomplish his goals. He skips most of his classes and spends most of his time in the hallways of his school avoiding schoolwork. He is yet another in a generation that has been led to believe life owes him fame and fortune. At the same time he has been given the impression that working for such success is a sign of shame.

Perhaps we should call Frank a member of the "time-bomb" generation. The inevitable frustration he will feel when he discovers his current values are useless in dealing with reality will eventually explode in anti-societal behavior. And he is not alone.

At this point I wish to insert in the RECORD, "Hall People Are Rarely in Class," from the Washington Post, May 1, 1978:

[From the Washington Post, May 1, 1978]

"HALL PEOPLE" ARE RARELY IN CLASS

(By Juan Williams)

Frank rolled over and sighed. His eyes quickly opened, then closed. Something had awakened him. "... Get up, Frank, you'll be late," his mother yelled again. He let his eyes slide back into a light sleep. She yelled upstairs once more, and he pulled the blanket tight. Frank was going to be late again for the start of classes at Eastern High School.

"We can't get him in the bed and when we get him in . . ." Frank's father said, "we can't get him out of bed."

Out of bed and standing in Eastern High's hallway in an olive Army fatigue jacket, smoking cigarettes, maybe a joint, or looking

for "lucky seven from heaven" in a crap game on the stairs, Frank is one of the students who go to Eastern High School almost every day but rarely enter a classroom.

By 9:30 a.m., a half-hour after school begins, Eastern's halls are dotted with groups of students talking and joking, oblivious to first-period classes under way around them. Frank does not have to go to class to see his friends; they are in the halls where he falls in with them.

Frank is one of the "hall people," as an Eastern teacher describes a band of students who linger in the halls on any school day too cold for them to gather a few feet outside the school.

The "hall people" hide from teachers' view in one of Eastern's dozen or more doorways and walk down to the basement ramp for one or two class periods to catch a "buzz" on marijuana. In warm weather, they line the small brick wall that encircles the driveway. There they discuss love, sports, crime, parties, and how to do just enough work to pass in classes they often skip.

"I don't know why I be late a lot," Frank said. ". . . I just like to lay there (in bed) and think, you know, about—hmmm—like people, why some people get things and be popular . . . about how I could do things so they'd all know about me and wouldn't be telling me to do nothing because I'd have a briefcase, the suit, some money, you know, and they couldn't say nothing because of who I am.

"Look man," he said, "what's it take? You be on TV, then you're somebody: you got a car, some herb (marijuana). So give 'em to me then. But they talking about you got to do this, get A grades, and you can't be doing that because you ain't old enough. That ain't me, they don't know me, I'm different. . . . Me, they don't know me."

Frank indeed is one of the 70s' teenagers whom nobody seems to understand. Teachers and parents are equally baffled by the students' behavior and often turn on each other. Teachers blame parents and parents blame teachers in trying to explain what is wrong or what went wrong, and then all too often they end up debating whether anything is wrong in the first place.

Have these children been deprived or left unloved in some way? Or are they spoiled? Most of these teenagers are well-fed, have in most cases middle-class allowances or part-time jobs, have generally kind parents, phonograph records, sports and movies galore. So why do they consistently cut classes, stay high on drugs or alcohol, sleep all day and spend waking hours locked in their rooms or roaming the streets?

Teen-agers of the 1970s are not like those of the 1960s. Teens such as Frank generally are apolitical, are into disco, stylish clothes and money, and want all the success and prestige the establishment has to offer. Few remember the 1960s or care about why students marched, held sit-ins and talked about revolution and going back to the earth or back to Africa.

Unlike teen-agers of the 1960s, Frank and his generation generally are not tempted by hard drugs such as LSD and heroin, Marijuana, beer and hard liquor are as common as soda for Eastern High School students. They have a few drinks and get high at parties or whenever they want to be sure of having a good time at a concert, in class, at work, after work, in the stands at a game, watching television or making love.

In the parlance of the 1970s, Frank is "mellow." He constantly moves his shoulders from side-to-side in a bop as he stands talking, and he regularly pulls one thumb up to his mouth and licks it, before snapping his fiingers. He is the guy for whom other students at Eastern stop to talk. Maybe they skip a class to hang around with him in the halls.

Frank knows "who's around and what's going down," as he says rhythmically. Carrying large, noisy radios and dressing in wild colors is not for him. Frank is into the mellow, understated look of windbreakers, army fatigue jackets, Hush Puppies or Italian designer shoes and fitted dungarees.

As he stands on Eastern's basement ramp, Frank is in his element: two clusters of students are smoking marijuana, lines of students are leaning against the wall talking and a small ring of dice throwers crouches in front of a doorway. Amid this activity, two seniors circle each other throwing mock punches.

In the three months after a reporter picked him out of that crowd and talked to him regularly, Frank was expelled from Eastern for nonattendance as the acting principal moved against the "hall people." He got into a fight and badly injured another Eastern student when he punched him in the eye. He applied for a job, took the test to get into the Army and thinks he failed. Then he induced his parents to return with him to Eastern so he could enroll again.

This time, Frank was registered as a student who attends academic classes at Eastern in the morning and works at a vocational trade each afternoon.

Despite the changes and his new schedule, Frank still is found in the school halls.

". . . Unfortunately today we have a level of students," says Ray Hammond, one of Eastern's assistant principals, "who don't know just exactly what they want to do. So they're not trying to advance intellectually, they're not trying to advance economically. They just don't know what's going on.

"I think this is the group we . . . really have to get to in order to start giving them some direction because if we don't . . . they'll be grown men and women and they'll have no direction.

"Unfortunately young students have lost so many values now, I think they don't take on the responsibilities they should and I'm afraid most of them are just hanging in limbo . . . (these students) are hooked up with having nothing but a good time, smoking pot strung out, to hell with education, to hell with everything . . ."

WANT TO BE SOMEONE

Despite having no college or job training, Frank says he immediately wants an apartment, money from a "big-time" job his friends will respect and to be in on anybody's plans—"like a consultant, because of who I am . . . But I want to be someone, you know, that they got to cover with first."

Frank wants to be on top now, not later, unlike the tough kids of the 50s and 60s who denounced the establishment. Frank's only problem with the establishment is that he is not recognized as someone for whom the establishment has been waiting eagerly.

To get on top, to impress the other "hall people," Frank may talk about his favorite drink, a jigger of hot sauce and a shot of tequila. He may say he is older than he is or tell about his "biggest problem . . . too many girls." Frank will tell his friends that he has been around and knows all about "it," all of "it." "It" could be anything.

". . . I've done it," the Eastern senior said. "I've done all that stuff—been drunk, smoked and smoked, stayed up all night. I done it."

"I try to tell him," Frank's father said, "that being a man is more than staying out late, smoking pot and having women. I say, 'Frank, it is more than that. What if anything happens to me? You'd be the man of the house.' But he doesn't listen."

Frank and other "hall people" set a tone for Eastern that brings students out of classes and into the halls, denigrates hard work in the classroom and makes the school more a place where students hang out with friends than work to attain an education. School administrators do not know what to do with Frank or students like him.

When an administrator catches students gambling, they receive a lecture and any money recovered goes to the student government treasury. Students caught smoking usually are lectured and told to go to class. Administrators generally do not want to call police, a move that could create even more trouble in getting students into the classroom.

Throughout the school day, administrators walk the halls and try to disperse groups of class-cutters. For acting principal Gloria Adams, the "hall people" have become a problem that one counselor calls "as bad as the plague."

"Eastern is . . . a place for socializing," Adams said. "You know, you stop and wonder so often why you have a group of kids—percentage-wise as small as it is—who don't go to class but come (to Eastern) every day . . . When you stop and think about it, school is where the action is.

". . . During the day time, the best way to spend your time is not at home by yourself. You have to go to school to see your friends . . . ," she said.

The "hall people," according to Eastern teachers and administrators, also entice good students out of the classroom.

"Whereas we admit to a 20 percent (about 360 students) real hard-core element in the halls . . . of that other 80 percent, a good number are succeeding in four or five classes but they're still hooking (cutting) one class, still goofing off out in the halls," said Jean Lofton, an Eastern counselor who has worked for 20 years in Washington schools.

ENERGY OF HALL PEOPLE

Ernest Johnson, an Eastern assistant principal, is the great enemy of all "hall people," because he, too, knows the crannies where the "hall people" cluster, and he forces them back to class. He said peer pressure to be "hip" pushes good students out of the classroom.

"You may be doing all right in class but, if you have a friend and you continue to see him out in the halls, there is a tendency for him to draw you out there with him. Peer pressure is very, very high among students," Johnson said.

"So, once you get out there (in the halls), you've missed something in class. So, you go back in class, and the teacher asks you something and you feel stupid, you feel frustrated. So rather than face that daily embarrassment in front of your friends, you go hang out in the halls with your friends where you feel more comfortable and you enjoy yourself," he said.

In class, students who have missed a class or two while in the halls often are the students who are disruptive, play the clown, talk and constantly ask for a bathroom pass. The pass puts them back into the halls. The "hall people" set a tone for Eastern that touches everything there, including 10th graders just coming into the school.

". . . When I was in the 10th grade," said Maurice Wright, a senior who cut almost half of his classes during the first 40-day advisory period of this school year, "the first thing I had in my mind (was cutting) . . . The rumors . . . had been around that at Eastern you can go to classes when you want and you ain't have to go if you ain't want to. You just sit around or something like that. . . . I came up here and did just that . . ."

Robert Kamp, the senior class president and an occasional class-cutter, said skipping classes occurs more in high school than ever before because school and education are not considered as important as they once were.

"Shooting dice and smoking," he said, "it's natural, it's natural.

"Back, you know, about 50 years ago, schools were hard and everybody wanted to go, so it was like a privilege, something special.

"It's nothing now, it's not hard now, man, it's not hard and they make you go, they say you got to have the diploma. And we get it free now, too, because . . . high school and all before that (elementary and junior high) is free . . . So all you need is a high school diploma, and it's not hard to get that like it was a long time ago. They know that, so they run it through their minds and see they can have a good time here."

Kemp is not disturbed by the marijuana smoking or gambling in the halls. "They might be some over here getting high," he said, "but, so what? They're not hurting nothing. It's just the smell of it that they (teachers and administrators) be turned off about. Students smoke in the halls because they don't have a lounge like the teachers. Bad break. If we had one of them, we wouldn't have nothing to worry about. Nothing. They might smoke reefer but at least it wouldn't be all in the building and going outside."

SOME SERIOUS PROBLEMS

The problem of students who become "hall people" because they see school as nothing more than a place to meet their friends is compounded by other students who come to Eastern hounded by serious problems, such as poverty. They are distracted in the classroom and led inexorably into the halls.

"The social problems can be so great, and the pressures on the kids so great—what the heck, why do you expect them to sit up in a classroom? You find someone, he's hungry, or they're worrying about whether they're going to eat or pay the rent, welfare checks and babies . . . and you're talking (in class) about an amoeba. They could care less about that," said biology teacher Walter Brown.

Principal Adams said the problem of "hall people" may not be as severe as it appears to a parent who walks a hall at Eastern and sees 20 or 30 students joking and smoking.

"For every 30 students you see in the hallways, there are 30-times-14 students in the 14 classrooms along that hallway," she said.

Adams, explained that Eastern's halls cannot be cleared by teachers or patrolling administrators because "Eastern is a block long. If you get them out of one spot, they can go to the other end of the building."

The principal now is campaigning to force "hall people" out of the school by expelling students such as Frank who has a record of consistent class cutting.

After Frank was expelled, he did not find work to his liking. "No jobs for me out there. They won't even let you get on (hire you), and then if you do, they want you to take a whole bunch of orders, do this, do that . . . be some boss's . . . boy . . . I'm going to do it (get money and success), but I'm going to do it my way. I can do a lot, man, and it comes natural for me, right?" he said.

"Look, I can do this stuff in the classroom if I want to, like some of the little girls around here. But where's that take you? . . . college? Yeah, well, they got people out there working at nothing. Look, it's just people getting in your way, stopping you. . . . College ain't going to get you nothin' for sure and neither is hard work. It's power and who's on top. That's what it is. You ask guys who be working," he said.

"They want you to lick the floors, man. You don't have to go to college to do that . . ."

Frank's desire for a meaningful and important job immediately is common among Eastern students. Most students who have never taken any math courses more taxing than one in problem solving and basic algebra claim to be on their way to becoming doctors, engineers and lawyers.

"They see success all around them," said Wayne Paige, a drafting teacher. A lot of them will tell you Max Robinson (the WTOP newscaster) makes $125,000 for reading the news on TV. They expect they'll be able to do that. They see actors dancing across the movie screen and making big money, athletes on TV making big money, the music groups . . . So they want big money, too. But they don't realize the preparation involved."

Frank does not know what kind of work he wants to do but estimates that by the time he is 22 years old he will be making $40,000 a year.

His parents just want him to graduate from Eastern this year.

A FAVOR TO GRADUATE

"I try to tell him education is important," Frank's father said. "He acts like he's doing me a favor to graduate. I try to tell him he's doing himself a favor. The only favor he's doing me is learning something so he could get a job and I wouldn't have to support him for the rest of my life.

"We try to get him to be part of the family. He won't go shopping like his sister. She knows if she jumps in the car she'll get what she wants. But not him. He'll stay home and tell you he needs this or that. You bring him something and most of the time he'll tell you he doesn't like it," Frank's father said.

Frank's father complained that his son will not take part in other family activities, such as cookouts.

Frank said later: "Look, who wants to sit around with them and eat burgers. I want to see where people are happening, right? . . . Where I can get into something new. Forget cookouts. That's for the Waltons. You don't see no stars on the Waltons. They're going to know me."

Frank's mother said she feels her son is going through a troubled time but will straighten out. "He hasn't been interested in school since the eighth grade. But he's a good boy. He was doing very well in school before the eighth grade and was in accelerated classes, but then he fell in with the wrong friends. In the seventh grade, he was a standout. But he fell in with the wrong crowd at school," she said.

Frank's father said his wife loves Frank and makes excuses for him. "His mother says he gets depressed," the father said. "What's he got to get depressed about? He's had a beautiful life. He's got everything he wants, his own room, new clothes . . . I didn't have a father, so I thought I'd be better.

"He had a model, so I thought he'd pick up on being responsible. It's this freedom thing. I don't think it does any good. I had to listen to my mother, or she'd whip me. To this day my mother will tell me when I'm getting too far out of line," Frank's father said.

The father put part of the blame for Frank's problems on the school system. ". . . I think the teachers have given up on the kids because they're so hard to get through to."

School Superintendent Vincent E. Reed does not feel that parents of the "hall people," should be angry at teachers, administrators or the school system.

"Everyone is to blame. It's a shared responsibility between the youngsters, the parents and the school. If they don't achieve, then everyone is saying, 'Poor little victim. Look what they've done to him.' I don't go with that. In most cases the youngsters have not put out, exerted (themselves) to get an education. Others come through the system without any problem.

"But society is not putting pressure on youngsters to learn. We've let standards drop, used racism as a crutch. . . . Money to buy you the best tutoring service is an advantage. But having advantage doesn't mean that when you don't have it you go to rock bottom. It may make it tougher, but it doesn't mean you go to rock bottom because you don't have it."

When he does go to classes, Frank rarely speaks and always sits in the back of the room. If several guys are seated together, Frank will join in their jokes and try to make himself the center of the action. But most often he says nothing.

LITTLE WORK PRODUCED

Evelyn Baugh, who taught Frank English, said that his work was not good and that he rarely came to class.

When she looked for a file on the work Frank has produced in her class, she realized she had not started one because Frank had not turned in enough work.

"He would be absent, and then he'd come to me after class and talk for a long time about whatever was on his mind. Then he'd promise to come to the next class, but usually he wouldn't be there," she said.

"How can you expect anyone to learn anything there?" asked a teacher who wished to remain anonymous. "The loudspeaker comes on with an announcement once a period, there's noise in the halls and most of the kids are comfortable sitting back and getting just enough to pass the test and say they got over in my course."

"Before, the primary goal in school was education. Now it's to motivate the student," teacher Wayne Paige said.

"Before," Paige said, "the person knew he had to learn. . . . Education was an escape from a tedious sort of working-class job and poverty. It was something noble to our grandparents. To get an education was a privilege. Education has become a diploma," Paige said.

". . . Somebody 15 or 16 years old has their own life style and values and ideas and, once they get here, you try to help and mold and shape a bit. But sometimes kids come here so removed from acting right . . . you know, like I said two or three peoplein a class or in an assembly can disrupt the whole situation and other kids pick up on those vibes . . ." athletic coach Tillman Sease said.

Eastern teachers said they are forced to promote students who do not known enough to merit promotion. But no teacher would agree to let his or her name be attached to that admission.

"If a teacher in the seventh grade is having a knucklehead in the class, and he is acting crazy, she's not going to want him around next year so she's got to pass him on to the next teacher," Sease said.

Frank, who failed one of his five courses in his junior year, must take an extra course this year to meet graduation requirements. Although Frank had cut at least half of his classes by December, in his first semester as a senior, his teachers said he could avoid failure in their coures as long as he came to some classes and turned in some work in January.

"Nothing is more important to these kids than graduation," said one of Frank's teachers who asked not to be named. "During senior year I go along with that by rarely failing seniors. If they got this far, why should they be disappointed now when everyone in this family expects them to graduate?"

CADGES A JOINT

By obtaining a bathroom pass after attendance is taken in any of his classes, Frank can spend most of the class period in the hallway without having a class cut noted on his record.

One December morning after he received a bathroom pass in his second period class, Frank walked down to the ramp in the basement.

He crumpled the written bathroom pass into a ball and threw it into a trash can, then talked with people on the ramp until he saw a friend that he knew had some marijuana.

Cajoling and begging in a loud and dramatic style—"Man, you know you owe me, why don't you give it up?"—Frank enticed his friend to pull out a small manila envelope, known as a nickle bag ($5 worth of marijuana) and lay enough marijuana in a thin white cigarette paper to make a joint.

After getting high, Frank wandered up the ramp, passed a biology lab class—"The smoke bothers me but I keep my door locked," the teacher said—and up to the auditorium.

An assistant principal in the auditorium was asking students why they were there, so Frank walked on into the annex behind the auditorium. There he opened the doors to a geometry classroom and looked in. The teacher looked at Frank but said nothing. Frank saw none of his friends, so he kept walking.

While wandering, Frank heard part of a drafting class, a geometry class and stood against the wall to watch one history teacher gesture wildly while lecturing a class. Then he looked through the glass windows in the door of Nancy Freelander's math class and eyed her.

Hearing laughter from the staircase next to Freelander's classroom, Frank pushed through the swinging doors to the landing atop the stairs and found five "hall people" playing craps.

Frank nodded to the circle of small-time gamblers and watched a young man on his knees slide 50 cents from the center of the floor into a small pile of dimes, nickles and quarters in front of him.

"Seven come eleven, right atcha, unh," one of the teen-age gamblers said. In the background, Freelander's voice and the sound of chalk scratching the blackboard could be heard.

"Gambling. This is a big thing if you say, 'I'm a gambler, I'm a hustler. I broke so and so.' (They're just) shooting for a quarter. But they're trying to be big time, trying to be a gambler. Lots of guys feel this is the thing to do," assistant principal Ernest Johnson said.

"They're always smoking over the stairwell," said Freelander, whose room was next door to the gamblers. "I went over there one day when I thought I saw someone smoking a cigarette, but, when I smelled it, it was marijuana. What can I do? I don't know his name. I don't know most of the students in this school, and I don't want them to do anything after three (o'clock) to me or my car," she said.

SHOP COURSES LIMITED

Frank went downstairs to his third-period class, printing shop. Printing is the only vocational skill taught at Eastern. A large woodshop area is closed because it does not meet regulations of the Occupational Safety and Health Administration.

Eastern's only shop class is overcrowded. Students are sleeping, talking, going out to the ramp and are in various stages of printing projects, all at once. No teacher, even shop teacher Reggie Crews, who is "all right" with the "hall people," can control the criss-crossing currents of activity.

One day, while Crews was intent on a printing project, one of his male students left the shop to talk to two girls on the ramp near the print shop. Fists flew suddenly as the two girls began beating the young man. Crews stopped the fight by pulling the boy back into the shop.

Five minutes later, about 20 students, mostly "hall people," appeared in front of Crews' shop room to demand that the young man who had fought with the girls come out before they came in to get him. Crews locked the shop door and learned from his student that a member of the group outside was the boyfriend of one girl he had fought.

Crews called the school's main office from a phone in the shop and asked the school policeman, a 5th District officer who patrols the area around the school and regularly checks with the principal, to come to the shop. Then he yelled outside to the angry youths that the police were coming.

The group milled about briefly and departed.

Although fighting is not a common problem at Eastern, that same day another fight this one far more vicious, took place. A girl and her ex-boyfriend quarreled as they passed en route to first-period classes. She grabbed one of his gloves and ripped it apart.

When they saw each other while leaving first-period classes, the argument erupted again. He pushed her. She flashed a razor and, as a friend of the girl grabbed the boy, she cut him once on the side of his face and sliced him across the abdomen.

A 10-day suspension for fighting followed for both students.

"He must've been slow," said Frank, when asked about the fight. "To let a girl do all that. She could've killed that . . . ."

"SUGAR RAY" A HERO

Frank claims to know his fighters. His favorite is Sugar Ray Leonard, who, according to Frank, has the same problem as Frank—"slow, man, slow hands"—an opinion about the speed of Sugar Ray's hands that is not widely shared.

"(Sugar Ray) is the hero around here (Eastern)," coach Sease said after Leonard had given a speech at Eastern urging students to stay in school and do what their teachers and parents tell them to do.

"You know, he (Leonard) fits the image that a lot of kids probably would hope to portray of themselves especially a lot of the fellows—sporting to women, you know, three piece suits and, you know, making a lot of money. Plus he can use his hands, so that fits the mold of what a lot of guys want to be about . . ." Sease said.

"You got to be a man," Frank said, explaining his interest in fighting, "A man don't have to take nothing off of no one."

Besides fighting, Frank claims his biggest interests is getting around town to house parties and discos and learning the street scene. Frank's Washington extends from Eastern, in Northeast, to his home in near Southeast, to house parties in Prince George's County and downtown to "The Room" disco, which caters to teen-agers. Along the way, he stops at McDonald's and Burger King which serve as clubhouses for today's high school students.

According to teachers and counselors, young men in their early 20s often return to Eastern seeking old friends and hangouts. Most graduates who were "hall people" at Eastern now have jobs that pay the minimum wage. Becoming a cashier at McDonald's is typical of such work, the teachers said.

"You'll find those students who graduated last year who are still unemployed (and) hanging around out front, smoking weed, talking to the ones that were in 11th grade when they (the hangers-on) were seniors," said city school board member John Warren.

"They'll be telling the younger ones 'Why you going to class, man? Ain't nothing going to happen. I been out here looking for a job, and I ain't found nothing.'

". . . Children are a mirror image of the people who made impressions on them," Warren said, "They are just like clay. It's uncomfortable to realize that the way they are at 12 or 16 is the way they have been made by us (and) what they've seen around them." ●

LEGISLATION TO AMEND UNITED STATES CODE WITH RESPECT TO ACCOUNTABILITY AND RESPONSIBILITY FOR U.S. PROPERTY ISSUED TO NATIONAL GUARD

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maine (Mr. EMERY) is recognized for 5 minutes.

● Mr. EMERY. Madam Speaker, I have today introduced legislation which would permit the Secretaries of the Army and of the Air Force to prescribe regulations governing pecuniary liability for lost, damaged, or destroyed property that would apply uniformly to Regular, Reserve, and National Guard members of their services.

Under current law (32 U.S.C. 710), individual members of the National Guard must be held pecuniarily responsible to the United States whenever property issued to the National Guard is lost, damaged, or destroyed through their negligence, however, slight.

The same standard is applied to Regulars and Reserves of the Army and Air Force with respect to personal arms and clothing issued to them because of a similar statute (37 U.S.C. 1007(e)). However, in all cases not covered by that law, Regular Army, Regular Air Force, Army Reserves, and Air Force Reserve members are held pecuniarily liable only if gross negligence or willful misconduct is involved.

The manifest inequity of the current law becomes apparent in the most usual sort of case, when a vehicle is damaged in an accident. If the driver was a Guardsman, and the surveying officer appointed by the Army or Air Force determined that the accident resulted from his simple negligence, it is incumbent upon the Secretary concerned to hold him financially responsible. Had the driver been a Regular or Reserve, he would not be pecuniarily liable, because gross negligence or willful misconduct was not present.

My bill would eliminate the requirement to impose a higher standard of care upon Guardsmen than upon their Regular or Reserve counterparts.

My bill would also permit the money value of the property to be charged against the State concerned if the loss, damage or destruction occurred while the National Guard was in active State service, and not engaged in training or duty authorized by Federal law.

I urge my colleagues to support this legislation.

A further explanation of the current law and my amendment follows along with the text of the bill:

H.R. 12487

A bill to amend title 32, United States Code with respect to accountability and responsibility for United States property issued to the National Guard

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 710 of title 32, United States Code, is amended as follows:

(1) Subsection (b) is amended by striking out "shall" in the first sentence and inserting in place thereof "may".

(2) Subsection (c) is amended to read as follows:

"(c) The Secretary concerned may prescribe regulations for the accounting, and fixing of responsibility, for property issued to the National Guard, and those regulations shall be uniform, as far as practicable. Under regulations to be prescribed by the Secretary concerned, when property covered by this subsection is lost, damaged, or destroyed as the result of the gross negligence or willful misconduct of a member of the National

Guard, the amount of the damage, or cost of repair or replacement may be charged to such member from pay due him for duties performed in his status as a member of the National Guard. If the loss, damage, or destruction, occurred during or as the result of active duty in support of civil authority that amount of the damage, or cost of repair or replacement may be charged to the State or Territory, Puerto Rico, or the District of Columbia, whichever is concerned, and paid from its or any non-Federal funds."

EXPLANATION

Current subsection (b) of section 710 of title 32 makes it mandatory upon the Secretary concerned to have a survey made whenever property issued to the National Guard is lost, damaged, or destroyed, or becomes unserviceable or unsuitable. There are many instances in which the formal investigation by a surveying officer is unnecessary, as for instance when the loss or damage was due to an Act of God, or the lack of negligence is immediately apparent. The amendment would permit the Secretary to dispense with appointment of a surveying officer in such circumstances.

Current subsection (c) of section 710 of title 32 requires the Secretary concerned to hold the National Guard member, or the jurisdiction concerned, pecuniarily responsible for any property that is lost, damaged, or destroyed through negligence. Although members of the active Army and Air Force, and of the Army Reserve and Air Force Reserve (who are not covered by similar statutes) are held pecuniarily responsible only in the case of gross negligence or willful misconduct, strict construction of the term "negligence" in subsection (c) requires the imposition of pecuniary liability against Guardsmen when a lesser degree, i.e. "simple" or "ordinary" negligence is determined to have been present. The amendment would permit the service Secretaries to apply the same criteria to members of all components under his control.

Subsection (c) also permits the Secretaries to charge the money value of the lost, damaged, or destroyed property to the member, or to the State, Territory, Puerto Rico, or the District of Columbia, whichever is concerned Although members of the National Guard have a unique dual status, their training and duty under title 32 is equated with a similar duty performed by members of the Army Reserve and Air Force Reserve (10 U.S.C. 3686, 8686). The negligence of the latter components are not imputed to higher commands, and there is no reason to impute the negligence of the individual Guardsman to his State, or to place the local jurisdiction in the position of a guarantor or surety. However, if the loss, damage or destruction occurs while the Guardsman is performing State active duty not authorized under title 32, it would be appropriate to assess pecuniary liability against the State.●

CHANGES IN AGENDA FOR CRIME SUBCOMMITTEE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan, (Mr. CONYERS) is recognized for 5 minutes.

● Mr. CONYERS. Madam Speaker, I wish to announce that the Subcommittee on Crime, which I chair, has rescheduled its markup of H.R. 10934, to provide further authorization for appropriations for pretrial service agencies. The markup previously scheduled for Wednesday, May 3, at 9 a.m., in room 2226, Rayburn House Office Building, will now take place at 9 a.m., Thursday, May 4, in room 2237, Rayburn House Office Building,

In addition, the subcommittee's hearing scheduled for Wednesday, May 3, on Treasury's (BATF) proposed firearms regulations has been canceled until further notice. However, the scheduled Thursday, May 4, hearing on this subject will proceed as previously announced.●

A TRIBUTE TO HOBART T. JACKSON

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. PEPPER) is recognized for 20 minutes.

● Mr. PEPPER. Madam Speaker, I had the privilege yesterday to attend a testimonial banquet for Mr. Hobart C. Jackson, the executive vice president and director of the Stephen Smith Geriatric Center, and founder of the National Caucus of the Black Aged. At that time, Mr. Jackson was honored for the many valuable contributions he has made over the years in the field of aging.

Under Mr. Jackson's direction, the Stephen Smith Geriatric Center, the oldest facility in the country providing care and services for the black elderly, has flourished. When he began at the center there were only 45 residents and 19 staffpersons. Today, the new $4.5 million comprehensive health care facility for the aged, which opened yesterday, is a reflection of his dedicated efforts to improve the quality of life for older Americans. The center now provides services for about 1,500 elderly persons and a staff of more than 150.

It was also Mr. Jackson who brought the plight of minority and low-income elderly to the attention of the White House Conference on Aging in 1971. To assure that the needs of these populations would no longer be overlooked, Mr. Jackson founded the National Caucus on the Black Aged in 1971. This organization works to assure that future policies and programs include services responsive to the identified concerns of black and low-income aged. I am sure that his vigorous, enthusiastic, and outspoken support for improving conditions for these segments of our population were instrumental in bringing to the forefront the need to federally support this effort.

As chairman of the House Select Committee on Aging, I have had the opportunity to work with Mr. Jackson on numerous occasions and I commend him for his deep and lasting commitment to our Nation's elderly in general, and our service to those that are aging.

At this time I would like to share with my colleagues the program for the Hobart C. Jackson testimonial banquet which outlines in greater detail his service to those that are aging.

I would also like to direct my colleagues' attention to a resolution which I introduced today jointly with the Honorable HAROLD FORD in tribute to Hobart C. Jackson.

I ask that both of these documents appear in their entirety in the RECORD at this point:

HOBART C. JACKSON TESTIMONIAL BANQUET

(Monday, May 1, 1978, Washington Hilton Hotel, Washington, D.C.)

PROGRAMME

Introduction of Mistress of Ceremonies: Franklin P. Ollivierre, Chairperson; Hobart C. Jackson Testimonial Planning Committee.

Mistress of Ceremonies: J. C. Hayward, Anchorwoman, WTOP-TV Eyewitness News.

Invocation: The Rev. Dr. Bobby Joe Saucer, Dean, Morehouse School of Religion.

Greetings from the District of Columbia: The Hon. Walter E. Washington, Mayor.

Letter from President Carter: Nelson H. Cruikshank, Counselor to the President on Aging.

Resolution Proclaiming May 1, 1978 Hobard C. Jackson Day in the District of Columbia: Sterling Tucker, Chairman, District of Columbia City Council.

Keynote Address: The Hon. Harold E. Ford, United States Congress.

Unveiling of Hobart Jackson's Portrait (Artist: Anthony Watkins): Remarks by Hobart C. Jackson & Family; Dolores A. Davis, Executive Director, The National Center on Black Aged; Aaron E. Henry, Chairman, The National Caucus/Center on Black Aged.

SPEAKING OF HOBART

Robert Benedict, Commissioner, Administration on Aging.

Mother M. Bernadette de Lourdes, President, National Council on the Aging, Inc.

Jacob Reingold, Member of the Executive Board, American Association of Homes for the Aging.

Nelson H. Cruikshank, Counselor to the President on Aging.

Arthur S. Flemming, Chairman, U.S. Commission on Civil Rights.

Eddie W. Gibbs, Executive Director, Eliza Johnson Center for the Aging, Inc.

Jacquelyne J. Jackson, Associate Professor of Medical Sociology, Department of Psychiatry, Duke University Medical Center.

Claude Pepper, U.S. House of Representatives.

Ollie A. Randall, Co-founder and Board Member, National Council on the Aging.

Walter A. Browne, Treasurer. Mercy-Douglass Human Services Corp., Philadelphia.

"Ode to Hobart Jackson," Sung by Aaron E. Henry.

Union Temple Baptist Church Senior Choir, Washington, D.C.: Wesley Boyd, Director.

Benediction: Rev. Charles E. Olewine, Pastor; Calvin United Presbyterian Church.

ODE TO HOBART JACKSON

Tell me, tell me, why was Hobart Jackson born
Tell me, tell me, why was Hobart Jackson born

Somebody had to hold our hand
Somebody had to take a stand
Somebody had to develop the land
That's why Hobart Jackson was born

Tell me, tell me, why was Hobart Jackson born
Tell me, tell me, why was Hobart Jackson born

Somebody had to do a good deed
Somebody had to preserve our seed
Somebody had to develop the creed
That's why Hobart Jackson was born

Tell me, tell me, why was Hobart Jackson born
Tell me, tell me, why was Hobart Jackson born

Somebody had to cry at midnight
Somebody had to weep and mourn
Somebody had to love old Black folks
That's why Hobart Jackson was born

MR. HOBART C. JACKSON, SR.

Mr. Hobart C. Jackson is the Executive Vice President and Director of the Stephen Smith Geriatric Center, a position he has held since 1974. Before becoming its chief executive officer, he was administrator of the Center from 1949 to 1974.

The Stephen Smith Geriatric Center is the oldest facility in the country providing care and services for the Black elderly. It is composed of Stephen Smith Home for the Aged (founded in 1864), Stephen Smith Towers (constructed in 1967), and two multi-purpose centers (Smith-Shepard and Smith-Pinn), organized in 1974. When he began at the Center there were 45 aged residents and 19 staff persons. The new $4.5 million comprehensive health care facility for the aged which opened today is testimony of Hobart Jackson's deep and lasting commitment to improving the quality of life for the elderly. The Smith Center now has institutional and non-institutional services for about 1,500 elderly persons and a staff of more than 150.

Other buildings completed during Jackson's tenure include the Cunningham Infirmary in 1961 ($500,000) and Stephen Smith Towers in 1967 ($1,500,000).

Prior to his involvement in the field of social services to the elderly, the low income and minority aged were not adequately represented in legislation or in the practice of gerontology. It was Mr. Jackson who first brought the plight of the Older Black citizen to the American public's attention. Their concerns were addressed during the 1971 White House Conference on Aging. To assure that the problems and needs of this segment of the aging population would not be overlooked again, Jackson founded the National Caucus on the Black Aged in 1971. The Caucus was awarded a three-year grant from the Administration on Aging and the National Center on the Black Aged was established to administer the grant.

Mr. Jackson served as the Center's first director and it is through his efforts that the Center has grown into an on-going and comprehensive program of education, information gathering and dissemination, coordination, consultative services to public and private sectors, research on contemporary issues and development of improved policies and programs in the delivery of services to Black and low income elderly.

Hobart C. Jackson currently serves at the national, state and local level on numerous committees and participates in conferences, workshops, and seminars in the field of aging as a speaker, discussion leader, consultant, resource person, and in varying other capacities.

His papers on aging have been published by the American Association of Homes for the Aging, The National Council on the Aging, the Gerontological Society, The National Health Council, the National Caucus on the Black Aged, the National Conference on Social Welfare, the University of Southern California, and other organizations.

He has presented papers or appeared on the programs of the annual meetings of the following National Organizations: American Association of Homes for the Aging, American Association of Volunteer Service Coordinators, National Conference on Social Welfare, National Health Council, National Urban League, National Recreation Association, National Council on the Aging, United Negro College Fund, Gerontological Society, Annual Conference on Aging at the University of Michigan, the White House Conference on Aging, and the National Welfare Rights Organization.

He has testified before Committees of both houses of Congress. He has been a guest lecturer at more than 20 colleges and universities. He has advised countless students interested in the field of gerontology.

He has received more than forty awards for his achievements from national, state, and local organizations.

He has served on commissions or task forces under three Presidents, four Governors, and four Mayors.

Jackson was a member of the Executive Committee of the White House Conference on Aging, both pre-conference and post-conference. He was also chairman of an Advisory Council on Aging and Aged Blacks to the United States Senate Special Committee on Aging.

Mr. Jackson attended public schools in Chattanooga, Tennessee where he was born. He attended Morehouse College in Atlanta, Georgia, graduating cum laude with a Bachelor of Science degree. He holds a Master's degree in Social Science from Bryn Mawr College in Bryn Mawr, Pennsylvania and has completed requirements at Atlanta University for a Master's degree in Economics and Business Administration.

While in Atlanta Mr. Jackson met and later married Elaine Bethel of Oklahoma City. The Jacksons have been married for 35 years and have raised one son and two daughters.

Hobart, Jr., is a member of the faculty at the University of Kansas in Lawrence, Kansas; his oldest daughter, Dale, who graduated from Talladega College in Talladega, Alabama, is a systems engineer with IBM in New Orleans. Marlena, the youngest, is a graduate of Thiel College in Greenville, Pennsylvania and works as a Research Chemist at Hercules, Inc., in Wilmington, Delaware. Mrs. Jackson is a supervisor with the Philadelphia Department of Public Welfare.

SOME PAST AFFILIATIONS

Executive Board Member, Vice President, and Chairman of Social Research, Planning, and Practice Section, Gerontological Society.

Vice President, The National Council on the Aging.

Chairman, Governor's Advisory Committee on Aging, 1960–1965.

Member, House of Delegates, National Association of Social Workers.

Chairman, Committee on Aging, 1964–66, National Urban League.

Member of Editorial Board, The Gerontologist.

Member, Executive Committee (Pre and Post), 1971 White House Conference on Aging.

Chairman, Delegate Criteria Committee for Pennsylvania, 1961 White House Conference on Aging.

Participant, 1950 National Conference on Aging. (1st National Conference on Aging).

Chairman, Advisory Council on Aging and Aged Blacks, U.S. Senate Special Committee on Aging.

Member, Presidential Task Force on Aging, 1967–1968.

H. Res. 1161

Whereas, Hobart C. Jackson, the Executive Vice President and Director of the Stephen Smith Geriatric Center, and founder of the National Caucus of the Black Aged, has been instrumental in improving conditions, policies, and programs for the elderly, in general, and the Black elderly and low income elderly, in particular; and

Whereas, he has demonstrated a deep and lasting commitment to our nation's aging, and

Whereas, he has done much to restore confidence in our government and to earn him the respect of the people of the United States: Therefore, be it

Resolved, That the House of Representatives commends Hobart C. Jackson for his dedicated service, and looks forward to a continuation of his outspoken support for improved conditions in the delivery of services to our nation's elderly.●

DISAPPROVAL OF THE EXPORT OF NUCLEAR FUEL TO INDIA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut (Mr. DODD) is recognized for 5 minutes.

● Mr. DODD. Madam Speaker, today I introduced a resolution to disapprove the export of nuclear fuel to India. As you know, the Nuclear Regulatory Commission, just 12 days ago, refused to grant an export license for this sale. However, President Carter overturned that decision and has authorized the export. Now it is up to both Houses of Congress to decide whether to allow this sale.

There are two fundamental reasons why I feel Congress should not allow further exports of nuclear fuel to India at the present time.

First, India has given us little indication that she will agree to allow full-scope international safeguards on her nuclear facilities. The Nuclear Non-Proliferation Act of 1978 forbids the export of nuclear fuel to nations that do not accept full-scope safeguards after March 1980. The 2-year grace period was provided in order to give countries time to comply with the required safeguards. But if it appears that a nation will not comply with these safeguards in the required 2 years, then it seems foolish to me to continue exporting that nation nuclear fuel. I would rather cut off India's nuclear fuel now than supply them up to the point where the Nuclear Non-Pro-

liferation Act requires us to cut them off. The difference between now and 2 years from now is approximately 17,000 pounds of uranium.

Second, India maintains that unless we continue to supply them with nuclear fuel, they will be free to reprocess the fuel we have previously given them. (Reprocessing is the crucial step in producing weapons grade material.) In short, we are being subjected to a subtle form of nuclear blackmail. Either we continue to sell them fuel or they will reprocess what they already have. I do not believe that blackmail of this sort gives us any reason to hope India is considering adherence to international safeguards in good faith. And if India does not accept safeguards within 2 years (as now appears likely), they will reprocess our fuel anyway. Why should we sell them 17,000 more pounds of nuclear fuel to do it with?

I sincerely hope that India will accept full-scope safeguards before March 1980, and that we will be able to continue exporting them nuclear fuel without fear of it being reprocessed and diverted to nuclear weapons programs. But we need more than hope. Congress should require explicit assurances from the administration that significant progress is in fact being made on full-scope safeguards. Until such assurances are forthcoming, Congress should exhibit the firmness of its belief in non-proliferation by refusing to allow the continued export of nuclear fuel to India.●

EFFECTIVE FEDERAL INCOME TAX RATES PAID BY U.S. CORPORATIONS IN 1972: A TREASURY STUDY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. VANIK), is recognized for 5 minutes.

● Mr. VANIK. Madam Speaker, the Department of Treasury is making public a study of the effective Federal income tax rates of U.S. corporations in 1972. The study, originally requested by Senator GAYLORD NELSON's Small Business Committee, was started in late 1975. Senator NELSON has inserted the extensive material elsewhere in this RECORD. Public release by the Treasury is planned for Thursday.

I have had only a small amount of time to review the figures in the Department's work, but I want to make clear that I do not think that they contradict my own annual corporate tax studies, which I have done since 1971.

In fact, not only does the study not contradict my own, but it coincides with it almost exactly.

While much attention will probably be paid to the effective corporate tax rate of 38.8 percent for all corporations, the figure I am more concerned with is the amount of effective taxes paid by the very large American corporations—the corporations on which my tax study focuses. For companies in the $0.5 to $1 billion asset range—148 in all—the effective tax rate was 39.2 percent. For the 175 companies in the highest asset range, $1 billion or more, the effective tax rate in the Treasury study is 29.2 percent. My own studies in 1972, showed that the 90 very large companies for which I was able to obtain data paid an average effective Federal income tax rate of 28.6 percent—a figure almost identical to the tax rate computed in the Treasury study.

It should be kept in mind that the Treasury figures are based on 1972 statistics.

The companies in my studies represent the largest corporations in our country—companies whose taxes can make a huge difference in the amount of revenue that the Federal Government collects. In the Treasury study the largest asset range alone—$1 billion and above, while paying an effective Federal income tax rate of only 29.2 percent (lower than any other asset range in the study except one), at the same time accounted for over 38 percent of total corporate income—almost $30 billion of all corporate income of $75.1 billion in "basic worldwide taxable income." Our progressive income tax system is apparently failing us here.

I also want to stress that the effective tax rate of U.S. corporations is only one measure of corporate taxation; also extremely important is the amount of taxes they pay relative to other Federal receipts. My annual corporate tax studies have shown that the amount of corporate Federal income taxes paid as a percent of total Federal budget receipts has steadily declined. Though America's corporate contributions to the Treasury amounted to 22.7 percent in 1967, my most recent corporate study showed that 1976 year contributions were only 13.8 percent.

Corporate income taxes amounted to only 15.6 percent of Federal budget receipts in 1972.

Corporations do pay taxes other than U.S. Federal income tax rates, of course, but I have chosen to make comparisons using this measure. As a member of the Ways and Means Committee, I am responsible for the "tax expenditures" that are allowed to occur through the United States Tax Code. The dollars lost or gained in Federal revenue are as important in reducing the Federal deficit as those we have by trimming Federal spending. Taxes paid to foreign governments are of no help in knowing the health of our own country's revenues.

Senator NELSON and his Small Business Committee intend to follow up the Treasury study with an analysis. I hope it can explore some of the issues I have raised, as well as others.

In any event, it should be made clear that the Treasury study is not the definitive word on the "effective taxes" of American corporations.●

CLARIFICATION OF H.R. 2222, AMENDING NATIONAL LABOR RELATIONS ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. THOMPSON) is recognized for 5 minutes.

● Mr. THOMPSON. Madam Speaker, we have scheduled for floor consideration Thursday the bill, H.R. 2222, to amend the National Labor Relations Act to clarify the scope of its coverage.

In the report on that bill, Coverage of Medical House staff under the National Labor Relations Act (H. Rept. 95–980), there are two sentences to which objection has been raised by the Liaison Committee on Graduate Medical Education. One is an oversimplification of the relationship of the American Medical Association to the accreditation process involving hospital based training programs. The other is a partial quote from a National Labor Relations Board decision.

In any event, in order to eliminate any possible confusion, I ask unanimous consent that the letter sent Chairman PERKINS by the Liaison Committee on Graduate Medical Education be printed at this point in the RECORD so that all Members may have access to it before floor consideration of H.R. 2222.

The letter follows:

APRIL 12, 1978.

HON. CARL D. PERKINS,
Chairman, Committee on Education and Labor, House of Representatives, Rayburn House Office Building, Washington, D.C.

DEAR CONGRESSMAN PERKINS: I write as chairman of the Liaison Committee on Graduate Medical Education to comment on statements in the Report of the Committee on Education and Labor on H.R. 2222, a bill to provide coverage of medical housestaff under the National Labor Relations Act (Report No. 95–980). On page 2 of the report, it is stated that housestaff provide medical care to hospital patients as part of an American Medical Association (AMA) accredited hospital-based training program in a medical specialty or sub-specialty. On page 5, the following statement appears: "But the AMA, 'the ultimate governing authority for housestaff programs in this country,' declared by resolution of its House of Delegates and in testimony before the Labor-Management Relations Subcommittee that housestaff properly belong within the coverage of the act." These statements which cast the AMA as the sole accreditor for, and ultimate authority over, graduate medical education are not consonant with the present state of affairs.

In 1972 the Liaison on Graduate Medical Education (LCGME) was established as the accrediting agency for graduate medical education in the United States. The LCGME is sponsored by five national professional organizations concerned with medical education. These are: the American Board of Medical Specialties, the American Hospital Association, the American Medical Association, the Association of American Medical Colleges, and the Council of Medical Specialty Societies. The LCGME, working in concert with 23 Specialty Residency Review Committees and the Coordinating Council on Medical Education, develops policies for and carries out the review and accreditation of graduate medical education programs in the United States. It is important that this board range of involvement in graduate medical education policy and accreditation through the LCGME be recognized and understood.

Sincerely yours,

WILLIAM K. HAMILTON M.D.,
Chairman, Liaison Committee on Graduate Medical Education.●

NUCLEAR NONPROLIFERATION AND INDIA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. BINGHAM) is recognized for 10 minutes.

● Mr. BINGHAM. Madam Speaker, under the terms of the Nuclear Nonproliferation Act of 1978 (Public Law 95-242), the House will be called upon in the weeks ahead to consider a resolution of approval or disapproval of the Executive order issued by President Carter on April 27 authorizing the export of low enriched nuclear fuel to India. The question of whether the Congress should approve or disapprove the Indian fuel shipment is very difficult and very complex. Some will argue that it seems likely that this shipment will be abused should future negotiations fail to gain stronger nonproliferation guarantees and therefore that the Congress should not acquiesce in this export to a country which has in the past diverted our nuclear materials for explosive purposes. On the other hand, the administration is cautiously optimistic about the prospects of Indian compliance with basic U.S. safeguards concerns. It can thus be argued that withholding the disputed fuel shipment would critically undermine the nonproliferation discussions with India—especially the upcoming negotiations between Prime Minister Desai and President Carter to take place in Washington June 11 and 12—and thereby shatter any remaining hopes for accommodation between the world's two most populous democracies.

The President's Executive order has been referred to the International Relations Committee for a period of 45 days. During this time the committee will be seeking more information regarding the President's reasons for optimism regarding the continuing discussions with India designed to reach agreement on basic safeguards assurances and future acceptance of "full scope" safeguards.

Mr. Speaker, I am submitting for the RECORD the text of the President's statement on the Indian fuel shipment along with an account of the dispute from the New York Times and a thoughtful Times editorial on the subject. A provocative Wall Street Journal editorial, arguing an entirely contrary viewpoint, is also attached:

LETTER FROM THE WHITE HOUSE

To the Congress of the United States:

I am transmitting herewith, pursuant to Section 126b(2) of the Atomic Energy Act of 1954, as amended, an Executive Order authorizing the export of 7,638 Kgs. of low-enriched uranium to India for use in the fueling of its Tarapur Atomic Power Station.

In our Agreement for Cooperation with India, the United States agreed to supply all of the fuel requirements for that Power Station, and India agreed to operate it exclusively on U.S.-supplied fuel. We contracted to supply the specific fuel here involved a number of years ago.

An application for a license to export this fuel was submitted to the Nuclear Regulatory Commission early last year. This application was carefully reviewed within the Executive Branch, which concluded that the proposed export would not be inimical to the common defense and security, that it would meet all the immediate statutory criteria under the then pending Nuclear Non-Proliferation Act, and that the license should be issued. Later that month, the Commission was officially notified of the Executive Branch findings and recommendations.

On April 20, the Nuclear Regulatory Commission found itself unable to agree upon the issuance of this license, being divided by a 2-2 vote. The Nuclear Non-Proliferation Act of 1978 wisely provided for just such a contingency. Previously, there was no clear way of dealing with a situation in which the Commission was unable to decide upon the issuance of an export license, and no way of ensuring that in cases where the licensing process would lead to a result that the President believed would be seriously prejudicial to the achievement of United States non-proliferation objectives, such prejudice could be avoided.

I have determined that this is such a case. The Government of India has given us its commitments to use our exports only at the Tarapur Atomic Power Station and not for any explosive or military purpose, and I have the highest confidence that it will honor these commitments. I am convinced that denial of this export would seriously undermine our efforts to persuade India to accept full-scope safeguards, and would seriously prejudice the achievement of other U.S. nonproliferation goals. I intend to pursue these matters further with the Government of India.

A period in which to seek agreement to full-scope safeguards was clearly provided for in the Act. The Act permits a continuation of exports during this period, including exports in cases where there are questions as to whether and when that objective may be achieved. Rather than prejudice the prospects for success in such efforts by refusing to fulfill an existing commitment that is important to India's power supply, we should be using this period to find, in the light of the new legislation's requirements, mutually acceptable ways of meeting both India's need for continued operation of the Tarapur Atomic Power Station and our need for full-scope safeguards and the attainment of other non-proliferation objectives.

In transmitting this Executive Order to you pursuant to Section 126b(2) of the Act, I wish to make clear that I am not departing from the reservations I expressed at the time I signed the Nuclear Non-Proliferation Act of 1978 concerning the constitutionality of provisions of that Act which purport to allow Congress to overturn my decisions by actions not subject to my veto power.

JIMMY CARTER.

THE WHITE HOUSE, *April 27, 1978.*

CARTER ORDERS SALE OF URANIUM TO INDIA FOR POWER FACILITY

(By Graham Hovey)

WASHINGTON, April 27.—President Carter overruled the Nuclear Regulatory Commission today and ordered the sale of more than eight tons of enriched uranium to India for its Tarapur nuclear power plant outside Bombay.

In a message to Congress, Mr. Carter said he was convinced that to deny the sale "would seriously undermine our efforts to persuade India to accept fullscope safeguards and would seriously prejudice the achievement of other U.S. nonproliferation goals."

"The Government of India has given us its commitments to use our exports only at the Tarapur Atomic Power Station and not for any explosive or military purpose, and I have the highest confidence that it will honor these commitments," the President said.

SHIPMENTS CAN BE CONTINUED

Mr. Carter pointed out that the Nuclear Non-Proliferation Act of 1978, which seeks to bar uranium exports that could endanger United States security, permits continuation of shipments for a two-year period, during which Washington can try to reach agreement with recipient countries for "full-scope safeguards."

This period, he said, should be used to find "mutually acceptable ways" of meeting India's needs for the Tarapur plant, "and our need for full-scope safeguards and the attainment of other non-proliferation objectives."

The United States, in a nuclear-cooperation pact with India reached 15 years ago, agreed to supply all the fuel requirements for the Tarapur station, and India in turn agreed to operate it exclusively on fuel furnished by this country.

COMMISSION REFUSED LICENSE

On a 2-to-2 tie vote last Thursday, the Nuclear Regulatory Commission in effect refused to grant a license for the export of the 16,800 pounds of enriched uranium. The tie vote constituted a rejection, since one seat on the five-member agency is vacant.

After the vote, however, the commission decided unanimously to send the application to the President, who has authority to approve the export of uranium if he deems that to do so would serve the country's security interests. His decision under the new law, however, can be overturned by Congress.

The commission's denial of the export license had been strongly attacked by India's Prime Minister, Morarji R. Desai, who said that the decision would free India "to adopt any course we like to safeguard our own interest."

In overruling the commission, President Carter in effect accepted India's interpretation that the United States had "an existing commitment" to supply the fuel, and said that refusing to fulfill it would prejudice the prospects for getting India to accept stricter safeguards on its nuclear operations.

Mr. Carter said that the executive branch had carefully reviewed India's application after it was received last year, and had concluded that it would meet all requirements of the laws as they then existed and would "not be inimical to the common defense and security."

Under the stricter controls specified in the Nuclear Non-Proliferation Act of 1978, however, the two commissioners who voted against the uranium sale cited India's continuing resistance to international safeguards against the use of nuclear facilities for weapons purposes.

Mr. Carter, in his executive order, repeated the reservations he had expressed when he signed the Nuclear Non-Proliferation Act of 1978 about the constitutionality of the provisions that allow Congress to overturn his nuclear decisions "by actions not subject to my veto power." The provisions have not been tested in the courts.

A NUCLEAR GAMBLE ON INDIA

President Carter has taken a calculated risk in approving another shipment of nuclear fuel to India after the Nuclear Regulatory Commission refused to issue an export license. India is the only nation that has explored a nuclear device built with materials diverted from a civilian program, and it has adamantly refused to allow international inspection of all its nuclear facilities. But Mr. Carter had little choice. He promised the fuel on his visit to India in January. And he clings to the hope that the Indians can be brought to accept international safeguards against the misuse of nuclear materials. It is a gamble worth taking.

The Nuclear Regulatory Commission raised troubling questions in rejecting the export license. Two commissioners argued that provisions of the nuclear cooperation agreement between the United States and India are uniquely affected by a new nuclear export law. The law forbids fuel shipments, after 24 months, to countries that do not place all nuclear activity under international safeguards, unless the President and Congress make an exception. India has consistently refused to accept such safeguards until the major powers reduce their nuclear stockpiles. Thus it appears likely that the

United States will fairly soon have to stop shipping nuclear fuel to India.

What might happen then is uncertain. Under a 1963 agreement, the United States supplied two power reactors to India at Tarapur and has continued to supply fuel for them. The Indians contend that if the United States should cut off the fuel, the agreement would be abrogated; India would be free to reprocess the spent fuel from previous shipments and separate out plutonium, which could be used to make explosives. As Prime Minister Desai said in March: "If they say 'no' . . . then all ways are open to us . . . we are not bound." The regulatory commission thus had no firm assurance, as required by the new law, that the new shipment would not be misused.

Mr. Carter has nonetheless chosen to authorize the shipment himself—as permitted under the new law, subject to veto by Congress—in the hope of obtaining eventual agreement on safeguards with the Indians. He believes he does have a commitment that the Indians will not use the material to make explosives. The risk of adding another 7.6 tons of fuel to the larger quantities already sent to India does not seem unreasonable. If the shipments were stopped now, however, all hope of agreement might be lost.

So the President's gamble is defensible. But at some point he will have to stand firm. The United States has been remarkably patient with India. The fuel shipments continued even after India exploded a nuclear device made from materials supplied by Canada and the United States—in the hope, thus far vain, that India would become a responsible nuclear citizen. A confrontation seems inevitable within two years. The coming months must be devoted to obtaining formal assurances that India will not misuse the fuel we have already supplied and will open all its nuclear facilities to international inspection.

Continuing Burlesque

Of all the delights of the Carter administration, none tops the continuing burlesque of its policy to constrain the proliferation of nuclear weapons. In the name of stopping proliferation, Mr. Carter has just overruled the Nuclear Regulatory Commission in order to send 7.6 tons of enriched uranium to India, the only nation actually to divert American atomic materials into the proliferation of nuclear weapons.

The Indians say that their atom bomb is a "peaceful" one, and therefore they didn't violate their agreements in using American heavy water in making atomic explosives in a Canadian-supplied reactor. After this incident, the Canadians cut off the export of all nuclear materials to India. Following the example, India cut off the export of all rhesus monkeys to the United States, because some of them were used in radiation experiments the Indians consider nonpeaceful. But ignoring these examples, Mr. Carter has decided that Uncle Sam should turn the other cheek.

Is this the same Jimmy Carter who back during the presidential campaign complained, "When India exploded its so-called 'peaceful' nuclear device, the U.S. made no public expression of disapproval"? Who further complained that we "rewarded" India with further nuclear materials? Who stopped the U.S. neutron bomb out of antinuclear moralism? Well, yes. He now says that not sending more uranium to India "would seriously undermine our attempts to persuade India to accept full-scope safeguards" against further diversion.

But the Indians, in the tradition of "peaceful" bombs and rhesus monkeys, have already made their position on comprehensive safeguards perfectly clear. As the State Department describes it, "India would accept such safeguards when at least the U.S., the U.K., and the U.S.S.R. agreed to a complete nuclear test ban, agreed not to add further to their nuclear arsenals, and came to an agreement to have a gradual reduction of nuclear stockpiles, with a view to the eventual destruction of such stockpiles." The millennium must come first, then the Indians will accept safeguards.

When the NRC refused to approve the sale in a 2–2 vote, the prevailing opinion noted that the Indian position on safeguards is on a collision course with U.S. law. The Nuclear Non-Proliferation Act of 1978 forbids exports to any nation that has not accepted full safeguards, and provides the presidential escape clause for only the first 18 months following its enactment. Shortly—barring the equally implausible contingencies of Soviet-American disarmament or Indian capitulation on safeguards—shipments to India will be illegal.

India has further made clear that if its nuclear supplies are cut off, it will feel freed from all previous agreements. It will proceed to use all nuclear materials in its possession however it wants, which means reprocessing spent nuclear fuel into plutonium for bombs. In other words, it is all but certain that the 7.6 tons of uranium Mr. Carter is now shipping India will in fact end up being used to proliferate nuclear weapons. This lesson about nuclear proliferation will not be lost on other nations pondering whether to get the bomb.

On behalf of the Indians, we must say that at least we can understand them. They want the bomb, and they know an easy mark when they see one. The Americans, by contrast, remain inscrutable. If Mr. Carter wanted to play patsy on proliferation, he did have the option of doing so quietly. Instead, he has chosen to do so after setting the stage with trumpet fanfares and heraldic processions.●

CARTER AND ENERGY: PROMISES BROKEN, PROMISES FORGOTTEN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. Drinan) is recognized for 5 minutes.

● Mr. DRINAN. Madam Speaker, having worked closely with many of my House colleagues on legislation promoting efficient energy use in American homes, businesses, and industry. I had high hopes for candidate Jimmy Carter's promise of a new direction in national energy policy.

I was understandably disappointed last year when President Carter and James Schlesinger proposed an energy plan which would reduce projected 1985 energy demand by only 4 quads (quadrillion Btu), in contrast with economically achievable energy conservation estimated by the Ford Foundation energy policy project and experts at the Massachusetts Institute of Technology to be closer to 20 or 21 quads by 1985.

Though President Carter described energy conservation as the "cornerstone" of his proposed legislation, the administration's own statistics belied the validity of that assertion. Energy Secretary Schlesinger was much less tactful in his support of the national energy plan, and eventually assured oil industry representatives that "there is a very limited amount of conservation in this program."

I was further shocked and disappointed to learn last month that the administration advocates indefinite delay on legislation authorizing low-interest loans for residential and commercial applications of solar heating. It is common knowledge that the limited solar incentives approved by the National Energy Act conferees will reach only a narrow segment of potential solar consumers, and it is further known—after extensive analyses were performed for the Energy Research and Development Administration, Department of Energy, Office of Technology Assessment, Council on Environmental Quality and Joint Economic Committee—that many solar heating applications are either already competitive or on the verge of commercial viability. Yet without a secure means of financing, and without the administration's genuine support, this short-term energy potential will largely go unrealized.

I have found it increasingly difficult to reconcile President Carter's statements with his actions on energy policy, Mr. Speaker, and I was interested to learn that this sense of discouragement is shared by a broad coalition of public interest lobbies.

The following joint statement was issued last week by the Natural Resources Defense Council, Friends of the Earth, Environmental Policy Center, Environmental Action, Environmentalists for Full Employment, Wilderness Society, Consumer Action Now, Sierra Club, Ralph Nader, Critical Mass Energy Project, Environmental Defense Fund, National Parks and Wilderness Association, and the National Consumers League:

Carter and Energy: Promises Broken, Promises Forgotten—A Joint Statement

Environmentalists and consumer groups around the country are fast becoming convinced that President Carter has abandoned the progressive and far-reaching energy policies of his campaign and his first months in office, in favor of the tired, discredited policies which he ran against less than two years ago.

Recent news about the planning of Phase II of the National Energy Plan, the recent introduction of the nuclear licensing bill, and an upcoming speech devoted to boosting nuclear power confirm the growing belief that the Administration has a Jekyll-and-Hyde personality when it comes to formulating and promoting national energy policy. Although the President makes bold, visionary statements about energy policy, his Energy Secretary, James R. Schlesinger, is backsliding every day to the worn-out, inadequate energy policies of the Republican Administrations in which he served.

The President and his advisers speak of innovation, imagination and commitment being put at the disposal of conservation, of renewable energy resources and of decentralization. Instead DOE is devoting its imagination, enthusiasm and commitment to nuclear power, to massive subsidies for development of synthetic fuels, and to efforts to block citizens from the energy decision-making process.

There is also serious impropriety when the Secretary of Energy, whose Department is regulated by an independent Nuclear Regulatory Commission: (1) is permitted to pick the candidates for seats on the Commission; (2) writes a bill designed to make the Commission move faster; and (3) drafts an executive order which will give the Secretary institutionalized political authority to influence and interfere with Commission schedules, procedures and timetables, all in order

to "speed up" the use of what the President has said is "our last resort" for energy.

In addition, although the Administration is committed to a strong environmental program, it is ceding all authority and power in energy-environment disputes to a Secretary who has demonstrated for years an insensitivity to environmental problems. This is inconsistent with the Administration's commitment to developing our energy future consonant with protecting the environment.

Similarly, the Carter Administration has spoken in robust terms about energy and employment but has shown little inclination to coordinate energy and jobs programs. Consequently, the President has been promoting energy strategies that will actually limit job growth while the crisis over employment deepens.

But we are particularly disturbed by policies which actively encourage hasty commitments to nuclear power while the Administration frankly acknowledges: (1) that it will be a decade or more before we even know theoretically whether we can solve the most serious safety and environmental problems of nuclear energy—nuclear waste disposal—and, (2) that there is mounting evidence that nuclear power is the most expensive energy for consumers.

After more than a year of Secretary Schlesinger, some may have forgotten the promises of the Presidential campaign and of the early days of this Administration. We have not forgotten.

We remember that the President:

Set energy priorities that ordered energy conservation the number one priority to control demand and solar energy one of the nation's top priorities to create supply.

Pledged to minimize dependence on nuclear power, to use it only as a "last resort" and only then with strengthened safety standards.

Pledged to reform the nuclear licensing process only after a thorough study of the causes of delay was completed.

Pledged that his energy policies would be implemented in a way that would deal fairly and equitably with consumers.

Pledged to develop and use energy resources consistent with protection of the environment and in compliance with environmental standards.

Took a strong stand against nuclear arms proliferation, spoke out against the future use of plutonium as a fuel for nuclear reactors, and announced plans to defer indefinitely plutonium reprocessing, to cancel the Clinch River Breeder Reactor and to redirect our energy research away from plutonium breeders.

Pledged that competition among energy producers and distributors would be guaranteed.

Pledged that if there was to be commercialization of synthetic fuels, it would be without government subsidies.

Pledged that in all aspects of the government he would expand the role of citizens in shaping their own destiny by increased citizen participation in government decisionmaking.

Pledged that as President he would personally provide the forceful leadership so badly needed to extricate the country from the energy crisis and to establish a sound energy future.

What has happened to the high promise of this Administration? In place of Presidential leadership, the energy program has been turned over to former Atomic Energy Commission Chairman James R. Schlesinger, who has successfully reassembled his old cadre of nuclear promoters from the AEC. The President's abdication of his leadership role on the energy issue has resulted in a massive erosion of his early commitments to a sane energy policy:

In place of the thorough study of nuclear licensing reform the President promised, Secretary Schlesinger has sent to Congress a nuclear licensing bill that was introduced without the benefit of such a study. Instead, he has introduced a bill that punishes public participation in the licensing process, does nothing to solve the real problems in reactor licensing and fails to propose a single new provision to strengthen reactor safety. In addition, this piece of legislation repudiates the President's own stated commitment to minimize dependence on nuclear power and use it as a last resort. The bill also does not address a thorough consideration of the nuclear waste problem in deciding whether to build and operate nuclear reactors.

In place of federal government leadership in implementing energy conservation and using solar energy, the federal government and particularly key government officials continue to drag their heels, showing neither leadership, conviction or imagination, and setting an abysmal example for the rest of the country.

In place of a program emphasizing the development of solar energy, DOE's proposed budget continues to give the lion's share of all energy research to nuclear power and actually reduces the outlay for solar energy to a mere 3% of the DOE budget.

In place of the promised end to the development of plutonium breeder reactors, Secretary Schlesinger has now proposed to substitute for the Clinch River Breeder Reactor development of a plutonium breeder that is two or three times larger than CRBR.

In place of the promised vigorous opposition to the proliferation of nuclear weapons abroad, the State Department has allowed Japan to reprocess U.S.-supplied spent fuel, and has continued to push for the sale of nuclear fuel tc India despite the fact that New Dehli has refused to accept international safeguard requirements and has exploded a nuclear weapons device. The State Department has continued this posture even in the face of strong reservations by the independent Nuclear Regulatory Commission.

In place of a vigorous campaign to restore and generate competition in our energy markets, Secretary Schlesinger is now interfering with federal enforcement of the antitrust laws. DOE is now actively blocking attempts by the Department of Justice and the Federal Trade Commission to obtain from the Energy Department the necessary data to investigate pending cases.

In place of private commercialization of synthetic fuels which would assure that overly expensive systems would not be developed, Secretary Schlesinger is now developing an energy supply strategy which has as its centerpiece massive governmental price supports and subsidies for otherwise uneconomic synthetic fuels.

Despite this deterioration of energy policies, the President is still our best hope for the kind of energy future he promised and we supported. But time is running out for the energy platform on which President Carter campaigned for the peoples' votes. Unless he acts now he cannot expect to retain the support and confidence of his environmental/consumer constitutency. The President must begin to take his proper role as the leader in development and implementation of an energy policy.

If, as we often hear, Secretary Schlesinger is a good manager, then let him manage but do not let him undermine and worse, remake, energy policy.

One year ago today President Carter spoke to the Nation and properly emphasized the critical role public attitudes and actions will play in achieving energy conservation and implementing renewable, non-polluting energy systems. Now a year later President Carter must realize that the atmosphere and propensity for change cannot occur unless he personally takes a major role in leading his Administration's energy policies and actions back to the commitments and promises of the campaign and the early months of 1977. To develop public support for the kind of energy future he spoke of a year ago and to begin to restore the confidence of his strong environmental and consumer constituency, the President must:

1. Cancel any plans to give any Presidential endorsement, even a qualified endorsement for the further use of nuclear power. Instead, he must reiterate the principle that nuclear power is sufficiently dangerous that we should use it only after full implementation of solar, conservation, geothermal and fossil fuel technologies.

2. Link the further licensing and operation of nuclear reactors to the final resolution of: (1) the technical and social problems of safely disposing of nuclear wastes, and (2) the nearly 200 unresolved safety problems which still plague the present generation of nuclear reactors.

3. Reassert, in both word and deed, that the energy future can and, with public support, will be based on conservation, renewable resources and a minimized dependence on nuclear power.

4. Establish a firm commitment, with a timetable for action for moving to greatly expanded use of already established renewable resource energy systems.

5. To assure that the goals for implementing renewable resource energy systems will be met, a solar bank to make or guarantee loans for renewable resource systems should be established and federal investments and procurement policies should be shaped to meet these goals.

6. To improve market penetration of renewable resources and to quickly create a vigorous domestic industry and labor force, there should be a major shift in our foreign assistance away from nuclear energy and into renewable resources.

7. End State Department and Export-Import Bank promotion of nuclear power exports to developing countries and increase U.S. assistance to other nations in making realistic assessment of their energy requirements and developing renewable energy sources.

8. Redirect energy research and development funds to make renewable resources development the highest energy priority.

9. Insist that new energy supplies must come from the least cost source and that all costs, including social and environmental costs are taken into account.

10. Commit the federal government in every agency and department to develop on a priority basis energy policies based on the premise that no new energy should be produced that could be saved through conservation at equal or less cost.

11. Move to end federal subsidies for nonrenewable resources. These include investment tax credits, the marketing of federal energy sources at less than a fair return and abolition of federally-provided insurance and limitations on liability such as Price-Anderson.

12. Exercise the legal authority we now possess to prevent the reprocessing of United States-supplied nuclear fuel in any proposed or existing facility overseas. Vigorously use the new authority provided in the Nuclear Non-Proliferation Act of 1978 and fully exercise our influence to prevent actions by other nations which facilitate nuclear weapons proliferation.

13. Oppose all legislative efforts to divert excess profits from high energy prices and new energy taxes to the energy industry and assure that those monies are fairly allocated among consumers.

14. Take all steps under the existing antitrust laws and proposed any necessary new legislation to break up energy monopolies and guarantee true competition in the energy sector.

15. Prevent DOE from interfering with the decisions of independent, regulatory bodies

or other agencies and eliminate all DOE involvement in appointments or legislation relating to NRC.

We have waited patiently and silently for most of this past year. We have waited for this Administration to fulfill—or begin to fulfill their oft-repeated promises. We have searched for clues or hints of principles being upheld.

Instead we have watched in surprise and with growing discouragement as the President abandoned one campaign commitment after another. And we can wait no longer.

The time has long passed for the Administration to have honored its obligations to the American consumer.

PERSONAL STATEMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. MATTOX) is recognized for 5 minutes.

● Mr. MATTOX. Mr. Speaker, during the consideration of the first budget resolution by the Budget Committee, I announced my intention to offer an amendment that would withdraw all aid to the Government of South Korea unless and until we received its full cooperation in the investigation currently underway by the House of Representatives on Korean influence-buying of Members and former Members of Congress. I insisted that this include the testimony of both Tongsun Park and former Ambassador Kim Dong Jo.

I have been in close touch with Col. Leon Jaworski as to the progress of this investigation. Tongsun Park has now testified. It is my understanding that delicate and sensitive negotiations are underway that hopefully will result in other testimony which is needed. In the last few days Colonel Jaworski assured me that these discussions to resolve the issue are in progress.

I, for one, intend to monitor this situation very carefully and to continue to press for full testimony from all relevant parties. However, in view of the present status of the matter, I shall not offer the amendment to this budget resolution. I do wish to announce that if current discussions break down, or are stalled, I shall ask Members of the House of Representatives to support my amendments to the forthcoming appropriations bills, striking all fiscal assistance to the Government of South Korea. The people demand a total disclosure of all that has transpired with respect to the alleged influence-buying and that the investigation be complete in every respect. Confidence in the House of Representatives must be restored in the minds of the American people.●

CONDOMINIUM ACT OF 1978

(Mr. LEHMAN asked and was given permission to extend his remarks at this point in the RECORD, and to include extraneous matter.)

● Mr. LEHMAN. Mr. Speaker, last month, I introduced the Condominium Act of 1978, in a new effort to bring an end to unconscionable 99-year condominium recreation leases.

The legislation was prepared by the U.S. Department of Housing and Urban Development (HUD), in cooperation with south Florida's Congressmen and Senators, and would provide for comprehensive Federal regulation of condominium contracts, including those which were signed in years past. Current Florida condominium laws have so far proven unable to solve the problems associated with long-term recreation leases in contracts signed prior to the enactment of the State laws.

The Condominium Act, H.R. 12124, includes four major provisions of particular importance to south Florida condominium unit owners:

First, the problem of 99-year recreation leases is specifically addressed by declaring that, by a two-thirds vote of the unit owners, a court case could be brought to have the lease declared unconscionable. Unconscionability is defined as "including any gross disparities between the obligations incurred and the benefits received." The court, if it decided in favor of the unit owners, could grant relief such as the recission or reformation of all or part of the lease.

Second, the bill would make future automatic recreation lease rent increases unenforceable.

Third, unit owners would be able to terminate long-term "sweetheart" maintenance contracts in 90 days, if two-thirds of the unit owners so voted.

Finally, the bill would void existing lease provisions that require unit owners to pay all attorney's fees or judgments incurred by the developer in suits between the developer and the unit owners.

Previous administrations had refused to support condominium legislation of this type, arguing that congressional action affecting existing contractual relationships would be in violation of the Constitution. However, under the new administration, the Attorney General's office has stated that "it is the (Justice) Department's judgment that the bill has no serious constitutional impediments." In addition, they said that "where Congress is legislating in an area within its appropriate functions, the Supreme Court has repeatedly upheld laws which have had retrospective consequences."

The administration and HUD just completed drafting this legislation after 9 months of difficult legal work. Unfortunately, it is too late for Congress to thoroughly consider the bill in this session.

However, our office has already begun lining up support for the new legislation in the House. Representative THOMAS ASHLEY, chairman of the Housing and Community Development Subcommittee which must review the bill, agreed to be a cosponsor and has promised to hold hearings early next year. Another initial cosponsor is Representative BEN ROSENTHAL, chairman of the Commerce Consumer, and Monetary Affairs Subcommittee.

When Congress convenes next year, I will do all I can to see that the House of Representatives promptly considers this new and important legislative proposal which we hope will provide a remedy for present condominium recreation lease problems.

Because our office has received numerous requests for copies of H.R. 12124, the text of the bill follows:

H.R. 12124

A bill to encourage broader utilization of the condominium form of homeownership, to provide minimum national standards for disclosure and consumer protection for condominium purchasers and owners and tenants in condominium conversions, to encourage States to establish similar standards, to correct abusive use of long-term leasing of recreation and other condominium-related facilities, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Condominium Act of 1978".

TITLE I

FINDINGS AND PURPOSE

SEC. 101. (a) The Congress finds and declares that there is a shortage of adequate and affordable housing throughout the Nation; that utilization of the condominium form of ownership can increase the supply of housing and expand the opportunities for homeownership particularly for low- and moderate-income and elderly persons and families. The Congress further finds that consumer abuses have occurred throughout the Nation in the condominium industry which have caused economic and social hardships for consumers, which threaten the continued use and acceptability of the condominium form of ownership and which interfere with the interstate sale of condominiums and that continuation of these abuses is a national problem requiring Federal action.

(b) It is therefore the purpose of this Act to establish national standards for consumer protection and disclosure together with appropriate enforcement procedures, to encourage States to adopt statutes which will provide substantially equivalent or greater consumer protection, and to correct and prevent continuing abuses including abusive use of long-term leasing of recreation and other condominium-related facilities.

TITLE II

DEFINITIONS

SEC. 201. As used in this Act the term—

(1) "affiliate of a developer" means any person who controls, is controlled by, or is under common control with a developer. A person "controls" a developer if the person (i) is a general partner, officer, director, or employee of the developer, (ii) directly or indirectly or acting in concert with one or more other persons, or through one or more subsidiaries, owns, controls, holds with power to vote, or holds proxies representing more than 20 per centum of the voting interests of the developer, (iii) controls in any manner the election of a majority of the directors of the developer, or has contributed more than 20 per centum of the capital of the developer. A person "is controlled by" a developer if (i) the developer is a general

partner, officer, director, or employee of the person, (ii) directly or indirectly or acting in concert with one or more other persons, or through one or more subsidiaries, owns, controls, hold with power to vote, or holds proxies representing, more than 20 per centum of the voting interests of the person, (iii) controls in any manner the election of a majority of the directors, or (iv) has contributed more than 20 per centum of the capital of the person;

(2) "agent" means any person who represents, acts for or on behalf of, or in concert with, a developer in selling or offering to sell any condominium unit in a condominium project, but such term does not include an attorney at law whose representation consists solely of rendering legal services;

(3) "association", "unit owners association" or "owner association" means the organization, whose membership consists exclusively of all the unit owners in the condominium project, which is, or will be, responsible for the operation, administration, and management of the condominium project;

(4) "automatic rent increase clause" means a provision in a lease permitting periodic increases in the fee due under the lease which is effective automatically or at the sole option of the lessor, and which provides that the fee shall increase at some percentage rate or the rate of a recognized index;

(5) "common elements" means all portions of the condominium project, other than the units;

(6) "common expenses" means expenditures made or liabilities incurred by or on behalf of the association, together with any allocations to reserves;

(7) "condominium instruments" means all documents or instruments and amendments thereto creating the condominium project;

(8) "condominium project" means real estate which (i) has portions designated as units for separate ownership and the remaining portions designated for common ownership solely by the owners of those units, each owner having an undivided interest in the common elements, and (ii) is or has been offered for sale or sold, directly or indirectly, through use of any means or instruments of transportation or communication of interstate commerce, or the mails;

(9) "conversion condominium project" means a condominium project containing any building that was, at any time before the first conveyance of a unit to a purchaser, wholly or partially occupied by persons other than purchasers and persons who occupy with the consent of purchasers;

(10) "convey" or "conveyance" means (i) a transfer to a purchaser of legal title in a unit at settlement, other than as security for an obligation or, (ii) the acquisition by a purchaser of a leasehold interest for more than five years;

(11) "developer" means any person who offers to sell or sells his interest in a unit not previously conveyed. Developer also means any successor of such person who offers to sell or sells units in the condominium project and who assumes special developer rights in the project including the right to: add, convert or withdraw real estate from the condominium project; maintain sales offices, management offices and rental units; exercise easements through the common elements for the purpose of making improvements within the condominium; or exercise control of the owners association;

(12) "executive board" means the body, regardless of name, designated in the condominium instruments to act on behalf of the association;

(13) "ground lease" means a lease, in a leasehold condominium project, of the real estate on or in which one or more of the units are located, the termination or expiration of which will terminate the condominium project or reduce the number of units in the condominium project;

(14) "interstate commerce" means trade, traffic, transportation, communication, or exchange among the States, or between any foreign country and a State, or any transaction which affects such trade, traffic, transportation, communication or exchange;

(5) "lease" includes any agreement or arrangement containing a unit owner's obligation, individually or collectively, to make payments for a leasehold interest or for other rights to use or possess real estate, not including mortgages or other such agreements for the purchase of real estate;

(16) "leasehold condominium project" means a condominium project in which all or a portion of the real estate is subject to a lease, the termination or expiration of which will terminate the condominium project or reduce the size of the condominium project;

(17) "offer" means any advertisement, inducement, solicitation, or attempt to encourage any person to acquire any interest in a unit, other than as security for an obligation;

(18) "person" means a natural person, corporation, partnership, association, trust, or other entity, or any combination thereof;

(19) "purchaser" means any person, other than a developer, who by means of a voluntary transfer acquires a legal or equitable interest in a unit, other than (i) a leasehold interest (including renewal options) of less than five years, or (i) as security for an obligation;

(20) "real estate" means any leasehold or other estate or interest in, over, or under land, including structures, fixtures, and other improvements and interests which by custom, usage, or law pass with a conveyance of land though not described in the contract of sale or instrument of conveyance. "Real estate" includes parcels with or without upper or lower boundaries, and spaces that may be filled with air or water;

(21) "sale of a condominium unit" means any obligation or arrangement for consideration for conveyance to a purchaser of a condominium unit, excluding options or reservations not binding on the purchaser;

(22) "Secretary" means the Secretary of Housing and Urban Development;

(23) "special developer control" means any right, arising under State law, the condominium instruments, the association's bylaws, charter or articles of association or incorporation, or power of attorney or similar agreement, through which the developer may control or direct the unit owners association or its executive board. A developer's right to exercise the voting share allocated to any unit which he owns is not deemed a right of developer control if the voting share allocated to that unit is the same voting share as would be allocated to the same unit were that unit owned by any other unit owner at that time;

(24) "State" includes the several States, the District of Columbia, the Commonwealth of Puerto Rico, and the territories and possessions of the United States;

(25) "termination of developer control" means the date when the developer irrevocably relinquishes all rights of developer control or that date when all rights of developer control cease by operation of law or under the provisions of this Act;

(26) "unit" or "condominium unit" means a portion of the condominium project designated for separate ownership; and

(27) "unit owner" means (i) a developer who owns a unit, (ii) a person to whom ownership of a unit has been conveyed, or (iii) a lessee of a unit in a leasehold condominium project whose lease expires simultaneously with any lease the expiration or termination of which will remove the unit from the condominium project. Unit owner does not include a person having an interest in a unit solely as security for an obligation. If title to a unit is held in a land trust, "unit owner" means the beneficiary of the trust.

EXEMPTIONS

SEC. 202. (a) The provisions of this Act shall apply to all condominium projects and units except—

(1) a condominium unit sold or offered for sale by the Federal Government, by any State or local government, or any agency thereof; or

(2) a condominium project in which all units are restricted to nonresidential purposes or uses.

(b) The Secretary may by rules and regulations exempt any condominium projects or condominium units from any of the provisions of this Act, if and to the extent that the Secretary determines it to be necessary or appropriate in the public interest and consistent with the protection of consumers and the purposes intended by the policy and provisions of the Act.

PROHIBITIONS

SEC. 203. (a) It shall be unlawful for any developer or agent in selling or offering to sell any condominium unit in any condominium project—

(1) to employ any device, scheme, or artifice to defraud; or

(2) to obtain money or property by means of any untrue statement of a material fact or any omission to state a material fact necessary in order to make the statements made not misleading, or

(3) to engage in any transaction, practice, or course of business which operates or would operate as a fraud or deceit upon a purchaser.

(b) Any provisions in any lease or management agreement requiring unit owners or the owners association in any condominium project subject to this Act to reimburse, regardless of the outcome, the developer, his successor, or affiliate of the developer for attorneys' fees and/or money judgments, in a suit between unit owners or the owners association and the developer arising under the lease or agreement, are against public policy and void. It is the express intent of Congress that the provisions of this subsection shall apply to leases or agreements regardless of execution date.

COOLING-OFF PERIOD; RIGHTS OF PURCHASERS

SEC. 204. (a) Prior to conveyance of a condominium unit in a condominium project, the purchaser may elect to rescind any contract or agreement for the sale of the unit at any time during the period ending fifteen days after—

(1) the purchaser and developer have executed the contract, or

(2) the purchaser has been furnished with the written disclosure statement required under section 206,

whichever occurs later.

(b) A purchaser may exercise the right to rescind under this section by hand-delivering notice or by mailing notice by prepaid United States mail to the developer or his agent, and the developer or his agent shall refund to the purchaser fully and promptly, without penalty, any deposit or other payment made by the purchaser.

(c) If the purchaser has not received the written disclosure statement required by section 206 by the time of conveyance, the purchaser may not elect to rescind the sale pursuant to this section but shall have the right to receive from the developer an amount equal to 10 per centum of the purchase price of the unit.

(d) Nothing in this subsection shall prevent purchasers from asserting any rights they may have under section 211. The provisions of section 211(c) shall apply in suits seeking to recover damages in excess of the amount recoverable under section 204(c).

NATIONAL STANDARDS FOR CONSUMER PROTECTION

SEC. 205. (a) In a condominum project subject to this Act, a developer—

(1) shall place any deposit made by a purchaser in connection with the reservation or sale of a condominium unit, up to an aggregate of 15% of the purchase price, in trust or escrow in an account designated solely for that purpose, by a licensed title insurance company, an attorney, an independent bonded escrow company, or an institution whose accounts are insured by a governmental agency or instrumentality, until delivered to the developer either at settlement or upon forfeiture by the purchaser, or returned to or otherwise credited to the purchaser;

(2) shall be liable to the owners association or unit owners for all losses suffered by the association or unit owners as a result of a tort or breach of contract committed by the developer or an affiliate of the developer during any period prior to the terminaion of special developer control;

(3) shall establish a unit owners association not later than the time of conveyance of the first unit to a purchaser. The developer shall terminate any special developer control of the unit owners association not later than (i) sixty days after conveyance of 75 per centum of the units to purchasers, or (ii) five years after the date of the first conveyance of a unit to a purchaser, whichever occurs first. In any event, not later than sixty days after conveyance of 25 per centum of the units to purchasers, they shall be entitled to elect not less than 25 per centum of the members of the executive board of the unit owners association, and not later than sixty days after conveyance of 50 per centum of the units to purchasers, they shall be entitled to elect not less than 33⅓ per centum of the members of the executive board of the unit owners association. In determining the percentage of units which have been conveyed, the total number of units in the condominium project is presumed to include the units the developer has reserved the right to build in the recorded condominium instruments;

(4) shall pay all expenses of the unit owners association prior to the first common expense assessment and thereafter shall pay the common expenses for each unit that he owns;

(5) shall not convey to a purchaser an interest in a unit which may be used for residential purposes, unless (i) that unit is substantially completed as evidenced by a certificate of occupancy from a governmental entity or a recorded certificate of completion executed by a registered or licensed architect or engineer who is not an affiliate of the developer; or (ii) there is an executed construction contract for completion of the project and a performance bond of not less than 100 per centum of the cost of completing that project;

(6) shall display or deliver to prospective purchasers advertising and promotional material only if that material is not inconsistent with the information required to be disclosed under section 206;

(7) shall, other than in a conversion condominium project, warrant and guarantee against defects in the plumbing, electrical, mechanical, structural, or any other components constituting any of the units or common elements. The developer shall assure that subcontractors providing such components are also liable to fulfill the warranties and guarantees under the terms and conditions of this paragraph. Such warranties and guarantees shall exist on a unit for at least one year from the date of conveyance of that unit by a developer to a bona fide purchaser and on all of the common elements for at least three years from the date of completion of each common element or the date of conveyance of the first unit to a purchaser other than an affiliate of the developer, whichever is later. Such warranties and guarantees by the developer shall be separate from, and in addition to, any warranties or guarantees provided by any other person, or as otherwise provided by law;

(8) shall, in a conversion condominium project, warrant and guarantee against defects any repair, addition, or improvement which the developer or an affiliate of the developer makes to the plumbing, electrical, mechanical, structural, or any other components constituting any of the unit or common elements. The developer shall assure that subcontractors providing such components are also liable to fulfill the warranties and guarantees under the terms of this paragraph. Such warranties and guarantees shall exist on a unit for at least one year from the date of conveyance of that unit by a developer to a bona fide purchaser and on all of the common elements for at least three years from the date of completion of each common element or the date of conveyance of the first unit to a purchaser other than an affiliate of the developer, whichever is later. Such warranties and guarantees by the developer shall be separate from, and in addition to, any warranties or guarantees provided by any other person, or as otherwise provided by law;

(9) shall in the case of a conversion condominium project—

(i) give each of the tenants and any subtenant notice of the conversion no later than one hundred and twenty days before the developer will require the tenants and any subtenant in possession to vacate. The notice shall set forth generally the rights of tenants and subtenants under this paragraph, and shall be hand delivered to the unit or mailed by prepaid United States mail to the tenant and subtenant at the address of the unit or any other mailing address provided by a tenant. No tenant or subtenant may be required by the developer to vacate upon less than one hundred and twenty days' notice, except by reason of nonpayment of rent, waste, or conduct which disturbs other tenants' peaceful enjoyment of the premises, and the terms of the tenancy may not be altered during that period. Failure of a developer to give notice as required by this paragraph constitutes a defense to an action for possession. Nothing in this paragraph permits termination of a lease by a developer in violation of its terms;

(ii) for sixty days after delivery or mailing of the notice described in (i) of this paragraph, offer to convey each unit or proposed unit occupied for residential use to the tenant who leases that unit. If a tenant fails to purchase the unit during that sixty-day period, the developer may not offer to convey an interest in that unit during the following one hundred and eighty days at a price or on terms more favorable to the offeree than the price or terms offered to the tenant. This clause does not apply to any unit in a conversion condominium project if that unit will be restricted exclusively to nonresidential use or if the boundaries of the converted unit do not substantially conform to the dimensions of the residential unit before conversion;

(10) shall make books and records of the association reasonably available for inspection and copying during the period of his control to unit owners and their authorized representatives, and so long as the units are being offered for sale by the developer, make available for such persons changes in disclosures previously made to purchasers; and

(11) shall not enter into contracts or leases with himself or any affiliate of the developer or enter into any management contract, employment contract, or lease of recreational facilities or parking areas on behalf of the unit owners association, unless those contracts or leases may be terminated by the owners association at any time after the termination of developer control, without penalty, upon not less than ninety days notice to the other party. This paragraph does not apply to any ground lease unless the real estate subject to that lease was submitted to the condominium for the purpose of avoiding the right of the association to terminate a lease under this paragraph.

(b) This section shall not apply to a condominium project in which the developer has conveyed, in an arms-length transaction, at least one unit to a purchaser other than an affiliate of the developer prior to the effective date of this section.

NATIONAL STANDARDS FOR DISCLOSURE

SEC. 206. (a) Not later than the time of sale, a developer of a condominium project shall provide to each purchaser of a condominium unit the following written information—

(1) the name and principal address of the developer, and of the condominium project;

(2) a brief narrative description of the condominium project, including, without limitation, (i) a precise statement of the nature of the interest which is being offered, (ii) the types and number of units presently planned to be built, and (iii) the total number of units that may be included in the condominium project by reason of action of the developer, such as by future expansion or withdrawal of real estate, and the expected effects which such future action would have on the purchaser's interest, and (iv) the nature and extent of any recreational facilities the developer has built or is obligated to build, and (v) a statement as to whether, and under what conditions, persons other than unit owners in the condominium project are entitled to use such facilities;

(3) a statement of the number of units the developer intends (i) to rent or (ii) to sell in blocks of units to persons who do not intend to occupy the units on a year-round basis;

(4) a statement disclosing whether any units or common elements in the condominium project may be used for commercial or industrial purposes, the nature and extent of such uses, and the effect of such uses, if any, on the condominium unit owners;

(5) the developer's schedule for start and completion of all buildings, units, recreation facilities, and other common elements, together with a statement of which portions of the condominium project he is obligated to build under the recorded documents and which portions need not be built;

(6) (i) copies and a brief narrative description of the significant features of the sales contract, the condominium instruments, the bylaws, rules, and regulations, and amendments thereof, (ii) copies of any contracts and leases to be signed by purchasers, (iii) a brief narrative description of any contracts that are subject to section 205(a)(11), and (iv) a statement disclosing whether or not the developer or an affiliate of the developer has an interest in such contracts or leases, and disclosing the extent of such interest, if any;

(7) the expected significant terms of any financing the purchaser is required to use by the developer, including the name of the lender, estimated interest rate, minimum downpayment, and commissions, if any, the developer may receive for arranging the financing;

(8) the terms of warranties, if any, provided by the developer and subcontractors under section 205;

(9) the annual association balance sheet, if any, and a projected budget for the association covering the period of one year from the date the first unit is conveyed to a purchaser, and thereafter the current budget of the association, a statement of who prepared the budget, and a statement of the budget's assumption concerning occupancy and infla-

tion factors. The budget shall include, without limitation: (i) a statement of the amount, or a statement that there is no amount, included in the budget as a reserve for repairs and replacement, the items to be covered by the reserves and a statement of the basis for and the adequacy of the amount of the reserve, if any, (ii) a statement of any other reserves, (iii) the projected common expenses by category of expenditures for the association, (iv) the projected monthly common expense assessment for each type of unit and the formula for determining each unit's share of common expenses, (v) the projected income from common expense assessments and a statement identifying any other sources of income, and (vi) any current or expected fees or charges to be paid by unit owners for the use of the common elements and other facilities related to the condominium project;

(10) a statement disclosing any services provided by the developer which are not reflected in the budget, or any expenses he pays which he expects may become, at any subsequent time, a common expense of the association, and the amount of the additional cost which would be assessed at that time for each type of unit;

(11) a statement disclosing what utilities, insurance and taxes shall be paid for by the association and an estimate of the costs of utilities, insurance, and taxes to be borne by the unit owners individually;

(12) the amount of any initial or special fee due from the purchaser at closing, together with a description of the method of calculating the fee, the purpose to which the moneys will be put, the limitations, if any, on the use of the funds, and whether or not the fee is refundable upon sale of the unit by the purchaser;

(13) a description of any leins, defects, or encumbrances on or affecting the title to all or part of the condominium project;

(14) a statement of any judgments against the association or against the developer materially affecting the condominium project and the status of any pending suits material to the condominium project of which a developer has actual knowledge or to which the association or developer is a party;

(15) a statement of all restrictions or limitations on the use, occupancy, sale, or rental of any condominium unit;

(16) a statement of the purchaser's right under section 204 of this Act;

(17) a statement that any deposit made by a purchaser in connection with the sale of any unit will be held in trust or escrow until delivered to the developer either at settlement or upon forfeiture by the purchaser, or returned or otherwise credited to the purchaser. The statement shall also contain the name and address of the trustee or escrow agent holding such escrow; and

(18) a statement of all unusual and material circumstances, features, and characteristics of the condominium project.

(b) In the case of a conversion condominium project, the developer shall provide the following information in addition to the information required in subsection (a) of this section—

(1) a report, or a statement by the developer based on such report, prepared by an independent licensed architect or engineer, describing the present condition of all structural components and mechanical and utility installations which are material to the use and enjoyment of the condominium project;

(2) a statement by the developer of the expected useful life of each item reported on in paragraph (1) or a statement that no representations are made in this regard, and a statement of which items reported on in paragraph (1) are not covered by warranties disclosed under subsection 206(a)(8); and

(3) a list of any outstanding notices of uncured violations of building codes or other municipal regulations, together with the estimated cost of curing those violations.

(c) In the case of a leasehold condominium project, the developer shall provide the following information in addition to that required in subsections (a) and, if applicable, (b) of this section—

(1) a brief narrative description of the terms and significant features of the lease including, but not limited to (i) the amount of annual rent, (ii) the method of payment, (iii) the provisions pertaining to increases in rent, (iv) the date and place of recordation of the least, (v) the expiration date, and (vi) the real estate subject to the lease;

(2) a statement describing any rights of unit owners to redeem or renew the lease and to remove any improvements, the manner whereby such rights may be exercised or a statement that they do not have those rights;

(3) the formula for determining allocation of ownership interests, voting rights, and common expense liability upon termination of the lease; and

(4) a statement describing any right of the lessor to terminate the leasehold interest prior to the expiration of the lease.

(d) The developer, prior to conveyance, shall disclose to all purchasers any material change in the information previously furnished as required by this section.

(e) All information required by this section shall be in writing and fully, accurately, and simply stated.

(f) If a condominium project is composed of not more than twelve units and no power is reserved to a developer to make the condominium project part of a larger condominium project, group of condominium projects, or other real estate, the disclosures need not include the disclosures otherwise required by paragraphs (2)(ii)(iii), (3), (4), (5), (11), (12), (13), and (14) of subsection (a) of this section.

(g) This section shall not apply to a condominium unit restricted to commercial or industrial purposes.

(h) This section shall not apply to the sale of a unit in a condominium project in which the developer has conveyed, in an arms length transaction, one or more units to a purchaser other than an affiliate of the developer prior to the effective date of this section.

(i) If a condominium project is currently registered with the Securities and Exchange Commission of the United States, delivery to a purchaser of a copy of the prospectus files with the Securities and Exchange Commission, under the provisions of the Securities Act of 1933, satisfies the disclosure requirements of section 206 of this Act.

STATE CONDOMINIUM JURISDICTION

SEC. 207. (a) Nothing in this Act may be construed to prevent or limit the authority of any State or local government to enact and enforce any law, ordinance, or code with regard to any condominium project or condominium unit not in conflict with this Act. It is the intent of Congress to encourage the assumption and exercise by States of the authority and responsibility for the protection of condominium purchasers and owners.

(b) The Secretary, in the Secretary's discretion, may certify that standards and disclosure requirements in a State's laws applicable to condominium units or projects, taken as a whole, provide substantially equivalent or greater consumer protection than the national standards. Upon such certification the standards under the State's laws will apply for the purposes of this Act in lieu of the standards in sections 205 and 206. The Secretary may, in the Secretary's discretion, withdraw certification upon determination that a State's laws do not meet the requirements for certification.

INVESTIGATIONS, AND PERSECUTION OF OFFENSES

SEC. 208. (a) Whenever it shall appear to the Secretary that any person is engaged or about to engage in any acts or practices which constitute or will constitute a violation of the provisions of this Act, or of any rule or regulation prescribed pursuant thereto, the Secretary may, in the Secretary's discretion, transmit such evidence as may be available concerning such acts and practices to the Attorney General who shall bring an action in any district court of the United States, or the United States District Court for the District of Columbia to enjoin such acts or practices, and, upon a proper showing, a permanent or temporary injunction or restraining order shall be granted pursuant to this section, without bond. The Secretary also may transmit such evidence as may be available concerning such acts or practices to the Attorney General who may institute the appropriate criminal proceedings under this Act.

(b) The Secretary may make investigations as the Secretary deems necessary to determine whether any person has violated or is about to violate any provision of this Act or any rule or regulation prescribed pursuant thereto, and may require or permit any person to file a statement in writing, under oath or otherwise as the Secretary shall determine, as to all the facts and circumstances concerning the matter to be investigated. The Secretary is authorized to publish information concerning any such violations, and to investigate any facts, conditions, practices, or matters which the Secretary may deem necessary or proper to aid in the enforcing of the provisions of this Act, in the prescribing of rules and regulations thereunder, or in securing information to serve as a basis for recommending further legislation concerning the matters to which the Act relates.

(c) For the purpose of any such investigation, or any other proceeding under this Act, the Secretary or any officer designated by the Secretary is empowered to administer oaths and affirmations, subpena witnesses and compel their attendance, take evidence, and require the production of any books, papers, correspondence, memorandums, or other records which the Secretary deems relevant or material to the inquiry. Such attendance of witnesses and the production of any such records shall be required from any place in the United States or any State at any designated place of hearing.

(d) In case of contumacy by, or refusal to obey a subpena issued to, any person, the Secretary may, in the Secretary's discretion, transmit evidence of such act or practice to the Attorney General who shall bring an action to invoke the aid of any court of the United States within the jurisdiction of which such investigation or proceeding is carried on, or where such person resides or carries on business, in requiring the attendance and testimony of witnesses and the production of books, papers, correspondence, memoranda, and other records and documents. And such court shall issue an order requiring such person to appear before the Secretary or any officer designated by the Secretary, there to produce such records and documents if so ordered, or to give testimony touching the matter under investigation or in question; and any failure to obey such order of the court shall be punished by such court as a contempt thereof. All process in any such case may be served in the judicial district whereof such person is an inhabitant or wherever he may be found.

OPERATIONAL TERMINATION OF SELF-DEALING CONTRACTS

SEC. 209. (a) Any contract that—

(1) provides for operation, maintenance, or management of a unit owners association or property serving the unit owners; and

(2) is between unit owners or the unit owners association and the developer on an affiliate of the developer; and

(3) was entered into while the owners association is controlled by the developer

through special developer control or because the developer holds a majority of the votes in the owners association; and

(4) is for a period of more than two years may be terminated without penalty by the unit owners or owners association.

(b) The termination may occur at any time following termination of developer control of the unit owners.

(c) The termination shall be by a vote of owners of not less than two-thirds of the units other than the units owned by the developer or an affiliate of the developer.

(d) Following the unit owners' vote, the termination shall be effective ninety days after hand-delivering notice or mailing notice by prepaid United States mail to the parties to the contract.

(e) It is the express intent of Congress that the provisions of this section shall apply to contracts regardless of execution date.

CIVIL ACTIONS; UNCONSCIONABLE LEASES

SEC. 210. (a) Unit owners may bring an action seeking a judicial determination that a lease or leases, or portions thereof, are unconscionable if each lease has all of the following characteristics:

(1) it was made in connection with a condominium project; and

(2) it was entered into while the owners association is controlled by the developer through special developer control or because the developer holds a majority of the votes in the owners association; and

(3) it had to be accepted or ratified by purchasers or through the unit owners association as a condition of purchase of a unit in the condominium project.

Such suit must be authorized by the unit owners through a vote of the owners of not less than two-thirds of the units other than units owned by the developer, or an affiliate of the developer, and may be brought by the unit owners as a group or through the unit owners association.

(b) In making its determination of unconscionability, the court shall consider, but not be limited to—

(1) any gross disparity between the obligation incurred and the value of the benefit derived by the lessees, including consideration of (i) the obligations to pay rent, taxes, and insurance, and to maintain, repair, and replace the property, (ii) the value of the leased property, (iii) the price at which comparable property could have been acquired, and (iv) the lessor's rate of return on investment in the leased property and the condominium development as a whole;

(2) the unequal bargaining position of the parties to the lease;

(3) the adequacy of disclosure of the existence and terms of the lease to purchasers and the ability of purchasers to comprehend their rights and obligations thereunder;

(4) the identity of interest, if any, of original parties to the lease; and

(5) subsequent ratification of amendment to the lease agreed to by a majority of the unit owners other than the developer or an affiliate of the developer.

(c) If it is established that, in addition to the characteristics of subsection (a) of this section, the lease—

(1) is for a period of more than twenty-one years or is for a period of less than twenty-one years but contains automatic renewal provisions for a period of more than twenty-one years; and

(2) contains an automatic rent increase clause or creates a lien subjecting any unit to foreclosure for failure to make payments; and

(3) contains provisions requiring the lessees to assume all of substantially all obligations and liabilities associated with maintenance and use of the leased property; then the court, in making its finding, shall consider the lease to be unconscionable, unless proven otherwise by clear and convincing evidence under the standards in subsection (b).

(d) Upon finding that any lease, or portion thereof, is unconscionable, the court may exercise its authority to grant remedial relief as necessary to avoid an unconscionable result. Such relief may include, but shall not be limited to, rescission, reformation, restitution, the award of damages and reasonable attorney fees and court costs.

(e) The remedies provided by this section are to be liberally administered to the end that the aggrieved parties are put in as good a position as if the bargaining and terms had been fair.

(f) Notwithstanding the provisions of subsections (a) thorugh (e) of this section, exercise of any automatic rent increase clause shall be unenforceable, against unit owners or the owners association, as to future increases in rental payments occurring after the effective date of this Act in a lease having all of the following characteristics:

(1) it contains provisions requiring the lessees to assume all or substantially all obligations and liabilities associated with maintenance and use of the leased property; and

(2) it was entered into while the owners association is controlled by the developer through special developer control or because the developer holds a majority of votes in the owners association; and

(3) it had to be accepted or ratified by purchasers or through the unit owners association as a condition of purchase of a unit in the condominium project.

(g) It is the express intent of Congress that the provisions of this section shall apply to leases regardless of execution date, except that subsections (c) and (f) shall not apply to—

(1) ground leases entered into prior to the enactment of this Act; or

(2) any ground lease which the lessor has entered into in an arms-length transaction with the developer, without there being an identity of interest between the lessor and the developer. Such identity of interest between the lessor and the developer. Such identity of interest includes, but is not limited to, situations where the lessor is the developer, an agent of the developer, an affiliate of the developer, or is a member of the immediate family of the developer or affiliate of the developer.

CIVIL ACTIONS; ADDITIONAL REMEDIES

SEC. 211. (a) A developer, or agent or successor thereto subject to this Act, may be sued at law or in equity by any person aggrieved by a violation of this Act.

(b) In any suit authorized by this section for violation of sections 203, 205, or 206, damages may be awarded or such other relief granted as deemed fair, just, and equitable. The court in awarding relief shall consider, but not be limited to, the contract price of the unit, the amount paid by the purchaser on the contract, the cost of any improvements or necessary repairs paid by the purchaser, the fair market value of the unit at the time of sale to the purchaser, the fair market value of the unit at the time the suit was brought, and the fair market value of the unit at the time of judgment.

(c) In any suit brought by purchasers alleging misrepresentations or omissions of disclosure requirements in violation of sections 203(a) or 206, the plaintiff must prove that the misrepresentations or omission were material and that the defendant acted intentionally or negligently.

(d) Unless otherwise specified, suits authorized under this Act may be brought by one or more purchasers on behalf of all purchasers in a condominium project or by the owners' association in its own right or as representing all or part of the members of such association. In a class action under this Act brought by one or more unit owners as representative of other unit owners in a condominium project, the complaint shall be verified and shall allege with particularity the efforts the plaintiff has made to have the owners association bring such action on behalf of all unit owners. The class action may not be maintained if plaintiff has failed to notify the officers of the association of the intention to file the suit, or if such owners association is seeking in a pending suit to enforce the rights alleged in the plaintiff's suit.

(e) Every person who becomes liable to make any payment under this section may recover contributions from any person who, if sued separately, would have been liable to make the same payment.

(f) The amounts recoverable under this section may include interest paid, reasonable attorneys' fees, independent engineer and appraisers' fees, and court costs.

CRIMINAL PENALTIES

SEC. 212. Any person who willfully violates section 203(a), 205, or 206 of this Act shall upon conviction be fined not more than $10,000 or imprisoned not more than five years, or both.

JURISDICTION

SEC. 213. The district courts of the United States, the United States courts of any territory, and the United States District Court for the District of Columbia shall have jurisdiction of offenses and violations under this Act and under the rules and regulations prescribed by the Secretary pursuant thereto and concurrent with State courts, of suits in equity and actions at law brought to enforce a liability or duty created by this Act without regard to amount in controversy. Any such suit or action may be brought in the district wherein the defendant is found or is an inhabitant or transacts business, or in the district where the offer or sale took place and process in such cases may be served in other districts of which the defendant is an inhabitant or whenever the defendant may be found. Suits by purchasers to enforce their rights under section 205 or 206 regarding condominium projects located in States certified pursuant to section 207(b) shall be brought in State court. No case arising under this Act and brought in any State court of competent jurisdiction shall be removed to any court of the United States, except where any officer or employee of the United States in his official capacity is a party. No costs shall be assessed for or against the Secretary in any proceeding under this Act brought by or against the Secretary in the Supreme Court or such other courts.

LIMITATIONS OF ACTIONS

SEC. 214. No action shall be maintained to enforce any right or liability provided in sections 210 and 211 unless brought within six years after such cause of action accrued except that an action pursuant to section 210 involving a lease in existence at the time of enactment of this Act must be brought within three years of enactment of this Act.

ADMINISTRATION

SEC. 215. (a) The authority and responsibility for administering this Act shall be in the Secretary of Housing and Urban Development who may delegate any functions, duties, and powers to employees of the Department of Housing and Urban Development.

(b) The Secretary shall have authority, from time to time, to make, issue, amend, and rescind such rules and regulations and such orders as are necessary or appropriate to carry out the purposes of this Act. For the purpose of rules and regulations, the Secretary may classify persons and matters within the Secretary's jurisdiction and prescribe different requirements for different classes of persons or matters. In the development of these rules and regulations the Secretary shall consult with representatives of the building industry, with appropriate public officials and organizations of public officials, with representatives of the lending com-

munity and with representatives of consumer groups.

(c) Any person who violates any provisions of this Act or any rule, regulation, or order issued by the Secretary thereunder may be subjected to a civil penalty, in a determination by the Secretary after opportunity for a hearing, not to exceed $5,000 for each violation. Each separate offense shall be a violation and, in the case of a continuing offense, each day shall constitute a separate violation. The determination of the Secretary shall be subject to review only as provided in subsection (d) below.

(1) Penalties assessed pursuant to this section may be collected in an action brought by the Attorney General or, if the Attorney General directs, by the Secretary in any district court of the United States. In such action the validity and appropriateness of the final determination imposing the penalty shall not be subject to review.

(2) The amount of such penalty, when finally determined shall be payable to the United States Treasury.

(d) All hearings pursuant to subsection (c) of this section shall be public and any determination after such hearing shall be based on the record made at such hearing which shall be conducted in accordance with the provisions of the Administrative Procedures Act. A person aggrieved by a final determination of the Secretary under subsection (c) of this section may request a judicial review thereof in the United States court of appeals nearest where the person does business or United States Court of Appeals for the District of Columbia within twenty days after the Secretary's determination. Technical review of the Secretary's determination shall be in accordance with section 706 of title 5, United States Code.

CONTRARY STIPULATIONS VOID

SEC. 216. Any condition, stipulation, or provision binding any person to waive compliance with any provisions of this Act or of the rules and regulations of the Secretary shall be void.

REPORT TO CONGRESS

SEC. 217. The Secretary shall prepare and submit to Congress, a comprehensive report on the administration of this Act and the progress of States in providing consumer protection for condominium purchasers. The report shall be due thirty months after the enactment of this Act.

CONSUMER RESEARCH, EDUCATION, AND INFORMATION

SEC. 218. The Secretary is authorized, by contract or otherwise, to undertake research, education, information, and technical assistance activities designed to inform, assist, and protect consumers in the purchase of condominium units and management of condominium projects.

ADDITIONAL REMEDIES

SEC. 219. The rights and remedies provided by this Act shall be in addition to any and all other rights and remedies that may exist under Federal or State law.

APPLICABILITY OF OTHER PROVISIONS OF LAW

SEC. 220. (a) Compliance with the requirements imposed by or under this Act by a developer of a condominium project, not exempt under section 202, in which the units are in a building or buildings that are constructed or proposed to be constructed by the developer, shall be deemed to satisfy the requirements now or hereafter imposed under the Interstate Land Sales Full Disclosure Act with respect to a sale of or an offer to sell a condominium unit in a condominium project.

(b) Nothing in this Act shall affect the applicability of the Securities Act of 1933 and the Securities and Exchange Act of 1934.

(c) The provisions of the Magnuson-Moss Warranty—Federal Trade Commission Improvement Act (15 U.S.C. 2301 et seq.) shall be applicable in addition to warranty provisions of this Act, notwithstanding section 111(d) of that Act (15 U.S.C. 2311(d)).

AUTHORIZATION OF APPROPRIATIONS

SEC. 221. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

SEPARABILITY

SEC. 222. If any provisions of this Act or the application thereof to any person or circumstance is held invalid, neither the remainder of this Act nor the application of such provision to other persons or circumstances shall be affected thereby.

EFFECTIVE DATE

SEC. 223. This Act shall become effective upon enactment, except sections 205, 206, 208–210, 212, 213, and 220(a) shall become effective one year after enactment.

NUCLEAR ENERGY PRODUCTION

(Mr. PRICE asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. PRICE. Mr. Speaker, for the benefit of my colleagues, I would like to include at the close of my remarks some factual data concerning the actual delivery of nuclear energy this past severe winter. This data, which was assembled by the Edison Electric Institute, was published in the Thursday, April 27 Washington Post.

It is indeed fortunate for this nation that leaders in Government and industry foresaw the need for this supplementary energy source and did what was necessary to develop it. The effort to bring this new energy source into being involved a highly organized effort with specific objectives and schedule goals. In other words, the availability of this first new energy source which has the potential of powering a nation did not just happen. It was planned this way.

Unfortunately, the rate of addition of nuclear energy is not proceeding at the optimum rate. We must try harder to expedite the addition of nuclear power.

[Advertisement from the Washington Post, Apr. 27, 1978]

WITHOUT NUCLEAR ENERGY, LAST WINTER WOULD HAVE BEEN WORSE

Nuclear power plants provided electricity for 30 million Americans this past January, at a time when much of the country was suffering from another severe winter. Electric power was jeopardized in several areas not only by the cold, which froze coal supplies, but also by the extended miners' strike. Unaffected by either the strike or the ravages of winter, nuclear plants made the difference.

SAVED 13 MILLION TONS OF COAL

If you lived in Vermont this January, you received one third of your electricity from nuclear energy. In Chicago, 44 percent. In Omaha, more than half. In Philadelphia, 27 percent. In Raleigh, 39 percent. In New York, 23 percent. In Minneapolis, 40 percent. In Sacramento, 85 percent. In Pittsburgh, 22 percent. In Cedar Rapids, 53 percent. In Newark, 26 percent. In Milwaukee, 43 percent. In Charlotte, 27 percent. In Little Rock, 37 percent. Altogether, U.S. nuclear power plants generated a total of 27 billion kilowatt-hours—or 14 percent of our national electric supply for the month—saving 13 million tons of coal.

Besides providing for their own customers, utilities with nuclear energy were able to sell their reserve power to neighboring systems without nuclear plants, thus helping meet electricity needs nationwide. As a bonus, nuclear electricity is also cheaper than other sources in most areas and saved consumers a considerable amount of money in the bargain.

The cost of electricity from nuclear plants is the lowest of all major fuel sources used in generating electric energy.

THE THIRD CRISIS

This winter turned out to be the second consecutive year to dramatize the importance of having a diversified energy base that includes nuclear energy. Last winter, millions of Americans temporarily lost their jobs because of the unavailability of natural gas; electric power, including nuclear, was pressed into the gap. In 1973, the oil crisis underscored the need for additional energy supplies that are not controlled by foreign sources.

WHEN WILL WE LEARN?

Today, though—five years after the oil crisis—the nation is still not aggressively developing the new electric power sources that are vital to our economy and our way of life. Nuclear energy, which, along with coal, represents the most abundant fuel available for large-scale electric power plants, is not being fully developed because of governmental indecision and uncertainties in the licensing process. A nuclear plant begun today may not provide any power for more than a dozen winters, because of the drawn-out licensing system.

ON WITH THE JOB

The need for nuclear energy is obvious. It is saving priceless oil, coal and money every day. Its safety has been demonstrated in more than 25 years of operation around the world. The public's strong support has been proved in opinion polls and state-wide votes.

Nuclear energy stands ready to help meet the pressing energy needs of tomorrow—providing power for the homes and the jobs of today's children—just as it helped us through the past two winters. Isn't it time we stopped the delays and got on with what is, after all, an available energy solution?

Then we can expect more good news for many more winters and summers ahead.

UNAVOIDABLY ABSENT

(Mr. KASTEN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. KASTEN. Mr. Speaker, due to previous commitments in Wisconsin, I missed some recent rollcall votes. I wish to state for the record, therefore, my position on those votes.

"Yea" on House Resolution 1143, the rule to consider the NASA Authorization Act for fiscal year 1979;

"Yea" on the Madigan amendment to the Agricultural Credit Act;

"Yea" on final passage of the Agricultural Credit Act; and

"Nay" on the amendment offered by Congressman ERTEL to H.R. 9400, Civil Rights of Institutionalized Persons Act.

ARMY MAKES COMMONSENSE MOVE ON EXCESS RIFLES

(Mr. SIKES asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SIKES. Mr. Speaker, I have commented, on a number of occasions, on wasteful and unnecessary destruction of

Army weapons, particularly rifles which are no longer required for military purposes. It has been the policy to sell them for scrap, notwithstanding the fact that a rifle which is not considered serviceable by Army standards may have much useful life after replacement of parts and after adjustments.

This matter was brought to a head after the Defense Logistics Agency offered for sale and demilitarization approximately 290,000 M–1 Army rifles. Inquiry revealed that other lots were also in the process of being offered for bids from prospective buyers. Returns to the Government would only be a small percentage of the going price for such weapons. Immediate protests were made by organizations, sportsmen, private citizens and Members of Congress. The chairman of the Investigations Subcommittee of the Armed Services Committee, Hon. SAMUEL STRATTON, took the lead in seeking a more equitable means of disposing of these weapons.

I am very glad to report that the Department of the Army under the direction of Secretary Clifford L. Alexander is in the process of developing a much more realistic policy to deal with this subject. Recommendations have been adopted by the National Board for the Promotion of Rifle Practice, the agency directly responsible for needed changes. A long-range study, possibly implemented by new acts of Congress, hopefully will bring about an end to wasteful policy heretofore in effect. A statement providing information to Members of Congress covering recommendations of the National Board for the Promotion of Rifle Practice is submitted for reprinting in the CONGRESSIONAL RECORD.

DEPARTMENT OF THE ARMY,
Washington, D.C., May 1, 1978.

Re: Information for Members of Congress:

DESTRUCTION OF EXCESS M–1 RIFLES

The National Board for the Promotion of Rifle Practice (NBPRP) met on 28 April 1978 to consider recommendations concerning the Civilian Marksmanship Program. The NBPRP, an advisory board chaired by the Under Secretary of the Army, reviews and recommends policy to the Secretary of the Army who is charged with the conduct of the Civilian Marksmanship Program.

As the result of an announcement made several months ago that surplus M–1 rifles were being offered by the Defense Logistics Agency for destruction, the Board and the Army asked that the decision to destroy the rifles be postponed pending reexamination of the situation by the Board and the Secretary of the Army. At the 28 April 1978 Board meeting, the NBPRP made recommendations which, if adopted, would effect important but minor modifications to the ongoing program. They would not substantially expand or curtail the present Board program.

The Board made several recommendations with the most notable being that the Army retain its inventory of M–1 rifles and M–1 carbines pending detailed resolution of Department of Defense (DOD) and Director of Civilian Marksmanship (DCM) long term needs for the firearms, that the rifle sales program continue at the current rate, and that the restrictive requirements for purchase continue to include demonstration of serious intent to participate in high power competition. The following is an expansion of the recommendations adopted by the NBPRP to be forwarded to the Secretary of the Army for his consideration:

1. The current Army inventory of M–1 rifles and M–1 carbines be retained pending final determination of DOD and DCM needs.

2. The current inventory of .22 caliber target rifles not be destroyed or sold since they can be used in the DCM club loan program.

3. M–1 carbines be neither loaned or sold at this time.

4. Current eligibility criteria to purchase an M–1 rifle be modified to include participants in the high power marksmanship training program.

5. Continue M–1 rifle sales at the current level.

6. Retain antique and commercial nonstandard firearms in excess to Army needs for use by the NBPRP. Antique firearms in excess to NBPRP needs would be preserved by the Chief of Army Military History.

The NBPRP recommendations were adopted after full consideration of the wide range of views expressed by other governmental agencies. The Secretary of the Army will consider the NBPRP recommendations prior to making his decision.

GARFIELD ALTON ROSBOROUGH

(Mr. HALL asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. HALL. Mr. Speaker, Garfield Alton Rosborough, born to the union of Charles and Rella Rosborough, succumbed on Sunday, April 23, 1978, at Memorial Hospital, Marshall, Tex. Mr. Rosborough retired from his position as principal of H. B. Pemberton High School in July 1972 after 48 years with the Marshall Independent School System. He was a graduate of Central High School and held a B.A. degree from Wiley College and a M.A. degree from the University of Colorado. Of his 48 years in the field of education, 16 years were spent as a classroom teacher; 4 years as an assistant principal; and 28 years in administration. He has served as president of the City Teacher Circle, East Texas Teachers Association, a member of the Committee on Democracy in Education, chairman of the Harrison County Health Unit for 16 years. At the time of his death, he was active in community development, a member of the directors of the Friends of a Public Library, Marshall Chamber of Commerce, street improvement in Precinct 3, was serving his second term in place 5 on the Marshall Independent School District Board, a charter member of Nu Iota Chapter of Omega Psi Phi Fraternity and has been chairman of the Deacon Board of the Bethesda Baptist Church for over 30 years.

He is survived by his loving devoted wife, Beatrice Conner Rosborough; five sisters, Mrs. J. T. Braxton, Mrs. Lewis W. Roach, and Mrs. Delores Washington, all of Tulsa, Okla., Mrs. Thelma Durkie, San Francisco, Calif., and Mrs. Ruth Jackson of Marshall; four nieces, Gwendolyn C. Brantley, Dannette Washington, Lillian Adams, and Rella Rosborough; four nephews, Robert Jackson, Lewis W. Roach, Cardell Smith and Webster Rosborough, Jr., and a host of other relatives and friends.

I had the pleasure of knowing Professor Rosborough for over 25 years. I served with him as a member of the school board of the Marshall Independent School District. I knew him as an educator and as a true friend to all mankind. Professor Rosborough will be sorely missed, not only in Marshall, Tex., but the entire State of Texas and Nation. He was truly a great man.●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. RISENHOOVER (at the request of Mr. WRIGHT), for today on account of official business.

Mr. RODINO (at the request of Mr. WRIGHT), for today, on account of illness in the family.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. GARY A. MYERS), to include extraneous matter:)

Mr. JEFFORDS, for 1 hour today.
Mr. CONABLE, for 10 minutes today.
Mr. MICHEL, for 15 minutes today.
Mr. EMERY, for 5 minutes.
Mr. DON H. CLAUSEN, for 10 minutes today.
Mr. DON H. CLAUSEN, for 10 minutes on May 3, 1978.

(The following Members (at the request of Mr. VOLKMER) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.
Mr. GONZALEZ, for 5 minutes, today.
Mr. CONYERS, for 5 minutes, today.
Mrs. BURKE of California, for 5 minutes, today.
Mr. PEPPER, for 20 minutes, today.
Mr. DUNCAN of Oregon, for 10 minutes, today.
Mr. DODD, for 5 minutes, today.
Mr. VANIK, for 5 minutes, today.
Mr. THOMPSON, for 5 minutes, today.
Mr. BINGHAM, for 10 minutes, today.
Mr. DRINAN, for 5 minutes, today.
Mr. MATTOX, for 5 minutes, today.
Mr. SIKES, for 30 minutes, May 3, 1978.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. LEHMAN, and to include extraneous matter notwithstanding the fact, that it exceeds two pages of the CONGRESSIONAL RECORD and is estimated by the Public Printer to cost $1,724.63.

(The following Members (at the request of Mr. GARY A. MYERS) and to include extraneous matter:)

Mr. ANDERSON of Illinois in two instances.
Mr. MARRIOTT.
Mr. GREEN.
Mr. WALSH.
Mr. HILLIS.
Mr. HAGEDORN.
Mr. BADHAM.
Mr. DERWINSKI in two instances.
Mr. CRANE in two instances.
Mr. BROWN of Ohio.
Mr. SYMMS.
Mr. CARTER.

Mr. GILMAN in two instances.
Mr. CONTE in six instances.
Mr. FINDLEY.
Mr. ASHBROOK in three instances.
Mrs. HECKLER.
(The following Members (at the request of Mr. VOLKMER) and to include extraneous matter:)
Mr. FASCELL.
Mr. ANDERSON of California in three instances.
Mr. GONZALEZ in three instances.
Ms. MIKULSKI.
Mr. MONTGOMERY.
Mr. STARK.
Mr. FRASER.
Mr. STUMP.
Mr. MCDONALD in four instances.
Mr. CARNEY.
Mr. RANGEL.
Mr. BRODHEAD.
Mr. NOLAN.
Mr. EDWARDS of California.
Mr. WAXMAN.
Mr. BONIOR.
Mr. MITCHELL of Maryland in four instances.
Mr. TEAGUE in two instances.
Mr. OTTINGER.
Mr. VANIK.
Mrs. CHISHOLM in two instances.
Mr. MILLER of California.
Mr. ROGERS in five instances.
Mr. BRADEMAS in 10 instances.
Mr. RICHMOND.
Mr. CONYERS.
Mr. FISHER.
Mr. BENJAMIN.
Mr. ROSENTHAL.
Mr. PEPPER.

SENATE ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

The SPEAKER announced his signature to enrolled bills and concurrent resolutions of the Senate of the following title:

S. 917. An act to provide for conveyance of certain lands adjacent to the Gund Ranch, Grass Valley, Nev., to the University of Nevada;

S. 958. An act for the relief of Ernesto F. Garcia, Jr.;

S. 2220. An act to authorize the Secretary of the Treasury to designate an Assistant Secretary to serve in his place as a member of the Library of Congress Trust Fund Board;

S.J. Res. 106. Joint resolution to provide for the reappointment of A. Leon Higgenbotham, Jr., as a citizen regent of the Board of Regents of the Smithsonian Institution;

S.J. Res. 107. Joint resolution to provide for the reappointment of John Paul Austin as a citizen regent of the Board of Regents of the Smithsonian Institution; and

S.J. Res. 108. Joint resolution to provide for the appointment of Anne Legendre Armstrong as citizen agent of the Board of Regents of the Smithsonian Institution.

ADJOURNMENT

Mr. VOLKMER. Madam Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 37 minutes p.m.), under its previous order, the House adjourned until tomorrow, Wednesday, May 3, 1978, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

4041. A communication from the President of the United States, transmitting proposed supplemental appropriations for fiscal year 1978, budget amendments for fiscal year 1979, and a request for advance appropriations for fiscal year 1980 (H. Doc. No. 95–331); to the Committee on Appropriations and ordered to be printed.

4042. A letter from the Administrator of General Services, transmitting a draft of proposed legislation to amend the Federal Property and Administrative Services Act of 1949, as amended, to permit recovery of the estimated replacement cost, in lieu of the original acquisition cost, of motor vehicles and related equipment used in the Interagency Motor Pool System; to the Committee on Government Operations.

4043. A letter from the Special Assistant for Management, Office of the Special Representative for Trade Negotiations, Executive Office of the President, transmitting a further report on the Office's activities under the Freedom of Information Act during calendar year 1977, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

4044. A letter from the Administrator, Agency for International Development, Department of State, transmitting a report covering calendar year 1977 on U.S.-aid-recipient countries which are in arrears in payments of dues, assessments and other obligations to the United Nations, pursuant to section 620(u) of the Foreign Assistance Act of 1961, as amended (81 Stat. 459); to the Committee on International Relations.

4045. A letter from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b; to the Committee on International Relations.

4046. A letter from the Chairman, Securities and Exchange Commission, transmitting a draft of proposed legislation to amend the Securities Act of 1933 and the Trust Indenture Act of 1939 to delete the existing exemption for certain industrial development bonds; to the Committee on Interstate and Foreign Commerce.

4047. A letter from the Assistant Attorney General (Civil Division), transmitting notice of the Justice Department's intention to discontinue its defense of the constitutionality of certain sections of the District of Columbia Code, which are being challenged in the case of *Paul Poe, et al.* v. *Joseph A. Califano, Jr.*, USDC DC, Civil Action No. 74–1800; jointly, to the Committees on the District of Columbia, and the Judiciary.

4048. A letter from the Secretary of Energy, transmitting a draft of proposed legislation to authorize the Secretary of Energy to enter into cooperative arrangements to contain and to reduce potential radiation exposure from residual radioactive materials, and for other purposes; jointly, to the Committees on Interior and Insular Affairs, and Interstate and Foreign Commerce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar as follows:

Mr. MAHON: Committee on Appropriations. House Joint Resolution 873. Joint resolution making an urgent supplemental appropriation for the disaster loan program of the Small Business Administration for the fiscal year ending September 30, 1978 (Rept. No. 95–1105). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. PHILLIP BURTON (for himself, Mr. DON H. CLAUSEN, Mr. DE LUGO, Mr. LAGOMARSINO, Mr. KETCHUM, and Mr. WON PAT):

H.R. 12481. A bill to authorize appropriations for certain insular areas of the United States, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. ANDERSON of California (for himself, Mr. DOWNEY, Mr. HEFTEL, Mr. RYAN, and Mr. ROYBAL):

H.R. 12482. A bill to regulate the trapping of mammals and birds on Federal lands, and for other purposes; jointly, to the Committees on Merchant Marine and Fisheries, Interstate and Foreign Commerce, and the Judiciary.

By Mr. BAFALIS:

H.R. 12483. A bill to amend title II of the Social Security Act to provide that a beneficiary who dies shall (if otherwise eligible) be entitled to a prorated benefit for the month in which that death occurs; to the Committee on Ways and Means.

By Mr. BRADEMAS (for himself, Mr. PHILLIP BURTON, Mr. BUCHANAN, Mr. WEISS, and Mr. CORRADA):

H.R. 12484. A bill to amend the Rehabilitation Act of 1973 to extend certain programs established in such act, to establish a community service employment program for handicapped individuals, to provide for independent living rehabilitation services for the severely handicapped, and for other purposes; to the Committee on Education and Labor.

By Mr. CARTER (by request):

H.R. 12485. A bill to amend the Federal Food, Drug and Cosmetic Act, as amended, to establish procedures and safeguards to assure that safe and effective drugs are available to the American people at the earliest possible time consistent with protection of the public health and welfare; to the Committee on Interstate and Foreign Commerce.

By Mr. DE LA GARZA (for himself, Mr. TRAXLER, Mr. ANDREWS of North Dakota, Mr. AKAKA, Mr. BAUCUS, Mr. BREAUX, Mr. HANSEN, Mr. HEFTEL, Mr. HUCKABY, Mr. JENRETTE, Mr. JOHNSON of Colorado, Mr. LEGGETT, Mr. LONG of Louisiana, Mr. MCCORMACK, Mr. MCFALL, Mr. MOORE, Mr. NOLAN, Mr. RONCALIO, Mr. SIKES, Mr. SISK, Mr. SMITH of Iowa, Mrs. SMITH of Nebraska, Mr. STANGELAND, Mr. WAGGONNER, and Mr. CORRADA):

H.R. 12486. A bill to implement the International Sugar Agreement between the United States and foreign countries; to protect the welfare of consumers of sugar and those engaged in the domestic sugar-producing industry; to promote the export trade of the United States; and for other purposes; jointly, to the Committees on Agriculture, and Ways and Means.

By Mr. EMERY:

H.R. 12487. A bill to amend title 32, United States Code with respect to accountability and responsibility for U.S. property issued to the National Guard; to the Committee on Armed Services.

By Mr. GAYDOS:

H.R. 12488. A bill to promote steel trade negotiations under the Trade Act of 1974; to the Committee on Ways and Means.

By Mr. HANNAFORD:

H.R. 12489. A bill to eliminate the reduction in social security benefits for spouses

and surviving spouses receiving certain Government pensions, as recently added to title II of the Social Security Act by section 334 of the Social Security Amendments of 1977; to the Committee on Ways and Means.

By Mr. KEMP:

H.R. 12490. A bill to suspend the duty on live worms, if a product of Canada, until the close of June 30, 1981; to the Committee on Ways and Means.

By Mr. KETCHUM (for himself, Mr. ARCHER, Mr. VANDER JAGT, Mr. STEIGER, Mr. FRENZEL, Mr. MARTIN, Mr. BAFALIS, Mr. SCHULZE, Mr. GRADISON, Mr. CONABLE, Mr. SEBELIUS, Mr. BADHAM, and Mr. GREEN):

H.R. 12491. A bill to amend the Social Security Act and the Internal Revenue Code of 1954, to strengthen the financing of the social security system, to provide for a gradual increase in retirement age, to improve the treatment of women through the establishment of a working spouse's benefits and to eliminate gender-based discrimination, to provide coverage under the system for Federal employees, to increase and ultimately repeal the earnings limitation, and for other purposes; to the Committee on Ways and Means.

By Mr. LEDERER:

H.R. 12492. A bill to carry out the obligations of the United States under the International Sugar Agreement, 1977, to protect the interests of consumers of sugar and consumers and manufacturers of sugar-containing products by insuring the availability of ample supplies of sugar at fair and stable prices, to provide for the welfare of all segments of the domestic sugar industry, and for other purposes; jointly, to the Committees on Agriculture, and Ways and Means.

By Mr. LEHMAN:

H.R. 12493. A bill to amend title 13, United States Code, to authorize appropriations to carry out the provisions of such title for fiscal year 1979 and to provide that for subsequent fiscal years appropriations shall be subject to annual authorization; to the Committee on Post Office and Civil Service.

By Mr. LEHMAN (for himself, Mr. BEDELL, Mr. CLAY, Mr. FORD of Michigan, Mr. GARCIA, Mr. HANLEY, Mr. HEFTEL, Mr. LEACH, Mr. LOTT, Mr. RYAN, Mrs. SPELLMAN, Mr. UDALL, and Mr. CHARLES H. WILSON of California):

H.R. 12494. A bill to amend title 13, United States Code, to provide for the review of Federal authority for the collection of statistical information, to require certain information to be included in committee reports accompanying legislation in which there is provided Federal authority for the collection of information, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. McDONALD:

H.R. 12495. A bill to limit eligibility for appointment and admission to any U.S. service academy to male individuals; jointly, to the Committees on Armed Services, and Merchant Marine and Fisheries.

By Mr. MURTHA:

H.R. 12496. A bill to amend section 118(c) of title 28, United States Code, to provide for the holding of court for the Western District of Pennsylvania at Johnstown, Pa., to the Committee on the Judiciary.

By Mr. OTTINGER:

H.R. 12497. A bill to amend the Internal Revenue Code of 1954 to allow individuals to elect, in lieu of the deduction for charitable contributions, a credit against income tax for 50 percent of such contributions; to the Committee on Ways and Means.

By Mr. PRICE (for himself and Mr. BOB WILSON) (by request):

H.R. 12498. A bill to amend title 10, United States Code, to provide for more efficient and expeditious disposal of lost, abandoned, and unclaimed property in the custody of the military departments; to the Committee on Armed Services.

By Mr. SEIBERLING:

H.R. 12499. A bill to amend the Internal Revenue Code of 1954 to provide that a taxpayer may, with respect to any pollution control facility used in connection with a plant or other property in operation before January 1, 1971, elect a 12-month amortization of such facility or a 20-percent investment tax credit; to the Committee on Ways and Means.

By Mr. SEIBERLING (for himself, Ms. MIKULSKI, and Mr. ROE):

H.R. 12500. A bill to amend the Internal Revenue Code of 1954 to allow, as a credit against income tax, certain amounts of social security taxes paid by an employee, and to make the earned income credit permanent; to the Committee on Ways and Means.

By Mr. SEIBERLING (for himself and Mr. RUPPE):

H.R. 12501. A bill to amend the Internal Revenue Code of 1954 to encourage the modernization of manufacturing plants by providing an additional investment credit for machinery placed in service in existing manufacturing plants or in nearby plants; to the Committee on Ways and Means.

By Mr. STANTON:

H.R. 12502. A bill to extend the authority of the Secretary of the Treasury to make loans under the New York City Seasonal Financing Act of 1975 for a period of 3 years; to the Committee on Banking, Finance and Urban Affairs.

By Mr. WIGGINS (for himself, Mr. HYDE, Mr. SAWYER, Mr. HUGHES, and Mr. EVANS of Georgia):

H.R. 12503. A bill to provide procedures for determining the validity of a ratification of an amendment to the Constitution of the United States, and for other purposes; at the Committee on the Judiciary.

By Mr. CHARLES H. WILSON of California:

H.R. 12504. A bill to amend title 5, United States Code, to revise the pay structure for Federal air traffic controllers; to the Committee on Post Office and Civil Service.

By Mr. FLIPPO (for himself, Mr. TEAGUE, Mr. FUQUA, Mr. MCCORMACK, Mr. WYDLER, and Mr. WINN):

H.R. 12505. A bill to provide for a research, development, and demonstration program to determine the feasibility of collecting in space solar energy to be transmitted to Earth and to generate electricity for domestic purposes; to the Committee on Science and Technology.

By Mr. BEDELL (for himself, Mr. DOWNEY, Mr. LAFALCE, Mr. CARR, and Mr. NOLAN):

H.R. 12506. A bill to amend the Internal Revenue Code of 1954 to provide graduated corporate income tax rates; to the Committee on Ways and Means.

By Mr. GRASSLEY (for himself, Mr. NOLAN, Mr. HALL, Mr. PRICE, and Mr. QUIE):

H.R. 12507. A bill to establish a separate community development program for units of general local government which have a population of 20,000 or fewer individuals and are located in nonmetropolitan areas; jointly, to the Committees on Agriculture, and Banking, Finance and Urban Affairs.

By Mr. HARRIS (for himself, Mr. SISK, Mr. EILBERG, Mr. EDWARDS of California, Mr. HALL, Mr. EVANS of Georgia, Mr. FISH, Mr. SAWYER, Mr. FRENZEL, and Mrs. FENWICK):

H.R. 12508. A bill to amend the Immigration and Nationality Act to facilitate the admission into the United States of more than two adopted children, and to provide for the expeditious naturalization of adopted children; to the Committee on the Judiciary.

By Ms. HOLTZMAN (for herself, Mr. EILBERG, Mr. HALL, Mr. HARRIS, Mr. EVANS of Georgia, Mr. FISH, and Mr. SAWYER):

H.R. 12509. A bill to amend the Immigration and Nationality Act to exclude from admission into, and to deport from, the United States all aliens who persecuted any person on the basis of race, religion, national origin, or political opinion, and for other purposes; to the Committee on the Judiciary.

By Mr. MITCHELL of Maryland:

H.R. 12510. A bill to amend the Federal Reserve Act respecting the positions of Chairman and Vice Chairman of the Federal Reserve Board; to the Committee on Banking, Finance and Urban Affairs.

By Mr. PERKINS (for himself, Mr. QUIE, Mr. FORD of Michigan, Mr. ANDREWS of North Carolina, Mr. BLOUIN, Mr. SIMON, Mr. ZEFERETTI, Mr. MOTTL, Mr. MURPHY of Pennsylvania, Mr. WEISS, Mr. HEFTEL, Mr. CORRADA, Mr. KILDEE, Mr. MILLER of California, Mr. BUCHANAN, Mr. PRESSLER, Mr. GOODLING, Mrs. PETTIS, Mr. PURSELL, and Mr. JEFFORDS):

H.R. 12511. A bill to extend for 1 year the child care food program of the National School Lunch Act and the women, infants, and children program of the Child Nutrition Act of 1966; to the Committee on Education and Labor.

By Mr. STEERS (for himself, Mr. FISHER, Mr. FAUNTROY, Mrs. HOLT, Mrs. SPELLMAN, and Mr. HARRIS):

H.R. 12512. A bill to amend the Federal Aviation Act of 1958 in order to require the Administrator of the Federal Aviation Administration to prepare and put into effect comprehensive noise abatement plans for airports operated by the Administrator; to the Committee on Public Works and Transportation.

By Mr. MATHIS:

H.R. 12513. A bill to amend the Commodity Exchange Act for the purposes of revising certain violations of such act, establishing restitution procedures with respect to such violations, and authorizing civil forfeiture proceedings with respect to such violations, and for other purposes; jointly to the Committees on Agriculture, and the Judiciary.

By Mr. MOORE (for himself, Mr. RUSSO, Mr. SATTERFIELD, Mr. SCHULZE, Mr. SKUBITZ, Mrs. SMITH of Nebraska, Mr. SNYDER, Mr. STEERS, Mr. STEIGER, Mr. TAYLOR, Mr. TRIBLE, Mr. VANDER JAGT, Mr. WALKER, Mr. WALSH, Mr. WIGGINS, Mr. WINN, Mr. WYDLER, Mr. YOUNG of Alaska, Mr. ASHBROOK, Mr. BROWN of Michigan, Mr. BURLISON of Missouri, Mr. COUGHLIN, Mr. CRANE, Mr. DERWINSKI, and Mr. DORNAN):

H.J. Res. 883. Joint resolution designating July 1, 1978, as "National Free Enterprise Day"; to the Committee on Post Office and Civil Service.

By Mr. SOLARZ:

H.J. Res. 884. Joint resolution to establish a Presidential Commission to develop plans for a memorial to the victims of the Holocaust; to the Committee on House Administration.

By Mr. YATRON:

H.J. Res. 885. Joint resolution extending the deadline for the ratification of the equal rights amendment; to the Committee on the Judiciary

By Mr. D'AMOURS:

H. Con. Res. 600. Concurrent resolution disapproving proposed regulations of the Department of the Treasury requiring centralized registration of firearms and other matters; jointly, to the Committees on the Judiciary, and Ways and Means.

By Mr. DODD:

H. Con. Res. 601. Concurrent resolution disapproving the proposed export of low-

enriched uranium to India; to the Committee on International Relations.

By Mr. FASCELL (for himself, Mr. DERWINSKI, Mr. BURKE of Florida, Mr. ROSENTHAL, Mr. IRELAND, Mr. HARRINGTON, Mr. GUYER, Mr. FOWLER, Mr. FRASER, Mr. BINGHAM, Mrs. COLLINS of Illinois, Mr. YATRON, Mr. SOLARZ, Mr. GILMAN, Mr. LAGOMARSINO, Mr. WHALEN, Mr. WINN, Mr. LONG of Maryland, Mr. WOLFF, Mr. BONKER, Mr. CAVANAUGH, Mr. NIX, Mrs. FENWICK, and Mr. BEILENSON):

H. Con. Res. 602. Concurrent resolution disapproving the proposed package of sales of aircraft to Saudi Arabia, Egypt, and Israel; to the Committee on International Relations.

By Mr. KELLY:

H. Res. 1160. Resolution commending Hudson, Fla., on the centennial of its founding; to the Committee on Post Office and Civil Service.

By Mr. PEPPER (for himself and Mr. FORD of Tennessee):

H. Res. 1161. Resolution commending Hobart C. Jackson for his services to the elderly; to the Committee on Post Office and Civil Service.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H. CON. RES. 559

By Mr. COUGHLIN:

In the matter relating to the recommended level of Federal revenues decrease the amount $500,000,000.

In the matter relating to the amount by which the aggregate level of Federal revenues should be decreased, increase the amount by $500,000,000;

In the matter relating to the amount of the deficit increase the amount by $500,000,000;

In the matter relating to the appropriate level of the public debt increase the amount by $500,000,000;

In the matter relating to the amount by which the statutory limit on the public debt should accordingly be increased, increase the amount by $500,000,000.

By Mr. GAMMAGE:

On page 1, line 7, strike out "$443,279,000,000" and insert in lieu thereof "$444,179,000,000".

On page 1, line 9, strike out "$28,400,000,000" and insert in lieu thereof "$27,500,000,000".

On page 2, line 5, strike out "$58,079,000,000" and insert in lieu thereof "$56,179,000,000".

On page 2, line 7, strike out "$856,279,000,000" and insert in lieu thereof "$854,379,000,000".

On page 2, line 9, strike out "$104,279,000,000" and insert in lieu thereof "$102,379,000,000".

By Mr. IRELAND:

Page 3, line 25, strike out "$31,429,000,000" and insert in lieu thereof "$30,888,000,000".

Page 4, line 3, strike out "$49,550,000,000" and insert in lieu thereof "$44,693,000,000".

Page 4, line 6, strike out "$159,339,000,000" and insert in lieu thereof "$157,469,000,000".

(And conform the aggregate dollar figures contained in the first section of the resolution.)

By Mr. STRATTON:

On page 1 line 11, strike "$568,152,000,000" and insert in lieu thereof "$570,513,000,000."

On page 2 line 20, strike "$127,439,000,000" and insert in lieu thereof "$129,800,000,000."

SENATE—*Tuesday, May 2, 1978*

(Legislative day of Monday, April 24, 1978)

The Senate met at 11 a.m., on the expiration of the recess, and was called to order by Hon. MURIEL HUMPHREY, a Senator from the State of Minnesota.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Let us pray.

O Thou God and Father of us all, amid the national and global concerns which drain our strength and consume the hours, help us in this oasis of quietness to drink of the water of life which refreshes the inner resources of our harried lives. Deliver us from the hard secularism which so easily engulfs us in our daily work and give us not only this time of reverent ceremony but many moments when all else is put aside and we know Thy nearness as the Strength of our lives and the Light to our pathway.

Make us to know how solemn is our task, that we live with instant history, that we serve our precious Republic in a world where humanity is one family. In our problem solving help us neither to act too swiftly nor delay unduly, and to remember we are creatures of both time and eternity. Make us good craftsmen in the skills of a government of the people, by the people, and for the people.

And to Thee shall be the everlasting praises. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., May 2, 1978.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable MURIEL HUMPHREY, a Senator from the State of Minnesota, to perform the duties of the Chair.

JAMES O. EASTLAND,
President pro tempore.

Mrs. HUMPHREY thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from West Virginia.

THE JOURNAL

Mr. ROBERT C. BYRD. Madam President, I ask unanimous consent that the Journal of proceedings be approved to date.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. ROBERT C. BYRD. Madam President, I ask unanimous consent that the Senate go into executive session to consider the nominations on the Executive Calendar under New Reports.

Mr. BAKER. Madam President, reserving the right to object, and I will not object, I rise only to advise the distinguished majority leader that we have no objection to going into executive session to consider the nominations on the Executive Calendar under Department of State and Agency for International Development. We have no objection to proceeding to their consideration and their confirmation.

There being no objection, the Senate proceeded to the consideration of executive business.

The ACTING PRESIDENT pro tempore. The nominations will be stated.

DEPARTMENT OF STATE

The second assistant legislative clerk read the nomination of William B. Edmondson, of Nebraska, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of South Africa.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

Mr. ROBERT C. BYRD. Madam President, I move to reconsider the vote by which the nominee was confirmed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AGENCY FOR INTERNATIONAL DEVELOPMENT

The second assistant legislative clerk read the nomination of David Bronheim, of the District of Columbia, to be an Assistant Administrator of the Agency for International Development.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

Mr. ROBERT C. BYRD. Madam President, I move to reconsider the vote by which the nominee was confirmed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Madam President, I ask unanimous consent that the President be immediately notified of the confirmation of the nomination.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. Madam President, I ask unanimous consent that the Senate return to legislative session.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETINGS

Mr. ROBERT C. BYRD. Madam President, I ask unanimous consent that the Committee on Human Resources be authorized to meet during the sessions of the Senate on May 3, 4, and 5, and May 8, 9, 10, and 11 to consider various measures requiring authorizations pertaining to the May 15 budget deadline, and other committee business.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. Madam President, will the majority leader yield for just a moment?

Mr. ROBERT C. BYRD. Yes.

Mr. BAKER. I notice that his memorandum indicates approval from the minority side on this request.

Mr. ROBERT C. BYRD. That is why I stressed, "and other committee business."

Mr. BAKER. I wonder if the majority leader might reformulate his request to omit the last words, "and other committee business"?

Mr. ROBERT C. BYRD. Yes.

Madam President, I reform the request accordingly.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. I thank the majority leader.

Mr. ROBERT C. BYRD. The Senator is welcome.

Madam President I ask unanimous consent that the Foreign Relations Committee be authorized to meet during the sessions of the Senate on Wednesday, May 3; Thursday, May 4; and Friday, May 5; to hold markup sessions in fiscal year 1979 authorizations for the Department of State and foreign assistance programs, which must be reported to the Senate by May 15 under the Budget Act.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER FOR RECESS TO 9:30 A.M. TOMORROW

Mr. ROBERT C. BYRD. Madam President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 9:30 a.m. tomorrow.

The ACTING PRESIDENT pro tempore. Without objecton, it is so ordered.

ORDER FOR RECOGNITION OF SENATORS ON TOMORROW

Mr. ROBERT C. BYRD. Madam President, I ask unanimous consent that on tomorrow, after the two leaders or their designees have been recognized under the standing order, Messrs. LEAHY and CHURCH be recognized, each for not to exceed 15 minutes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER TO RESUME CONSIDERATION OF THE WATERWAYS FEE BILL ON TOMORROW

Mr. ROBERT C. BYRD. Madam President, I ask unanimous consent that upon completion of the orders for recognization of Senators on tomorrow, the Senate resume consideration of the waterways fee bill.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Madam President, I have no further request for time.

Mr. BAKER. Madam President, I yield my time under the standing order to the distinguished Senator from North Carolina.

Mr. HELMS. Madam President, I thank the able minority leader, my friend from Tennessee (Mr. BAKER).

JOSEPH M. HUNT, JR.

Mr. HELMS. Madam President, last night this Senator from North Carolina lost, undoubtedly, one of his best friends. His formal name was Joseph M. Hunt, Jr., but almost everyone knew him as Cousin Joe.

Joe was a former speaker of the House of Representatives of the North Carolina General Assembly. He was former chairman of the State highway and public works commission in my State. And he was one of nature's noblemen.

He had an unfailing loyalty to his countless friends. I have never known a man more steadfast in his refusal to compromise principle and he had an unyielding dedication to his State and his Nation.

Joe was a sight to behold in terms of political combat. He stated his position candidly, frankly, honestly, always as a thoroughbred gentleman. He did so in a way that even his adversaries gained good cheer from him.

I recall on one occasion when he was campaigning for the State senate from his home county of Guilford. While making a tour of one of the shopping centers in Greensboro, he shook the hand of a lady who glared at him a moment and said, "Of course, I will not vote for you, I don't agree with you on anything."

Joe replied, "Madam, I love you nonetheless, and I just want you to know that I did not ever suggest that this election would be unanimous."

Later I learned that the lady changed her mind and supported Cousin Joe, simply because she realized that he was a gentleman.

Joe sat in the family gallery in January 1973 when I was sworn in as a Member of the U.S. Senate. Before that time and since, he has been one of my treasured friends.

So I extend my deepest sympathy and that of Mrs. Helms to Joe's family—to his gracious wife, Grace, his lovely daughter and his fine son, and to Joe's cousin, who just happens to be the distinguished Governor of North Carolina, Gov. James B. Hunt. But perhaps most of all Mrs. Helms and I would want Joe's grandchildren to remember always that the grandfather whom they loved so dearly also loved them from the depth of his heart. Their grandfather worked and fought to make this country better for them, and for all of the other little folks who compose the next generation.

S. 3018—FOOD AND DRUG REFORM ACT OF 1978

Mr. HELMS. Madam President, overregulation of the pharmaceutical industry by the Food and Drug Administration has resulted in greatly increased costs to the consumer, decrease competition and innovation in the drug industry, and significant delay in the marketing of new drugs. American production of new drugs has fallen from an average of 43 per year before 1962 to 13 per year. Major drug breakthroughs enter the American market on the average of 2 to 5 years after widespread use in Europe. Most importantly, the "drug lag" caused by Federal regulation has resulted in the death and suffering of thousands of Americans.

As our drug regulatory system is now structured, the most advanced medical care is too often available only to those wealthy enough to travel outside the United States to obtain treatment. For example, over 23 million Americans suffer with hypertension—a condition which causes thousands of deaths yearly—yet America has not produced a single new antihypertension drug since 1963, while more than 20 such drugs have been developed and are widely used in Europe.

Madam President, I believe that it is time for Congress to review the effects of the 1962 amendments to the Food, Drug, and Cosmetic Act. I believe further that a careful study of the many problems posed by present law will lead to the conclusion that a reduction of FDA regulation will most effectively meet the health needs of the American people.

DRUG LAG A RESULT OF OVERREGULATION

During 1974, the FDA finally admitted the existence of a "drug lag" in the United States. Richard Crout, Director of the FDA Bureau of Drugs, testified before the Senate Subcommittee on Health that—

> There is no question that a "drug lag" exists in the United States in the sense that a significant number of drugs marketed in foreign countries are not available here.

In 1973 the doctor's magazine Medical Times conducted a nationwide poll of family physicians regarding how FDA regulations affected their practice. It found that 86 percent of the doctors questioned felt that FDA regulations deprive their patients of important therapeutic drugs. (November 1973 at 132).

An analysis of U.S. drug development involving new chemical entities between 1962 and 1974 by Louis Lasagna and Wil-

liam Wardell of the University of Rochester School of Medicine found that the time required for clinical study and approval has risen steadily from 2.5 to 6 years. The study also revealed that no drug clinically studied in human beings since 1968 has yet been approved by FDA for marketing. It concluded that "if the present trend continues, by 1979 it will require ten years for a drug to be evaluated in man and approved in the United States." (An Analysis of Drug Development Involving New Chemical Entities, unpublished study at 4, 5).

Private Practice magazine reports that in the United States, during the 10 years prior to 1962, the pharmaceutical industry produced and marketed an average of 43 new chemical entities per year. Between 1962 and 1970, this figure dropped to 17, while the average between 1968 and 1973 fell to 13 per year. (November 1973 at 61).

In a study of the introduction of new drugs in the United States and Great Britain, Professor Wardell found that the United States is lagging seriously behind Great Britain and other countries in the introduction of new therapeutic drugs. In a comparison of 82 drugs now available in both countries, Professor Wardell found that only 14 of these drugs were introduced into both countries during the same year; while 43 were introduced into Britain first and only 25 were introduced into the United States first. When expressed in terms of a single index there were 59 "drug-years" of prior availability in the United States, while there were 120 "drug-years" of prior availability in Britain.

In a comparison of 98 drugs available in only one of the two countries, Professor Wardell found 77 of the drugs exclusively available in Britain while only 21 drugs were exclusively available in the United States. In terms of "drug-years" of exclusive availability, the figures were 256 for Britain and 68 for the United States. Thus, when considering exclusively available drugs, whether expressed in terms of drugs available or in "drug-years", the British figures are nearly four times those of the American.

The 12th International Congress of Diseases of the Chest conducted by the American College of Chest Physicians concluded that FDA's regulations deprived American physicians and their patients of valuable new drugs for an unnecessarily long time. (3 British Medical Journal 541, 1974)

Louis Goldman, writing in Modern Medicine, also concluded that FDA's method of approving drugs has kept many U.S. patients from receiving treatment with useful, new medications. He found that physicians in the United States simply do not have access to a large number of drugs that their colleagues abroad find useful, if not essential (June 1975 at 44).

During the years 1958 through 1962, Kathryn Welling reported in Barron's that "it generally required about 2 years and a little over $1 million to develop a new drug in the United States. Now it takes 8 to 10 years and up to $20 million; the average probably runs around $12 million" (June 28, 1976).

Professors Wardell and Lasagna conclude their book, "Regulation and Drug Development," with the observation that—

It is difficult to argue that the United States has escaped an inordinate amount of new drug toxicity by its conservative approach; it has gained little else. On the other hand, it is relatively easy to show that Britain has gained by having effective drugs available sooner. Furthermore, the costs of this policy in terms of damage due to adverse drug reactions have been small compared with the existing levels of damage produced by older drugs. There appear to be no other therapeutic costs of any consequence in Britain. In view of the clear benefits demonstrable from some of the drugs introduced into Britain, it appears that the United States has lost more than it has gained from adopting a more conservative approach than did Britain. (at 105)

Dr. Theodore Klumpp, writing in the Journal of Legal Medicine made the following observations on FDA procedures:

The cost of getting a new drug through the FDA has risen to prohibitive levels. This has created an unfortunate and very serious byproduct: Many pharmaceutical firms now cannot afford to develop new drugs for rare diseases or minor conditions where the market potential does not look as if it would cover the cost of getting them through the FDA. For the same reason, improved modifications of old drugs and new as well as useful combinations of such drugs may never see the light of day. The cost of discovery, development, and obtaining FDA approval is now estimated at as much as $8-million to $10-million, and it ordinarily takes from eight to 10 years from basic discovery to FDA clearance. I know of applications that have rested on FDA desks for four and five years.

Even more important, illness and prolonged suffering are continued and lives are lost while the FDA sits on new drugs that often have been available for years in other countries. (Sept., 1976 at 25)

DRUG LAG INCREASES PATIENT SUFFERING

The FDA imposed "drug lag" concerns more Americans than just researchers, scientists, and pharmaceutical manufacturers. According to many experts studying this problem, thousands of Americans are needlessly suffering and even dying as a result of this delay.

Dr. Ray Gifford, president of the American Society for Clinical Pharmacology and Therapeutics, recently stated that a "drug lag" in the United States does exist and that:

It would be naive to deny that the drug lag has cost some Americans their lives or well being. Doctor Myrvin Ellestad of the American College of Cardiology Bethesda Conference Committee is more emphatic. He charges that FDA regulation "is costing thousands upon thousands of American lives. (Private Practice, February 1975 at 41".)

At a recent conference on pharmaceutical innovation sponsored by American University in Washington, D.C., Professor Wardell observed that:

If even one new drug of the stature of penicillin or digitalis has been unjustifiably banished to a company's back shelf because of excessively stringent regulatory requirements, that event will have harmed more people than all the toxicity that has occurred in the history of modern drugs development.

A graphic example of the adverse effect of pharmaceutical overregulation in terms of human suffering is the delay in the introduction of a new family of drugs called beta-blockers.

These drugs have been developed over the past 15 years and are proving to be very effective in the treatment of high blood pressure, irregular heartbeats, chest pain and other symtoms of heart disease—conditions which afflict over 23 million Americans. Frederick Roll, in his study of drug regulation makes the following observation:

The modern use of beta blockers for a variety of important new indications has been pioneered abroad, with the U.S. following 10 years behind. Current studies are showing that beta blockers can prevent heart attacks and sudden death. The estimated potential saving in the U.S. is at least 10,000 lives per year. The use of these drugs for that indication is at least five years away in the U.S. (Of Politics and Drug Regulation, Jan. 1977 at 20)

Madam President, it would seem difficult to over emphasize the conclusion of this noted researcher, that as a direct result of present law over 50,000 Americans will lose lives because of a delay in the introduction of one new drug alone.

Elsewhere, Professor Wardell estimates that the 5-year delay in approving a new sedative (benzodiazepine) to replace older, more dangerous medications cost 1,200 lives. (Business Week, June 30, 1975 at 114.)

Professors Wardell and Lasagna then make the following observation:

The point is obvious. Introduction of a new drug that produced fatalities anywhere approaching this magnitude would be regarded as a major disaster, but the undoubted occurrence of deaths through failure to introduce a drug has so far gone unremarked. It would not take many examples of this type to show that earlier introduction of some new drugs might more than counterbalance all the new drug toxicity of the past decade. (Regulation and Drug Development at 73)

THE FOOD AND DRUG REFORM ACT OF 1978

Madam President, the Food and Drug Reform Act of 1978 which I am introducing today should do much to alleviate the serious drug lag which I have just discussed. First, it provides that pharmaceutical firms need submit only certified clinical summaries of their investigations of a new drug. FDA officials would be able to conduct an on-site examination of the data on which these summaries are based. The savings in paperwork and storage costs for both private industry and government should be substantial. Additionally, the bill provides strong criminal penalties for inaccurate summaries which result from reckless work in the preparation of these summaries or for intentionally inaccurate summaries.

The bill establishes a new congressional policy which states clearly that FDA is to do everything possible to make safe and effective drugs promptly available. The bill requires that an economic impact statement accompany each new FDA regulation and that FDA make a twice-yearly report to the Congress on the status of new drug applications and agency action regarding those applications. It also limits the number of extensions of time FDA may take in reviewing drug submissions.

The bill contains a new "sunshine"

provision which would open FDA decisionmaking to the public by making preclinical and clinical summaries available to the public while preserving necessary trade secrets. It would provide for a reorganization of advisory committees to assist in FDA's consideration of new drug applications.

The bill also establishes a new office at FDA to provide technical and other nonfinancial assistance to small pharmaceutical firms to enable them to more efficiently comply with FDA regulations. It also calls for broad review by the Congress every 6 years of the manner in which FDA is enforcing and interpreting the Food, Drug, and Cosmetic Act. Finally, the bill provides for a revision of the present drug patent law. By providing longer patent protection, the bill allows pharmaceutical firms a longer period of time to recover development costs and thereby provide strong incentive for reduced prescription drug prices for the public.

Madam President, I ask unanimous consent that the text of the Food and Drug Reform Act of 1978 be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3018

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE AND REFERENCE TO ACT

SECTION 1. (a) This Act may be cited as the "Food and Drug Reform Act of 1978".

(b) Whenever in this Act an amendment is expressed in terms of an amendment to a section or other provision, the reference shall be considered to be made to a section or other provision of the Federal Food, Drug, and Cosmetic Act.

SUBMISSION OF CERTIFIED SUMMARIES

SEC. 2. (a) Section 505(b) is amended—

(1) by inserting "(1)" immediately after "(b)";

(2) by striking out in clause (1) "full reports of investigations which have been made" and inserting in lieu thereof "a summary of each investigation which has been made";

(3) by redesignating clauses (1), (2), (3), (4), (5), and (6), as clauses (A), (B), (C), (D), (E), and (F), respectively; and

(4) by adding at the end thereof the following new paragraph:

"(2) (A) Each summary of an investigation submitted under clause (A) of paragraph (1) shall be certified under oath by a person who conducted or supervised the investigation as being a complete and accurate summary of the methodology and results of the investigation.

"(B) No person shall be required under paragraph (1) to submit to the Secretary, as part of an application with respect to a drug, any report submitted by such person, within four years of the date of submission of such application, to the Secretary under clause (1) of subsection (i) with respect to such drug.

"(C) An applicant shall maintain such records of an investigation for which a summary is submitted under clause (A) of paragraph (1) as the Secretary may by general regulation, or by order with respect to such applicant's application prescribe on the basis of a finding that such records are necessary in order to enable the Secretary to determine, or facilitate a determination of, whether any of the grounds specified in subsection (d) exist for denying approval of such application. Each person required under this subparagraph to maintain records, and every person in charge or in custody thereof, shall, upon request of an officer or employee designated by the Secretary, permit such officer or employee at all reasonable times to have access to and copy and verify such records.".

(b) Section 512(b) is amended—

(1) by inserting "(1)" immediately after "(b)";

(2) by striking out in clause (1) "full reports of investigations which have been made" and inserting in lieu thereof "a summary of each investigation which has been made";

(3) by redesignating clauses (1), (2), (3), (4), (5), (6), (7), and (8), as clauses (A), (B), (C), (D), (E), (F), (G), and (H), respectively; and

(4) by adding at the end thereof the following new paragraphs:

"(2) No person shall be required under paragraph (1) to submit to the Secretary, as part of an application with respect to an animal drug, any report submitted by such person, within four years of the date of submission of such application, to the Secretary under the second sentence of subesction (j) with respect to such animal drug.

"(3) An applicant shall maintain such records of an investigation for which a summary is submitted under clause (A) of paragraph (1) as the Secretary may by general regulation, or by order with respect to such application, prescribe on the basis of a finding that such applicant's records are necessary in order to enable the Secretary to determine, or facilitate a determination of, whether any of the grounds specified in subsection (d) exist for denying approval of such application. Each person required under this subparagraph to maintain records, and every person in charge or in custody thereof, shall, upon request of an officer or employee designated by the Secretary, permit such officer or employee at all reasonable times to have access to and copy and verify such records.".

(c) Section 301 is amended—

(1) by striking out in clause (e) "(i) or (j)" and inserting in lieu thereof "(b), (i), or (j)"; and

(2) by inserting in clause (e) "(b)," immediately after "512"; and

(3) by adding at the end thereof the following new clause:

"(s) The submission under oath under section 505(b) or 512(b) of a summary that is inaccurate or incomplete in any material respect.".

POLICY OF AVOIDING DELAY

SEC. 3. (a) Section 505(a) is amended—

(1) by inserting "(1)" immediately after (a); and

(2) by adding at the end thereof the following new paragraph:

"(2) It is the policy of this Act that the Secretary, in order to make promptly available to persons in the United States safe and effective drugs which are available in other parts of the world, shall take all possible steps to avoid unnecessary delays in the review and approval of an application.".

(b) Section 512 is amended by inserting immediately at the end thereof the following:

"(o) It is the policy of this Act that the Secretary, in order to make promptly available to persons in the United States safe and effective drugs which are available in other parts of the world, shall take all possible steps to avoid unnecessary delays in the review and approval of an application.".

ECONOMIC IMPACT STATEMENT ON AND CONGRESSIONAL REVIEW OF REGULATIONS

SEC. 4. (a) Section 701 is amended by adding at the end thereof the following new subsection:

"(j) (1) Notwithstanding any other provision of law, no regulation affecting the development, testing or marketing of any drug, promulgated on or after the date of enactment of this Act, shall become effective unless the Secretary shall issue and cause to be published in the Federal Register a copy of such proposed regulation together with an economic impact statement which shall assess any additional costs required or expected to be incurred under such action on—

"(A) reducing competition in the drug industry;

"(B) increasing the cost of drugs to consumers;

"(C) decreasing research on new and innovative drugs; and

"(D) diverting manpower in the drug industry from drug research to paperwork.

Notwithstanding the exception provided under section 553(b) of title 5, United States Code, such statement shall be based upon the record established under the provisions of section 553 of title 5, United States Code, compiled during the rulemaking proceeding regarding such regulation.".

(b) The amendment made by subsection (a) shall not apply to any action of issuing, amending, or repealing a regulation before the date of enactment of this Act.

SEMIANNUAL STATUS REPORTS

SEC. 5. (a) Section 505 is amended by adding at the end thereof the following new subsection:

"(k) (1) The Secretary shall submit to Congress, in the months of January and July of each year, a report (which shall also be published in the Federal Register) on the status of each application for—

"(A) approval of a new drug, or

"(B) approval of an exemption from the operation of this section of a new drug intended solely for investigational use,

which has been filed under this section, and which has not been approved or disapproved before a date 30 days before the date of submission of such report.

"(2) The report shall include for each such drug application—

"(A) a statement of the composition of the drug;

"(B) any established name of the drug (as defined in section 502(e)(2));

"(C) the name of the person filing the application.".

"(D) the date the application first was filed;

"(E) the names of any foreign nations which have approved the drug for use; and

"(F) a statement of any actions taken, and review made, by the Secretary on the application.".

(b) Section 512 is amended by adding at the end thereof the following new subsection:

"(p) (1) The Secretary shall submit to Congress, in the months of January and July of each year, a report (which shall also be published in the Federal Register) on the status of each application for—

"(A) approval of a new animal drug, or

"(B) approval of an exemption from the operation of this section of a new animal drug intended solely for investigational use. which has been filed under this section, and which has not been approved or disapproved before a date 30 days before the date of submission of such report.

"(2) The report shall include for each such drug application—

"(A) a statement of the composition of the drug;

"(B) any established name of the drug (as defined in section 502(e)(2));

"(C) the name of the person filing the application;

"(D) the date the application first was filed;

"(E) the names of any foreign nations which have approved the drug for use; and

"(F) a statement of any actions taken, and review made, by the Secretary on the application.".

ACCELERATION AND CHANGES IN REVIEW OF NEW DRUG APPLICATIONS

SEC. 6. (a) Section 505(b) is amended by adding, after the paragraph added by the amendment made by section 3(a)(4) of this Act, the following new paragraphs:

"(3) The Secretary shall promptly refer the application to the appropriate drug advisory committee, established under subsection (m). The committee shall promptly review the application and, not later than 90 days after referral of the application, shall submit to the Secretary a report together with recommendations on whether the application should be approved and on whether any grounds specified in clauses (1) through (6) of subsection (d) apply with respect to the application, and the reasons for such recommendations. The Secretary shall promptly make public the report made by a drug advisory committee.

"(4)(A) An applicant may file with the Secretary, not earlier than 90 days and not later than 120 days after the date of filing an application under this subsection, a request for a review of the status of such application.

"(B) Promptly upon receipt of such a request the Secretary shall review, in consultation with the drug advisory committee to which the application was referred under paragraph (3), whether there are grounds for finding that clauses (1) through (6) of subsection (d) may apply with respect to the application.

"(C) After such review and not later than 60 days after the receipt of such a request, the Secretary shall notify the applicant of any such grounds or other deficiencies in the application which might apply and shall inform the applicant of the measures required to place the application in approvable form.

"(D) After such review and notification, the Secretary may not refuse to approve an application on a ground which was not specified in the notification, if—

"(i) the ground is contained in clauses (1) through (6) of subsection (d), and

"(ii) no new and substantial evidence has been produced after the review with regard to the ground.".

(b) Section 505(c) is amended by striking out "Within one hundred and eighty days" and all that follows through "the Secretary shall either—" and inserting in lieu thereof "Within 180 days (or, if agreed upon by the Secretary and the applicant, within 360 days) of the date of filing of an application pursuant to subsection (b), the Secretary, after consideration of the report submitted under subsection (b) by the appropriate drug advisory committee established under subsection (m), shall either—".

(c)(1) Section 505(e) is amended by inserting "and after consultation with the appropriate drug advisory committee established under subsection (m)" immediately after "after due notice and opportunity for hearing to the applicant" each time it occurs.

(2) Section 505(g) is amended—

(A) by inserting "(1)" immediately after "(g)";

(B) by redesignating clauses (1) and (2) as clauses (A) and (B); and

(C) by adding at the end thereof the following new paragraph:

"(2) An order of the Secretary under subsection (c), (d), or (e) shall include a statement of reasons why the Secretary in the order has followed or refused to follow a recommendation made, with respect to the drug affected by the order, by a drug advisory committee".

(3) Section 505(i)(3) is amended—

(A) by inserting "or to the appropriate drug advisory committee (established under subsection (m)), or, to both," immediately after "the making of such reports to the Secretary"; and

(B) by inserting "or it" immediately after "as the Secretary finds will enable him".

(4) Section 505(j)(1) is amended by inserting ", after consultation with the various drug advisory committees established under subsection (m)," immediately before "may by general regulation".

(d) Section 512(b) is amended by adding, after the paragraph added by the amendment made by section 3(b)(4) of this Act, the following new paragraphs:

"(3) The Secretary shall promptly refer the application to the appropriate animal drug advisory committee, established under subsection (q). The committee shall promptly review the application and, not later than 90 days after referral of the application, and shall submit to the Secretary a report together with recommendations on whether the application should be approved and on whether any grounds specified in subparagraphs (A) through (H) of subsection (d)(1) applies with respect to the application, and the reasons for such recommendations. The Secretary shall promptly make public the report made by an animal drug advisory committee.

"(4)(A) An applicant may file with the Secretary, not earlier than 90 days and not later than 120 days after the date of filing an application under this subsection, a request for a review of the status of such application.

"(B) Promptly upon receipt of such a request the Secretary shall review, in consultation with the animal drug advisory committee in which the application was referred under paragraph (3), whether there are grounds for finding that subparagraphs (A) through (H) of subsection (d)(1) may apply with respect to the application.

"(C) After such review and not later than 60 days after the receipt of such a request, the Secretary shall notify the applicant of any such grounds or other deficiencies in the application which might apply and shall inform the applicant of the measures required to place the application in approvable form.

"(D) After such review and notification, the Secretary may not refuse to approve an application on a ground which was not specified in the notification, if—

"(i) the ground is contained in subparagraphs (A) through (H) of subsection (d)(1), and

"(ii) no new and substantial evidence has been produced after the review with regard to the ground.".

(e) Section 512(c) is amended by striking out "Within one hundred and eighty days" and all that follows through "the Secretary shall either—" and inserting in lieu thereof "Within 180 days (or, if agreed upon by the Secretary and the applicant, within 360 days) of the date of filing of an application pursuant to subsection (b), the Secretary, after consideration of the report submitted under subsection (b) by the appropriate animal drug advisory committee established under subsection (q), shall either—".

(f)(1) Section 512(e) is amended by inserting "and after consultation with the appropriate animal drug advisory committee established under subsection (q)" immediately after "after due notice and opportunity for hearing to the applicant" each time it occurs.

(2) Section 512(g) is amended—

(A) by inserting "(1)" immediately after "(g)";

(B) by redesignating clauses (1) and (2) as clauses (A) and (B); and

(C) by adding at the end thereof the following new paragraph:

"(2) An order of the Secretary under subsection (c), (d), or (e) shall include a statement of reasons why the Secretary in the order has followed or refused to follow a recommendation made, with respect to the drug affected by the order, by an animal drug advisory committee.".

(3) Section 512(j) is amended—

(A) by inserting "or to the appropriate animal drug advisory committee (established under subsection (q)), or to both," immediately after "the making of such reports to the Secretary"; and

(B) by inserting "or it" immediately after "as the Secretary finds will enable him".

(4) Section 512(l)(1) is amended by inserting ", after consultation with the various drug advisory committees established under subsection (q)," immediately before "may by general regulation".

(g) Section 512(m) is amended—

(1) by inserting in paragraph (2) ", after consultation with the appropriate animal drug advisory committee established under subsection (q)," immediately after "the Secretary shall";

(2) by inserting in paragraph (3) "and after consultation with the appropriate animal drug advisory committee established under subsection (q)" immediately after "opportunity for a hearing in accordance with such paragraph";

(3) by striking out in paragraph (3) "and opportunity for hearing" and substituting ", opportunity for hearing, and consultation with a committee";

(4) by striking out in paragraph (4) "and opportunity for hearing to the applicant" each time it appears in the paragraph and substituting ", opportunity for hearing to the applicant, and consultation with the appropriate animal drug advisory committee established under subsection (q)"; and

(5) by inserting in paragraph (5)(A) ", after consultation with the various animal drug advisory committees," immediately before "may by general regulation".

RELEASE OF CLINICAL AND PRECLINICAL SUMMARIES

SEC. 7. (a) Section 505 is amended by adding after the subsection added by the amendment made by section 6(a) of this Act the following new subsection:

"(l)(1) The Secretary shall promulgate regulations under which the text of—

"(A) each summary of an investigation which was submitted to the Secretary pursuant to subsection (c), and

"(B) each report or preclinical test which was submitted to the Secretary pursuant to subsection (i),

with respect to a drug shall be made available (subject to section 301 (j)) to the public upon issuance of an order under subsection (c) or (d) approving an application for approval for the drug.

"(2) Any information respecting a drug which is made available pursuant to paragraph (1) may not be used to establish the safety of another drug for purposes of this Act by any person other than the person who submitted the information so made available.".

(b) Section 512 is amended by adding after the subsection added by the amendment made by section 6(b) of this Act the following new subsection:

"(p)(1) The Secretary shall promulgate regulations under which the text of—

"(A) each summary of an investigation which was submitted to the Secretary pursuant to subsection (b), and

"(B) each report which was submitted to the Secretary pursuant to subsection (j), with respect to a new animal drug or an animal feed bearing or containing a new animal drug shall be made available (subject to section 301(j)) to the public upon issuance of an order under subsection (c), (d), or (m) approving an application for approval for the animal drug or animal feed.

"(2) Any information respecting a drug or animal feed which is made available pur-

suant to paragraph (1) may not be used to establish the safety or effectiveness of another drug for purposes of this Act by any person other than the person who submitted the information so made available.".

ADVISORY COMMITTEES

SEC. 8. (a) Section 505 is amended by adding after the subsection added by the amendment made by section 8(a) of this Act, the following new subsection:

"(m)(1) The Secretary shall establish seven drug advisory committees, one for each of the following classes of drugs: cardiopulmonary renal, neuropharmocological, metabolic-endocrine, anti-infective, oncologic and radiopharmocological, and surgical-dental, and one for drugs not so classified.

"(2) Each drug advisory committee (hereinafter in this subsection referred to as a 'committee') shall review and make recommendations, as provided in this section, on new drug applications within the class of drugs covered by such committee, and to advise the Secretary on such other matters as the Secretary determines to be consistent with those functions.

"(3) Each committee shall be composed of five members as follows:

"(A) The Secretary shall appoint three members from individuals who are nominated by professional or medical specialty organizations whose members are experienced with the class of drugs reviewed by such committee; one member to be a physician active in the practice of medicine.

"(B) The Secretary shall appoint one member who is a pharmacologist.

"(C) The Secretary shall appoint one member who is a representative of the interests of the general public.

Each member shall be qualified by training or experience to evaluate the safety of the drugs to be referred to the committee and, to the extent feasible, possess skill in the use of, or experience in the development, manufacture, or use of, such drugs. No individual who is otherwise in the regular full-time employ of the United States and engaged in the administration of this Act may be a member of any committee for more than three years in any six-year period. The Secretary shall designate one of the members of each committee to serve as chairman thereof.

"(4)(A) No member may sit as a member of a committee when the committee is reviewing a drug in which or in the manufacturer or sponsor of which drug, the individual has a pecuniary interest.

"(B) Except as provided in subparagraph (A), a member may sit as a member of a committee when the committee is reviewing a drug which the member has used or tested.

"(5) Committee members (other than officers or employees of the United States), while attending meetings or conferences of a committee or otherwise engaged in its business, shall be entitled to receive compensation at rates to be fixed by the Secretary, but not at rates exceeding the daily equivalent of the rate in effect for grade GS–18 of the General Schedule, for each day so engaged, including traveltime; and while so serving away from their homes or regular places of business each member may be allowed travel expenses (including per diem in lieu of subsistence) as authorized by section 5703(b) of title 5, United States Code, for persons in the Government service employed intermittently.

"(6) The Secretary shall furnish each committee with adequate clerical and other necessary assistance.

"(7) Section 14 of the Federal Advisory Committee Act shall not apply to the duration of a committee established under this subsection.".

(b) Section 512 is amended by adding, after the subsection added by the amendment made by section 8(b) of this Act, the following new subsection:

"(q)(1) The Secretary shall establish not more than seven animal drug advisory committees. Each animal drug advisory committee (hereinafter in this subsection referred to as a 'committee') shall review and make recommendations as provided in this section, on new animal drug applications within the class of animal drugs designated by the Secretary for such committee, and to advise the Secretary on such other matters as the Secretary determines to be consistent with those functions.

"(2) Each committee shall be composed of five members as follows:

"(A) The Secretary shall appoint three members from individuals who are nominated by professional or veterinary specialty organizations whose members are experienced with the class of animal drugs reviewed by such committee.

"(B) The Secretary shall appoint one member who is a pharmacologist.

"(C) The Secretary shall appoint one member who is a representative of the interests of the general public.

Each member shall be qualified by training or experience to evaluate the safety of the animal drugs to be referred to the committee and who, to the extent feasible, possess skill in the use of, or experience in the development, manufacture, or use of, such drugs. No individual who is otherwise in the regular full-time employ of the United States and engaged in the administration of this Act may be a member of any committee. No individual may serve as a member of a committee for more than three years in any six-year period. The Secretary shall designate one of the members of each committee to serve as chairman thereof.

"(3)(A) No member may sit as a member of a committee when the committee is reviewing an animal drug in which, or in the manufacturer or sponsor of which drug, the individual has a pecuniary interest.

"(4) Committee members (other than officers or employees of the United States), while attending meetings or conferences of a committee or otherwise engaged in its business, shall be entitled to receive compensation at rates to be fixed by the Secretary, but not at rates exceeding the daily equivalent of the rate in effect for grade GS–18 of the General Schedule, for each day so engaged, including traveltime; and while so serving away from their homes or regular places of business each member may be allowed travel expenses (including per diem in lieu of subsistence) as authorized by section 5703 (b) of title 5, United States Code, for persons in the Government service employed intermittently.

"(5) The Secretary shall furnish each committee with adequate clerical and other necessary assistance.

"(6) Section 14 of the Federal Advisory Committee Act shall not apply to the duration of a committee established under this subsection.".

MODIFIED INVESTIGATIONAL PROCEDURES FOR INDIVIDUALS AND SMALL DRUG COMPANIES

SEC. 9. Section 505(i) is amended—

(1) by inserting "(1)" immediately after "(i)";

(2) by striking out "Such regulations may" and inserting in lieu thereof the following:

"(2) Except as provided in paragraph (3), such regulations may";

(3) by redesignating paragraphs (1), (2), and (3) as subparagraphs (A), (B), and (C), respectively; and

(4) by striking out the language after subparagraph (C), as so redesignated, and substituting the following new paragraph:

"(3)(A) Such regulations may not provide that subparagraph (A) of paragraph (2) shall be applied as a condition with respect to the use in an investigation of a drug—

"(i) the sponsor of which is a small business, and

"(ii) which investigation will be conducted by an expert or experts from a public or other nonprofit school of medicine, dentistry, or veterinary medicine (as defined in section 724 of the Public Health Service Act) which is accredited by a recognized body or bodies approved for such purpose by the Commissioner of Education.

"(B) For the purpose of subparagraph (A), the term 'small business' means an individual or person who is engaged in the manufacturing, developing, or testing of drugs and who does not employ more than 100 individuals in such activity, and who is not an employee, agent, or subsidiary of a person who employs 100 or more individuals in the conduct of business related to the manufacturing, developing, or testing of drugs.".

PERIODIC REVIEW OF FDA ACTIVITIES

SEC. 10. In 1982, and every sixth year thereafter, the appropriate committees of the House of Representatives and the Senate shall hold hearings and conduct a comprehensive review of the functions and operations of the entity within the Department of Health, Education, and Welfare charged with administration of the Federal Food, Drug, and Cosmetic Act during the period for 6 years immediately preceding such year, and shall recommend to each respective House the enactment of such legislation as it determines to be necessary.

ASSISTANCE FOR SMALL MANUFACTURERS OF NEW DRUGS AND NEW ANIMAL DRUGS

SEC. 11. The Secretary of Health, Education, and Welfare shall establish within the Department of Health, Education, and Welfare an identifiable office to provide technical and other nonfinancial assistance to small manufacturers of new drugs and new animal drugs to assist them in complying with the requirements of the Federal Food, Drug, and Cosmetic Act.

EXTENSION OF PATENTS

SEC. 12. (a) Section 154 of title 35, United States Code, is amended—

(1) by inserting "(a)" immediately before "Every patent";

(2) by inserting "except as provided in subsection (b)," immediately before "for the term of seventeen years"; and

(3) by inserting at the end thereof the following new subsection:

"(b) In the case of a patent issued for a new drug (As defined in section 201(p) of the Federal Food, Drug, and Cosmetic Act) or for a new animal drug (as defined in section 201 (w) of the Federal Food, Drug, and Cosmetic Act), the term of such patent shall begin on the date such patent is issued and shall end on the earlier of (1) a date 17 years after the date the Secretary of Health, Education, and Welfare, or his delegate, first approves an application, filed pursuant to section 505(b) or 512(b) of the Federal Food, Drug, and Cosmetic Act, for approval of such drug or animal drug, respectively, or (2) a date 27 years after the date the patent is issued.".

(b) The amendments made by subsection (a) shall only apply to patents for new drugs or new animal drugs applications for which, under the appropriate section of the Federal Food, Drug, and Cosmetic Act, have first been approved on or after July 1, 1977, regardless of whether such patents have been issued before the date of enactment of this section.

AGRICULTURAL CREDIT ASSISTANCE ACT OF 1978

The ACTING PRESIDENT pro tempore. Under the previous order the Senate will now resume consideration of S. 2146, which will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 2146) to amend the Consolidated Farm and Rural Development Act, as amended.

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Missouri (Mr. EAGLETON) is recognized to call up an amendment, on which there shall be 30 minutes, to be equally divided and controlled.

Mr. EAGLETON. Madam President, I suggest the absence of a quorum, with the time to be charged against my time.

The ACTING PRESIDENT pro tempore. Will the Senator call up his amendment first?

UP AMENDMENT NO. 1256

Mr. EAGLETON. I am in the process of redrafting it, but I send the amendment to the desk.

The ACTING PRESIDENT pro tempore. The Senator has no time until the amendment is before the Senate.

The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Missouri (Mr. EAGLETON) proposes an unprinted amendment numbered 1256.

Mr. EAGLETON. Madam President, I ask unanimous consent that reading of the amendment be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

On page 20, line 4, after the word "loans" insert a semicolon and "loan moratorium".

On page 26, after line 23, add the following new section:

LOAN MORATORIUM

SEC. 119. Subtitle D of the Consolidated Farm and Rural Development Act is amended by adding after section 331 a new section as follows:

"SEC. 331A. In any area eligible for emergency loans under subtitle C, the Secretary may permit, at the request of the borrower, the deferral of principal and interest on any outstanding loan made, insured, or held by the Secretary under this title, or under the provisions of any other law administered by the Farmers Home Administration, for not to exceed three years from the date of such deferral. The interest which accrues during the deferral period on any loan deferred under authority of this section shall bear no interest during or after such period.

Mr. EAGLETON. Madam President, the Food and Agriculture Act of 1977 provides specific authority for the Secretary of Agriculture to use funds contained in the Agricultural Credit Insurance Fund to pay installments of principal and interest to the holders of notes of Farmers Home Administration borrowers.

It was the intent of Congress in providing the Secretary this authority to allow him simply to postpone the payment of principal and interest on FmHA loans for farmers hard pressed due to natural disasters. It was our belief that the Department of Agriculture should carry out a program of loan deferrals for farmers equivalent to what the Small Business Administration provides small businesses. This was very clear in the legislative history. Both in comments I made on the floor of the Senate and in the statement of Representative BURLISON on the floor of the House, reference was made to the loan deferral program of the Small Business Administration which does not charge the borrower additional interest when his loan is deferred.

FmHA is now in the final stages of developing its system of deferral in order to carry out the provisions of the 1977 farm bill. The FmHA system of deferral requires that deferred interest be added to the outstanding principal, with interest then being charged on the basis of the new adjusted principal. What this means to a farmer with a $50,000 operating loan which is deferred for 2 years is that he will have to pay an additional $1,200 in interest above and beyond what a small businessman in the same circumstances would pay on a deferred SBA loan.

So far as I am concerned, there is no justification for denying farmers the kind of loan deferral program which is available to small businessmen. My amendment is aimed at correcting this inequity by prohibiting the FmHA from charging interest on interest on deferred loans. This will be effective only in areas which are eligible for emergency loans.

The loan deferral program originally was intended to give farmers hard pressed by natural disasters a little breathing room when bill-paying time came around. The Farmers Home Administration has instead turned it into a program which burdens farmers with more debt and higher payments. In my opinion and in that of most of the farmers with whom I have discussed this proposal, the deferral program as proposed by FmHA would cause more financial distress than it would relieve.

This amendment will correct this situation and will make the loan deferral program a viable tool for assisting hard pressed farmers once again.

I should note that the original form of my amendment gave the Secretary of Agriculture no discretion in the implementation of the loan deferral program. However, as the result of the personal assurance I have received from the Secretary of Agriculture that the loan deferral program will be carried out without interest being charged on interest, I have modified my amendment so that this deferral program will be within the Secretary's discretionary authority. I hasten to add, however, that the prohibition on the charging of interest on interest remains mandatory for this program.

It is important to note that the House-passed version of this bill contains a section which provides the Secretary with the authority to grant a moratorium on payments of principal and interest for borrowers who can demonstrate that they are temporarily unable to continue making payments. I have recently received a letter from Representative MOORE of Louisiana, the chief sponsor of this section, which indicates that it was his intent that interest not be charged on interest when a moratorium is granted. I ask unanimous consent that Representative MOORE's letter be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

HOUSE OF REPRESENTATIVES,
Washington, D.C., May 1, 1978.

Hon. THOMAS F. EAGLETON,
Chairman, Subcommittee on Agriculture and Related Agencies, Senate Committee on Appropriations, Washington, D.C.

DEAR SENATOR EAGLETON: It has come to my attention that your are interested in an amendment I offered to the Agricultural Credit Act of 1978, H.R. 11504, and which was adopted by the House Agriculture Committee and included in the bill as reported to the House. This legislation passed the House of Representatives on April 24, 1978 by a vote of 347–23.

The language of my amendment now appears as Section 117 in Title I, and concerns the creation of a new section 331A within the Consolidated Farm and Rural Development Act giving the Secretary of Agriculture the authority to grant a moratorium upon the payment of interest and principal on loans extended by the Farmers Home Administration. Also, the Secretary is authorized to forego foreclosures on such loans under the circumstances set forth in the section.

I believe your primary interest in this new authority granted the Secretary involves whether the Farmers Home Administration charges interest upon the interest due under the terms of any loan covered by this legislation. I assure you I had no intention of creating a situation where Farmers Home would take such action, because in fact I feel this action would negate any good a moratorium could provide. It does not seem logical to me to allow a farmer the special provision of delaying the payment of principal and interest on a loan on one hand to help him through difficult financial problems, and turn around on the other hand and ask him to pay interest fees in order to obtain this special consideration. I simply had the desire to allow hard-pressed farmers the chance to place principal and interest payments they could not now meet, at the end of a normal payment period; hopefully, a time when they could meet these obligations. I feel it would be far better to help keep farmers in business as viable producers, especially young farmers, than have them leave agriculture because of the inability to obtain sufficient credit.

I hope this explanation has answered your question about my amendment, and that it will be useful to you. I support H.R. 11504 as being a needed shot in the arm for our overall farm credit situation, and hope you are successful in clarifying this matter before the Senate.

With kindest personal regards, I remain

Sincerely yours,

W. HENSON MOORE,
Member of Congress.

P.S. I would like to add that under the provisions of this section and the bill, the interest on a loan would continue to run, but the farmer would not actually pay this interest and the principal until the later date set by the Secretary.

Mr. EAGLETON. Madam President, it is evident to me, therefore, that both Houses of Congress are in support of this concept that interest should not be charged on interest when loans are deferred. Farmers in dire need of relief from adverse financial pressure should not be burdened by such charges. I urge my colleagues to accept my amendment.

I reserve the remainder of my time.

Mr. ALLEN. Madam President, I yield myself such time as I may require.

The amendment which the distinguished Senator from Missouri (Mr. EAGLETON) had planned to offer provided that the Secretary shall defer the payment of principal and interest on a loan in a disaster area, whether it be a dis-

aster loan or other type of farmers home loan, for a period of 3 years, which seemed to be an amendment that could not be accepted because it required the Secretary to defer payments on a loan for a period of 3 years and obviously that is not a very sound provision because too many people would ask that their loans be deferred for a period of 3 years and since there would be no interest on interest a large number of borrowers would do that.

The distinguished Senator from Missouri (Mr. EAGLETON) has modified his amendment and has given the Secretary the right to so defer loans and in case of the deferral not to charge interest on interest for a period up to 3 years. So this would allow the Secretary in emergency or distressed situations regarding borrowers to defer payments and to charge only the interest on the principal amount and not to charge interest on interest.

With this change, making it discretionary or optional on the part of the Secretary, the committee will accept the amendment.

However, there is one addition that I wish to get the distinguished Senator from Missouri to agree to by way of modification because the amendment says the interest which accrues during the deferral period on any loan deferred under authority of this section shall bear no interest during or after such period.

Obviously, if it is necessary to foreclose the loan the amount of principal and interest would be used as a basis for the purchase price and from that date on obviously interest should be charged because the interest would then become a part of the principal.

I have discussed with the distinguished Senator from Missouri (Mr. EAGLETON) the matter of asking him to modify his amendment, and I believe we have reached an agreement. If the distinguished Senator will modify his amendment in that way we will be willing to accept the amendment on behalf of the committee.

That is correct, I understand.

Mr. DOLE. Madam President, will the Senator yield briefly?

Mr. ALLEN. I yield.

Mr. DOLE. Yes. I discussed the amendment and modification with the distinguished Senator from Missouri. I agree with the comments made by the chairman of the subcommittee, Senator ALLEN. I indicate that it is a good amendment and should be accepted.

Mr. EAGLETON. Madam President, I thank both my colleague from Alabama and my colleague from Kansas.

I send a modified amendment to the desk.

The ACTING PRESIDENT pro tempore. Without objection, the amendment will be so modified.

The modified amendment is as follows:

On page 20, line 4, after the word "loans" insert a semicolon and "loan moratorium".

On page 26, after line 23, add the following new section:

LOAN MORATORIUM

SEC. 119. Subtitle D of the Consolidated Farm and Rural Development Act is amended by adding after section 331 a new section as follows:

"SEC. 331A. In any area eligible for emergency loans under subtitle C, the Secretary many permit, at the request of the borrower, the deferral of principal and interest on any outstanding loan made, insured, or held by the Secretary under this title, or under the provisions of any other law administered by the Farmers Home Administration, for not to exceed three years from the date of such deferral. The interest which accrues during the deferral period on any loan deferred under authority of this section shall bear no interest during or after such period; provided, however, if the security instrument securing such loan is foreclosed such interest as is included in the purchase price at such foreclosure shall become a part of the principal and shall draw interest from the date of foreclosure at the rate prescribed by law.

On page 27, line 1, strike out "Sec. 119" and insert in lieu thereof "Sec. 120".

Mr. EAGLETON. Madam President, before going to a vote on the modified amendment, I shall address a comment to Senator ALLEN of Alabama and be pleased if he could respond with respect thereto. It is on an analogous subject matter not immediately germane, however, to the specific amendment at the desk.

May I say to Senator ALLEN that he and the Agriculture Committee have done a wonderful job in putting this bill together and you are to be commended for it. I am particularly pleased that you have modernized loan limits to assist more family farmers.

I do, however, have a question that pertains to legislative history. Specifically, it is concerned with the definition of a "single enterprise." Under present legislative history, to be eligible for a disaster loan, an applicant must have suffered a 20-percent loss of production in a "single enterprise" that is basic to his farming operation. Such an enterprise must constitute not less than 25 percent of the gross income from farming. All cash field crops are combined to form a "single enterprise." This is also true for all cash vegetable crops, all cash fruit crops and all feed crops and pasture. Only hog, beef, dairy, poultry, and aquaculture operations are defined as "single enterprises" on an uncombined basis. Madam President, this combining of cash enterprises has given some of my constituents some trouble. For example, a farmer may lose half of his soybean crop, but because soybeans are combined with other cash crops on which there is no loss, the net result may be less than a 20-percent loss, thus depriving him of a loan.

So I ask my colleague, Senator ALLEN, if this is the intended definition of a single enterprise?

Mr. ALLEN. I thank the distinguished Senator from Missouri for his question and his statement as to his understanding as to what a single enterprise means.

The report at page 79, referring to section 329, has this to say:

An applicant seeking financial assistance based on production losses must show that a single enterprise which constitutes a basic part of his farming, ranching, or aquaculture operation has sustained at least a 20 per centum loss of normal per acre or per animal production as a result of the disaster.

It certainly is not intended by the definition to include as a single enterprise his entire operation. Instead, a single enterprise is a single crop or type of livestock and nothing more. It is not intended that field crops, vegetable crops, fruit crops, or feed crops should be combined in the manner which the Senator outlined. In the example which he just gave, the farmer who lost one-half of his soybean crop should not be penalized because he had a normal year with his other cash crops. In such instances, only one crop, the crop with the greatest loss, will be used to determine the qualifying loss of at least a 20-percent reduction in yield in a basic enterprise.

The Senator's question is appreciated and we trust that this colloquy will clear up this inequity.

Mr. EAGLETON. It most certainly does, and I thank my distinguished colleague.

Madam President, if there be no further discussion, I think we are at the point to vote on the Eagleton amendment, as modified.

Mr. ALLEN. Madam President, if the Senator will yield, I believe, even though there is no opposition to the amendment, the unanimous-consent agreement would provide that we begin voting at 2 o'clock on the amendments that are pending.

The ACTING PRESIDENT pro tempore. The Senator is correct.

Mr. ALLEN. I would then request that we make no effort to agree to the amendment at this time. I think it would be well that we yield back the time that each side has, and I do yield back the time that I have on the amendment.

Mr. EAGLETON. I yield back the remainder of my time, Madam President.

AMENDMENT NO. 1826

(Formerly numbered UP amendment 1254)

The ACTING PRESIDENT pro tempore. The clerk will report the amendment of the Senator from Alabama.

The assistant legislative clerk read as follows:

The Senator from Alabama (Mr. ALLEN) proposes an amendment numbered 1826.

The amendment is as follows:

On page 28, beginning with line 12, strike out all down through line 5 on page 29, and insert in lieu thereof the following:

"SEC. 203. Loans may be insured or guaranteed under this title for (1) refinancing outstanding indebtedness, including the making of installment payments of principal and interest on real estate or other debts that cannot be paid unless assistance is rendered pursuant to this title, or other debts that must be consolidated or restructured to provide adequate terms within the applicant's repayment ability, (2) reorganization of the farm or ranching operation, including changes in the nature or method of operation, necessary to provide an economically sound operating unit, (3) purchase of essential water rights, supplies, and irrigation facilities, (4) purchase of essential livestock, poultry, and farm equipment, (5) purchase of feed, seed, fertilizer, insecticides, and farm supplies and other essential farm operating expenses, including cash rent, (6) financing essential land and water development, use, and conservation, (7) other essential farm and home needs, including, but not limited to, family subsistence, and (8) loan closing costs. No loan may be insured or guaranteed under this section the purpose of which is to purchase or lease additional land."

Mr. ALLEN. Madam President, I yield myself such time as I may require within the limits accorded me.

This amendment has been requested by the Farmers Home Administration. The bill has a new title, which is a very important title, and one that I think is very constructive indeed. It takes into account that farmers can have not only natural disasters that require them to seek to borrow money, but they can have economic disasters as well.

So this amendment recognizes the fact that the bill does have a provision allowing a farmer in economic distress, a farmer who has had an economic disaster, to apply to Farmers Home for a loan, and the bill sets out any number of things he can use as a basis for borrowing the money.

It covers a consolidation of his debt, paying principal and interest, buying fertilizer and feed, and making all sorts of efforts to rehabilitate himself financially.

But it also includes the right to buy additional land and put that land purchase in the loan. The Farmers Home Administration takes the position if the farmer is in economic distress, he should not be borrowing money under this disaster program to buy additional land. An avenue is available to him to purchase land and borrow money on it under the regular farm ownership program.

All this amendment does—and it has been submitted at the request of the Farmers Home Administration—is to strike out the provision authorizing a farmer applying for a loan under the circumstances of economic disaster to buy land. All other provisions are left in the bill.

I have talked to the distinguished Senator from Kansas (Mr. DOLE), the ranking minority member on the committee, and I believe he feels this is a sound amendment.

I do reserve the remainder of my time.

The ACTING PRESIDENT pro tempore. The Senator from Kansas.

Mr. DOLE. Madam President, I have listened with interest to the distinguished Senator from Alabama, and as one who had an initial interest in the inclusion of a provision which would permit acquisition of land to maintain the normal level of operation, the Senator from Kansas is convinced that the Farmers Home Administration is probably correct.

It occurred to the Senator from Kansas there might be some rare instance where, in order to hold on to what the farmer had, it might be necessary to make some small additional acquisition. But I am persuaded by the arguments of the distinguished Senator from Alabama and the letter which, if it is not made a part of the RECORD, I ask unanimous consent be made a part of the RECORD from the Department of Agriculture to our distinguished chairman, Senator TALMADGE, signed by the Assistant Secretary for Rural Development.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF AGRICULTURE,
Washington, D.C.

Hon. HERMAN E. TALMADGE,
Chairman, Committee on Agriculture, Nutrition, and Forestry, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: We are pleased that the Senate will consider S. 2146 today. This legislation is important to many of the nation's farmers, as you have pointed out, and we believe it is a good bill.

There are differences between the Administration's proposals, the House passed bill and the package the Senate will consider today. There are only three issues which are of major concern to us at this time, and two of those are amendments which are yet to be introduced.

In Title II, the Emergency Agricultural Credit Adjustment Act of 1978, we believe it is essential that loans from this title not be used for acquisition of any new land. New land purchases can be accomplished through the regular farm ownership program with its increased limits. We oppose any language in Title II which would permit even limited land acquisition. The Administration's proposed language is attached.

The Administration along with many members of the Senate continues to be concerned with the Farmers Home Administration emergency disaster program and a similar program administered by the Small Business Administration. We have no amendment which is timely for consideration today. But we would recommend continuing with the present program until the FmHA/SBA problem is resolved and/or until the new crop insurance proposal, if enacted by the Congress, makes clear the appropriate role if any, for a disaster loan program in FmHA.

The final item gives us the most serious problems. As you know, the House passed an amendment (Smith-Glickman) which basically says FmHA home loan guarantees will be made under terms and restrictions no less favorable to the borrower and in amounts at least equal to those offered by the Department of Housing and Urban Development.

There are at least four major differences between HUD and FmHA program:

1. FmHA remains a lender of last resort and thus requires a credit elsewhere test before making a loan:

2. The FmHA home mortgage limit is $33,000 and HUD's is $60,000;

3. There is no income limit on an individual working through HUD while FmHA's programs are limited to families with adjusted annual incomes of $20,000 and less;

4. FmHA still finances "modest" housing while HUD places no limitations on size or style of house to be financed.

The concern of many Members of Congress about the failure of FmHA to implement the above-moderate guarantee loan program authorized last year is certainly understandable and justified. As late as this morning, we once again explained to senior officials in the Office of Management and Budget the importance and need for an above-moderate guarantee program. While the immediate reasons for implementing such a program are obvious, we again pointed out that there is a lack of credit available for many middle-income families in rural America to purchase homes and that the current direction of the credit market is compounding the situation.

There have been no hearings, either in Agriculture or Housing committees, on the Smith-Glickman proposal and no evaluation of the additional cost, both in actual budget outlays and in personal years, of the program. We feel most strongly that an amendment to S. 2146 similar to the House passed version by Smith-Glickman would jeopardize an otherwise sound, and vital piece of legislation.

Sincerely,

ALEX P. MERCURE,
Assistant Secretary.

Section 203 of S. 2146 is amended by deleting the proposed language and inserting the following:

"Sec. 203. Loans may be insured or guaranteed under this title for (1) refinancing outstanding indebtedness, including the making of installment payments of principal and intrest on real estate or other debts that cannot be paid unless assistance is rendered pursuant to this title, or other debts that must be consolidated or restructured to provide adequate terms within the applicant's repayment ability, (2) reorganization of the farm or ranching operation, including changes in the nature or method of operation, necessary to provide an economically sound operating unit, (3) purchase of essential water rights, supplies, and irrigation facilities, (4) purchase of essential livestock, poultry, and farm equipment, (5) purchase of feed, seed, fertilizer, insecticides, and farm supplies and other essential farm operating expenses, including cash rent, (6) financing essential land and water development, use, and conservation, (7) other essential farm and home needs, including, but not limited to, family subsistence, and (8) loan closing costs. No loan may be insured or guaranteed under this section the purpose of which is to purchase or lease additional land."

Mr. DOLE. It appears to this Senator there could be some possibility of not abuse but of use of this section which might deprive other farmers, who are in dire straits, of their existing needed benefits under this proposal and, therefore, the Senator from Kansas certainly has no objection to the amendment. I know of no objection to the amendment on this side of the aisle.

I would at this time just state very briefly my general support of the legislation.

Madam President, the vote we take today is very important to the farmers, ranchers, and consumers of this country. An adequate up-to-date credit program is vital to the continued success of family farmers especially in a time of financial crisis. I speak in favor of S. 2146, the Agricultural Credit Assistance Act of 1978.

We have had many disappointments in rural America; in fact, the most recent was the defeat in the House of the emergency farm legislation. We will be considering, I understand, perhaps later today, a second effort to assist American farmers, but in a very limited way. It would only permit the increase in target prices for wheat from $3 or $3.05, depending on the circumstances, to $3.40 a bushel for 1978, and make a small adjustment in loan rates for cotton.

In January of 1976, Senator BELLMON of Oklahoma, and I introduced a bill, S. 312, which contained most of the basic provisions included in the bill we consider today. The loan program updates we introduced in 1976 have been needed for several years.

In February of this year I introduced S. 2532 to create an economic emergency loan program for farmers and ranchers suffering from a general tightening of agricultural credit and an unfavorable relationship between production costs and prices received for agricultural commodities.

This is a new effort because it occurred to the members of the committee that farmers can be in the same plight because of economic circumstances as they might be under a natural disaster such

as a flood, hail, or whatever. So there is no question about the need.

LEGISLATION NEEDED NOW

It is important that this legislation be passed today and implemented immediately. Time is very important and many farmers and bankers are awaiting the passage of this bill before deciding on the financial road to take in the next few months. The road of survival or foreclosure and sellout.

S. 2146, as amended by the committee, makes a number of improvements in the credit assistance programs for farmers, ranchers, and rural communities and businesses. Title I amends the Consolidated Farm and Rural Development Act, title II establishes a new economic emergency loan program for farmers and ranchers, and title III amends and extends the Emergency Livestock Credit Act of 1974.

TITLE I

The FmHA has, since 1935, served as a primary force in agricultural lending for low resource and modest income farmers in the United States. Through the years, farming operations have changed, land values and production costs have risen. There has been a need to update and modernize the lending authorities of the FmHA every few years.

S. 2146 makes a number of amendments to the Consolidated Farm and Rural Development Act to improve FmHA's delivery of services to farmers and rural America. These amendments will be of substantial assistance to the farmers in deep economic distress today and should be adopted.

ELIGIBILITY EXTENDED

S. 2146 proposes to extend eligibility for farm real estate and operating loans under the act to family farm corporations and partnerships, ending the present limitation on eligibility of such loans to individual farmers and ranchers.

Farmers and bankers have been contacting me for at least 8 years asking for this authority. Many farmers need to be in a partnership or a family corporation for various financial and legal reasons. For several years, no one, not the FmHA or the SBA, would finance a farming partnership or a corporation.

This is an area of change that is needed to help family farmers get credit no matter the form of legal entity they choose to create.

LOAN LIMITS RAISED

S. 2146 will increase the loan limits on farm real estate loans under the act from $100,000 to $200,000 for direct and insured loans and $300,000 for guaranteed loans, and on farm operating loans under the act from $50,000 to $100,000 on direct or insured loans and $200,000 on guaranteed loans.

The existing limits are inadequate in many States such as Kansas. Present farming operations in Kansas require far more credit than is presently available from the FmHA. FmHA can no longer finance an adequate size family farm operation, especially in western Kansas. These low loan limits are presently keeping FmHA from helping many farmers in Kansas who need large amounts of additional credit.

TITLE II—ECONOMIC EMERGENCY LOAN

Farmers all across the country are facing a financial crisis. Many farmers are having to refinance to continue in the farming business. Farmers are borrowing record amounts of money to finance their farming operations.

Private and public loan organizations are being called upon to loan farmers large amounts of money just to survive. Many organizations are already loaned up or are limited in their capacity to help finance farmers.

Farmers from all parts of the United States are calling my office stating loan funds are not available, from private or public institutions, to keep them in business until farming conditions improve.

Due to the cost price squeeze, farm debt has nearly doubled since 1974 to the unprecedented level of $119 billion outstanding at the beginning of this year. For many farmers, current debt load is becoming unmanageable.

It has become clear that many farmers will need special credit assistance in 1978—to ease the pressure of unmanageable payments due on existing debt, and provide themselves with working capital so that they can earn their way back to solvency.

MORE CREDIT IS NOT THE ANSWER

More credit is not the answer to farm problems, more income and constant prices for supplies is the answer. Farmers have to have more income in order to survive.

Many farmers, though, do need credit to survive until we can solve the farm price problem and get prices up. New legislation is needed to give farmers the credit necessary to survive the present crisis.

The Farmers Home Administration, the major governmental lending institution for farmers, is simply not in a position, with its existing programs, to meet the credit needs of the farmers today.

The FmHA has an emergency loan program for farmers affected by natural disasters, but it does not have a loan program specifically designed for economic disasters (except for the emergency livestock loan program that is made available only to livestock producers).

FmHA regular farm real estate and operating loan programs have been of some assistance to farmers and ranchers suffering from economic disasters. However, due to size restrictions and funding limitations, these two loan programs cannot meet the total needs of farmers and ranchers affected by the current economic disaster.

ECONOMIC EMERGENCY LOANS DURING 1950'S

From 1953 until 1961, the FmHA had an "economic emergency" loan program. Public Law 83–115, enacted on July 14, 1953, authorized the Secretary of Agriculture to make economic emergency loans to farmers in areas where the Secretary found that an economic disaster had caused a need for agricultural credit that could not be met by the commercial lenders or by the FmHA under its regular loan programs.

I strongly feel an economic emergency loan program is needed by the FmHA. This is evidenced by the introduction of my bill, S. 2532. I am pleased that this bill incorporates most of the provisions contained in my earlier bill.

I feel this clear need is met by the new economic emergency loan program established in title II of this bill, S. 2146.

TITLE III, EMERGENCY LIVESTOCK CREDIT ACT OF 1974

Title III of S. 2146 extends the Emergency Livestock Credit Act of 1974 for 1 additional year. I believe this credit act should be continued.

The 1974 act was adopted in a period of high feedgrain prices and low cattle prices due to an oversupply of cattle on feed. FmHA did not have a program that in any way came close to meeting the credit needs of cattlemen. The 1974 act allowed the FmHA to guarantee loans to bona fide farmers and ranchers primarily and directly engaged in agricultural production who had substantial livestock operation, so that they could continue their normal operations during the temporarily adverse economic period.

Recovery by the livestock industry has been slow and recovery has not been completed by many farmers and ranchers. More time is needed. Our action today will help farmers and ranchers have a longer period of time to recover from the tough financial situation they have faced for the past several years.

The Agricultural Credit Assistance Act of 1978 is a bill that will allow the Farmers Home Administration to better serve farmers through their regular ongoing programs and to allow them to have a new economic loan program for farmers.

The bill has been studied by all the groups that are affected by its passage and I believe it enjoys almost total support from those groups. Farm groups around the country support this bill. Farmers who contact my office and need credit believe the bill is a good one.

The USDA and the administration support the basic provisions of the bill. There has been a good working relationship among farmers, farm groups, USDA, the administration, and the Senate Agricultural Committee on this bill.

There are many of us who have worked for a long time to get this bill passed. I appreciate the support and cooperation I have received on the two bills I introduced that are incorporated into this bill. I am hopeful a conference with the House can be held promptly. I am also hopeful the USDA can get the legislation implemented in a timely manner. Time is of the essence and farmers need this legislation now.

I urge all my colleagues to support S. 2146.

Having said that, it would seem to this Senator that this legislation, brought to the floor by the distinguished Senator from Alabama, answers many of the needs of America's farmers, and I certainly expect it to be passed and I certainly support the legislation.

It seems to this Senator that we have moved as we should in the Congress, with the support of the administration, to fill a need of the American farmer.

At the appropriate time, Madam President, I would ask unanimous consent

that the Senator from Kansas may submit an amendment for consideration, although it was not included in the unanimous-consent agreement yesterday.

The ACTING PRESIDENT pro tempore. At the conclusion of the time on this amendment, the Senator means?

Mr. DOLE. Yes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. DOLE. I yield back my time.

Mr. ALLEN. Madam President, I yield myself the remaining time allotted to me.

I wish to commend the distinguished Senator from Kansas (Mr. DOLE) for his hard work on this bill and on all legislation coming before the Committee on Agriculture and coming before the Senate in regard to assisting our farmers.

This bill for improvements in the legislation regarding farm credit has been before the Committee on Agriculture for some 3 years. We have been working hard, our staff has worked hard, we have worked in close cooperation with Farmers Home and with the administration, and the Committee on Agriculture, with the able assistance of the chairman and the distinguished Senator from Kansas, and all members of the committee, has drafted this legislation. I believe it will be a great boon for our farmers as they need more credit to carry on their agricultural operations.

I appreciate the distinguished Senator from Kansas' agreeing to the amendment which I have offered on behalf of the Farmers Home Administration. They have cooperated well with our committee, and we certainly feel that in this minor regard we should accept their recommendations as to this amendment.

I yield back the remainder of my time, Madam President, and I assume that this amendment will be voted on some time after 2 o'clock.

The ACTING PRESIDENT pro tempore. The Senator is correct. Does the Senator from Kansas yield back the remainder of his time?

Mr. DOLE. I yield back the remainder of my time.

The ACTING PRESIDENT pro tempore. The Senator from Kansas is recognized to call up his amendment.

UP AMENDMENT NO. 1257

Mr. DOLE. Madam President, I send to the desk an unprinted amendment and ask for its immediate consideration.

The ACTING PRESIDENT pro temporte. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE) proposes an unprinted amendment numbered 1257:

On page 34, line 21, after "1974" insert the following: "and Miscellaneous".

On page 34, line 22——

Mr. DOLE. Madam President, I ask unanimous consent that further reading of the amendment be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

On page 34, line 21, after "1974, insert the following: "and Miscellaneous."

On page 34, line 22, strike out the subsection designation "(a)."

On page 35, strike out lines 15 and 16, and insert in lieu thereof the following new sections:

"SEC. 302. Section 9 of the Beef Research and Information Act (90 Stat. 534; 7 U.S.C. 2908) is amended by striking out in the third sentence the words 'not less than two-thirds' and inserting in lieu thereof 'a majority'.".

"SEC. 303. The provisions of this title shall become effective upon enactment.".

Mr. DOLE. Just to state very briefly what this unprinted amendment does, it simply amends the Beef Research and Promotion Act, known as Public Law 94–294, to provide one change in this existing law.

It would change the requirement that the referendum conducted among beef producers be approved by a majority of those voting instead of the present requirement for two-thirds approval.

Madam President, following passage of this law in 1976, a referendum as provided in the law was conducted in the summer of 1977. It was approved by 56.5 percent of the producers. The majority of the producers did approve of this concept, and the law provides that those who do not want to participate, may ask for a refund of their funds.

The funds would be collected through the marketing of cattle and the beef processing industry and submitted to the Beef Board to be expended according the provisions of the referendum to conduct research on the utilization of beef and to develop new markets, at home and abroad for beef.

With the current thrust for expanded beef exports, the balance-of-payments deficit and other international trade factors, expansion of beef exports at this time could be a big plus to the Nation's economy.

The cattlemen of the Nation deserve the right to vote again on this referendum with this change in the law, so that they can expeditiously pursue market expansion through the information and promotion authorities it would set up.

You will recall there was much discussion about this provision of the legislation when it was passed in 1976. The joint conference committee had difficulty in arriving at a compromise. Finally the two-thirds majority provision was accepted, due to a compromise between the proponents of the legislation and the American Farm Bureau Federation. The Farm Bureau had insisted on the two-thirds majority. Since that time the American Farm Bureau Federation has changed its mind and approves of the simple majority approval of the referendum and so adopted a resolution at their last national convention in January 1978, in Houston. I ask that that resolution be inserted in the RECORD at this point.

Madam President, again, the amendment is a simple one, it would merely change the two-thirds requirement to a simple majority for approval of a beef referendum such as was conducted last July and was nearly approved. There is no budget impact since the cost of the referendum would be paid from funds collected if passed and by the cattlemen if it fails. I ask my colleagues to support this amendment in the interest of our farmers and cattlemen, and in the interest of our consumers in having an adequate and reasonably priced supply of beef in the future.

Mr. ALLEN. Madam President, I yield myself such time as I may use.

The committee is agreeable to accepting the amendment. It certainly has to do with an important farming operation, and it does allow the beef producers to vote by majority vote as to whether they wish a beef research program to help them increase production and increase sales and to better their beef industry. The distinguished Senator from Kansas also points out that this modest assessment that is placed on beef producers as an assessment for the beef research program is refundable to those producers who do not wish to participate in the program. In that event, if a producer is unwilling to have the assessment charged against him, he would pay the assessment and then apply for its return, and he would then get the benefit of the research program without any charge to him.

This seems to me to be a very fine amendment, and on behalf of the committee we are willing to accept the amendment.

Mr. DOLE. Madam President, will the Senator yield for one additional comment?

Mr. ALLEN. Yes.

Mr. DOLE. I ask unanimous consent to have printed in the RECORD a statement of Farm Bureau policies for 1978, wherein they indicate the change in their position, so that that will be a matter of record, together with a list of the States showing percentage of participation and voting in favor in the last referendum.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

FARM BUREAU POLICIES FOR 1978

PROMOTION OF AGRICULTURAL COMMODITIES

We recognize the right of producers to promote increased research, sales, and consumption of the commodities they produce.

We will oppose federal legislation providing for any new national commodity promotion which does not provide:

(1) Individual producers the right to vote in a referendum on initiation of any promotion program for a commodity which they produce.

(2) In order for a referendum to be valid, 50 percent of the registered producers must have voted, with two-thirds casting an affirmative vote; however, for a beef referendum to be valid, 50 percent of the registered producers must have voted with a majority casting an affirmative vote. No producer should be required to sign his or her ballot in a beef referendum.

(3) Periodic review and referenda to determine continuation or termination of the program at intervals not to exceed five years or at any time upon petition of 10 percent of the registered producers in the area covered by the program—in referenda dealing with continuation or termination the voting requirements for continuation shall be the same as those set out above for initiation of the program.

(4) Opportunity for producers who do not desire to participate to obtain refunds of

their assessments without undue difficulty or delay.

(5) That collected funds shall not be used for political or lobbying activities.

(6) That only those persons who contribute monies to the respective programs shall be eligible to serve on the Boards which administer such programs.

Opportunities should be offered to producers with existing promotional programs to approve changes in operation and administration under the guidelines of the existing legislation in order that the declared policy of such legislation may be carried out.

Any commission or body created under an agricultural commodity promotion program must provide complete accountability of the expenditure of funds collected from producers. Funds released to any agricultural organization, public agency, or private firm for promotion or research purposes should be on a contractual basis with complete accountability required.

PARTICIPATION IN BEEF REFERENDUM

State	Cattle farms	Registered		Voted		"Yes" votes	
		Number	Percent	Number	Percent of register	Number	Percent "yes"
Alabama	53,000	2,340	4	1,350	58	877	65

Mr. ALLEN. Madam President, before I yield back the remainder of my time on the amendment, may I inquire whether all time has been consumed on the Clark amendment, and whether it will come up for a vote in order, among the votes beginning at 2 o'clock?

The ACTING PRESIDENT pro tempore. It will.

Mr. ALLEN. I yield back the remainder of my time on the amendment.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the amendment of the Senator from Kansas.

The amendment was agreed to.

Mr. ALLEN. Madam President, I yield myself such time on the bill as I may use.

I ask unanimous consent that Bill Motes of Senator CLARK's staff be granted the privilege of the floor during the consideration of S. 2146, including all rollcall votes thereon.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ALLEN. I ask unanimous consent that the name of the distinguished Senator from North Carolina (Mr. MORGAN) be added as a cosponsor of S. 2146.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ALLEN. Mr. President, I ask unanimous consent that the name of the distinguished Senator from New Mexico (Mr. DOMENICI) be added as a cosponsor to S. 2146.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

NAVIGATION DEVELOPMENT ACT

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now proceed to the consideration of H.R. 8309, which the clerk will report.

The assistant legislative clerk read as follows:

Calendar No. 549, a bill (H.R. 8309) authorizing certain public works on rivers for navigation, and for other purposes.

The Senate proceeded to consider the bill.

The ACTING PRESIDENT pro tempore. Who yields time?

Mr. DOLE. Madam President, a parliamentary inquiry.

The ACTING PRESIDENT pro tempore. The Senator will state it.

Mr. DOLE. Would it be possible, by unanimous consent, to return to the emergency agriculture credit bill, to propose a technical amendment?

The ACTING PRESIDENT pro tempore. The Senator is correct.

Mr. DOLE. Then I ask unanimous consent that the Senate resume the consideration of S. 2146.

The ACTING PRESIDENT pro tempore. Without objection. it is so ordered.

AGRICULTURAL CREDIT ASSISTANCE ACT OF 1978

The Senate resumed the consideration of S. 2146.

UP AMENDMENT NO. 1258

Mr. ALLEN. Madam President, I send to the desk a technical amendment and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Alabama (Mr. ALLEN) proposes an unprinted amendment numbered 1258:

On page 14, line 16, insert a comma immediately after "(5)".

On page 17, line 15, strike out "pursuant to" and insert in lieu thereof "under".

On page 18, line 10, strike out "followings" and insert in lieu thereof "following:".

On page 26, line 18, strike out "the territories and possessions" and insert in lieu thereof "the commonwealths, territories, and possessions".

On page 26, line 22, strike out "the territories and possessions" and insert in lieu thereof "the commonwealths, territories, and possessions"

On page 28, line 16, strike out "pursuant to" and insert in lieu thereof "under".

The ACTING PRESIDENT pro tempore. Without objection, the amendment is agreed to.

UP AMENDMENT 1259

Mr. ALLEN. Madam President, I offer an amendment recommended by the Farmers Home Administration.

The ACTING PRESIDENT pro tempore. The clerk will state the amendment.

The second assistant legislative clerk read as follows:

The Senator from Alabama (Mr. ALLEN) proposes unprinted amendment numbered 1259.

The amendment is as follows:

On page 21, strike out lines 15 through 22, and insert in lieu thereof the following:

EMERGENCY LOAN DESIGNATION

SEC. 113. Section 321 of the Consolidated Farm and Rural Development Act is amended to read: "Sec. 321. The Secretary shall make and insure loans under this subtitle to (1) established farmers, ranchers, or persons engaged in aquaculture, who are citizens of the United States, and (2) to farm cooperatives, corporations, or partnerships in which a majority interest is held by members, stockholders, or partners who are citizens of the United States if the cooperative, corporation, or partnership is engaged primarily in farming, ranching, or aquaculture, where the Secretary finds that the applicants' farming, ranching, or aquaculture operations have been substantially affected by a natural disaster in the United States or by a major disaster or emergency designated by the President pursuant to the provisions of the Disaster Relief Act of 1974: *Provided*, That they have experience and resources necessary to assure a reasonable prospect for successful operation with the assistance of such loan. For the purposes of this subtitle 'aquaculture' means husbandry of aquatic organisms under a controlled or selected environment."

Mr. ALLEN. Madam President, the purpose of this amendment, which contains all the present provisions in section 114, is to give the Secretary of Agriculture greater discretion in making available emergency loans. It will permit the Secretary to adopt revised procedures that would make emergency loans more readily available to farmers, ranchers, and aquaculture operators after the occurrence of a natural disaster, therefore making assistance available to disaster victims on a more timely basis.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. ALLEN. Madam President, I suggest the absence of a quorum, and ask unanimous consent that the time not be charged to either side.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legisaltive clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, its is so ordered.

Mr. ROBERT C. BYRD. Madam President, I ask unanimous consent to proceed for not more than 5 minutes, with the time to be equally divided between Mr. TALMADGE and Mr. DOLE.

The ACTIN GPRESIDDENT pro tempore. Without objection, its is so ordered.

BUDGET ACT WAIVER

Mr. ROBERT C. BYRD. Madam President, I ask that the Chair lay before the Senate, Senate Resolution 443, the Budget Act waiver on the conference report on H.R. 6782.

The ACTING PRESIDENT pro tempore. The resolution will be stated by title.

The legislative clerk read as follows:

S. Res. 443 waiving section 303(a) of the Congressional Budget Act of 1974 with respect to the consideration of the conference report on H.R. 6782.

The ACTING PRESIDENT pro tempore. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the resolution.

The resolution (S. Res. 443) was agreed to, as follows:

Resolved, That pursuant to section 303(c) of the Congressional Budget Act of 1974, the provisions of section 303(a) of such Act are waived with respect to the consideration of the Conference Report on H.R. 6782, a bill to permit marketing orders to include provisions concerning marketing promotion, including paid advertisement, of raisins and distribution among handlers of the pro rata costs of such promotion. Such waiver is necessary to permit consideration of statutory authority that would increase the minimum loan rate for upland cotton to 48 cents per pound to become effective in a fiscal year for which the first concurrent resolution on the budget has not been agreed to.

Mr. ROBERT C. BYRD. Madam President, I move to reconsider the vote by which the resolution was agreed to.

Mr. TALMADGE. Madam President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

● Mr. BELLMON. Mr. President, the Budget Committee has favorably reported the waiver with respect to the Emergency Agriculture Act of 1978. I would note that the favorable report reflects the facts that no substantive budgetary purpose would be served by denying the waiver.

Section 303 of the Budget Act is meant to prohibit new entitlements from being added to Federal obligation without full budgetary considerations and debate. Because the flexible parity version of H.R. 6782 was before the Senate at the time of the Budget Committee markup, we were able to consider the budgetary implications of such entitlement legislation. In fact, Mr. President, the first budget resolution adopted by the Senate only last week does anticipate costs roughly of the magnitude of those incurred by H.R. 6782. CBO estimates a cost of $700 million for this bill, whereas the Senate in its deliberations allowed $1 billion to cover an emergency farm initiative.

Mr. President, I am concerned that this bill grants extraordinary discretion to the Secretary of Agriculture. The Secretary was already granted broad discretion with respect to loan rates and set-aside provision by the Agriculture Act of 1977. I would hope we are not setting a precedent by abdicating congressional control over programs having such large budgetary exposure.●

EMERGENCY AGRICULTURAL ACT OF 1978—CONFERENCE REPORT

Mr. TALMADGE. Madam President, I submit a report of the committee of conference on H.R. 6782 and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 6782) to permit marketing orders to include provisions concerning marketing promotion, incuding paid advertisement, of raisins and distribution among handlers of the pro rata costs of such promoting, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The ACTING PRESIDENT pro tempore. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of May 1, 1978.)

Mr. TALMADGE. Madam President, this is the report of the second committee of conference on this legislation.

The first report was approved by the Senate on April 10, but was defeated in the House of Representatives on April 12. Had the first conference report cleared the Congress, it faced a promised veto by the President.

I hope the second effort will meet with a kinder fate.

This is a modest bill that provides limited help to the Nation's farmers. It is far short of what I think is needed to restore vitality to the agricultural economy. But it appears to be the best farm legislation attainable under existing cricumstances.

The bill as agreed to by the committee of conference on April 26 contains three major provisions.

First, it gives the Secretary of Agriculture discretionary authority to increase the target prices for wheat, feed grains, and upland cotton for the 1978 through 1981 crops whenever a set-aside is in effect for one or more of these crops.

Under the Food and Agriculture Act of 1977, target prices are fixed by law and may be adjusted by the Secretary only to reflect increases in production costs. The additional authority that this bill provides will enable the Secretary to encourage greater participation in set-asides and afford farmers greater price protection.

If the target price is increased for which a set-aside is in effect, the Secretary may increase the target price for any other commodity in such amount as he determines necessary for the effective operation of the program.

The discretionary authority to increase target prices applies to all commodities covered by target prices except rice. This commodity was not included in H.R. 6782

as passed by the Senate. However, it was the consensus of the committee of conference that the authority should be extended to rice through separate legislation. An amendment to apply this authority to rice was adopted by the Senate during its consideration of S. 2146, the Agricultural Credit Assistance Act of 1978.

It is my understanding that the administration intends this year to use the authority to increase target prices only for wheat. If H.R. 6782 becomes law, the Secretary has declared his intention to increase the 1978 target price for wheat to $3.40 per bushel from the present level of $3.

Second, the bill agreed to by the committee of conference makes certain technical changes in the formula contained in the 1977 Farm Act for computing the loan level for upland cotton. This provision also sets a minimum loan level of 48 cents per pound regardless of the formula for the 1978–81 crops. This will raise the 1978 loan level for cotton from 44 to 48 cents per pound.

Third, the bill increases the borrowing authority of the Commodity Credit Corporation from $14.5 to $25 billion, effective October 1, 1978. This agency's borrowing authority is now severely strained by the increase in price support activities.

Madam President, as I stated at the outset, this is a modest bill. The only immediate relief it would provide are the increase in the target price for wheat and the loan level for cotton.

However, I believe the bill makes desirable adjustments in the 1977 Farm Act. It provides greater flexibility in the basic farm law and gives the Secretary of Agriculture additional authority to cope with the type of supply and price problems that helped trigger the present farm crisis. I hope the administration will make better use in the future of the tools Congress has provided than it has in the past.

Madam President, I urge the adoption of the conference report.

Madam President, I ask unanimous consent that a letter dated April 28, 1978, from the Congressional Budget Office showing the cost estimates be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

CONGRESSIONAL BUDGET OFFICE,
U.S. CONGRESS,
Washington, D.C., April 28, 1978.

Hon. HERMAN E. TALMADGE,
Chairman, Committee on Agriculture, Nutrition and Forestry, U.S. Senate, Russell Senate Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: In response to a request from the staff of the Budget Committee, we have prepared estimates of the budget and economic impact of H.R. 6782, the Emergency Agricultural Act of 1978, as agreed to by the House and Senate conferees, April 26, 1978.

The conference agreement has the following provisions:

(1) Effective October 1, 1978, but retroactive to cover the entire 1978 crop, and for the 1979 through 1981 crops, the Secretary of Agriculture is authorized to increase the target prices for wheat, feed grains, and/or upland cotton above the formula prices contained in the Food and Agriculture Act of 1977 (P.L. 95–113). An increase for any one of these commodities is authorized when a set-aside is in effect for the commodity or if deemed necessary for effective operation of a set-aside on another commodity. The increase is to be adjusted to reflect any land diversion payments.

(2) Effective October 1, 1978, but retroactive to cover the entire 1978 crop, and for the 1979 through 1981 crops, the formula used to compute the cotton loan rate is changed to 85 percent of the U.S. spot market average prices, using three out of the past five years, and dropping the highest and lowest years. However, if the July 1 through October 15 Northern European price quotation formula is higher, the Secretary may raise the loan to the higher level. In any case, the minimum loan rate is $0.48 cents per pound.

(3) An optional program for crops grown for gasohol production is authorized, effective October 1, 1978.

(4) The authorization level for Commodity Credit Corporation borrowing authority is increased by $10.5 billion to $25 billion, effective October 1, 1978.

(5) Effective October 1, 1978, authorization for market promotion activities is added to the existing federal marketing order for raisins.

The following table presents the estimated budget authority and outlays associated with H.R. 6782. The extensive discretionary authority provided in the conference agreement makes it extremely difficult to cost. Therefore, the estimate is based on the Administration's statements of intent with regard to the wheat target price for the 1978 crop, and on the Administration's interpretation of the target price provision for the 1979 through 1981 crops. Costs could be somewhat less or much greater than those shown below, depending on exactly what the Administration chooses to do.

ESTIMATED BUDGET AUTHORITY AND OUTLAYS

[By fiscal years, in millions of dollars]

	Fiscal year—				
	1979	1980	1981	1982	1983
BUDGET AUTHORITY					
Function 350:					
Increase in the authorization level for CCC borrowing authority	10,500	0	0	0	0
Less: Estimated contract authority and appropriation to liquidate contract authority in CBO base	5,561	0	0	0	0
Net function 350	4,939	0	0	0	0
Function 900	−42	−22	−14	−15	−2
Net budget authority	4,897	−22	−14	−15	−2

	Fiscal year—				
	1979	1980	1981	1982	1983
OUTLAYS					
Function 350:					
Wheat	599	284	213	214	0
Cotton	100	88	25	30	25
Net interest (CCC)	42	22	14	15	2
Total function 350	741	394	252	259	22
Function 900	−42	−22	−14	−15	−7
Net outlays	699	372	238	244	25

In addition, the raisin marketing order amendment is expected to cost $7,500 in fiscal year 1979, primarily for a mail referendum.

TITLE I

USDA officials have confirmed that the Administration intends to increase the wheat target price for the 1978 crop to $3.40 per bushel. The CBO projection assumes a wheat set-aside program for each of the 1979 through 1981 crops. For each crop, the target price was assumed to be increased above the formula price projected under Public Law 95–113 in proportion to the assumed set-aside, but adjusted for the savings in variable cost. This interpretation of the conference agreement conforms with the Administration's interpretation.

USDA officials also confirmed that the Administration does not intend to increase target prices for the 1978 crop of feed grains, so there is no added cost in fiscal year 1979. Because the CBO projection assumes a 1979 feed grain set-aside program, there is a possibility that the Administration would raise the target price for the 1979 corn crop. Using the Administration's interpretation of the set-aside and cost adjustment factor, the 1979 crop corn target price would be $2.21 per bushel. The projected farm price for the 1979 corn crop is $2.30 per bushel, leaving a $0.09 per bushel margin between CBO's projected 1979 target and the projected market price. Therefore, no increased outlays would be incurred. No feed grain set-aside program is projected by CBO for crop years 1981 and 1982, so the adjustment factor would probably not be applied.

Loan rates for cotton were projected using the revised domestic spot price formula in the conference agreement. In the cases where the formula result fell below $0.48 per pound, the $0.48 rate was used. Net lending for cotton was projected using an equation that relates volume to the projected farm price and the loan rate.

No cotton target price adjustments were projected because CBO does not anticipate that the conditions set forth in the bill will be met.

Interest payments on increased Treasury borrowings were charged at six percent of the increased program outlays.

Because supply and demand are not expected to change in response to the provisions of the conference agreement, commodity prices are not expected to increase.

Supporting details for the wheat and cotton estimates are shown in Tables 1 through 4.

TITLE II

The gasohol provisions, which provide for a program at the discretion of the Secretary, are not expected to result in additional cost to the federal government.

TITLE III

The estimate assumes that the $10.5 billion of additional borrowing authority is fully appropriated in fiscal year 1979.

TITLE IV

The costs of the mail referendum were supplied by USDA. The costs of conducting the market promotion program will be paid for by handlers, with no additional cost to the federal government.

We would be pleased to answer any questions you may have regarding this estimate.

Sincerely,

ROBERT A. LEVINE,
Deputy Director.

Mr. DOLE. Madam President, I share the views just expressed by my distinguished chairman (Mr. TALMADGE). I would only say that this is the best we can accomplish. We are at the mercy of the administration. The administration has indicated they would accept an increase in wheat target prices for the 1978 crop year to $3.40 and a slight adjustment in loan rates for cotton.

It would seem to the Senator from Kansas that having followed one tortuous path without success we should accept this conference report because it will benefit some farmers this year.

Madam President, we have before us today the results of the meeting of Senate/House conferees of April 26, 1978. That second meeting of conferees followed the rejection by the House of the earlier conference report, which had been accepted by the Senate.

RECENT PRICE DECLINES

Since consideration of the previous conference report by the Senate on April 10, the cash price of wheat in Kansas City has dropped from $3.46 per bushel to $3.06—down 40 cents per bushel. For the same 18-day period, cash corn prices

on the Chicago market declined from $2.61 per bushel to $2.53—down 8 cents per bushel.

Thus, as the prospects for farm legislation diminished the farmers of this Nation have seen an erosion of prices that had strengthened when it had appeared that supplies would be more nearly brought in line with demand by legislative action.

LEGISLATION IS STILL NEEDED

The need for emergency farm legislation has been fully documented in hearings before the Agriculture, Nutrition, and Forestry Committee. It is also made evident by the tractorcades, rallies and spontaneous groundswell of unrest in every agricultural region of this country. Madam President, the farm crisis continues. It cannot be ignored. It must be recognized and dealt with by this Body.

Farmers are still caught in the grip of rising costs of production and declining farm prices. Inflation has pushed his production costs higher and higher while slack world demand for his commodities has resulted in low prices—often below the cost of production. The present rate of inflation in our Nation is at an annual rate of 10 percent. How long can we expect the family farmer to survive with the prices he pays for production items increasing at annual rates of 10 percent or even more while the prices that he receives either decline or linger at levels below his cost of production?

FARM CRISIS SPREADING

As I have pointed out before, farm income has declined in real terms from $33 billion in 1973 to only about $20 billion in 1977. During the same period of time, total form debt has increased 63 percent.

Furthermore, the economic problems of farmers are spreading to other agribusiness enterprises such as farm machinery and farm supply dealers and manufacturers—and it will spread further. The nonfarm economy cannot long escape the effects of the disastrous farm situation.

On March 31, 1978, the USDA updated its figures for producing selected crops in the United States. I should like to call to the attention of my colleagues that the cost of production figures—with land cost at current values included—range as follows:

Wheat, per bushel, $3.61–$3.92.

Corn, per bushel, $2.54–$2.71.

Cotton, per bushel, $.66–$.77.

These figures indicated to me that adjustments in target price levels are needed. This problem was addressed in the previous Conference Report that passed the Senate but failed in the House.

Now the conferees are offering another report which has as its centerpiece a provision that would enable the Secretary of Agriculture to adjust upward the target price whenever a set-aside is in effect for wheat, feed grains, or cotton.

I further understand that if this conference report is accepted by the Congress and becomes law that the administration will raise the target price for wheat for the 1978 crop to $3.40 per bushel. This is needed, is fully justified, and will serve to give some needed flexibility in administering farm legislation not only for 1978 but also for the life of the Food and Agriculture Act of 1977.

Therefore, Madam President, I support acceptance of this conference report (H.R. 6782) and urge my colleagues to do the same. I was hoping for more than this for the farmers and all of rural America, but it appears to be the best we can get under the circumstances.

Mr. ALLEN. Will the Senator yield?

Mr. TALMADGE. I yield such time as I may have to the distinguished Senator from Alabama.

Mr. ALLEN. I thank the distinguished chairman.

Madam President, the distinguished chairman of our Committee on Agriculture (Mr. TALMADGE) said at the conclusion of our conference committee session on the emergency farm legislation last week in response to the question of agreement to the House proposal, "The Senate concurs—reluctantly."

Those words echo my sentiments, Madam President. The Senate had earlier passed legislation of an emergency nature which would have been of great assistance to our farmers. The legislation was passed, agreed to in conference, the conference report on H.R. 6872 was agreed to by the Senate and finally killed in the House under the threat of a Presidential veto. The farmers of Alabama left Washington depressed and distressed, and understandably so.

Now, we have attempted legislatively to pick up the pieces. We would have preferred to do more for our farmers, but realistically, we had to act within the parameters of that which the administration announced it would accept.

Therefore, we are, in our conference report today, merely amending the Food and Agriculture Act of 1977, Public Law 95–113, by authorizing the Secretary of Agriculture to raise the target prices on wheat, feed grains, and upland cotton when a set-aside is in effect, by such amount as he determines appropriate to compensate producers for participation in the set-aside. Further, we have agreed that technical changes are needed in the upland cotton loan computation formula. During consideration of the 1977 farm bill, the members of our committee, in making the decision to base our loan rate on the Northern European price quotation of the Liverpool Index, thought that beyond a shadow of a doubt, the loan rate for upland cotton would be formulated at approximately 48 cents per pound. Unfortunately, the Northern European price took a nosedive the first 2 weeks in October of 1977 and caused the loan rate for 1978 cotton to be set at 44 cents per pound. We are seeking to restore that loan rate by technical changes in the formula to the figure we originally intended. We are also recommending that a floor be set for the loan rate for upland cotton at no less than 48 cents per pound for the 1978–81 crops.

We are giving the executive branch this flexibility in good faith with the hope that due recognition will be given to the serious cost squeeze facing our agricultural producers. We are not acting in naivete. The administration has already stated that the only increase acceptable is an increase in the target price on wheat from $3.00 to $3.40 per bushel. It is our hope that the President will accept the slight increase in the loan rate on upland cotton. I point out that the target price on cotton—52 cents per pound—and the increased loan rate of 48 cents per pound are figures far below the cost of production in the State of Alabama. Let us hope that prices at the marketplace will substantially improve over the next few months to enable the cotton producers of Alabama to make a profit for the first time in the last couple of years. If they do not, many of them face bankruptcy, Madam President.

Thankfully, we have had machinery in place to help our agriculture producers through the programs of the Farmers Home Administration, the Small Business Administration, and the Farm Credit Administration. Many of our Nation's farmers are in debt and we have provided them with loans to make it possible for them to continue producing food and fiber. But you cannot borrow your way out of debt. Our farmers want to be able to make a profit within the marketplace. They do not want Government handouts. They do not want to be paid for not producing. They want a fair return for their efforts and fruits of their labors.

Hopefully, with the programs announced by USDA, providing set-asides for wheat and feed grains and the voluntary set-aside for cotton, along with the expansion of the farmer-held grain reserves and the announced intention to create an international grain reserve, farm prices will show a steady increase in the months ahead. Farm income must be increased whatever the cost.

Even though the provisions contained in this conference report are far less than adequate, Madam President, I trust that my colleagues will approve it without delay, so that our farmers will receive some encouragement that their efforts during the past several months will not have been in vain.

Mr. THURMOND. Mr. President, I rise in support of the conference report on H.R. 6782, the Emergency Agricultural Act of 1978. I commend the able and distinguished members of the conference committee for recognizing the urgency of the current farm crisis and reporting out this emergency legislation.

I am pleased that the committee has given discretionary authority to the Secretary of Agriculture to increase target prices on 1978 through 1981 crops of wheat, feed grains, and upland cotton. The survival of many of our farmers will depend on this new authority given to the Secretary. I hope that the Secretary will now see fit to raise the target prices to levels which will permit farmers to receive a fair return for their 1978 crops.

I am further pleased that the committee has recognized the need to amend the formula for computing loan rates for upland cotton and have increased the borrowing authority of the Com-

modity Credit Corporation. The amended formula provides that the loan rate for cotton shall not be less than $0.48 per pound for the 1978–81 crop years.

The total net income of the U.S. farmers dropped below $20 billion in 1977, the lowest since 1972. This was 10 percent below the 1976 level. Declining farm product prices have led to renewed appeals for a return to 100 percent parity prices. At the present time farm prices are 66 percent of parity.

Farm debt is one of the most accurate barometers of farm distress. Farm debt, as you know, is on the rise. Farm indebtedness increased rapidly in the past year, rising a record 16 percent. Farm debt now totals nearly $120 billion, twice as much as in 1970. Farmers may need more credit but mainly they need better prices.

Mr. President, this bill will not benefit the farmers as much as the bill contained in the Conference Report which the President threatened to veto and which the House defeated. However, it should be helpful and I am pleased to support it.

I think it is in the interest, not only of the farmers, but in the interest of the consumer and in the interest of all the American people, that we take action to help the farmer during this period of crisis. Therefore, I urge my colleagues to support the conference report on H.R. 6782.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. TALMADGE. Madam President, I move to reconsider the vote by which the conference report was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NAVIGATION DEVELOPMENT ACT

The ACTING PRESIDENT pro tempore. The clerk will state H.R. 8309 by title.

The legislative clerk read as follows:

A bill (H.R. 8309) authorizing certain public works on rivers for navigation, and for other purposes.

The Senate continued with the consideration of the bill.

The ACTING PRESIDENT pro tempore. Who yields time?

Mr. ALLEN. Madam President, I suggest the absence of a quorum and ask unanimous consent that it not be charged to either side.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. DOMENICI. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. DOMENICI. Madam President, I ask unanimous consent that the following staff members of the Committee on Environment and Public Works be granted the privilege of the floor during debate and votes on H.R. 8309, the Inland Navigation Act: John Yago, Richard Harris, Bailey Guard, Hal Brayman, Ann Garrabrant, Steve Swain, Phil Cummings, Lee Rawls, Karl Braithwaite, Ric Herod, Joan Ramsay, and Mike Naeve.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. THURMOND. Mr. President, I ask unanimous consent that Mr. Ed Twilley, of my staff, have the privilege of the floor during the consideration and votes on the pending bill.

The PRESIDING OFFICER (Mr. ALLEN). Without objection, it is so ordered.

Mr. ALLEN. Mr. President, on behalf of the distinguished Senator from Louisiana (Mr. JOHNSTON) I ask unanimous consent that the privilege of the floor for Mr. John Walton of Mr. JOHNSTON's staff be granted during consideration of H.R. 8309 and all votes thereon.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAYH. Mr. President, I ask unanimous consent that Eva Lubellan, of my staff, have the privilege of the floor during the debate and votes on this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Chair, will now make an announcement as to the debate time limitation.

Time for the debate on this bill is limited to 7 hours, with 3 hours to be jointly shared by Senators RANDOLPH and LONG or their designees, with 3 hours under the control of Senator BAKER or his designee and with 1 hour under the control of Senator CRANSTON.

The time for debate on any amendments shall be limited to 1 hour except on one amendment each by Senators DOMENICI, DANFORTH, and LONG, on which there shall be 3 hours each; on any amendment to Senator DOMENICI's amendment, on which there shall be 2 hours each; and on one amendment each by Senators GRAVEL and MELCHER, and on three amendments by Senator ALLEN, on each of which there shall be 70 minutes; and 30 minutes on any debatable motion, appeal or point of order. No amendments relative to user fees or lock and dam No. 26 shall be in order today.

Who yields time?

Mr. DOMENICI. Mr. President, I ask unanimous consent that Mary Goedde of Senator HAYAKAWA's staff, Kermit Almstedt and Burleigh Leonard of Senator DANFORTH's staff, Matt Scacozza and Mal Sterrett of the Commerce Committee staff, and Jon DeVore of Senator STEVENS staff be granted the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. I suggest the absence of a quorum and ask unanimous consent that it be assessed equally.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRAVEL addressed the Chair.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. GRAVEL. Mr. President, what is the pending business?

The PRESIDING OFFICER. The pending business is the waterway user bill.

Mr. GRAVEL. Mr. President, the Senate has before it H.R. 8309, the Navigation Development Act. I believe it appropriate at this time to lay out a description of the events over the past several years that have brought us to this point in time.

Locks and dam 26 and waterway user charges have been considered by the Committee on Environment and Public Works and by the Senate for several years.

In 1976 the Subcommittee on Water Resources held extensive hearings on these items, which culminated in a hearing record of 1,120 pages. The Water Resources Development Act of 1976 contained authorizations for locks and dam 26 and a waterway user charge designed to recover 50 percent of both construction and operation and maintenance. That measure was passed by the Senate, but those two provisions were dropped in conference in order to get a bill on the last day of the 94th Congress.

Another set of extensive hearings were held in 1977 on locks and dam 26 and user charges. The hearing record numbered 1.652 pages. In June of 1977 the Committee on Environment and Public Works brought to the Senate floor still another water resources development bill which contained river basin monetary authorizations and projects in over 30 States. That legislation was amended on the floor to include locks and dam 26 and a waterway user charge which would recover 50 percent of construction and 100 percent of operation and maintenance.

The bill was passed by the Senate and sent to the House. The House considered that the waterway user charge was a revenue-raising measure which should have originated in the House of Representatives. The bill was therefore held at the Speaker's desk and never considered.

Now, Mr. President, we are considering locks and dam 26 and waterway user charges for a third time. The House has sent us a bill, H.R. 8309, which would institute a 4-cent per gallon fuel tax on liquid fuel used by commercial shallow-

draft vessels, to increase to 6 cents per gallon in 1981.

There are a number of amendments which will be offered to H.R. 8309. Due to the absence today of several Members having a deep interest in locks and dam 26 and user charges, those amendments will not be taken up today. I would like at this time to outline for my colleagues the activities which will take place during these 3 days of debate.

When I have finished my opening remarks and have yielded the floor to the Senator who is carrying the minority side (Mr. DOMENICI), I will offer a committee amendment which will contain items relating to eight projects, authorization of river basin monetary authorizations to carry that program through fiscal year 1979, and authorization for a macroeconomic study to determine the competitive effect of Federal and State subsidies and taxes on the different modes of inland freight transportation. The river basins and the study were both included in the bill which passed the Senate last June, and the projects were approved by the Public Works Committee subsequent to passage of that bill.

When the committee amendment has been adopted, we will move on to consideration of individual project amendments exclusive of locks and dam 26 and user charges.

It is my understanding that there will be an amendment that will be initiated by Senator CRANSTON with respect to the Big Pine Flat exemption, to strike it from the committee amendment which will be offered.

There would be in that case a 1-hour time agreement on that amendment.

After disposal of that amendment, other project amendments will be offered by various Members. There will be as many, probably, as 45 or 50 of these which I hope will be disposed of in a very timely fashion.

As early as possible on Wednesday, Senator RANDOLPH, distinguished chairman of the Committee on Environment and Public Works, will offer a second committee amendment to H.R. 8309. This will add to the House bill all the project authorizations and modifications which were contained in the bill which passed the Senate last year. These constitute 45 projects in 30 States, at an estimated Federal cost of about $374 million. I wish to make it clear to my colleagues having an interest in those projects that they do not need to offer separate amendments to include them in H.R. 8309. That will be taken care of by Senator RANDOLPH's amendment.

Following disposition of Senator RANDOLPH's amendment, the Senate will move to consider amendments to locks and dam 26 and water user charges. Final vote will be no later than 2 p.m. on Thursday, May 4.

Mr. President, at this time, I yield to my distinguished colleague from New Mexico for his opening comments.

The PRESIDING OFFICER. The Chair recognizes the distinguished Senator from New Mexico (Mr. DOMENICI).

Mr. DOMENICI. I thank the Chair.

Mr. President, pursuant to the order entered, I have been designated by Senator BAKER for the 3 hours on the bill, as noted when the Chair announced the unanimous-consent agreement.

Mr. President, I welcome this opportunity to offer a few comments on the legislation we will be considering during the next 2 or 3 days.

Tomorrow, the Senate turns to the related issues of waterway user charges and locks and dam 26. These issues, I recognize, may be tiring ones for many of my colleagues. They, as well as I, thought we had resolved these points on June 22 of last year, when we passed a comprehensive user charge proposal in the Senate. But our action was ignored by the House. In an effort to avoid the issue, the House has let our Senate-passed proposal for a comprehensive waterway user charge and our request for a conference on it rest on the Speaker's desk.

It is not my point at this time to reiterate all the arguments supporting the need for user charges: the distortions to national transportation engendered by the free ride given the barge industry; the simple unfairness to the American taxpayer of this kind of support to a few companies and one favored mode of freight transportation.

Nothing really has changed since June 22. The Army Corps of Engineers is still spending hundreds of millions of dollars each year as a 100-percent subsidy for the barge companies. The waterway interests continue to wail in terror when it is suggested they pay anything approaching a reasonable or fair share of these costs. Other types of water users—irrigators, hydropower users, municipalities, industries receiving water—still repay the Federal Government for their share of the costs of corps and other Federal water projects. Only the barge companies continue to enjoy to float along at full Federal support.

In order to place our discussion of the next couple of days into perspective, it may be helpful to recall the chronology of this issue, and the related one of the reconstruction of locks and dam 26 on the Mississippi River.

In the closing days of the 94th Congress, the Committee on Public Works, as it was then known, reported an omnibus water resources bill that authorized construction of a new locks and dam 26, plus the development of a system of waterway user charges. Faced with the possibility of a filibuster by various Members, the Senate dropped both those related provisions from the bill. At that time, the chairman of the Subcommittee on Water Resources (Mr. GRAVEL) and I pledged to do all that we could to have these issues resolved by the Senate early in 1977.

As a result, several pieces of legislation were introduced affecting locks and dam 26 and user charges. These included S. 712 and S. 790. Following extensive hearings and markups last spring, the Committee on Commerce, Science and Transportation and the Committee on Environment and Public Works jointly reported S. 790 to the floor. Both bills authorized locks and dam 26. The Public Works version also phased-in over 10 years a system of waterway user charges; the Commerce Committee version did not.

S. 790, as such, was never considered in the Senate. When an omnibus Water Resources Development Act (S. 1529) was brought to the Senate floor last June 21, I offered the Environment and Public Works Committee version of S. 790 as an amendment. Under the amendment's timetable, a user charge system would, after the 10-year phasein, recover all of the Corps of Engineers annual spending for operating and maintaining the inland waterway system, plus half the construction costs on new waterway improvements. This schedule was intended to place waterway development more in line with other water resources and transportation programs, where the direct beneficiaries of the water—hydropower, irrigation, water supply—repay the costs. It is also similar to the philosophy that the user of roads and the airways repay the Federal Government virtually all of the associated Federal expenditures.

After considering various amendments, the Senate agreed to my amendment on a vote of 71 to 20. The text of S. 1529 was then substituted for a House-passed water resources bill (H.R. 5885), and the Senate requested a conference.

Normally, a proposal such as ours would receive at least some consideration in a conference. But the House ignored the request for a conference. Instead, the House decided to take a separate tact, one seeking to avoid any consideration of the Senate's June 22 decision. So the House developed a new bill, H.R. 8309.

That bill was passed by the House last fall and sent to the Senate. In an effort to expedite consideration and to avoid what would have required a time-consuming, three-committee joint referral process, I was able to have the bill placed immediately on the Senate Calendar. There it has rested ever since, with occasional false starts of floor action, called off at the last minute.

Until recently, it was my intention to ask the Senate to reaffirm our position established last June 22 by approving the comprehensive 100 percent, 50 percent cost recovery program. I believe that represents a fair, long-term solution to the issue.

But, of course, I recognize the fact that the House has moved, however modestly, and that many of my colleagues are seeking a reasonable compromise of the issue. One of the basic areas of disagreement, of course, has ended: we were no longer arguing "whether," but "how much." The argument became whether user charges will be in any way effective, or whether it will be a basic cosmetic painting of the same old subsidies.

The compromise approach that Senator STEVENSON and I have introduced, I believe, is the only one that will assure passage into law of the construction of locks and dam 26 during this Congress. I hope that my colleagues will vote to

support our compromise, to support more balanced national transportation policy which would insure such a balanced policy—if not now, at least in the future—and to reiterate the Senate's position of last June, clearly indicating that the Senate wanted to move in that direction.

Mr. President, I wish also to comment on some of the other water resources projects we will be asked to consider today. I am sure that most of the ones that have been submitted for printing or discussed with me or with staff will be noncontroversial and accepted. Some, however, appear to raise problems of the basic Federal approach to water projects. While there may be an apparent need for the change, these proposals deserve a hearing, with testimony from interested persons and groups. I hope that my colleagues will understand that any reluctance by the floor managers to accept a proposal in no way is an effort to lessen the significance of the proposal. Rather, it is an effort to assure that we are proceeding with full knowledge of the facts and that hearings have been held. I would also caution constraint on this legislation. In his letter to the Senate discussing waterway user charges, DOT Secretary Brock Adams made the following significant statement:

> The President has asked me to convey his hope that this bill will not be used as a vehicle for additional costly or extraneous amendments that could jeopardize final enactment of this needed legislation.

I call to the attention of the Senate the fact that the full text of that letter is found in the RECORD. It was attached to the amendment offered by Senator STEVENSON and me, to which I have referred previously in these remarks.

Aside from addressing the issue of additional costly or extraneous amendments, this letter goes into detail as to the President's desire that we begin now to initiate some user fee system for recoupment of capital improvements—not now, not any that are presently under construction, but those that might start in the future.

That letter also indicates that the 10-percent recoupment for future new projects not now under construction, which 10 percent would be recovered in the first 10 years immediately after the construction, will receive the support of the President if it finds its way into this bill and that the bill would be signed if such is the desire of the Senate and the House of Representatives as a means of beginning to initiate some plan for recoupment.

I point out that the projects that we included in last year's bill, and serve as the basis for this bill, will cost the taxpayers at a minimum $1,258,959,000. That is before any inflation for which we have no authorizing control and it is adding no cost for various projects that could pose tremendous costs if they are added here today or in the next 2 or 3 days.

Mr. President, I reserve the remainder of my time.

Mr. GRAVEL. Mr. President, I ask unanimous consent that Bill Hoffman, Jerry Gauche, Tyler Jones, and Heida Boucher, of my staff, be accorded the privilege of the floor during consideration of this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRAVEL. Mr. President, I ask unanimous consent to have printed in the RECORD a statement by the distinguished chairman of the Committee on Environment and Public Works, the Senator from West Virginia (Mr. RANDOLPH).

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENT BY SENATOR RANDOLPH

The measure which comes before the Senate today is of critical importance. Our waters are our most abundant resource and the projects which we shall discuss today are important in the development and use of these waters.

This legislation is the culmination of three years activity by the Committee on Environment and Public Works. Locks and Dam 26 and user charges have been under consideration for this length of time. The Senate on June 22, of last year passed a bill (H.R. 5885) which authorized Locks and Dam 26 and waterway user charges. This bill has not been acted on by the House which has instead returned to us H.R. 8309 for consideration. This legislation which we consider today will be an opportunity to dispose of this issue and authorize new projects and modifications of existing authorizations to be carried out by the Army Corps of Engineers.

Because of the unique way that this measure has come before the Senate, committee amendments to be offered by myself and Senator Gravel will provide the basis of project authorizations. These projects have been carefully considered by the Committee on Environment and Public Works both through hearings and markup. These projects will enhance our water resource management and be useful to growth and development for years to come.

The projects recommended for authorization by the Committee will continue the important development of our water resources. Projects are authorized for flood control, water supply, navigation, beach restoration and other purposes. These are useful projects and respond to various local water problems. Seventeen States and one territory have projects in this bill.

The Committee amendments authorize construction of 12 projects recommended by the Chief of Engineers. These projects were developed from studies initiated by the Committee on Environment and Public Works. These projects are located in all regions of the nation and are of many types. The measure also continues a new authorization procedure for the Phase I engineering and design stage of project development. Five projects of this type authorization are recommended in the bill.

The legislation also contains several provisions amending the authority of the Corps of Engineers to carry out general activities. These are important changes in procedures of the Corps and will be of benefit to water resources development generally. Several of these deserve special recognition. I have long been concerned with the question of dam safety. The Committee in this legislation addresses this problem. Section 407 specifically provides that each report of the Chief of Engineers and the Soil Conservation Service which recommend impoundment of water as solution to a problem shall specifically report on factors involving dam safety in the project document. This is an important step forward and hopefully will do much to provide Congress with sufficient data on the safety of our authorized dams.

Finally, section 421 authorizes the Corps under Section 208 of the Flood Control Act of 1954 to survey and plan small stream clearing and snagging projects for local governments. Quite often, the study of a local flooding problem will not lead to an economically feasible solution under Federal criteria. This does not mean that the project is not of local importance. This new authorization to the Corps will allow it to plan, design and prepare specifications for a project which the local government will then construct with other funds. Under this authority Federal revenue sharing funds may be used by the local government for this purpose.

These amendments contain many excellent provisions and many necessary projects. I recommend that the members of the Senate give careful consideration of this measure. I urge the passage of H.R. 8309.

AMENDMENT NO. 1831

(Purpose: To authorize projects for river and harbor improvement recommended by the Committee on Environment and Public Works)

Mr. GRAVEL. Mr. President, I send amendment No. 1831, as modified, to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Alaska (Mr. GRAVEL) proposes amendment numbered 1831, as modified.

Mr. GRAVEL. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 17, line 5, insert the following:

TITLE IV—WATER RESOURCE PROJECTS

SEC. 401. (a) The Secretary of the Army shall on or before March 1, 1979, establish a Tennessee-Tombigbee Human Resource Center (hereinafter referred to as the "Center").

(b)(1) The Center shall consist of a Board of Directors and executive staff with offices located in the vicinity of the Tennessee-Tombigbee Waterway Project (hereinafter the "project").

(2)(a) The Board of Directors shall consist of seven members, one each to be selected by the following agencies and organizations:

(i) the Corps of Engineers;

(ii) the Department of Commerce, Office of Minority Business Enterprise;

(iii) the Department of Labor;

(iv) the Tennessee-Tombigbee Waterway Development Authority;

(v) the Minority Peoples Council;

(vi) the National Association for the Advancement of Colored People; and

(vii) a representative to be jointly selected by the Governors of Tennessee, Alabama, and Mississippi.

(b) The representative selected by the Governors and the representative of the Corps of Engineers shall serve as cochairmen of the Board of Directors.

(3) The staff of the Center shall consist of an executive director selected by the Board of Directors, a majority concurring, and such additional staff as the Board shall deem necessary to assist the Board in carrying out the purposes of this section. The executive staff shall be selected by the execu-

tive director subject to the approval of the Board of Directors.

(c) The purposes of the Center shall be—

(1) to oversee minority employment on the project to determine whether minority employment goals are achieved;

(2) to oversee project contracting to determine whether minority firms are afforded a reasonable opportunity to participate in project contracts and subcontracts;

(3) to oversee planning and policies which affect or control the construction, design or operation of the project to determine whether minorities are appropriately represented and whether project facilities and benefits are equitably distributed among communities affected by the project;

(4) to provide information and assistance to minorities and minority-owned firms regarding the availability of employment and construction opportunities; and

(5) to assist in the coordination of programs which affect the utilization of minority resources.

(d) The Center is authorized and directed to—

(1) establish and maintain a central office and staff as is necessary to carry out the purposes of this section, including such branch offices as are necessary to serve as information clearinghouses, all to be located within the vicinity of the project;

(2) to prepare and submit an annual report to the Secretary of the Army and to Congress, which report shall be due on July 1 of each year; and

(3) to consult with Federal and State agencies and federally funded organizations, including the recruitment and training program, the Federation of Southern Cooperatives, and the National Rural Center, to assure that adequate training is available to minorities and to assist the coordination of such programs.

(e) The annual report of the Center shall include—

(1) an inventory of project employment indicating the proportion of minorities employed at various skill and pay levels;

(2) an inventory of project contracts indicating the proportion of contracts and subcontracts awarded to minority enterprises;

(3) a description of minority involvement in Federal, State, and local organizations which control or influence decisions regarding the design, location, or operation of facilities of the Tennessee-Tombigbee Waterway project, including an analysis of the effect of such decisions upon the distribution of project benefits, including secondary benefits, among communities affected by the project;

(4) a description of policies and programs of the Corps of Engineers and other Federal and State agencies which have been undertaken or are planned for the purpose of enhancing the utilization of or which affect the utilization of minority resources in the construction of the project, including an evaluation of such programs and policies; and

(5) the findings of the Board of Directors with regard to the adequacy and effectiveness of programs and policies related to project construction and operation and planning for secondary project benefits from the standpoint of the utilization and development of minority resources.

(f)(1) The Department of the Army, and the Corps of Engineers shall provide the Center with such relevant information as may be requested by the Center in connection with the performance of its functions.

(2) In furtherance of the purposes of this section the Center is authorized to consult with such agencies, individuals, and organizations as the Board of Directors deems appropriate, including the Tennessee-Tombigbee Construction Assistance Center, the National Rural Center, the Federation of Southern Cooperatives, and the Southwest Tennessee Area Development Association.

(g) There is authorized to be appropriated up to $1,500,000 in each of fiscal years 1979 through 1986, for the purpose of this section. In order to expedite establishment of the Tennessee Tombigbee Minority Resources Center authorized by this section, there is authorized to be expended not to exceed $1,000,000 in fiscal year 1978 from construction general funds appropriated to the United Sttaes Army Corps of Engineers for the Tennessee-Tombigbee Waterway, Alabama and Mississippi. None of these funds should be charged against the economic costs of the project.

SEC. 402. The Secretary of the Army acting through the Chief of Engineers is hereby authorized to cause a survey to be made at Kinnickinnic River, Milwaukee County, Wisconsin, for flood control and allied purposes, at an estimated cost of $300,000 and to submit a report thereon to Congress with recommendations.

SEC. 403. The portion of the project for the Nansemond River, Virginia, from the United States Highway 460 Bridge at Suffolk, Virginia, to the upstream project limits at river mile 18.66, a distance of approximately 2,500 feet, authorized by section 1 of the Rivers and Harbors Act of August 11, 1888 (25 Stat. 410), and modified by section of the River and Harbor Act of July 3, 1930 (46 Stat. 922), shall hereby be deauthorized on the date of enactment of this Act.

SEC. 404. Section 160 of Public Law 94–587, the Water Resources Development Act of 1976, is hereby amended to delete the last sentence thereof and to delete the words after the word "recommendations" in the sentence immediately preceding the last sentence and substitute in lieu thereof the words "of the Chief of Engineers in his report dated February 8, 1977, at an estimated cost of $11,000,000.".

SEC. 405. Section 173 of Public Law 94–587, the Water Resources Development Act of 1976, is hereby amended to delete the last sentence thereof and to delete the words after the word "report" in line 5 and substitute in lieu thereof the words "of the Chief of Engineers dated March 30, 1977, at an estimated Federal cost of $7,231,000.".

SEC. 406. Section 109 of Public Law 94–587, the Water Resources Development Act of 1976, is hereby amended to delete the last sentence thereof and to delete the words after "recommendations" and substitute in lieu thereof the words "of the Chief of Engineers dated September 27, 1977, at an estimated cost of $700,000.".

SEC. 407. Notwithstanding any other provision of law, to the extent that water regulated by Pine Flat Dam in California, authorized by section 10 of the Act of December 22, 1944 (58 Stat. 887), constitutes a supplemental source of hydroelectric power and irrigation supply, the provisions of the Act of June 16, 1938, relating to the Colorado-Big Thompson project in Colorado are hereby made equally applicable to lands in the Kings River and Tulare Lake Basin.

SEC. 408. The project for navigation at Houston Ship Channel (Greens Bayou), Texas, authorized under section 301 of the River and Harbor Act of 1965 (79 Stat. 1091) is hereby modified to authorize and direct the Secretary of the Army, acting through the Chief of Engineers, to perform such dredging operations as are necessary to maintain a forty-foot project depth in that section of Greens Bayou from mile 0 to mile 0.34 as described in House Document Numbered 257, Eighty-ninth Congress.

SEC. 409. (a) The Secretary of the Army is prohibited from determining the forty-five-acre cabin site in the South Recreation Area at Conchas Lake, New Mexico, to be excess of project needs prior to 1996, unless such a determination is agreed to by the Governor of the State of New Mexico or his designee.

(b) The Secretary of the Army shall not require the removal or sale and purchase of existing cabins, cottages, or other privately owned improvements located on the site referred to in subsection (a) of this section prior to 1996, unless agreed to by the Governor of the State of New Mexico or his designee. Existing and prospective lease arrangements shall reflect the requirements of this section.

SEC. 410. Funds appropriated for fiscal years 1978 and 1979 may be expended notwithstanding the provisions of section 221 of the Flood Control Act of 1970 (Public Law 91–611) for the following projects:

(1) Deer Creek Lake, Ohio;

(2) Delaware Lake, Ohio;

(3) Dillon Lake, Ohio;

(4) Paint Creek Lake, Ohio;

(5) C. J. Brown Dam and Reservoir, Ohio; and

(6) Michael J. Kirwan Dam and Reservoir, Ohio.

TITLE V—RIVER BASIN MONETARY AUTHORIZATIONS

SEC. 501. In addition to previous authorizations, there is hereby authorized to be appropriated for the prosecution of the comprehensive plan of development of each river basin under the jurisdiction of the Secretary of the Army referred to in the first column below, which was basically authorized by the Act referred to by date of enactment in the second column below, an amount not to exceed that shown opposite such river basin in the third column below:

[Dollars in millions]

Basin	*Act of Congress*	*Amount*
Alabama-Coosa River Basin	Mar. 2, 1945	$3
Arkansas River Basin	June 28, 1938	9
Brazos River Basin	Sept. 3, 1954	24
Central and Southern Florida	June 30, 1948	2
Columbia River Basin	June 28, 1938	53
Mississippi River and tributaries	May 15, 1928	300
Missouri River Basin	June 28, 1938	74
North Branch, Susquehanna River Basin	July 3, 1958	30
Ohio River Basin	June 22, 1936	20
Ouachita River Basin	May 17, 1950	2
Red River Waterway	Aug. 13, 1968	120
San Joaquin River Basin	Dec. 22, 1944	65
Santa Ana River Basin	June 22, 1936	1
South Platte River Basin	May 17, 1950	7
Tampa Harbor	Dec. 31, 1970	21
Upper Mississippi River Basin	June 28, 1938	3

SEC. 502. The above authorization for the Columbia River Basin shall include an amount not to exceed $1,000,000 which shall be available for the local flood protection projects authorized by section 204 of the Flood Control Act of 1950 (64 Stat. 180), thereby increasing the total authorization for said local flood protection projects to a sum not to exceed $16,000,000.

SEC. 503. The total amount authorized to be appropriated by this title shall not exceed $734,000,000.

SEC. 504. This title may be cited as the "River Basin Monetary Authorization Act of 1977".

TITLE VI—MACROECONOMIC INLAND FREIGHT TRANSPORTATION STUDY

SEC. 601. This title may be cited as "The Comparative Macroeconomic Inland Freight Transportation Study Act of 1977".

SEC. 602. The Congress finds that there is a need to determine the competitive effect

of Federal and State subsidies, direct and indirect, and taxes on the different modes of inland freight transportation.

SEC. 603. The Secretary of Transportation is directed to conduct a thorough and complete study regarding the economic impact and competitive effects of taxes, subsidies, user fees, and other similar charges on the different modes of inland freight transportation. Such study shall include an analysis of the amount and competitive effect of Federal and State subsidies, direct and indirect, and taxes on the different modes of inland freight transportation, and the types the user charge, if any, that would be equitable to all modes.

SEC. 604. The Secretary of Transportation shall submit to the President and the Congress a final report containing the results of the study conducted under subsection 503 within eighteen months after the date of enactment of this Act. Such report shall include such recommended legislation and administrative actions as the Secretary deems necessary and appropriate.

SEC. 605. There are authorized to be appropriated not more than $1,000,000 to the Secretary of Transportation to carry out the purposes of this section.

Mr. GRAVEL. Mr. President, the amendment I am offering on behalf of the Committee on Environment and Public Works would add three new titles to H.R. 8309.

A new title IV would contain modifications of eight specific projects. These projects were approved by the Committee following passage of H.R. 5885 last June. While hearings as such were not held on them, the Committee consided them carefully and determined them to be meritorious and without significant controversy. I ask unanimous consent that a description of these items will be printed in the RECORD at this point in my remarks.

There being no objection, the description was ordered to be printed in the RECORD, as follows:

COMMITTEE AMENDMENT

Section 401. Directs the Secretary of the Army to establish a Minority Resource Center to oversee minority involvement in planning and construction of the Tennessee-Tombigbee Waterway project. It authorizes $1.5 million annually and requires an annual report on the level and quality of minority participation in activities associated with this project.

Section 402. This section authorizes the Corps of Engineers to conduct a feasibility study to determine possible solutions to flood control and associated problems on the Kinnickinnic River, Wisconsin, in the vicinity of Milwaukee. Legislative authorization is required for this study because the area in question has never been studied by the Corps.

Section 403. Deauthorization of a portion of the navigation project on the Nansemond River in the vicinity of Suffolk, Virginia. there is currently only one commercial user of the navigation channel, who intends to convert to another mode of transportation in the near future. The city of Suffolk wants to build a bridge across the river, but cannot proceed until the navigation project is deauthorized, as the bridge would be too low to permit navigation. This section does not entail any cost to the Federal Government.

Sections 404 and 406 remove the conditional authorization for Phase I of the Susitna River project, Alaska, and the Santa Ana project, California. The Water Resources Development Act of 1976 authorized Phase I of advanced engineering and design for these two projects, subject to the final approval of the Chief of Engineers and notification to the Congress of such approval. This language was incorporated into the 1976 Act because the Susitna and Santa Ana projects did not have a final Chief's report at the time the bill was enacted. Both projects now have Chief's approval, but the Office of Management and Budget has not permitted notification to Congress of that approval. These sections remove the requirement for such notification so that the Corps of Engineers can proceed with the studies necessary to determine the full scope and effects of the proposed projects. These amendments does not in any way authorize construction until such scope and effects are determined and the Congress reconsiders the projects. They will, however, permit the Corps to proceed with studies authorized last year.

Section 405. The Water Resources Development Act of 1976 authorized construction of the Bassett Creek, Minnesota, local flood control project subject to final approval of the Chief of Engineers and notification to the Congress of such approval. As in the preceding section, the Chief has approved the final report but the Congress has not been notified. The report has been with the Office of Management and Budget since April of this year. The estimated Federal share is $7.2 million. As the project is badly needed and has received the endorsement of the Chief of Engineers, this section would allow the Corps to proceed with construction as soon as the necessary money is appropriated.

Section 407. Exempts the Big Pine Flat project in California from the 160-acre irrigation limitation under the Bureau of Reclamation.

Section 408. Authorizes the Corps to maintain the navigation channel at Green's Bayou, Texas, at a depth of 40 feet. The original authorization of Green's Bayou and the Houston Ship Channel authorized the Corps to dredge and maintain both channels at 36 feet. A subsequent modification increased the depth of the Houston Ship Channel to 40 feet. In order to expedite continuing navigation, the Port of Houston, at its own expense, dredged the Green's Bayou Channel to 40 feet. This amendment would authorize the Corps to maintain the channel to its current depth. This work would not entail any additional money over that needed to maintain the channel at the authorized depth of 36 feet.

Section 409. This section relates to existing cabins at Conchas Lake, New Mexico. In 1946 the Corps of Engineers agreed to the construction of private recreational cabins on Federal property. The Corps has now decided not to renew the leases on the land, and the cabins must be phased out by 1982. This section extends existing leases through 1996, allowing for a review of the situation.

Section 410. Exempts six Ohio Corps of Engineers projects from the constructural agreements required by section 221 of the 1970 Flood Control River and Harbor Act. Section 221 requires that non-Federal interest enter into binding agreements guaranteeing payment of their share of project construction and/or operation and maintenance. This section has resulted in problems with several States in which the State constitution prohibits the binding of future legislatures to the appropriation of funds. Ohio is one of these States. The six projects to which this section applies all have funds appropriated for on-going work in FY 1978. Pending a thorough review of section 221 by the Water Resources next year, this section exempts these projects from this requirement for FY 1978 and FY 1979 only. In no way does the Committee intend to relieve the State of Ohio of its obligations in constructing or maintaining these projects.

Mr. GRAVEL. Mr. President, the new title V addresses river basin monetary authorizations. Projects in this category have all been authorized in the past. This language merely provides authority needed for funding continuing construction. A total of $734 million is authorized, approximately $143 million of which is for fiscal year 1978 and the remainder for fiscal year 1979.

Title VI authorizes a macroeconomic study to determine the competitive effect of Federal and State subsidies and taxes on the different modes of inland freight transportation. This provision was a part of H.R. 5885 as it passed the Senate last year.

Mr. President, the Senator from California has just arrived on the spot, and I know that he wants to now address himself to one of the items in this amendment that I am proposing.

I yield the floor to him.

The PRESIDING OFFICER. The Senator from Alaska will yield time to the Senator from California.

Mr. GRAVEL. This amendment is under a specific time agreement. I think the time will be between Senator DOMENICI and myself under controlled time. So I am happy to yield time to the Senator from California.

Mr. CRANSTON. Mr. President, I thank the Senator very much.

UP AMENDMENT NO. 1260

Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The Chair will state that the amendment is not in order at this time inasmuch as the time for consideration of the amendment of the Senator from Alaska on behalf of the committee has not expired. However, if the amendment is an amendment to the amendment, that can be offered as soon as time has expired.

Mr. GRAVEL. Mr. President, I ask unanimous consent that notwithstanding the time not having expired we permit the Senator from California to offer his amendment at this time.

The PRESIDING OFFICER. Is there objection to the request?

Mr. DOMENICI. No objection.

The PRESIDING OFFICER. Hearing no objection, the amendment is in order, and the amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from California (Mr. CRANSTON) proposes an unprinted amendment numbered 1260.

Strike out section 407 in such amendment.

Mr. CRANSTON. Mr. President, this amendment deletes from Senator GRAVEL's amendment a section exempting Kings River water users from Federal reclamation law. At the request of Senator WALLOP, the Senate Environment and Public Works Committee adopted this provision exempting from Federal reclamation law lands in my State of California which receive water from Pine Flat Dam. It may well be that upon careful consideration such an ex-

emption can be justified, and if so, it will have my support. However, I strongly object to the Environment and Public Works Committee's premature action.

The Environment and Public Works Committee adopted this exemption without holding any hearings on the issue. Since 1963 there has been litigation pending on the question of whether the Kings River farmers are subject to the excess land provision of reclamation law. The ninth circuit court ruled in August 1977 that the water users who receive Kings River water for irrigation purposes are subject to Federal reclamation law. The Public Works Committee action would reverse the court's decision after 14 years of litigation.

Moreover, the Public Works Committee's action singles out one irrigation area for an exemption without considering claims of other farmers in California and other States who also believe they should be exempted from reclamation law. For example, in California, the Imperial Valley growers have an argument for exemption which I believe to be more meritorious than the Kings River farmers, even though the Kings River argument may prove, upon examination and study, to be on balance, meritorious. A unilateral exemption now for Kings River would be premature and would not provide equal treatment to other claimants.

Mr. President, this is not simply a question of 1,000- or 2,000-acre family-owned farms being exempted from the 160-acre limitation. One ranch comprising approximately 90,000 acres and another ranch of approximately 60,000 acres, both in the Tulare Lake Basin, would be exempted from the 160-acre limitation.

No one seems to know how much subsidy is involved in the Federal storage of Kings River water used for irrigation purposes. I have heard estimates ranging from $1 to $100 per acre-foot. Thus, the exemption might involve a subsidy of several million dollars a year to a single farm. We should be aware of how many taxpayers' dollars—if any—we would be providing to the Kings River farmers before we adopt any exemption from reclamation law.

Proponents of exempting the Kings River argue that the exemption is justified because Pine Flat Dam is a Corps of Engineers, not a Bureau of Reclamation project. The ninth circuit court concluded there was no merit in this argument. The court carefully reviewed the legislative history of the 1944 Flood Control Act which authorized the construction of Pine Flat Dam, and concluded that the Congress intended section 8 of that act to apply to Pine Flat Dam. Section 8 specifies that a Corps of Engineers project with irrigation as an authorized project purpose would be subject to Federal reclamation law. Even if one disagrees with the court's finding, the fact remains that there are nine other corps projects in California alone having irrigation as a purpose where Federal reclamation law is or will be applied. Why single out just 1 of the 10 for exemption?

Proponents of exempting the Pine Flat Dam also argue that the exemption is justified because all land to be served was in private hands, because local water users had appropriated most if not all Kings River water and had constructed extensive irrigation works in the area, and because no new lands were brought under cultivation as a result of the project.

The court found the obvious difficulty with this argument is that it is contrary to the whole tenor of the legislative history. In fact, the legislative history was waged on precisely these grounds. The Congress was repeatedly informed that all lands to be served by the Pine Flat project were in private hands, that local water users had appropriated most Kings River water and had constructed extensive irrigation works in the area, and that no new lands would be brought under irrigation as a result of the project. Knowing these facts, the Congress decided the Pine Flat Dam should be subject to reclamation law. The court noted that the Senate rejected two amendments specifically designed to exempt the Pine Flat Dam from the acreage limitation. One amendment would have made reclamation law inapplicable to any dam or reservoir which supplements any existing locally operated irrigation systems or other locally operated water facilities. Moreover, the court found that normally the function of federally financed reclamation projects is to furnish water storage needed to conserve and regulate the existing water supply—not to bring new lands under cultivation.

Certainly the arguments of the court should be looked into before acting on an amendment to exempt the Pine Flat Dam from reclamation law.

Mr. President, there is no need for immediate action today to exempt the Pine Flat Dam. The U.S. District Court has directed the Secretary of Interior to prepare an environmental impact statement on the proposed new regulations on the disposal of excess land. In the meantime, no owner will be required to sell his excess land. This gives Congress ample time to hold hearings on reclamation law and consider the need for revisions in the basic law and the various claims for special exemptions. The State Energy and Natural Resources Committee is doing just that.

The Senate Energy and Natural Resources Committee is the committee which has the jurisdiction over reclamation law. On April 12 and 13 the Energy Committee held hearings on this issue and received testimony from the administration and representatives of the Kings River Water Association specifically on the question of exempting Pine Flat Dam from the 160-acre limitation. The fact that the Kings River water users testified before the Senate Energy Committee demonstrates that the water users are aware that the Energy Committee is the appropriate forum to consider exemptions to reclamation law—not the Environment and Public Works Committee which adopted this exemption language in the Gravel amendment.

Mr. President, I want to make it clear that I have made no decision on whether Kings River water users should be exempted from the 160-acre limitation. However, this is a highly controversial and complicated matter which has been argued by the experts for almost 35 years. I strongly feel the procedure being undertaken by the Senate Energy and Natural Resources Committee—holding and reviewing new hearings pro and con on the issue—is the appropriate one. We must consider the lengthy history of the dispute with care, so that our final decision is the fairest and most reasonable for the affected farmers and the American people whose dollars are subsidizing these water deliveries.

The administration supports removing the Kings River exemption from this bill. So does Congressman JOHN KREBS, whose district includes the affected area and who is a supporter of an exemption for the Kings River, but does not believe this bill is the appropriate legislative procedure.

I urge my colleagues to support my amendment which, in effect, would defer the decision on whether to exempt the Pine Flat Dam and Kings River water users from reclamation law.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI. Mr. President, I am going to yield the time on this amendment to the junior Senator from Wyoming.

The PRESIDING OFFICER. The Chair recognizes the distinguished Senator from Wyoming.

Mr. DOMENICI. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DOMENICI. Was there 1 hour on this amendment to be equally divided?

The PRESIDING OFFICER. Yes.

Mr. DOMENICI. I thank the Chair.

Mr WALLOP. I thank the Chair, and I thank my colleague from New Mexico.

Mr. President, I would say, in resisting this amendment, that I have no quarrel with what the senior Senator from California's says concerning other problems dealing with the 160-acre limitation in California. Many of us do in the rest of the country share them. But, Mr. President. the Pine Flat Dam on the Kings River is deserving of an exemption from the excess land provisions of reclamation law simply because it is not a reclamation project. I do not intend to be facetious, for we all know that it is a Corps of Engineers project rather than a Bureau of Reclamation project. What I mean to describe in detail is that here we have none of the elements classically or commonly associated with the construction of a reclamation project which would justify the application of reclamation law.

The construction of this project did not result in the reclaiming of any arid lands; it did not result in the improvement of any public lands. No distribution works were built at Federal expense, and no additional water was made available through the construction of the dam. This is, in fact, a unique situation. The district court which considered this issue found that there is no similar situation

anywhere in the country where the Government has taken a river in which the water was 100 percent appropriated, built a dam across the river primarily for flood control, and then with no other investment by the Government subjected the project to reclamation law and the limitions inherent in it. In fact, there were no public lands in the Kings River service area. All of the land was privately owned and developed prior to the authorization of the dam. There is, in fact, no reason why the reclamation law should ever have been applied in this case.

Our colleague, Senator STEVENS, the senior Senator from Alaska, had occasion as the Solicitor of the Department of Interior to extensively consider the Kings River case. It was, and is, his opinion that this exemption should have been enacted 30 years ago.

Twice the local people have relied on the good faith of their Government, and twice they have been bitterly disappointed. First, they were assured from the beginning that this would be a flood control project and that their lands would not come under reclamation law. On that occasion they supported the project.

To have desired the Federal Government to build a reclamation project on the Kings River would have been silly on the face of it because the farmers did not need a reclamation project, particularly if it would subject them to acreage limitations and to the restrictions of reclamation law.

Prior to the construction of the dam the Kings River was the most completely used of any California stream, and even now, as I have said, the water is 100 percent appropriated by the farmers. When rights were in doubt the irrigation districts purchased those rights.

Even after the dam was authorized, the Kings River area was continually assured they were not subject to reclamation law, until a Presidential order changed that interpretation after World War II.

Second, the local people were assured, that once they had paid the Government the sums which represented the value to enhanced irrigation, the principle of "payout" would apply, and they would be exempted from acreage limitations. That, too, was a promise repeatedly made and not fulfilled by this Government.

The Department of the Interior announced this opinion beginning in 1914; the Associate Solicitor confirmed it in 1947; the Solicitor confirmed it in 1957; and finally Senator STEVENS, when he was Solicitor, reconfirmed it in 1961.

Based upon these assurances, the farmers did in fact pay out the portion of the project allocated to irrigation benefits. They have paid all they can legally. This is in addition to paying over 37 percent of the operation and maintenance of the dam every year in advance.

Absent an exemption by Congress the growers, who own one-third of the water in the river will have no choice but to allow their water to flow free and not be stored in the dam. That free flow will deny the small growers upstream the benefit of the joint use of that water. Controlled releases, as opposed to water and free flow, will make maximum use of water in the reservoir.

Mr. President, I ask that we now provide relief for these people who have waited 34 years for the Congress to keep faith with the promises made when the dam was authorized. At another time, in some more appropriate context, we can debate the various aspects of reclamation law, for those situations where it should apply. This is not one of those situations.

I ask the Senate to reject the amendment to strike, and adopt the committee's amendment.

So what we have here, Mr. President, is a circumstance in which the very people this amendment in all good faith is designed to protect will destroy them. That water can be stored without the Pine Flat Dam, and those people who rely on the flow provided by the storage within the dam will no longer have that opportunity. Surely it is not in the mind of the senior Senator from California to deny the small farmers access to water that is rightfully theirs.

When speaking of the subsidy, we have to ask ourselves what is a subsidy and what is meant by it. If it is the cost of the dam and its operation and maintenance there is no subsidy. If the sudsidy in question is interest that might have been paid by the growers on their portion of the cost of the dam until that time as they in fact repaid that portion, then we have a problem because those costs, almost $12 million, have already been paid back. Interest payments have never been requested because there is no way under the law to, in fact, pay it.

If the subsidy is supposed to be the flood control benefits, then these benefits are shared by urban dwellers as well. They are similar to benefits awarded to areas throughout the country. There is no possible way there can be a large subsidy in this case. The committee considered it. The total initial cost of the project was $40 million. The irrigation portion of the cost was agreed to be $14 million of which $11½ million has been repaid. The balance is being repaid on installment contracts by a few of the individual irrigation districts which chose that option.

Every year, the irrigators pay 37.4 percent of the operation and maintenance charges for the dam, in advance. And when we talk of subsidies we must remember the irrigators owned 100 percent of the water in the river before the dam was built. The few water rights which were in question were quitclaimed to the irrigation districts in return for cash payments. Surely, we do not intend to assert that the Federal Government has subsidized these irrigators by taking their own water from them and then offering to sell it back to them at Corps of Engineers rates.

I submit that the Environment and Public Works Committee did have reason to consider this matter. The dam was built by the Corps of Engineers. It was a Corps of Engineers project. The Corps of Engineers comes under the surveillance, if you will, or the jurisdiction of the Public Works Committee.

Mr. President, I would ask now that we provide relief for these people who have waited 34 years for this Congress to keep faith with the promises made when the dam was authorized. At another time, in some more appropriate context, we can debate the various aspects of reclamation law, and we will. I share with the senior Senator from California the desire to get that law cleared up for the people of this country. I think that is a matter of the utmost importance. But this is not one of those situations.

I ask the Senate to reject the motion to strike this amendment and to adopt the committee's recommendation that it be a part of the bill before us.

Mr. President I would also suggest that if it is, in fact, true that there are other areas in California for which cases can be made as well as this one, they perhaps ought not to wait. If they are really in the same kind of circumstances, if they really involve Corps of Engineers projects, then I suggest that they be added to this bill also, but not that we slight one because others have not been included.

We can accommodate them if their argument is as valid, and if they, in fact, do not meet any of the classic measurements of reclamation law. But this can in no circumstances be considered a reclamation project. It never was in the beginning, and has not been since.

Mr. President, may I inquire how much time remains?

The PRESIDING OFFICER. The Senator has 15 minutes remaining.

Mr. WALLOP. Mr. President, I yield the junior Senator from California such time as he may require.

Mr. HAYAKAWA. I thank the Senator from Wyoming.

Mr. President, the Pine Flat Dam was authorized under the Flood Control Act of 1944, as a flood control project.

This project, which was authorized for construction by the Army Corps of Engineers was intended as a flood control project, and not as an irrigation project.

There were no "public lands" in the Kings River service area. All of the land was privately owned and privately developed prior to the authorization or the construction of the dam. There were no arid lands that were "reclaimed" as a result of the construction of the Pine Flat Dam. There were no additional works built by the Government other than the dam itself. The waters of the Kings River have been used in irrigated agriculture for over a century. Before the year 1900 all of the water in the Kings River already had been appropriated to various owners.

The Kings River flows down into the San Joaquin Valley, and is then funneled into irrigation ditches and channels. All of these distribution works were built with private funds, and most of them were constructed before the Pine Flat Dam was even in the planning stages.

Before the dam was built the river would flood an area known as the Tulare Lake basin. The surface area that flooded was several hundred square miles in size, and was 30 feet deep

in some places. The water was pumped onto cropland, or it evaporated.

Even since the Pine Flat Dam has been constructed, flooding continues, but less severely. Even today during some very wet periods, there are over 100,000 acres that are under water from flooding, sometimes for as long as a 2-year period.

The first studies for the Pine Flat Dam were begun in 1938, but operation of the dam was not begun until February 1954. In 1963 the Tulare Lake Basin Irrigation District and the Federal Government agreed to let the courts decide the question of who had the jurisdiction over the Pine Flat Dam, the Army Corps of Engineers or the Bureau of Reclamation. The U.S. district court ruled in 1972 in favor of the growers, but the ninth circuit court reversed that decision in 1977.

When the Ninth Circuit Court of Appeals reversed the ruling of the U.S. district court, the court stated that this project was intended as a reclamation project—a statement which contradicts the assurances of the Federal Government to the farmers when the project was originally planned. The court offered a solution to the growers who owned lands in excess of 160 acres—to let their water pass through the dam without being stored. This simple solution would be an inconvenience for the large farmers—but they could deal with it. The situation would have a greater effect on the small growers.

If only the water of the small growers is held back by the dam, then when their water is released they would lose a great deal of it due to seepage. They would be even more severely impacted if the flow of their water were not controlled at all by the Pine Flat Dam—they would have more than enough water during some parts of the year, and suffer from dry periods during other times of the year.

Mr. President, the growers along the Kings River were promised repeatedly by the Federal Government, both orally and in writing by the Department of the Interior under several administrations, that as soon as they paid the Government a portion of the cost of the construction of the Pine Flat Dam, any claim by the Federal Government that reclamation laws could apply to their land would be abandoned. The growers have paid 100 percent of the cost of the dam attributed to an improved irrigation supply, because the dam regulated the flow of the water. That amount paid by the growers, ahead of schedule, is $14,250,000. The farmers in the Kings River service area had been repeatedly promised that the payment of that amount would produce the exemption this amendment would give to them. The Department of the Interior then changed its mind, and decided that it would not give them the exemption they had been promised, after all. This change of policy is unfair to the growers in the Kings River area.

I hope that other Senators will see the merits in protecting farm interests in the Kings River service area, and support this amendment. To break up productive and well-managed land, which is in the hands of private ownership, would have an unfair and disastrous effect on these families. Such a move on the part of the Federal Government would also have a detrimental effect on the production of food from these lands. I hope my colleagues will join me in supporting this exemption, by voting against the amendment to strike this committee amendment from the bill.

I might add that legislation to exempt the Kings River service area from reclamation laws has been introduced on the House side by Congressman JOHN KREBS, who represents this district.

I thank my colleague for yielding, and yield back to the Senator from Wyoming whatever time I have remaining.

The PRESIDING OFFICER. Who yields time?

Mr. WALLOP. Mr. President, I yield myself such time as I may use.

I would like very much, if I could, to have the attention of the distinguished Senator from California because there are some things I really do think ought to be brought into this debate.

The question is legitimately asked on his part: Why pass the measure now? Why not wait until we address the whole question of reclamation law? Why should we be asked to take a piecemeal approach to the situation?

Let me try to answer those, if I may, because I think it is important to know that we are not doing something in a frivolous manner.

First, the Kings River is the only area in the entire United States under a present and final court order to be broken up under the application of the reclamation law. This situation emerged long before the departmental regulations were placed under a moratorium by the order of a Federal judge pending the filing of the Department's environmental impact statement.

Secondly, under the circuit court order, the excess landholders are informed that they must either allow their lands to be broken up, which they will not do, or allow their water to pass through the dam, which they are willing to do rather than to submit.

The urgency of this is not for the excess landholders, the so-called large corporate growers. The urgency is for the small farmers, some 20,000 farm families along the river, whose supply of water will be severely distorted if this order is implemented.

This is the part on which I really hope I could have the Senator's attention:

The point is that we have come down right now to a bump situation and a very real urgency. If the Senator hears me, I hope he might reconsider this amendment. I realize what that entails.

As of 2 weeks ago the floodwaters from recent rains and the snowmelt in the Sierra Mountains have inundated 26,000 acres of farmland in the Tulare Lake area. Some of the land is now under 10 feet of water, and all of it will be out of production for at least this year. As of yesterday, the total area of flooded land increased an additional 14,000 acres in that 2-week period so that now 40,000 acres of productive farmland is under water and out of production. That equals 250 farms of the 160-acre size.

In the face of this situation which has so far produced a loss in the Senator's State of $10 million, the Bureau of Reclamation is refusing to release water from storage that could go out onto other lands and percolate down into the underground water table because the lands involved are "owned by large operators whom the Bureau contends are excess landholders."

Even though property losses are being sustained and even though lives are in danger, the Bureau has refused to release this water from storage so that other floodwaters could be impounded. The net effect is that the water coming onto the Tulare Lake lands could put as much as a total of 70,000 acres out of production at a loss of $15 to $25 million this year.

To me, I think it demands our serious attention. I would ask the Senator from California if he might at this moment reconsider his amendment. I realize what I am asking and the portent of it, but it seems to me we have a piece of arrogant bureaucracy endangering the lives of people and production in this country.

Mr. President, I yield for the moment and reserve the remainder of my time.

The PRESIDING OFFICER (Mr. BENTSEN). The Senator from California.

Mr. CRANSTON. Mr. President, the situation presently prevalent in California is an unpleasant one. However, I do not think it would be cured by Senate adoption of Senator GRAVEL's amendment at the present time. I think there are other ways to deal with that problem.

Let me comment on two other points among the many that the Senator has brought up—some of which I may agree with and others of which I may disagree with. This really leads to the point: I think this is not the place or time to consider this matter where there are different interpretations of views, different understandings of the facts. There really should be a hearing so we can go into these matters. That is the basic thrust of my position since I do not presently have a position for or against the ultimate exemption or nonexemption of the Kings River water users from Federal reclamation law.

As to no new water and no additional cultivation resulting from the dam, the Ninth Circuit Court found this factual premise questionable. But even if it were true, the court concluded that it did not follow that the project did not confer substantial benefits to the growers justifying the imposition of the acreage limitation. The project made water available when it otherwise would not be, thus providing a significant economic benefit to the landowners.

Regarding the fact that no additional land came under cultivation as a result of the project, the court noted that normally Federal reclamation projects furnish water storage needed to conserve and regulate the existing water supply. Pine Flat Dam is like most projects subject to reclamation law in this respect.

The Ninth Circuit Court noted that both of these issues were fully presented to the Congress during the debate on

the 1944 Flood Control Act, and the Congress did not exempt the Pine Flat Dam after hearing those arguments then.

On the other matter of flood control being the primary purpose allegedly of the dam, the Ninth Circuit Court concluded that the Pine Flat Dam is a multipurpose project, not solely a flood control project. The authorizing legislation specifically states that irrigation is one of the project purposes. The court also rejected the argument that the Pine Flat Dam is exempted from the acreage limitation because it is principally a flood control project. The court noted that during the authorization of the Pine Flat Dam the water users urged the House Flood Control Committee to adopt the dominant interest test to recognize that the dominant purpose of the Kings River project was flood control. However, the committee did not incorporate this proposal in the bill. The Ninth Circuit Court noted the issue was also debated extensively on the House and Senate floors. The proceedings of the Senate, the court concluded, make it clear beyond question that Congress intended the acreage limitation to apply to the Pine Flat Dam. The Senate rejected an amendment specifically designed to exempt dams in the Sacramento-San Joaquin River Basin, especially those on the Kings and Kern Rivers.

Today the Pine Flat Dam is operated largely for irrigation purposes. The water master for the Kings River Water Association advises me that daily he submits a request to the corps for the release of a specific amount of water for irrigation purposes. In 1976 and 1977, 2 dry years, there were no flood control requirements at all and all releases from the Pine Flat Dam were based on irrigation demand.

Also regarding operation and maintenance of the dam, Pine Flat is not the only corps built project with irrigation benefits which is operated and maintained by the corps and subject to Federal reclamation law. There are eight other such projects in California alone. An exemption for Pine Flat under this legislation would not give equal treatment to other growers who receive irrigation water from other corps projects.

I can answer some of the other points made by my good friend from Wyoming, but I do not think it appropriate to do so at this time. I think we should have hearings where these facts could be weighed more carefully with greater time, and the committee with the primary responsibility for such matters then could make a recommendation to the Senate. That is the reason that I offer and stand by my amendment.

Mr. WALLOP. Mr. President, I can understand the Senator standing by his amendment. The problem that I see, and the problem that distresses me the most, is that there may be other deserving areas as the Senator says. I do not quarrel with that. They may well have justification every bit as valid as this and they may, in fact, be properly addressed under similar kinds of amendments—in fact, they probably should have been. If that is the case they should have been presented to the committee under the same set of circumstances. But the problem we have here is that the very people I know the Senator seeks to protect, and I do not quarrel with his motives, are the ones who will be hurt.

I also think that because of the special circumstances that surround this, because of a court order that is outside the moratorium, and because of the problems that exist now with the bureaucratic arrogance which is endangering lives of other people, we really ought to deal with this matter right now.

At this moment, Mr. President, I yield to my colleague, the Senator from Alaska (Mr. STEVENS).

The PRESIDING OFFICER. The Senator from Alaska is recognized.

Mr. STEVENS. Mr. President, I had the opportunity to serve as the Solicitor for the Department of the Interior during a period of time when the issue of the Pine Flat Dam was being negotiated. I speak from my memory and from personal knowledge regarding many of the issues involved in this matter and wish only to present several significant points which I think are significant to the question at hand. This information will give Members of the Senate a better perspective on the Pine Flat Dam amendment.

First, from a historical perspective, the Senate should understand the Pine Flat Dam is a most unique situation when considering Federal water projects. Several renowned experts in Federal and State water projects have testified that it is the only known situation where the Federal Government placed a dam across a river in which 100 percent of the water was privately owned, in which no public lands were involved, where no arid lands were involved, where no "new" water was provided for any purposes, where no additional expenditures were made of any type or nature, where no new lands, either public or private, were brought into cultivation because of the dam being built, where the Corps of Engineers constructed the dam and then consistently, since 1954, when the dam was completed, have operated and maintained it. I am told there is no other example of such a situation in the entire Nation.

We should all note that if the rationale of the ninth circuit court in this matter is carried to its ultimate conclusion, then reclamation law could be applied to every Corps of Engineer project.

Let me emphasize that, Mr. President: This is a unique situation. The Federal Government placed that dam in this position despite the fact that the water was already privately owned. No public lands, no arid lands, no new water, no new lands, either public or private were brought into cultivation. The only reason that this issue exists is that the Corps of Engineers, after the dam was completed, has operated and maintained it. To apply the reclamation law to such a project, I think, is miscarrying the original intent of Congress in this area.

Second, the Senate should understand, in considering this measure, that from the very first time when discussions were held with the local land owners and water right owners about the construction, those landowners and water right owners were promised repeatedly by representatives of the Federal Government, including three different Secretaries of the Interior, that as soon as local interests paid that portion of the cost of the dam which would be attributed to the increased benefit to irrigation because of flood control, there would be a complete exemption of the excess land provision of reclamation law. In fact, they were promised that there would be no application of reclamation law to this area once the payout was completed.

In 1963, local interests paid the Government 100 percent of their assigned portion of the cost of the dam, $14,250,000. From that time on, the land and water rightful owners have fought unsuccessfully for the fulfillment of the repeated promises made to them by Secretaries of the Interior of both our great parties that they would be exempt from reclamation law.

As we know this is a matter of great concern to many in this Chamber. This situation is unique and should have been dealt with many years ago. The issue would not have come up if the promises made to these people at the time of construction of this dam had been kept.

I ask unanimous consent to have printed in the RECORD a copy of the opinion that I wrote on the Pine Flat River Dam, which I wrote when I was Solicitor for the Department of the Interior. The statement was provided to the Secretary of the Interior, Fred Seaton, on January 3, 1961. Also included for the RECORD is a copy of the letter that the Secretary of the Interior, Fred Seaton, sent to the Attorney General on this matter.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MEMORANDUM

WASHINGTON, D.C.,
January 3, 1961.

To Secretary of the Interior.
From Solicitor.
Subject: Proposed Repayment Contracts for the Kings River Project and the Kern River Project—Excess Land Limitations.

In connection with your consideration of these proposed contracts, it has been suggested that I review the question of the legal effect of final payment of construction charges, in the total amount required pursuant of the Federal reclamation laws, upon the application of the limitations contained in those laws on the acreage of land in a single ownership to which water may be served by the Federal project.

It is contemplated that on the Kings River Project a repayment contract will be executed by each of the twenty-eight entities representing the water users in the Kings River irrigation service area. One form of repayment contract offered for use by any such entity requires the repayment of its share of the total construction obligation in not to exceed forty annual installments. This contract would contain all of the provisions required by law concerning service of water from the project to lands in excess of 160 acres in a single ownership or the equivalent in joint ownership, including the execution of a recordable contract as a condition precedent to such service. As to excess lands not disposed of by the owner within the period of ten years under the recordable contract, the Secretary or his authorized representative would have the power to dispose of such lands on behalf of the owner.

This form of contract would permit the contracting entity at any time or times within the forty-year repayment period to make advance payment of the obligation or any part thereof. Payment in full of the repayment obligation at any time after the execution of the contract would terminate and cancel all recordable contracts executed thereunder except those executed more than ten years prior to the date of such payment. Payment in full would likewise permit the contracting entity to make deliveries of stored water to excess lands notwithstanding the limitation provisions of the contract.

Contracting entities under the Kings River Project would also have the choice of executing a contract calling for the payment in full of that entity's share of the repayment obligation not later than one hundred eighty days after the execution of the contract. This form is parallel to that which is offered for joint execution by the principal water users' organizations under the Kern River Project, in that the share of the repayment obligation owing by each entity is to be paid not later than one hundred eighty days following the date of execution of the contract. The period of one hundred eighty days is recommended as an appropriate period within which the contracting entity may accomplish the authorizations and necessary proceedings requisite to effect full payment to the United States upon proceeding with reasonable dispatch. Neither of these two forms of contract, namely, the two forms calling for payment in full within one hundred eighty days, contains any reference to the excess land provisions of the Federal reclamation laws. In each case it is provided that, in the event a contracting entity fails to pay its share of the obligation as prescribed, the entity shall have no further right to the use of irrigation storage of the project.

In none of the three forms of repayment contract before you for consideration is an individual parcel of excess land permitted to be relieved of the acreage limitations of the reclamation laws by the payment of the construction charges assignable to such parcel of land. On the contrary, no relief is provided from those limitations except upon the full and final payment, by the entity executing the contract with the United States, of its total construction cost repayment obligation thereunder.

The negotiation of repayment arrangements with the Kings River interests has been carried on for more than fourteen years. There was previously submitted for your consideration a proposed forty-year repayment contract between the United States and the Kings River Conservation District, representing the entire service area of the Kings River Project, providing for the repayment of the total reimbursable construction cost in the amount of $14,250,000 together with $750,000 as the agreed purchase price for certain claims to waters associated with Fresno Slough (Draft-October 27, 1955). Within the Conservation District were some thirty-one "member units" composed of water users now represented by the twenty-eight entities to whom the United States would now offer separate repayment contracts. In the 1955 draft, delivery of water to excess lands was prohibited unless such lands were covered by a recordable contract. The draft also provided, however, that the Conservation District, any member unit, or other organization, co-partnership, entity or individual within the District might at any time or times within the forty-year period make advance payments on the obligation. It further provided that the payment in full by any member unit, landowner or stockholder owning lands to which a specified portion of the repayment obligation had been allocated would remove the limitation upon the storage and delivery of water to such lands.

With respect to that earlier draft, under date of July 12, 1957, you wrote to Mr. Philip H. Gordon, President, Kings River Conservation District, advising him that "after painstaking consideration, I have concluded the terms of the proposed contract between the United States and your District * * * should not be approved." You pointed out that the Department continues to recognize and support the basic concept of reclamation law that full and final payment of the obligation of a district to the Federal Government ends the applicability of the acreage limitations. You observed that in prior years administrative action had permitted individual landowners to avoid the excess land limitations by payment of an allocated share of construction costs. You advised, however, that you could not justify such action in an effort to remedy an absence of lawful authority.

In announcing your determination to Mr. Gordon, as outlined above, you had the benefit of an opinion by the Solicitor Elmer F Bennett, under date of July 10, 1957 (M-36457). Your determination was entirely consistent with the opinion of the Solicitor, who advised that Congress had not authorized accelerated payments by individual landowners of their aliquot part of the District liability as a means of evading excess land limitations, and that the discretion to afford relief from those limitations had not been vested in you as Secretary and therefore remained a prerogative of the Congress. The Solicitor reviewed the pertinent statutory provisions together with a prior Associate Solicitor's opinion [1] and certain administrative actions taken thereunder. He pointed out that in connection with dams and reservoirs operated for flood control purposes after the Flood Control Act of 1944 the Secretary of the Interior was authorized to permit utilization of irrigation benefits from such works in conformity with the Federal reclamation laws. With respect to the excess land limitations, he set out the specific provisions with which you were required to comply under Section 46 of the Omnibus Adjustment Act, as amended.[2] He placed in historical perspective Section 46, dealing with District obligations, and the Act of August 9, 1912, as amended,[3] dealing with the obligations of individual homestead entrymen and water right applicants. He stated that "it is the payment of the full obligation by the district under the 1926 Act joint-liability repayment contract, as well as the similar payment under the 1912 Act individual contract, that relieves the excess lands from the statutory restrictions." He did not accept the proposition that the provisions of the earlier Act, relating to individuals, could be used to implement the later Act, relating to districts, to permit relief upon individual payouts. He pointed out that the previous opinion of the Associate Solicitor went no further than to advise that full payment of the reimbursable costs by a district relieved the excess lands in that district from the statutory limitations and requirements. It was administrative action later taken on the basis of a memorandum by the Chief Counsel of the Bureau of Reclamation which undertook to permit relief from these limitations by individual payout with respect to lands covered by a district obligation.

In net effect, then, Solicitor Bennett's opinion simply reaffirmed district payout under the 1926 Act and individual payout where the 1912 Act was applicable. The Associate Solicitor in 1947, in expressing the view that upon full payment of the construction obligation under a joint liability repayment contract the lands receiving water under such contract are relieved of the statutory excess land restrictions, relied upon the proviso to Section 3 of the 1912 Act and reviewed the instructions of 1914,[4] sometimes referred to as the "King opinion."

It has been said by critics of the Departmental position regarding the result of payment that Solicitor Bennett's opinion relied on the Associate Solicitor's earlier opinion without proper reanalysis; in turn, that the Associate Solicitor's opinion relied upon the King opinion without proper analysis of the basis for its conclusion; and finally that the King opinion was in error in the construction of the legislation then in effect. It is true that these documents do not include the working details of analysis of the 1912 Act, and to complete the record at this point that analysis is supplied in the following paragraphs.

The Instructions of 1914 cited the proviso to Section 3 of the 1912 Act and construed it, taking into consideration prior Departmental decisions in the two cases of Amaziah Johnson[5] and Keebaugh and Cook.[6] First, with respect to these two decisions, the King opinion must be understood to have done one thing and not to have done another. It did conclude that the holder of a farm unit or private lands upon which full payment had not been made on the appurtenant water right might own additional lands for which water right charges had been paid in full without limitation, whereas the implication of the two decisions was that one could not hold a tract upon which full payment had not been made and acquire water rights in another tract for which the water rights were paid in full if the area exceeded one hundred sixty acres. What the King opinion did not do was apply the limitation after full payment for the rights sought to be acquired by one individual, and no such case was before the Department for consideration.

Moving, then, to the basic construction of the proviso to Section 3 itself, I have no question of the validity of the Associate Solicitor's conclusion with respect thereto. He does not, however, touch upon the structure of the 1912 Act as a whole or the history of its passage in light of prior legislation. It appears to be appropriate at this time to fill in that portion of the record.

Under the provisions of Section 3 and Section 5 of the 1902 Act[7] the acreage limitation applied to the initiation of rights in public lands and to the initiation of the right to use of water on private lands. Further, patent to public lands was not to issue until payment in full, and no right to the use of water was to attach permanently to any lands until all payments were made. This was the total concept of acreage limitation in the reclamation law prior to the 1912 Act, and related itself solely to the status of the individual as an entryman prior to becoming a patentee or as a water right applicant prior to becoming the holder of a water right certificate.

In this stage of the law the irrigator was precluded from pledging his land with the necessary water rights as security for an improvement loan, thus imposing hardship on the irrigator and retarding development of the project. The initial impetus for the 1912 Act was the effort to correct this situation. Section 1 of the Act was drawn to permit, for the first time, the issuance of patents and water right certificates upon payment of "all sums due the United States on account of such land or water right at the time of issuance of patent or certificate * * *" (emphasis supplied). Thus the applicant

[3] Act of August 9, 1912 (37 Stat. 265; 43 U.S.C. 541 *et seq.*).

[4] Approved July 22, 1914 (43 L.D. 339).

[5] August 11, 1913 (42 L.D. 542)

[6] October 31, 1913 (42 L.D. 543)

[7] Act of June 17, 1902 (32 Stat. 388, 389)

needed only to be current in his payments rather than being required to have paid in full. Section 2 of the Act protected the United States by requiring each patent and water right certificate to reserve a lien to the United States for sums due or to become due. The substance of the 1912 Act, without Section 3, was passed by the Senate and was reported favorably by the House Committee. It was then, however, returned by request to the House Committee where it was redrafted and the present Section 3 was included. The records of the Congress contain no legislative history of Section 3 itself. It must be viewed in light of the fact that it was enacted by the Congress concurrently with Sections 1 and 2 and apparently as a result of consideration by the two Houses of the effect of Sections 1 and 2 standing alone. In the process of approving the policy embodied in Sections 1 and 2 it obviously became apparent to the Congress that such a provision would, consistently with the prior law, have the effect of lifting the excess land limitation at the time of issuance of patent and water right certificate and prior to full payment unless provision to the contrary was made. In other words, the entryman would become a patentee and the water right applicant would become the holder of a water right certificate. In order, therefore, that the period of time under prior law would not be so altered, Section 3 specifically continued the land limitation for "irrigable land for which entry or water right application" had been made until "final payment in full of * * * building and betterment charges" on such excess land. The Section thus had the effect of continuing the land limitation during the period between the issuance of evidence of ownership and final payment, which period would otherwise have been "uncovered" by the effect of Section 1.[8]

Most of the discussions of the 1912 Act, including those by critics of the Departmental position, have centered upon arguing the meaning of the proviso to Section 3 without recognizing, as set out above, the simple, necessary, and logical function of Section 3. It appears to me that the analysis set out above accords to the Congress the credit for intelligent consideration to which it is entitled. Furthermore, this interpretation, consistent with every action of this Department over a half of century, dissipates the cloud of confusion some critics attempt to create because of their myopic, preconceived opinion as to what the law should be. We must interpret the law as it exists, and leave to others the prerogative to discuss whether the law should be as it is.

The most recent general expression dealing with excess land appears in the Small Reclamation Project Act of 1956 (70 Stat. 1044). Section 5(b) of that Act provide in substance that interest shall be paid on that portion of the unpaid balance of the obligation allocable to excess lands. In other words, water may be delivered without regard to acreage, but interest is payable to the extent that excess lands are involved in the small project only while an obligation remains unpaid. Thus, the Congress in enacting the so-called "Eagle formula" demonstrated that it was not concerned per se with limiting the amount of land that might receive the benefit of Federally financed irrigation works; rather, it was concerned that so-called excess lands should not have the added assistance of interest-free Federal money during the period of repayment.

The Small Reclamation Projects Act of 1956 is by express provision (Section 11) a supplement to the Federal reclamation laws. It is hornbook law that individual enactments comprising a part of a general body of law treating with a given subject are, except as the context may expressly require another application; to be construed in harmony one with another. Viewing the Small Reclamation Projects Act of 1956 against an established Federal reclamation law excess land pattern tied to the continued existence of an unpaid obligation between the contracting entity and the United States, harmonizes the 1956 Act with the general statutory pattern save only that under the 1956 Act the Congress established a means whereby even during payout a water supply would be available to large ownerships. To regard the general body of reclamation law as providing for continuing applicability of acreage limitation provisions after payout would be to attribute to the Congress in its enactment of the 1956 Act a complete departure from the prior existing pattern, a departure not required not even hinted at by the language of the 1956 Act.

Finally, I note views are sometimes indicated that the concept of payment of construction charges terminating the excess land provisions of reclamation law in incompatible with the objective of the general homestead law[9] from which reclamation law was developed. This argument points out that the purport of that law is to limit an entryman to 160 acres of public land provided he is not already the proprietor of more than 160 acres. In terms of acreage limitation, the only qualification of the general homestead law is on the right of entry. The general homestead law never contained a continuing limitation on the acreage of land permitted to be owned after entry. To the contrary, it is clear that if a settler is qualified to make entry and does so there is no limit on the acreage of private lands he may acquire and still be qualified to make final proof and receive patent. *West* v. *Edward Rutledge Timber Co.* (D.C. Idaho, 1913) 210 F. 189, affirmed (C.C.A. 1915) 221 F. 30. To the extent that analogy may be drawn we see so incompatibility between this result and the concept earlier advanced that repayment by the contracting entity terminates the land limitation feature of the reclamation law.

On a review of the applicable legislation, and with regard for the record of construction heretofore given to the legislation from time to time in the Department, it is my opinion that you have the authority to provide, by contract with a water users' organization, that upon full and final payment of the construction charges which that organization is required to pay, the lands covered thereby are no longer subject to the acreage limitations of the Federal reclamation laws.

THEODORE F. STEVENS,
Solicitor.

ACT OF AUGUST 9, 1912 (37 STAT. 265)

SEC. 1. That any homestead entryman under the act of June seventeenth, nineteen hundred and two, known as the reclamation act, including entrymen on ceded Indian lands; may at any time after having complied with the provisions of law applicable to such lands as to residence, reclamation, and cultivation submit proof of such residence. reclamation, and cultivation, which proof. if found regular and satisfactory, shall entitle the entryman to a patent, and all purchasers of water-right certificates on reclamation projects shall be entitled to a final water-right certificate upon proof of the cultivation and reclamation of the land to which the certificate applies, to the extent required by the reclamation act for homestead entrymen: *Provided*, That no such patent or certificate shall issue until all sums due the United States on account of such land or water right at the time of issuance of patent or certificate have been paid.

SEC. 2. That every patent and water-right certificate issued under this act shall expressly reserve to the United States a prior lien on the land patented or for which water right is certified, together with all water rights appurtenant or belonging thereto, superior to all other liens, claims, or interests whatsoever for the payment of all sums due or to become due the United States or its successors in control of the irrigation project in connection with such lands and water rights.

Upon default of payment of any amount so due title to the land shall pass to the United States, free of all encumbrance, subject to the right of the defaulting debtor or any mortgagee, lien holder, judgment debtor, or subsequent purchaser to redeem the land within one year after the notice of such default shall have been given by payment of all moneys dues, with eight per centum interest and cost. And the United States, as its option, acting through the Secretary of the Interior, may cause land to be sold at any time after such failure to redeem, and from the proceeds of the sale there shall be paid into the reclamation fund all moneys due, with interest as herein provided, and costs. The balance of the proceeds, if any, shall be the property of the defaulting debtor or his assignee: *Provided*, That in case of sale after failure to redeem under this section the United States shall be authorized to bid in such land at not more than the amount in default, including interest and costs.

SEC. 3. That upon full and final payment being made of all amounts due on account of the building and betterment charges to the United States or its successors in control of the project, the United States or its successors, as the case may be, shall issue upon request a certificate certifying that payment of the building and betterment charges in full has been made and that the lien upon the land has been so far satisfied and is no longer of any force or effect except the lien for annual charges for operation and maintenance: *Provided*, That no person shall at any one time or in any manner, except as hereinafter otherwise provided, acquire, own, or hold irrigable land for which entry or water-right application shall have been made under the said reclamation act of June seventeenth, nineteen hundred and two, and acts supplementary thereto and amendatory thereof, before final payment in full of all installments of building and betterment charges shall have been made on account of such land in excess of one farm unit as fixed by the Secretary of the Interior, as the limit of area per entry of public land or per single ownership of private land for which a water right may be purchased respectively, nor in any case in excess of one hundred and sixty acres, nor shall water be furnished under said acts nor a water right sold or recognized for such excess; but any such excess land acquired at any time in good faith by descent, by will, or by foreclosure of any lien may be held for two years and no longer after its acquisition; and every excess holding prohibited as aforesaid shall be forfeited to the United States by proceedings instituted by the Attorney General for that purpose in any court of competent jurisdiction; and this proviso shall be recited in every patent and water-right certificate issued by the United States under the provisions of this act.

SEC. 4. That the Secretary of the Interior is hereby authorized to designate such bonded fiscal agents or officers of the Reclamation Service as he may deem advisable on

---

[8] A brief contemporary administrative construction of Section 3 appears in Secretary of the Interior Fisher's report to the President on the enrolled bill on August 6, 1912, in which he stated: "Section 3 * * * contains a proviso to prevent the consolidation of holdings until such time as full and final payment of the building charge shall have been made."

[9] March 3, 1891, 26 Stat. 1097 (43 U.S.C. 161)

each reclamation project to whom shall be paid all sums due on reclamation entries or water rights, and the officials so designated shall keep a record for the information of the public of the sums paid and the amount due at any time on account of any entry made or water right purchased under the reclamation act; and the Secretary of the Interior shall make provision for furnishing copies of duly authenticated records of entries upon payment of reasonable fees, which copies shall be admissible in evidence, as are copies authenticated under section eight hundred and eighty-eight of the Revised Statutes.

WASHINGTON, D.C.,
January 18, 1961.

DEAR MR. ATTORNEY GENERAL: Your opinion is requested on the question whether the applicability of the so-called excess land provisions of the Federal reclamation laws (Act of June 17, 1902, 32 Stat. 388, as amended and supplemented, particularly Section 46 of the Act of May 25, 1926, 44 Stat. 636, 649) survives repayment by the contracting entity of its construction charge obligation whether such repayment be as scheduled in the repayment contract involved or, at the election of the contractor, be made in advance of the payment schedule.

The legal officers of this Department have consistently been of the view that the restrictions of the excess land provisions do not continue beyond the date of payout of its construction charge obligation to the United States by the contracting entity. Enclosed are the several legal opinions in which this position has been expressed. These are:

Will R. King, Chief Counsel, approved July 22, 1914, 43 LD 339.

Felix S. Cohen, Associate Solicitor, October 22, 1947, M–35004.

Elmer F. Bennett, Solicitor, July 10, 1957, M–36457.

Theodore F. Stevens, Solicitor, January 3, 1961.

Notwithstanding the views continuously expressed by the principal law officers of this Department, the opposite point of view has been earnestly and repeatedly pressed upon this Department. The earnestness and insistence with which these contrary views have been pressed, together with the widespread interest in the question and its transcendent importance in the administration of the Federal reclamation laws, prompt me to request your consideration of the matter in order that it may definitively be set at rest within the Executive Branch. In this connection we are in receipt of copies of recently dated letters from your Department to various correspondents in which it is indicated that a ruling would be forthcoming upon receipt of a request by this Department.

The issue is directly presented in three forms of repayment contracts now before the Department for action involving in excess of thirty contracting entities covering repayment of the irrigation costs of Pine Flat and Isabella reservoirs in California. In view of the longstanding position of the chief legal officers of this Department, I am today approving these contracts as to form with the understanding, however, that their execution on behalf of the United States will be deferred pending receipt of your views. A representative copy of each of the three forms of contracts is enclosed for your information. We are currently advised that the only one of the twenty-eight entities on the Kings River Project which is likely to avail itself of the 180-day repayment contract form is the Lovelace Estate (Circle "L" Farms) which is a trust for the life of certain heirs of the devisor with remainder over to the University of California.

Agreements having been reached, after lengthy and complex negotiations with the numerous contracting entities under the Pine Flat and Isabella reservoirs, it is most desirable that the contracts be consummated as soon as possible.

The issue may also be present in the joint Federal-State San Luis Project authorized by Public Law 86–488. In the event the Federal reclamation laws are determined to be applicable to the State service area, the answer to the question here presented would control the applicability of the excess land restrictions to that area after the State had, as required, met all of its capital cost commitments for the construction of joint facilities.

For your further assistance, we are enclosing Part One of "Excess Land Provisions of the Federal Reclamation Laws and the Payment of Charges" transmitted to the Subcommittee on Public Works and Resources, Committee on Government Operations, House of Representatives, May 1956, and call your attention to Report No. 399, 86th Congress, House of Representatives, Committee on Interior and Insular Affairs, to accompany H.R. 7155, at page 7 *et seq.*, and to "The Excess Land Law: Execution of a Public Policy", Paul S. Taylor, Professor of Economics, University of California, Yale Law Journal, Volume 64, Number 4, February 1955.

We would greatly appreciate receiving your advice at the earliest practicable time.

Sincerely yours,

FRED A. SEATON,
Secretary of the Interior.

Mr. STEVENS. I urge my colleagues to carefully consider the facts and the history behind this issue which is before them at this time. With the facts in mind, I believe that a negative vote on this amendment is really a mandate to the Senate to see to it that the promises made—not only by people working in the area, but promises made by the Cabinet officials in charge of the enforcement of reclamation law be kept. These people have a right, I believe, to be treated fairly and justly. As to the opinion that I prepared, incidentally, I do not claim complete right of authorship in that opinion. I had, as every solicitor does, a group of bright young lawyers who worked on that opinion and the final paragraph of that opinion is this:

On a review of the applicable legislation, and with regard for the record of construction heretofore given to the legislation from time to time in the Department, it is my opinion that you have the authority to provide, by contract with a "water users" organization, that upon full and final payment of the construction charges which that organization is required to pay, the lands covered thereby are no longer subject to the acreage limitations of the Federal reclamation laws.

The PRESIDING OFFICER. The time for the opposition to the amendment has expired.

Mr. GRAVEL. Mr. President, does the Senator from Alaska desire additional time?

Mr. STEVENS. I thank my colleague. I do believe that this is an amendment which the Senate should support.

Mr. CRANSTON. May I have 1 minute?

Mr. GRAVEL. How much time do I have left?

Mr. STEVENS. May I correct the RECORD? I am opposed to the amendment and I support Senator WALLOP's position.

The PRESIDING OFFICER. The Senator from California has 20 minutes remaining on this amendment.

Mr. CRANSTON. I propose to take very little more of that time. I ask unanimous consent to have printed in the RECORD at this point at letter to Senator ABOUREZK from James W. Moorman, Assistant Attorney General, Land and Natural Resources Division. I put it in the RECORD simply to demonstrate how many different views there are of what the facts are in this case. We have heard various facts presented. Here is something that presents one view of facts; there are other views of the same facts. This is an additional reason behind the suggestion that there be a hearing where we can do our best to ascertain what the facts really are. I ask unanimous consent that Assistant Attorney General Moorman's letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

APRIL 27, 1978.

HON. JAMES ABOUREZK,
U.S. Senate,
Washington, D.C.

DEAR SENATOR ABOUREZK: We are writing in reply to your letter of February 27, 1978, wherein you sought our assistance in clarifying the facts surrounding the decision of the Court of Appeals for the Ninth Circuit in *United States* v. *Tulare Lake Canal Co., et al.*, 340 F. Supp. 1185 (1972); 535 F.2d 1093 (C.A. 9, 1976); *cert. denied* 429 U.S. 1121 (1977). In that decision, it was held that the acreage limitations provision of reclamation law was to be applied to the Pine Flat Dam project in California. Though various arguments are urged to justify an amendment to the Waterways Users Charge Bill (H.R. 8309) which would exempt the Pine Flat project from the acreage limitation laws, each was made in the recent litigation and rejected by the Court. The following analysis of the facts should refute arguments in support of the amendment.

First it is argued that an exemption is proper because Pine Flat Dam and Reservoir is a flood control project constructed by the Corps of Engineers. Pine Flat Dam and Reservoir was authorized in Section 10 of the Flood Control Act of 1944 as a multipurpose flood control and irrigation project. In 1948, the Corps of Engineers concluded that irrigation benefits would total $3,382,000 annually, while annual flood control benefits would total only $2,126,000, thus indicating that Pine Flat is predominantly an irrigation project. 535 F.2d at 1144. Furthermore, the ninth circuit, after an intensive review of the legislative history of the 1944 Flood Control Act, concluded that Section 8 of that Act was specifically adopted to bring the Kings River Project and other nearby projects under the provisions of reclamation law. 535 F.2d at 1099–1113.

Next an assertion is made that as all the water rights in the service area were privately owned and no new water was created by the project, the project should be exempt from reclamation law. The fact that all water rights may have been owned prior to construction was known to Congress when it enacted the 1944 legislation. It is also noted that preproject development of irrigation facilities and private ownership of water rights is the rule on reclamation projects not the exception. This was recognized by Congress as early as 1924. In 1960, it was estimated that 60 percent of all reclamation acreage fell in this category.

The further contention that no arid lands were reclaimed is of no revelance. First, arid lands or semi-arid lands refers to virtually all lands west of the 98th meridian. The mere fact that they were under irrigation prior to the project certainly does not mean that they are not in an arid region. The dire

need for irrigation, in fact, is proof of the fact that the lands are arid.

The application of reclamation law to the Kings River service area is predicated on the irrigation benefit derived from the project. That benefit is regulation of the flow of the river so that the users can make use of the water when they need it. Without regulation by Pine Flat, heavy spring runoff occurs in the Kings River, followed then by vastly diminished flows in the later summer months. Pine Flat provides the regulation needed to assure that these spring flows can be stored for use later in the irrigation season. The importance of this regulation was recognized by the ninth circuit, 535 F.2d 1113. The reclamation benefit is clear. The water users sought this benefit, and have paid a considerable sum for it, but simply stated the large landowners refuse to accept the conditions upon which such benefits are granted under the law.

The concept that prepayment of allocable irrigation cost somehow avoids the need to sell excess lands was also addressed by the ninth circuit. Upon careful review of the law, the Court concluded that this device could not be used to avoid the breakup of private excess land holdings. The court found that "payout" would defeat the longstanding Congressional purposes of reclamation law—i.e. the establishment of family farms, the avoidance of speculation and windfall benefits derived from reclamation projects. 535 F.2d 1118–1136. Such a finding is in accord with longstanding administrative practice and a formal opinion of the Solicitor of the Department of the Interior, 68 I.D. 372 (1961), which was approved by the Attorney General in 1961.

Claims that the water users have been assured for years that they would not be subject to reclamation law are without merit. Without question from the 1940's to the present, the large landowners have sought to obtain the project and its benefits without complying with excess lands requirements. H.R. 8309 is not the first effort by the Kings River interests, especially the large landowners in the Tulare Lake basin to obtain an exemption from the excess land provisions of reclamation law. (note, S. 972, 80th Cong., 1st Sess. (1947); H. H. 7915, 81st Cong., 2d Sess. 1950 and H.R. 413, 82d Cong., 1 Sess. (1951). As noted in the opinion:

Since the middle of 1940's, the history of the acreage limitation has been to a large extent a reflection of the unsuccessful struggle of owners of large tracts of land in California, including the Kings River area, "to obtain the Federal irrigation investment without accepting the acreage limitations." [Emphasis added]

As noted, Congress has been lobbied and legislation introduced to exempt the area; pressure has been exerted on the executive branch (535 F.2d 1137), and the matter under litigation from the early 1960's to the very present. All attempts to date have met with controversy and ultimate defeat.

As to the claim that the limitation is infeasible, it is simply noted that 80% of the service area is already in compliance with the law. The resistance comes primarily from the Tulare Lake basin where massive land holdings exist. It constitutes but 20% of the total service area of over 1,000,000 acres and includes one tract in single ownership of more than 60,000 acres. 535 F.2d 1093. No reason exists to provide preferential treatment to the Kings River service area, while at the same time the entire Central Valley Project is subject to the law.

A final argument is urged that the effect of the decision with respect to the Pine Flats project, is to make all other Corps of Engineer projects throughout the country subject to reclamation law. That is not the case. Section 8 of that Act specifically provides that the section does not apply to projects constructed by the Corps of Engineers prior to that act. Further, the act appears to apply reclamation law only to those projects constructed thereafter where the Secretary of the Interior determines that a project should be used for irrigation benefits, and where, after specific authorization by Congress, the Secretary implements the reclamation laws to construct, operate and maintain additional work as necessary for irrigation purposes. Based on the statutory language, neither the Department of the Interior nor the Corps of Engineers has construed the statute as extending excess land requirements to all Corps projects.

Sincerely,

JAMES W. MOORMAN,
Assistant Attorney General,
Land and Natural Resources Division.

Mr. WALLOP. Will the Senator yield to me just enough time for a unanimous-consent request?

Mr. CRANSTON. Of course, I yield such time as the Senator needs.

Mr. WALLOP. Mr. President, I ask unanimous consent that there be printed in the RECORD a letter to the Commissioner of Reclamation from the Associate Solicitor, Energy and Resources, on the subject of the San Joaquin River flood problems.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

WASHINGTON, D.C.,
March 30, 1978.

To Commissioner of Reclamation.
From Associate Solicitor, Energy & Resources.
Subject San Joaquin River Flood Problems—Central Valley Project.

I am unable to surname your proposed faxogram to the Regional Director in Sacramento, authorizing him to deliver water made available by flood evacuation releases from Friant Dam for use on excess lands within the Millerton Lake and Mendota Pool service areas. These waters would be sold by contract with these districts at a rate of $1.50 per acre-foot.

I know of no exception in reclamation law to the excess land requirement in these circumstances. The sale of excess or surplus water is authorized by the Warren Act. That Act specifically provides that such water shall not be delivered to any one landowner in excess of an amount sufficient to irrigate 160 acres. 43 U.S.C. § 523 *et seq.*

You cite as support the March 20, 1969, telegram from Commissioner Dominy to the Regional Director. That telegram does not explain the legal basis for the Commissioner's statement that flood evacuation release water can be delivered to lands without regard to the acreage limitation provisions of reclamation law. The telegram says only that such delivery may be justified where necessary to use federal facilities to minimize danger to lives and property. One could envision many situations in which delivery of water to excess land might minimize danger to lives and property. I find no basis in the law for such an exception, and using that rationale could effectively read the excess land provisions out of the law.

Your proposed faxogram to the Regional Director also cites as support the Solicitor's statement, in his letter to Congressman Sisk dated February 21, 1978, that "flood control benefits are traditionally made available by the United States without regard to acreage limitation." This statement is taken out of context. It referred to the fact that the Corps of Engineers provided some $69 million toward construction of the Oroville Dam, part of the California State Water Project. The money was made available for flood control pursuant to the Corps of Engineers' traditional authority in that area. The authorization was not to provide money pursuant to the reclamation law. The Oroville reservoir was, apart from this flood control money, built wholly with State money. Federal money was not used for irrigation-related facilities, and the excess land law was not involved.

It is a far different situation here, where the reservoir and canal through which the water would be delivered have been constructed at Congressional direction for operation pursuant to federal reclamation law. Congress has therefore required that the excess land restrictions apply to deliveries made out of or through these federally-constructed facilities.

I am of the opinion, therefore, that flood evacuation release water may not be delivered to excess land. The contracts by which such water is sold must contain standard excess land provisions. Of course, such releases are for a limited term, so the contracts for delivery of that water would also be for a limited term. The excess land restrictions apply only for the duration of the contract, so long as the water is being delivered under it.

JOHN D. LESHY.

The PRESIDING OFFICER. Does the Senator from California yield back the remainder of his time?

Mr. CRANSTON. I yield to the Senator from Alaska whatever time he needs.

Mr. GRAVEL. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GRAVEL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRAVEL. Mr. President, if the Senator from California will yield back all of his time, we shall then, hopefully, have a vote shortly after 3 p.m. We shall be starting at 2 o'clock voting on farm matters.

After those votes have been disposed of, as soon as they are disposed of and we come back to this bill, then we would vote on the Cranston amendment to strike a portion of my amendment. When that is disposed of, we would vote on my amendment, and at that point in time we would be prepared to take up other amendments.

Recognizing that we want that delay, I ask unanimous consent that we be permitted to entertain other amendments prior to those votes taking place.

The PRESIDING OFFICER. If the Senator from Alaska desires his amendment to be laid aside temporarily, it would carry with it the amendment in the second degree of the Senator from California and all amendments pending, and other amendments may be considered in the interim.

Mr. CRANSTON. Can we not get unanimous consent just to bring up other amendments between now and 2 o'clock without setting that aside?

The PRESIDING OFFICER. Yes; that is what would be done, if the Senator is asking unanimous consent for that purpose.

Mr. GRAVEL. I ask unanimous consent for that purpose.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

UP AMENDMENT NO. 1261

Mr. CRANSTON. Mr. President, I send an amendment to the desk and ask for its immediate consideration, and indicate that I will ask for the yeas and nays on my Pine Flat amendment when we have Senators here for a vote on my first amendment.

The PRESIDING OFFICER. For the benefit of the Chair, was the Senator from Alaska making an estimate of the time or a specific time?

Mr. GRAVEL. An estimate of time, and only an estimate.

Mr. CRANSTON. Mr. President, how many votes are to occur at 2 o'clock?

The PRESIDING OFFICER. We now have three amendments lined up for voting at 2 o'clock, plus, of course, the vote on the bill itself.

Mr. GRAVEL. Four votes.

The PRESIDING OFFICER. Four, and other amendments can still be offered.

Mr. GRAVEL. Four votes starting at 2 o'clock, and then we would go into the votes that we would have here.

Mr. DOMENICI. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DOMENICI. They are not all rollcall votes, necessarily?

The PRESIDING OFFICER. No. They are not requested at this time. Of course, they may well be by voice vote. At this time, no rollcall votes have been ordered or requested.

The clerk will state the amendment.

Mr. CRANSTON. Mr. President, I would like to ask that a request for the yeas and nays may be in order at any time on the amendment I have pending. I would still have to ask for the yeas and nays, but ask that it would be appropriate to make the request at any time.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. DOMENICI. Reserving the right to object, would the distinguished Senator from California tell us where this amendment will appear in the bill?

The PRESIDING OFFICER. The clerk must state the amendment.

The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from California (Mr. CRANSTON) proposes an unprinted amendment numbered 1261.

Mr. CRANSTON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the proper place in the bill insert a new section as follows:

SEC. . The project for flood control on Corte Madera Creek, Marin County, California, authorized by Section 201 of the Flood Control Act of 1962 and amended by Section 204 of the Flood Control Act of 1966, is hereby modified to authorize and direct the Secretary of the Army, acting through the Chief of Engineers, to construct the project for Unit 4, from the vicinity of Lagunitas Road Bridge to Sir Francis Drake Boulevard, substantially in accordance with the plan, dated February 1977, on file in the office of the San Francisco District Engineer. The plan is hereby further modified to authorize and direct the Secretary of the Army, acting through the Chief of Engineers, to construct such flood proofing measures as may be necessary to individual properties and other necessary structural measures in the vicinity of Lagunitas Road Bridge to insure the proper functioning of the completed portions of the authorized project. The non-Federal share of the costs of such measures shall be in accordance with the cost-sharing provisions contained in Section 73(b) of the Water Resources Development Act of 1974. The project is hereby further modified to eliminate any channel modifications upstream of Sir Francis Drake Boulevard.

Mr. DOMENICI. Mr. President, I want to know where it will go.

Mr. CRANSTON. Mr President, I believe this amendment is acceptable to the committee and will not take any time.

Mr. DOMENICI. Before that, will the Senator yield for a unanimous-consent request?

Mr. CRANSTON. Of course.

Mr. DOMENICI. I ask that this amendment appear at the end of the bill. Is there an objection from the Senator from California?

Mr. CRANSTON. No objection.

The PRESIDING OFFICER. Who seeks recognition?

Mr. CRANSTON. I do, to state what the amendment is for.

The PRESIDING OFFICER. The Senator from California.

Mr. CRANSTON. Mr. President, this amendment modifies the authorization of the Corte Madera Creek project in Marin County, Calif., to permit the Corps of Engineers to construct flood proofing measures to protect individual property owners.

Following the authorization of the Corte Madera Creek flood control project in the 1962 Flood Control Act, local citizens objected to the corps plan for a concrete channel upstream of Sir Francis Drake Boulevard. The corps and local citizens have now come to an agreement on a revised plan which would provide the needed flood control in a more natural and less environmentally damaging way.

I would like to point out that the originally authorized plan called for $16,300,000 in Federal moneys while the new revised plan is estimated at $15,270,000, in October 1977 figures. This is a savings of Federal dollars in the amount of $1,030,000.

I am aware that the revised plan developed by the San Francisco district engineer of the corps has not been approved yet at the Washington level. However, this is not a new project—it is a modification of a project previously approved by the Washington office of the corps and the Congress.

I hope this amendment can be speedily agreed to.

Mr. GRAVEL. Mr. President, I have no problems accepting this amendment. I think it would be acceptable, at least, on the majority side.

I might say with approval, of course, of this amendment, it should be placed properly in title IV following my amendment, when and if that is approved.

So I have no objection.

I yield to the distinguished Senator from New Mexico.

Mr. DOMENICI. Mr. President, I have no objection, even though this is a change in precedent. It is my understanding, and I direct this question to the Senator from California, that what we are going to do is less construction work in terms of an overall flood project, but, rather, accomplish the same end by raising a bridge and doing some flood prevention work on homes that would be affected, is that correct?

Mr. CRANSTON. Yes. At less cost to the Government.

Mr. DOMENICI. Less cost?

Mr. CRANSTON. Yes.

Mr. DOMENICI. The minority has no objection.

The PRESIDING OFFICER. Does the Senator from California yield back the remainder of his time?

Mr. CRANSTON. I do.

Mr. GRAVEL. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from California.

The amendment was agreed to.

The PRESIDING OFFICER. Who seeks recognition?

Mr. STAFFORD addressed the Chair.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. CRANSTON. Will the Senator yield for a unanimous-consent request?

Mr. STAFFORD. Yes.

Mr. CRANSTON. Mr. President, I ask unanimous consent that Kathy Files of my staff be granted privilege of the floor throughout consideration of this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 1694

(Purpose: To provide technical assistance in the control of streambank erosion)

Mr. STAFFORD. Mr. President, I call up my amendment which is at the desk, No. 1694, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Vermont (Mr. STAFFORD) proposes an amendment numbered 1694.

Mr. STAFFORD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 17, after line 5, insert the following, and number accordingly:

SEC. . Section 32 of Public Law 93-251 is amended by adding at the end thereof a new subsection:

"(f) In addition to the other authorities in this section, the Secretary of the Army, acting through the Chief of Engineers, shall provide technical assistance to retard streambank erosion to any person or agency requesting such assistance, if the applicant is experiencing, or can be expected to experience, erosion-threatening dwellings or loss of property. The Secretary may also provide assistance to an applicant who would be likely to be affected by flooding downstream from property threatened by erosion: *Provided,*

That the owner of such property agrees to allow the applicant to perform erosion-retarding work. There is authorized to be appropriated to the Secretary such sums as may be necessary to carry out this subsection.".

Mr. STAFFORD. Mr. President, one of the more troublesome problems in many areas of the Nation—certainly in the Northeast—involves streambank erosion, which cuts away at property, undermines homes, produces severe siltation, and, at times of heavy rainfall, results in the uprooting of vegetation, blocking streams and producing significant local flooding.

This is a proposal that is intended to provide an ounce of prevention. Let me give you an example in a tiny community in my own State. The town of Wardsboro, Vt., received some $750,000 in Federal disaster assistance as a result of an August 1976 flood, which ripped out bridges, homes, and sections of roadway. Much of this loss could have been prevented by wise soil management practices ahead of time. Severe soil erosion control, too, could have prevented it.

During the 93d Congress, the Streambank Erosion Control Evaluation and Demonstration Act of 1974 was enacted, authorizing a number of demonstration projects. The amendment would supplement and extend that authority, allowing the Corps of Engineers to assist local governments and people with plans to combat serious streambank erosion. This amendment does not provide a penny toward the actual cost of construction work. By making the corps expertise available to local communities and property owners, this amendment should enable people to help themselves more effectively. I urge its adoption.

I hope that the managers of the amendment, who I understand have examined it, will be willing to accept it.

Mr. GRAVEL. Mr. President, we have no difficulty in accepting this very fine amendment, for the majority.

I yield to the Senator from New Mexico.

Mr. DOMENICI. Mr. President, we have no objection.

Mr. GRAVEL. I yield back the remainder of my time.

Mr. STAFFORD. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment.

The amendment was agreed to.

Mr. STAFFORD. Mr. President, I move to reconsider the vote by which the amendment was adopted.

Mr. GRAVEL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1262

Mr. STAFFORD. Mr. President, I call up a corrected version of my amendment No. 1695, which I had submitted earlier, which I send to the desk, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Vermont (Mr. STAFFORD) proposes an unprinted amendment numbered 1262.

Mr. STAFFORD. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 17, line 5, insert the following and number accordingly:

"SEC. . (a) The Secretary of the Army, acting through the Chief of Engineers, shall undertake a program of research to increase his capability to control river ice, and to assist communities in breaking up such ice that would otherwise be likely to cause or aggravate flood damage or severe streambank erosion.

"(b) The Secretary is further authorized to provide technical assistance to local units sary ice-control or ice-breaking equipment to control or break up river ice. As part of such authority, the Secretary is authorized to purchase, utilize, and, if requested by local units of government, loan any necessary ice-control or ice-breaking equipment to such local units of government.

"(c) The sum of $3,000,000 is authorized to be appropriated to the Secretary in each of the fiscal years ending September 30, 1979, September 30, 1980, and September 30, 1981, to implement this section."

Mr. STAFFORD. Mr. President, this is a corrected version of amendment No. 1695, which I submitted earlier.

A seasonal problem which afflicts much of this Nation might be called ice floods. Following a buildup in river ice, followed by a sudden thaw, flooding is often produced by the "ice dams" that accumulate at bridge abutments or other impediments in the river.

Ice flooding has occurred in many areas this past winter, as it does every year. Here in Washington, there was even a threat that the bridges crossing the Potomac River might be imperiled by ice. The threats in many areas of the North is even more severe with the spring runoff.

The danger of ice buildup sometimes can be handled effectively through the emergency efforts of the Corps of Engineers. Such a project was approved this winter for Montpelier, Vt. But such efforts may come too late, or may involve costly last-minute work, using explosives.

I believe that with systematic and coordinated planning we can achieve new techniques in the control of river ice. I believe that we can and should successfully develop improved ice breakup techniques, and provide this information to affected communities. The corps is the proper organization to do this work, which is well beyond the means of many small communities.

This amendment is intended to strengthen the corps' ability to meet the ice-flooding problem. The only difference between this amendment and amendment No. 1695 is that this amendment clarifies the authority that the corps can itself utilize equipment purchased.

It authorizes $3,000,000 a year in fiscal year 1979, fiscal year 1980, and fiscal year 1981 to enable the corps to provide ice-breakup assistance and to purchase such equipment.

Mr. President, I hope that the managers of the bill, who have had an opportunity to examine this amendment, will accept it.

Mr. GRAVEL. Mr. President, ice is a subject with which I have some sympathy. I think the Senator has a very fine amendment, and I am prepared to accept it for the majority.

Mr. DOMENICI. We have no objection, Mr. President.

Mr. GRAVEL. I yield back the remainder of my time.

Mr. STAFFORD. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment.

The amendment was agreed to.

Mr. STAFFORD. I move to reconsider the vote by which the amendment was adopted.

Mr. GRAVEL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1700

(Purpose: To eliminte bureaucratic delays to foster hydroelectric developing at existing sites)

Mr. STAFFORD. Mr. President, I call up my amendment No.1700 and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Vermont (Mr. STAFFORD) proposes an amendment numbered 1700.

Mr. STAFFORD. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 17, after line 5, insert the following and number accordingly:

SEC. . (a) Any agency of the United States with the authority and responsibility to grant or review any license or permit needed to utilize hydroelectric power at existing dams or former industrial sites shall make every effort to simplify application procedures and to expedite the consideration of any license or permit that may be necessary for the construction or operation of such facility, or for the sale of power from such facility.

(b) The Comptroller General of the United States shall report to the Congress within one year of the enactment of this Act on the implementation of this section, his evaluation of any continuing institutional problems involved in hydroelectric development at existing dams or former industrial sites, and his assessment of the need for additional congressional action to facilitate hydroelectric development at existing dams or former industrial sites.

Mr. STAFFORD. Mr. President, this amendment would direct all Federal agencies to expedite consideration of hydropower retrofit projects. Various groups in Vermont and across the Nation are exploring the opportunities for adding new hydroelectric facilities at the sites of existing dams and former industrial plants. The Senate last year adopted several provisions intended to encourage a small-hydro revival. The Department of Energy is now developing a program to finance demonstration work

on hydro retrofit. The opportunities for retrofitting existing dams must not be dimmed by or frustrated by institutional delays imposed by Federal regulatory authorities, who often may think in terms of the time needed to review major new dam proposals.

This amendment directs Federal agencies to take every action they legally can to expedite any licenses or permits that may be required to retrofit hydropower facilities. This amendment would also direct the General Accounting Office to report to the Congress within 1 year on the effectiveness of the Federal response, with suggestions for any change in law that might be useful to facilitate retrofitting of power facilities at existing damsites.

Mr. President, I know that the managers of the bill have had an opportunity to examine this amendment, and I move its adoption.

Mr. GRAVEL. Mr. President, I have no problem accepting this amendment by the Senator from Vermont.

I yield to the Senator from New Mexico.

Mr. DOMENICI. We have no objection, Mr. President.

Mr. GRAVEL. I yield back the remainder of my time.

Mr. STAFFORD. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment.

The amendment was agreed to.

Mr. STAFFORD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GRAVEL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STAFFORD. Mr. President, I thank the managers of the bill for their cooperation in the adoption of these three amendments.

Before I yield the floor, I add, now that the official work is done, that the hazards of ice dam buildup do not apply only to stream erosion and buildings and bridges.

Last February, during one of our celebrated New England spring thaws, I was addressing a Rotary Club in the Motor Tavern Inn in Montpelier, Vt., immediately adjacent to a river flowing through that city. Halfway through my remarks, the manager of the inn came in, wearing hip boots, and told the assembled Rotarians that if they wished to get their cars out of the parking lot before they were surrounded by water, they would have to move immediately, and I lost three-quarters of my audience then.

Five minutes later the manager came back and said, "Senator, if you don't give us the keys to your car, it is going under water, too."

So I got a direct application of the dangers of flooding from ice jams damming up against bridges.

In the interests of all Senators, I thought a hazard to our public speaking was involved here as well as the other hazards.

[Laughter.]

Mr. DOMENICI. Mr. President, I ask unanimous consent that Doris Klump, of Senator DOLE's staff, have the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 1792

(PURPOSE: To authorize protection of archeological discoveries at Los Esteros Lake, New Mexico)

Mr. DOMENICI. Mr. President, I call up my amendment No. 1792.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New Mexico (Mr. DOMENICI) proposes an amendment numbered 1792.

Mr. DOMENICI. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 17, after line 5, insert the following and number accordingly:

SEC. . The project for Los Esteros Lake, Pecos River, New Mexico, authorized by section 203 of the Flood Control Act of 1954 (68 Stat. 1260), is hereby modified to authorize the expenditure of not to exceed $200,000 for the recovery of cultural resource data, in addition to any amounts authorized for this purpose pursuant to the Reservoir Salvage Act of 1960, as amended (88 Stat. 174).

Mr. DOMENICI. Mr. President, this amendment provides $200,000 to assure that artifacts from archeological sites dating to 3000 B.C. will be preserved before Los Esteros Lake in New Mexico is filled with floodwaters.

During the past 6 years, the National Park Service, Southern Methodist University, and the Center for Anthropological Studies in Albuquerque have carefully studied and cataloged the reservoir area. They have identified 60 sites eligible to be listed in the National Register. These range from 5,000-year-old campsites, where Indian families left grinding and scraping stones, more recent Indian sites with pottery and other artifacts, and the dwellings of European settlers and ranchers beginning in the 18th century.

The rescue and cataloging of these artifacts may provide important information in our study of the history of the Southwest.

To date the Corps of Engineers has obligated $261,000 to make these evaluations, and to begin to recover some of the artifacts. That sum, which is 1 percent of the cost of the Los Esteros project, is the limit permitted under Public Law 93-291.

My amendment authorizes the additional $200,000 needed to complete this important archeological work. The figure, I might add, is based on field investigations, and a plan developed by the Historic Preservation Office of New Mexico, the Advisory Council on Historic Preservation, and the corps' District Engineer in Albuquerque.

Mr. President, this is a sound and reasonable amendment. But we must act quickly. By this fall, the elevation of the dam will reach a level where a severe storm could flood sites not yet excavated and for which no money is presently available. I hope that this amendment will be accepted by the Senate. I move its adoption.

The PRESIDING OFFICER. Will the Senator advise the Chair whether this is the amendment on which he has 3 hours of debate?

Mr. DOMENICI. This is not.

That amendment, I believe, is precluded by definition until tomorrow in that it has to do with Locks and Dam 26 and user fees, a 3-hour minimum.

The PRESIDING OFFICER. The Chair thanks the Senator from New Mexico.

Mr. GRAVEL. Mr. President, I have no trouble with this amendment, and I think we should accept it. I am prepared to yield back all of my time.

Mr. DOMENICI. I thank the Senator from Alaska.

I yield back the remainder of my time and move the adoption of the amendment.

The amendment was agreed to.

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GRAVEL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOMENICI. I thank the Senator from Alaska for his consideration.

Mr. STONE. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. ALLEN. I yield.

Mr. STONE. Mr. President, I ask unanimous consent that Bruce Rowen, of my staff, be accorded the privilege of the floor during votes and consideration of this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Who seeks recognition ?

Mr. ALLEN addressed the Chair.

The PRESIDING OFFCIER. The Senator from Alabama.

UP AMENDMENT NO. 1263

Mr. ALLEN. Mr. President, I send to the desk an amendment to the bill itself and propose this amendment on behalf of myself and my distinguished colleague, Mr. Sparkman, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Alabama (Mr. ALLEN) for himself and Mr. SPARKMAN proposes unprinted amendment numbered 1263.

Mr. ALLEN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

"Section 32 of Public Law 93-251 is amended by adding at the end thereof a new subsection: "The navigation project for the Alabama-Coosa River authorized in the River and Harbor Act of 1945 is modified to authorize the Secretary of the Interior, in cooperation with the Secretary of the Army, acting through the Chief of Engineers, to provide technical and financial assistance to the State of Alabama for the purpose only

of correcting slope failures and erosion problems along the banks of the Coosa River by such methods as may be appropriately employed within the boundaries of land now owned by the United States or owned by the State of Alabama or within the waters of the Coosa River immediately contiguous thereto at the Fort Toulouse National Historic Landmark and Taskigi Indian Mound in the County of Elmore, State of Alabama. Any financial assistance provided hereunder shall be used only for the purpose specified, subject to such other terms and conditions as the Secretary of the Interior may impose, shall be in addition to and not in derogation of any other Federal financial assistance for historic preservation purposes to which the State of Alabama may otherwise be entitled under any other provisions of law, but shall not be subject to the limit on authorized appropriations for the Alabama-Coosa River navigation project imposed by the River and Harbor Act of 1945.

Mr. ALLEN. Mr. President, I yield myself such time as I may require.

Mr. President, on May 13 of last year, my distinguished senior colleague from Alabama, Senator SPARKMAN, and I introduced S. 1505, a bill designed to authorize the Corps of Engineers to correct slope failures which have occurred over recent months and years at the site of Fort Toulouse in Elmore County, Ala. Fort Toulouse and the nearby Taskigi Indian Mound are national historic landmarks located on Federal property near the confluence of the Coosa and Tallapoosa Rivers. Engineering projects by the Corps of Engineers on the Coosa River are suspected to have caused the accelerated sloughing off of the Coosa River bank at Fort Toulouse, a state of affairs which frankly threatens the eventual destruction of the fort and of the Indian Mound together with a consequent loss of the wealth of yet uncataloged archeological and historical information.

Now, Mr. President, perhaps it would be useful for me to trace briefly the history of this very important national historic site so that Senators will appreciate the importance of preserving it for the future.

In 1717, Captain Marchand of the French Army and 19 French colonial soldiers departed the Port of Mobile for the interior of Alabama. Captain Marchand was acting at the orders of Governor Bienville, who was then the Governor of the French Louisiana Territory. Bienville reasoned that the newly established city of New Orleans could only be successfully protected from the British and from the Spanish if the French constructed an outpost in the interior of Alabama to act as a flank defense against incursions from British colonies on the eastern seaboard or from the Spanish colony in Florida.

After sailing several hundred miles inland along the Alabama River, Captain Marchand selected for occupation a strategic site at the origin of the Alabama River near the confluence of the Coosa and Tallapoosa Rivers. With the acquiescence of the Creek Indian nation, Captain Marchand's men constructed a large fortification to control the river routes and named the structure Fort Toulouse. Many of the French soldiers thereafter took Indian wives, and Captain Marchand himself married the Creek Princess Sehoy of the Family of the Wind, the ruling family of the Creek Nation. From their offspring were drawn the great war chiefs and political leaders of the Creek Nation.

Since those early days, Fort Toulouse has had a long and important history in the development of the Southeast. Occupied successively by the French, the Creeks, and the British, in 1814 the fort was garrisoned by Andrew Jackson when his army of Tennesseans were en route to the Battle of New Orleans. Fort Toulouse served as Jackson's headquarters during his negotiations with the Creek Nation, and it was at Fort Toulouse that the famous Creek leader, William Weatherford—or Red Cloud—surrendered to Jackson by symbolically riding into Jackson's camp unarmed with a deer across his saddle as a gift.

Fort Toulouse next served as a principal site of settlement in the newly opened Alabama territory, but early in the history of the State of Alabama, the site was abandoned in favor of another developing town, the present capital at Montgomery which is some 15 miles downstream.

Fort Toulouse has long been State property, but some 10 years ago the site was designated a national historic landmark, and in 1971 a large tract of surrounding property was acquired by the Federal Government for a Federal park. Substantial sums of money have been expended both by the State of Alabama and by the Federal Government in reconstructing Fort Toulouse and in improving park facilities at the location. I have been particularly impressed with the tremendous local citizen participation in various projects associated with the fort, and frankly I feel great pride at the magnificent effort made by many individual citizens to upgrade the fort site even when Federal support for the project was not significant. But now, Mr. President, we face a problem that cannot be solved from purely local resources.

Now, as I said earlier, Mr. President, the Coosa River, probably as a result of Corps of Engineers projects on the Alabama-Coosa River system, has begun in the last few years to shift in its banks at the fort site and is eroding at an alarming rate the bluff on which the fort is situated. The problem has reached crisis proportions, and the northern berm and associated timber wall are in the process of sloughing off into the River. Immediate action is clearly required if this historic treasure is to be preserved. For that reason, Senator SPARKMAN and I introduced S. 1505.

I might also mention, Mr. President, that in addition to the fort, significant archeological sites in the immediate vicinity of the fort—and here I refer to the Taskigi Indian Mound—are also threatened. The amendment I propose is designed to guarantee that work on a prehistoric temple mound and related archeological remains at the site can continue so that all possible information can be developed regarding a prehistoric Indian culture which existed there some 10,000 years ago.

The Secretary of the Interior is already fully apprised of the situation at the fort, and I am confident that he also believes that prompt action is in order. In fact, Mr. President, the Department of the Interior has written to the distinguished chairman of the Committee on Energy and Natural Resources to recommend enactment of the provisions of this amendment. The letter from the Department of the Interior states that, "It is clear that emergency stabilization work is urgently needed to prevent further loss of the prehistoric and historic resources of this nationally significant site." In short, action must be taken in this Congress if further damage is to be prevented. My amendment will achieve that result.

Mr. President, I have drawn my amendment in careful fashion to insure that only those costs directly associated with preserving these historic sites will be covered. Therefore, no expenditures will occur which do not directly aid in reducing the slope failures as the fort site. The object of this amendment is simple: the amendment is designed strictly to shore up the bank at the site of the fort and mound, thereby preserving these archeological monuments for future years of study and recreational enjoyment.

I might state that S. 1505 received the approval of the U.S. Department of Interior in a letter dated July 25, 1977, to the Honorable HENRY M. JACKSON, chairman of the Committee on Energy and Natural Resources of the U.S. Senate, Washington, D.C.

That bill, S. 1505, and this amendment, would authorize the Secretary of the Interior, in cooperation with the Corps of Engineers, to provide technical and financial assistance to the State of Alabama for correction of erosional problems along the Coosa River threatening the integrity of the Fort Toulouse National Historical Landmark and adjacent Taskigi Indian Mound.

I ask unanimous consent that a letter dated July 25, 1977, from the Department of the Interior to the chairman of the Committee on Energy and Natural Resources be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF THE INTERIOR,
Washington, D.C. July 25, 1977.

HON. HENRY M. JACKSON,
Chairman, Committee on Energy and Natural Resources, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: This responds to the request of your Committee for the views of this Department on S. 1505, a bill "To authorize the Secretary of the Interior to assist in the preservation of the Fort Toulouse National Historic Landmarks and the Taskigi Indian Mound in the State of Alabama, and for other purposes."

We recommend the enactment of S. 1505.

S. 1505 would authorize the Secretary of the Interior, in cooperation with the Corps of Engineers, to provide technical and financial assistance to the State of Alabama for correction of erosional problems along the Coosa River threatening the integrity of the Fort Toulouse National Historic Landmark and adjacent Taskigi Indian Mound.

Fort Toulouse, in Central Alabama, was constructed in 1717 by the French as the eastern outpost of the Province of Louisiana. It is situated on the bank of the Coosa River, and apparently has been relocated in the

past to avoid the ravages of erosion. In 1814, Andrew Jackson's forces occupied the site after defeating the Creek Indians at the Battle of Horseshoe Bend. The site was the scene of the treaty ending the Creek War.

At the present time, the Coosa River is eroding its river banks at such a rate that the crumbling bank of the river is only a few feet from the historic fort. The nearby Taskigi Indian Mound has already been encroached upon by the river. Some of its archeological features, such as potsherds, have already been exposed by the the eroding river bank.

Fort Toulouse is a national historic landmark which attests to its national significance. We believe that the Fort and the Indian Mound deserve to be protected. It is clear that emergency stabilization work is urgently needed to prevent further loss of the prehistoric and historic resources of this nationally significant site.

The Corps of Engineers has estimated that the cost of such protection would range between $5.4 million and $10.5 million, depending on the level of construction carried out. The Department of the Interior does not have funds available to accomplish this task. Accordingly, we would need the necessary protection of the Fort. The Committee might also want to consider a direct authorization of funds in S. 1505 to the Army Corps of Engineers who will probably carry out this river bank stabilization work.

Sincerely,

BOB HERBST,
Assistant Secretary.

Mr. GRAVEL. Mr. President, I have no problems in accepting this amendment. I think it has great merit, and I yield to the Senator from New Mexico.

Mr. ALLEN. I thank the Senator.

Mr. DOMENICI. Mr. President, I might say to the distinguished Senator from Alabama I have some concern, and I just want to discuss it with him.

Mr. ALLEN. All right.

Mr. DOMENICI. It appears to me that there has been no economic justification for this project and no relation to Corps projects, and the information we have is that the erosion may be aggravated by a private power dam.

But we do have, I say to my good friend from Alabama, in section 32 of the law an overall program for demonstration programs that has as a goal the accomplishment of the same kind of purposes.

I am wondering if the Senator will agree to merely modify or amend his amendment to include as a preface to his amendment that section 32 of Public Law 93–251 is amended by adding at the end thereof a new section which would then be the Senator's amendment as he proposed it today.

That would put it in an ongoing project of this type wherein this kind of problem is handled rather than to put it in as a separate new section without the adequate study and evaluation that usually goes into it as part of a corps project.

Mr. ALLEN. Apparently it has been studied, I say to the distinguished Senator from New Mexico, and in S. 1505 identical language to this language was approved by the U.S. Department of the Interior as shown by this letter dated July 25, 1977 from the Department of the Interior that I have asked to be printed in the RECORD.

Mr. DOMENICI. I say to the Senator I certainly do not want to make the distinction on different agencies, but I say to my good friend from Alabama that there are certain procedures that the Corps of Engineers follow. We have tried very diligently to have them follow those procedures as best we can, and this does not follow that orderly procedure within the corps but would if it were in section 32.

Mr. ALLEN. Yes. I have no objection to the Senator's suggestion provided that it would accomplish the ends that are sought to be accomplished by the amendment.

I ask the distinguished manager of the bill, what would be the effect of the suggested modification as suggested by the distinguished Senator from New Mexico?

Mr. GRAVEL. If I might respond to the Senator, as I understand it, the goals that he seeks will be accomplished, but it will be done under an ongoing program that the Corps of Engineers has. If the Senator wanted to accept the modification made by the Senator from New Mexico we could make it very clear that if the Corps of Engineers is dilatory our hope is to later this year come forward with another bill and I think both I and undoubtedly the Senator from New Mexico would then support legislation to aggressively circumvent that corps process if the Senator from Alabama finds them to be too circuitous.

So I am led to believe that the Senator's goals can be accomplished. We have an ongoing corps program and procedure for doing that and if we direct that it be included in that then it should be done.

Mr. ALLEN. Well, would this modification, as suggested, mandate the Corps of Engineers to proceed with this work?

Mr. GRAVEL. I would interpret it as that. Is that the understanding of the Senator from New Mexico?

Mr. DOMENICI. That is my understanding.

Mr. ALLEN. The work would be done without further legislation if this amendment is agreed to by the House?

Mr. DOMENICI. That is correct.

Mr. GRAVEL. That is correct, and this amendment would be considered as directing them to do it.

Mr. ALLEN. Without further investigation; is that correct?

Mr. GRAVEL. They would follow their normal investigatory route as part of this program. But I do not think that should offer any delay, and I would hope we would not see bureaucracy try to reinvent the wheel. If this would be the work of the Department of Interior I would be most chagrined.

Mr. DOMENICI. I want to say to the Senator from Alabama that I do not offer the suggestion to him for purposes of making the project more difficult to accomplish nor to delay it but rather to create the consistency that is in the bill and, I believe, that Public Law 93–251, in particular section 32, is exactly for this.

Mr. ALLEN. I see.

Mr. DOMENICI. And we would take the Senator's language, if he accepts my suggestion, and add it right at the end of the section so that his project would be one of those they are doing pursuant to section 32.

Mr. ALLEN. I see.

Well, certainly with that explanation I would thank the distinguished Senator from New Mexico and the distinguished manager of the bill (Mr. GRAVEL) for their suggestions and I would accept the modification with my thanks for the suggestion.

Mr. GRAVEL. I would in that event, Mr. President, be prepared to yield back the remainder of my time if the Senator is so prepared.

The PRESIDING OFFICER. Does the Senator from Alabama yield back the remainder of his time?

Mr. ALLEN. I send a modification to the desk, this modification to be added at the beginning of my amendment. That is the modification suggested by the distinguished Senator from New Mexico.

Mr. DOMENICI. That is correct.

The amendment, as modified, is as follows:

On page 17, after line 5, insert the following, and number accordingly:

"Section 32 of Public Law 93–251 is amended by adding at the end thereof a new subsection:"

The navigation project for the Alabama-Coosa River authorized in the River and Harbor Act of 1945 is modified to authorize the Secretary of the Interior, in cooperation with the Secretary of the Army, acting through the Chief of Engineers, to provide technical and financial assistance to the State of Alabama for the purpose only of correcting slope failures and erosion problems along the banks of the Coosa River by such methods as may be appropriately employed within the boundaries of land now owned by the United States or owned by the State of Alabama or within the waters of the Coosa River immediately contiguous thereto at the Fort Toulouse National Historic Landmark and Taskigi Indian Mound in the County of Elmore, State of Alabama. Any financial assistance provided hereunder shall be used only for the purpose specified, subject to such other terms and conditions as the Secretary of the Interior may impose, shall be in addition to and not in derogation of any other Federal financial assistance for historic preservation purposes to which the State of Alabama may otherwise be entitled under any other provisions of law, but shall not be subject to the limit on authorized appropriations for the Alabama-Coosa River navigation project imposed by the River and Harbor Act of 1945.

Mr. GRAVEL. I yield back the remainder of my time.

Mr. ALLEN. I yield back the remainder of my time.

The PRESIDING OFFICER. Do the managers of the bill yield back their time?

Mr. DOMENICI. We yield back our time and we have no objection to the amendment, as modified.

The PRESIDING OFFICER. The question is on agreeing to the amendment, as modified, of the Senator from Alabama.

The amendment, as modified, was agreed to.

AMENDMENT NO. 1830

(Purpose: To authorize a project for Fisherman's Wharf, California)

Mr. GRAVEL. Mr. President, I call up amendment No. 1830.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Alaska (Mr. GRAVEL) proposes an amendment numbered 1830.

Mr. GRAVEL. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 17, line 5, insert the following:

SEC. —. The Secretary of the Army, acting through the Chief of Engineers, is hereby authorized and directed to construct the project for light-draft navigation in the Fisherman's Wharf area, San Francisco Harbor, California, substantially in accordance with the report of the Chief of Engineers, dated February 3, 1978, at an estimated Federal cost of $8,650,000.

Mr. GRAVEL. Mr. President, because the harbor at Fisherman's Wharf is essentially unprotected, wave energy from the open ocean and from local storms causes damage to vessels and mooring facilities. The wharf area is the principal unloading point and processing center for offshore fisheries outside of Golden Gate largely because of its central location and proximity to the open ocean. Many commercial boaters have moved to more protected harbors in the area even though they continue to visit Fisherman's Wharf for unloading or use it as a temporary base. The existing facilities at the wharf are limited and dilapidated. Provision of a protected berthing area would provide the impetus and incentive for improvement of the processing facilities. Other needs include provision of accommodations for recreation boats; additional pier fishing opportunities; maintenance of the recreation value for tourists and sightseers; protection of the historic vessels at the Hyde Street Pier; and improvement of water quality.

I think, Mr. President, anybody who has had the unusual pleasure of going to Fisherman's Wharf and regaling himself of that unusual locale can appreciate the need for this amendment. I have been asked to introduce this amendment by the people of that area, and am happy to do so, and I hope we can secure its passage on this particular bill.

I yield.

Mr. DOMENICI. I have no objection to the amendment.

Mr. GRAVEL. I yield back the remainder of my time.

The PRESIDING OFFICER. Do the managers of the bill yield back the remainder of their time? Does the Senator from New Mexico yield back the remainder of his time?

Mr. DOMENICI. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Alaska.

The amendment was agreed to.

Mr. GRAVEL. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOMENICI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GRAVEL. Mr. President, I suggest the absence of a quorum and ask unanimous consent that the time be charged to both sides.

The PRESIDING OFFICER. Without objection, it is so ordered. The absence of a quorum being suggested, the clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GRAVEL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ALLEN). Without objection, it is so ordered.

Mr. GRAVEL, Mr. President, I ask unanimous consent that the staff assistant of Senator HEINZ, Bob Hoeppler, be permitted the privileges of the floor during the deliberation on this legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRAVEL. If the Senator from Texas is ready we would be happy to take up his amendments. He has three amendments that I think we could accommodate him on if he is prepared to take them up.

I yield the floor.

UP AMENDMENT NO. 1264

Mr. BENTSEN. I thank the distinguished managers of the bill and I seek recognition.

I have an amendment which I am sending to the desk and I ask the clerk to report.

The PRESIDING OFFICER. The clerk will please state the amendment.

The legislative clerk read as follows:

The Senator from Texas (Mr. BENTSEN) proposes an unprinted amendment numbered 1264.

Mr. BENTSEN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 17 line 5 insert the following:

That the matter set forth in the second paragraph under the center heading "BRAZOS RIVER BASIN" in section 10 of the Flood Control Act of 1946 is amended by inserting "and other" after "irrigation".

Mr. BENTSEN. The purpose of this amendment is very straightforward and logical; I hope it will be accepted by the committee.

When the Lake Belton project was authorized by the 1946 Federal Flood Control Act, Congress reserved 45,000 acre-feet of reservoir capacity to be used for irrigation water in the Leon, Lampasas, and Little River Valleys. This anticipated demand for irrigation water has simply not materialized. No water from Lake Belton has ever been used for irrigation, and there is no reason to presume such a demand in the future.

The area in which Lake Belton is located has, however, enjoyed a very substantial population increase in recent years. The population of the Temple-Killeen area in Texas is projected to increase by approximately 20 percent between 1976 and 1980 and should reach 200,000 by the end of this decade.

As a result of this population increase the Temple-Killeen area is no longer able to satisfy water demands from ground water resources. Available ground water supplies are being rapidly depleted, and some of the area water is highly contaminated by dissolved minerals.

My amendment is designed to provide the obvious answer to this emerging problem. There are 45,000 acre-feet of water in Lake Belton set aside for irrigation, a use for which there is no demand. I would propose to make these water resources available to the communities of the Temple-Killeen area, thereby insuring adequate fresh water supplies for a growing and prospering area of Texas.

Mr. President, I urge the adoption of my amendment.

Mr. DOMENICI. Mr. President, will the Senator yield for a question?

Mr. BENTSEN. Yes.

Mr. DOMENICI. It is understood, is it not, that the cost would be fully reimbursed in accordance with the Water Supply Act?

Mr. BENTSEN. The Senator from New Mexico is correct in that statement.

Mr. GRAVEL. Mr. President, we have no objection to the amendment on the majority side. I yield to the minority.

Mr. DOMENICI. We have no objection.

● Mr. EAGLETON. Mr. President, I have joined Senator BENTSEN in sponsoring this amendment to section 221 of the Flood Control Act of 1970 because it will eliminate a problem with cost-sharing contracts at two important Missouri projects—Long Branch Lake in Macon, Mo., and Smithville Lake in Smithville, Mo.

The Long Branch and Smithville projects are well on the way to completion; Long Branch Dam will be finished this year, while the Smithville Dam was completed in 1976. Recreational development is authorized at both projects. Under the Federal Water Projects Recreation Act of 1965, 50 percent local cost sharing is required for all recreation development and fish and wildlife management. In 1969, the Missouri General Assembly passed the Missouri Water Projects Recreation Act to enable the State to enter into the necessary cost-sharing agreements. The State, however, could not enter into formal contracts until the general assembly also passed an instructional joint concurrent resolution in 1976. When this was done and the contracts drawn up, the Corps of Engineers' General Counsel did not approve the agreements because repayment obligations remained contingent upon future legislative appropriations.

What we have here is a "Catch 22" situation; recreational development must be carried out as part of the authorization, and cost-sharing contracts must be entered into for this purpose under Federal law. However, the only entity, in this case the State, which can realistically be expected to pay the development costs has been ineligible to participate. This amendment would remedy this unworkable situation and allow us in Missouri to get started on the development of the recreational facilities at Long Branch and Smithville Lakes. I, therefore, urge that it be adopted.●

Mr. GRAVEL. I yield back the remainder of my time.

Mr. BENTSEN. I yield back the remainder of my time, and ask for a vote on the amendment.

The PRESIDING OFFICER (Mr. HODGES). Does the Senator from Alaska yield back the remainder of his time?

Mr. GRAVEL. I yield back the remainder of my time.

The PRESIDING OFFICER. All remaining time having been yielded back, the question is on agreeing to the amendment of the Senator from Texas.

The amendment was agreed to.

Mr. CRANSTON. Mr. President, I ask for the yeas and nays on the King's River amendment, which was set aside temporarily so that we could deal with these other amendments.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

AGRICULTURAL CREDIT ASSISTANCE ACT OF 1978

The PRESIDING OFFICER. Under the previous order, the hour of 2 o'clock p.m. having arrived, the Senate will now resume the consideration of S. 2146, and will proceed to vote on the amendments by Senators EAGLETON, ALLEN, and CLARK.

The question is on agreeing to the amendment of the Senator from Missouri (Mr. EAGLETON).

The amendment was agreed to.

The PRESIDING OFFICER. The question now is on agreeing to the amendment of the Senator from Alabama (Mr. ALLEN).

The amendment was agreed to.

The PRESIDING OFFICER. The question now is on agreeing to the amendment of the Senator from Iowa (Mr. CLARK).

Mr. ALLEN. Mr. President, this amendment is contested, and I believe the distinguished Senator from Iowa wishes a yea or nay vote. He is not in the Chamber at the moment, and I therefore ask unanimous consent that I might be permitted to suggest the absence of a quorum until Senator CLARK returns.

The PRESIDING OFFICER. The Senator does not need unanimous consent to suggest the absence of a quorum.

Mr. ALLEN. I suggest the absence of a quorum.

Mr. DOMENICI. Here he is.

The PRESIDING OFFICER. Does the Senator withdraw that, since Senator Clark is now here?

Mr. ALLEN. Yes.

Mr. CLARK. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

AMENDMENT NO. 1825

The question is on agreeing to the amendment (No. 1825) of the Senator from Iowa (Mr. CLARK). The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Nevada (Mr. CANNON), the Senator from Arizona (Mr. DECONCINI), the Senator from Mississippi (Mr. EASTLAND), the Senator from Colorado (Mr. HASKELL), the Senator from Montana (Mr. HATFIELD), the Senator from Hawaii (Mr. INOUYE), and the Senator from West Virginia (Mr. RANDOLPH) are necessarily absent.

I further announce that, if present and voting, the Senator from West Virginia (Mr. RANDOLPH) would vote "nay."

Mr. STEVENS. I announce that the Senator from Oregon (Mr. HATFIELD) and the Senator from Kansas (Mr. PEARSON) are necessarily absent.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD) would vote "nay."

The result was announced—yeas 29, nays 62, as follows:

[Rollcall Vote No. 145 Leg.]

YEAS—29

Abourezk	Gravel	Moynihan
Anderson	Hart	Nelson
Bentsen	Hathaway	Percy
Burdick	Hollings	Riegle
Church	Huddleston	Sarbanes
Clark	Humphrey	Sasser
Cranston	Kennedy	Stevenson
Culver	Matsunaga	Stone
Durkin	McGovern	Williams
Ford	Morgan	

NAYS—62

Allen	Goldwater	Muskie
Baker	Griffin	Nunn
Bartlett	Hansen	Packwood
Bayh	Hatch	Pell
Bellmon	Hayakawa	Proxmire
Biden	Heinz	Ribicoff
Brooke	Helms	Roth
Bumpers	Hodges	Schmitt
Byrd, Harry F., Jr.	Jackson	Schweiker
Byrd, Robert C.	Javits	Scott
Case	Johnston	Sparkman
Chafee	Laxalt	Stafford
Chiles	Leahy	Stennis
Curtis	Long	Stevens
Danforth	Lugar	Talmadge
Dole	Magnuson	Thurmond
Domenici	Mathias	Tower
Eagleton	McClure	Wallop
Garn	McIntyre	Weicker
Glenn	Melcher	Young
	Metzenbaum	Zorinsky

NOT VOTING—9

Cannon	Hatfield, Mark O.	Inouye
DeConcini	Hatfield, Paul G.	Pearson
Eastland		Randolph
Haskell		

So the amendment was rejected.

The PRESIDING OFFICER (Mr. RIEGLE). If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. Under the previous order, third reading of S. 2146 having occurred, the Senate will now proceed to the consideration of the House companion bill, H.R. 11504, which will be amended by striking all after the enacting clause and inserting the text of the Senate bill followed by third reading and passage of the House bill without debate.

Mr. ALLEN. Mr. President, may we have order in the Senate?

The PRESIDING OFFICER. The Senate will be in order.

The bill will be stated by title.

The second assistant legislative clerk read as follows:

A bill (H.R. 11504) to amend the Consolidated Farm and Rural Development Act, provide an economic emergency loan program to farmers and ranchers in the United States, and extend the Emergency Livestock Credit Act.

The PRESIDING OFFICER. Without objection, the text of S. 2146 as amended by the Senate is substituted for the text of the bill H.R. 11504.

The question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

Mr. ALLEN. Mr. President, I have an amendment to the title that I send to the desk.

The PRESIDING OFFICER. The Chair advises that the amendment is not in order until the bill is passed.

Mr. ALLEN. I leave it at the desk, then.

The PRESIDING OFFICER. The bill having been read the third time, the question now is, Shall the bill as amended pass?

Mr. ALLEN. Mr. President, I call for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that this be a 10-minute rollcall vote, with the warning bells to sound 2 minutes after the beginning.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ALLEN. Mr. President, I ask unanimous consent that the name of the distinguished and gracious Senator from Minnesota (Mrs. HUMPHREY) be added as a cosponsor of S. 2146.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMENTS ON USDA REPORT ON RECLAMATION PROJECT FARMS

● Mr. ABOUREZK. Mr. President, I recently asked Prof. Phillip LaVeen of the University of California at Berkeley to comment on a report issued by the Department of Agriculture on the impact of proposed regulations for the sale of excess lands in Federal reclamation projects. The report concluded that small farms (160–320 acres) would yield very good incomes to their operators. There has been some criticism of the report's methods, and Professor LeVeen shares at least some of these reservations. Overall, however, he found the report reliable and accurate in projecting net incomes. He makes a very important additional point, however, when he states that the report fails to account for the tremendous increase in wealth a farmer can expect from the ownership of reclamation land. This increase results from the fact that reclamation land, in addition to the normal appreciation for agricultural land, receives a very substantial appreciation due to the conditions of its sale.

The land is sold at controlled prices which do not reflect value added by the construction of the project. If the new owner retains ownership for a period of time (usually half the life of the project,

or about 20 years) he can sell the land at market value, including the value added by the project. This frequently amounts to a value equal to twice the controlled price.

The increasing evidence of the prospects for success for small farmers in reclamation projects makes it very clear that Congress must act to set strict acreage limitations in these projects so that as many people as possible can reap the benefits of the program's tremendous subsidies.

I ask unanimous consent that Professor LeVeen's letter be printed in the RECORD.

The letter follows:

UNIVERSITY OF CALIFORNIA,
Berkeley, Calif., April 11, 1978.

HON. JAMES ABOUREZK,
U.S. Senator, Committee on the Budget, U.S. Senate Office Building, Washington, D.C.

DEAR SENATOR ABOUREZK: Last February, you wrote inquiring if I would evaluate the U.S. Department of Agriculture's study of the proposed regulations for the Reclamation Act; this letter is a response to that request.

My most general comment concerns the validity of the conclusions of that report which show that farms of 160 and 320 acres are generally capable of producing enough income to support a family. I find no problems with the methodology of the USDA report with one exception. The data are based upon reasonably accurate cost figures, but they are based on 1976 prices. At the current time, most of the crop prices have fallen from their 1976 levels. Revisions of the report would suggest that the income capacity should be lowered because of lower crop prices. However, the current price and cost conditions may not be representative of the long run.

Ideally, we would like to have estimates of farm income capacity which are based on the true long-run prices and costs which will prevail over the life of the project. Unfortunately, we do not know what these long-run prices and costs will be. The present conditions may represent unusually depressed prices. Certainly, the period of 1973–1976 represented unusually high prices.

Much of the criticism of the report is based on its use of relatively high crop prices which yield high income estimates. My own feeling is, and based upon some work that I have done, that the estimates of the USDA report are reasonably precise.

There is one point, however, which I think deserves greater elaboration. It should be recognized that there will be an additional economic benefit to any family which can obtain 160 or 320 acres of land, which is not explicitly pointed out in the report, that is as follows:

The incomes reported in the study are for labor and management. They exclude a return on capital. However, presumably for every year the farmer pays the bank for his initial loan to buy the land and other capital of the farm, his equity in the farm will grow. In 30 years or so, the farmer will be the owner of an asset worth at least one-half million dollars in current prices and land values. They will likely be much higher in the values which obtain in 30 years.

Thus, in addition to the annual income the farmer receives, his wealth will increase rapidly to the point of which, when he sells his farm after 25 or 30 years, he may well be a millionaire as a result of the economic opportunity afforded by the Reclamation Act. This wealth, in effect, is completely overlooked in the report.

The third point that I wish to make concerns the report's differing conclusions for the Westlands Water District as opposed to the Imperial Irrigation District. The report points out that farms in the Westlands Water District will be capable of providing families with incomes two to three times higher than farms in the Imperial Irrigation District. It should be pointed out, however, that this difference does not derive from different farming conditions but simply from the different assumptions of the report. This point is of considerable importance. The major reason that Imperial Irrigation District farms produce low incomes is the report's assumption that farmers must buy the land in that district at the current market value of approximately $1,500 to $2,000 per acre. On the other hand, it is that the report assumes that farmers in the Westlands District will be able to purchase the land for $700 per acre. The interest costs, therefore, in the Imperial Irrigation District are much higher, and these interest costs effectively wipe out much of potential income which would become available for the farmer.

Now the report assumed the high land prices in the Imperial Valley because the Bureau of Reclamation has not established what the prewater price of land should be in the Imperial Irrigation District. Certainly the $2,000 per acre in the Imperial Irrigation District represents a major portion of the benefits of the project. Land would have a very low value without project water in this area. Had the report used lower prices of land in its conclusion, farm income would have been roughly the same as in the Westlands.

There is considerable interest in exempting the Imperial Irrigation District from the excess land provisions of the Act. Some might interpret the differences in economic potential in the two irrigation districts to be justification for such a move. However, it would appear that there is no economic justification for treating the Westlands and Imperial differently.

There are many minor points that could be made regarding the USDA report. I do not think that these are of sufficient importance to merit their discussion. I have many other interests and concerns regarding the development of reclamation policy, and I have written about these in two recent papers which I am including along with this letter. The first of these papers deals with the economic implications of imposing the proposed and alternative regulations in California. I think this paper will be of considerable relevance to the issues at hand. The second paper deals more generally with the Bureau of Reclamation as an agency of economic and rural development. This paper attempts to place in perspective the history of reclamation policy and argues that the Bureau of Reclamation by its very nature cannot carry out effectively rural development in states such as California. This paper may be of interest to you as well.

If I may be of additional assistance to you, do not hesitate to write.

Sincerely yours,

E. P. LEVEEN,
Assistant Professor of Agricultural and Resource Economics.●

● Mr. McGOVERN. Mr. President, I rise in support of the pending legislation and urge its passage. For a number of years, I was the chairman of the subcommittee which reported this legislation. Under the reorganization of the committee, I now chair another subcommittee but remain the ranking majority member of the Subcommittee on Agricultural Credit and Rural Electrification. I congratulate my able colleague from Alabama (Mr. ALLEN), the present chairman, for his leadership in the subcommittee and for his performance in the management of this bill on the floor. My congratulations also go to our distinguished chairman, the senior Senator from Georgia (Mr. TALMADGE) for his valuable contributions to this bill as well as other major agricultural bills which have been passed in the Chamber.

Mr. President, though I am no longer the chairman of the Agricultural Credit Subcommittee, I maintain an active and sustaining interest in the subject matter. Farmers continue to be our most active participants in the credit market. As costs of production continue to rise it is thoroughly predictable that this quest for credit will be an integral if not major segment of farmers' productive capacity.

Commercial lending institutions and the Farm Credit Administration continue to be the backbone of the credit system for farmers. This has been the history of agriculture. In recent years, however, due to escalating land costs and inflated operating conditions as well as the entry of young farmers into the noble profession, the Farmers Home Administration has been called upon to furnish the major credit supplement to those unable to obtain credit through conventional means. In this regard, Mr. President, I want to call attention to the outstanding job the FmHA has done over the past years. Faced with intolerable shortages of personnel, the administration has continued to respond to agriculture's credit needs on both normal and emergency bases. In my own State, the FmHA lending section has become the largest single credit source in South Dakota. In this connection, I want to bring to the attention of this body the outstanding work of our State director, Mr. Jack Weiland. New on the job with the change of administrations, Jack Weiland has become a leader of unprecedented proportions. It is difficult to imagine how he has mastered the intricacies of administration in so short a time. For these reasons, I want to publicly commend him.

Mr. President, on the farmer credit side of this bill, I want to endorse its provisions because they are urgently needed. Current lending ceilings are far too low for both established and young farmers to perform the important function of producing food for the Nation and the world. Land acquisition ceilings and operating loan limits under existing legislation are totally inadequate and I do not think that there is anyone who does not recognize this. An important provision of this section of the bill is that we can now assist farm partnerships and family corporations. It is my judgment that there is sufficient legislative history on this subject to insure that its provisions will not be abused.

On the rural development side of the bill, I endorse the provisions for water and waste disposal, community facility loans, and business and industrial loans. Agriculture has come a long way since the end of World War II. And so has rural America. No longer do small towns and communities serve only as service centers for farmers. They have taken on a new identity of autonomous commercial communities, each with its own individual characteristics and its own problems. Public facilities are necessary to sustain their expansion. There is public concern for adequate financing for

ever expanding small business and manufacturing plants that are now an accepted part of the formerly pastoral small town.

As a matter of fact, Mr. President, these cities are now bustling and vibrant centers of commerce, business and various levels of fabricating manufactured goods. In many instances, they are also centers of higher education as well as contributors to the cultural and artistic heritage of our land. Indeed, demographic studies indicate a decided movement of people from urban centers to medium and small towns as our Nation's attitudes develop new values on the quality of life. For these reasons a strong program is needed to insure adequate funding for desirable aspects of public and business facilities. This legislation does this, especially in terms of degree of Federal commitment to such programs as water and waste disposal loans and grants.

Mr. President, I consider this bill a constructive step toward meeting our obligations to farmers and rural America. I urge its overwhelming passage.●

● Mr. ROBERT C. BYRD. Mr. President, I want to express my appreciation and admiration for the work of Senator ALLEN, the distinguished floor manager of S. 2146, the Consolidated Farm and Rural Development Act. He and the able minority managers, Senator CURTIS and Senator DOLE, moved this important agriculture bill to Senate passage with their usual skill and demonstrated their thorough knowledge of the field.

I also want to commend the able chairman, Senator TALMADGE, who also moved to passage today the conference report on H.R. 6782, the Emergency Agricultural Act. Under his chairmanship, the Committee on Agriculture, Nutrition, and Forestry always distinguishes itself in its efficient manner of expediting important legislation on the floor.●

Mr. THURMOND. Mr. President, I rise in support of S. 2146, the Agricultural Credit Assistance Act of 1978.

Many thousands of the farmers of our country are facing financial crisis. They are struggling with high production costs and low commodity prices. Others are suffering from crop losses due to drought or other disasters.

The situation should improve greatly by the end of the year. The cost-price squeeze should be rectified by higher farm commodity prices as a better balance of supply and demand is reached.

For many farmers, the crucial and immediate problem is how to meet debt obligations and continue in operation until those cures for the crisis take effect. However, many farmers are finding that the commercial lenders are loaned up to their limits. Further, the lenders are reluctant to overextend since new loans to farmers who are overloaded by present obligations and still operating at little or no profit are hardly good risks.

The Farmers Home Administration is the major Government lending institution for farmers. But the FmHA is simply not in a position, with its existing programs, to meet all the credit needs of the farmers today.

S. 2146 addresses this problem by establishing an economic emergency loan program and making a number of improvements in current loan programs. Therefore, I urge my colleagues to join me in support of S. 2146.

● Mr. HELMS. Mr. President, I rise in support of S. 2146 to amend the Consolidated Farm and Rural Development Act.

Every Senator knows of the financial crisis currently facing many of our farmers, and it is imperative that farmers continue to have access to an adequate amount of credit if small family farms are to survive.

There is no question, of course, that spiralling inflation is the root cause of the economic problems on the farm, and indeed, in the whole economy. It ought to be our first priority to put an end to the massive Federal deficits and wasteful spending that are the most direct cause of inflation. But, sad to say, the Congress does not seem to be inclined to vote that way in the immediate future.

S. 2146, as amended by the Senate Committee on Agriculture, Nutrition, and Forestry, makes several improvements in the Federal credit assistance programs for farmers, ranchers, rural communities, and businesses.

The bill will make farm partnerships and corporations eligible for farm ownership loans of the Farmers Home Administration; it would increase the limitation on farm ownership loans to $200,000 for direct loans and to $300,000 for guaranteed loans; for farm operating loans the amounts would be increased to $100,000 and $200,000, respectively.

Also, Mr. President, the interest rates on ownership and operating loans would remain at 5 percent up to $200,000, while interest on emergency loans would remain at 3 percent for those who could not get credit elsewhere. And, it would extend the very useful emergency livestock loan program for another year.

Many of our rural communities will benefit from the increase from 50 percent to 75 percent for the amount of maximum Federal participation in the water and waste disposal grant program.

In short, Mr. President, this bill will up-date the rural credit situation in accounting for the tremendous inflation that has made the costs of farmland and the costs for operating a farm skyrocket in recent years.

I might caution that many smaller and younger farmers are deeply in debt already, and that the Farmers Home Administration should be very judicious in its use of the increased credit authority granted by this bill.

Overall, this legislation is very much needed, and will benefit both our credit institutions and the family farmer. I hope Senators will give it their support.●

SENATE RESOLUTION 76 AND HOUSE RESOLUTION 238

Mr. HAYAKAWA. Mr. President, this body passed unanimously on September 9, 1977, Senate Resolution 76 "expressing the sense of the Senate that the President should take steps to terminate highly restrictive regulations of the European communities that seriously damage U.S. exports of dried prunes and certain other agricultural products."

Last Thursday, April 27, the House Ways and Means Committee ordered reported by unanimous vote, a similar resolution, House Resolution 238. Chairman ULLMAN patiently delayed consideration of the vote by his trade subcommittee in late October 1977 to allow the President more time to make clear what was certainly the sense of the Congress. The resolution will now be sent to the House floor for what will probably be rapid approval.

Both of these resolutions were prompted by the July 1975 announcement by the EEC that effective January 1, 1978, new restrictive import regulations were to be imposed on U.S. dried prunes and certain other agricultural products. This action threatened to disrupt historic export trade amounting to more than $60,000,000 in 1977–78, when walnuts are included. The regulations, 516/77 are now in effect.

However, Mr. President, despite the Senate's urging—now reinforced by House action—that the President should put the EC "on notice that the United States intends to exercise its rights under the General Agreement for Tariffs and Trade to take retaliatory measures against these restrictive regulations if they are not removed," and, that "the President should seek to obtain agreement from the European Communities that similar restrictive regulations on U.S. exports of other agricultural products will not be imposed in the future," there is no report available suggesting that any advance has been made in this matter which had its beginning nearly 3 years ago.

It is clear that the U.S. Government has not yet come to grips with this flagrant violation of hard-won access to EC markets by thousands of industrious and skilled growers in California. The President should be submitting an MTN agreement to the Senate later this year or early next year. I hope the Senate will not be unmindful of our Government's lack of resolve in this matter should the agreement omit specific reference to the lifting or the satisfactory resolution of these patently illegal actions by the European Community.

Mr. ALLEN. Mr. President, on the bill, I yield myself 3 minutes.

The PRESIDING OFFICER. The Chair has to advise the Senator from Alabama that there is no time remaining.

Mr. ALLEN. I did not know that all time had been yielded back on the bill.

The PRESIDING OFFICER. The Chair must advise that it was provided that, without further debate, the Senate would go to this vote.

Mr. ALLEN. It is not debate that I have. I ask unanimous consent that I may proceed for 3 minutes.

The PRESIDING OFFICER. Is there objection to the Senator's request? Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, may we have order in the Senate?

The PRESIDING OFFICER. The Senator's request is well taken. I ask the Senators to take their seats and others that may be on the floor to suspend conversations so that we may have order in the Senate so the Senator from Alabama may be heard. The Senator from Alabama is recognized for 3 minutes.

Mr. ALLLEN. Mr. President, this is landmark legislation that the Senate has passed. It is legislation that has been under consideration, in the process of evolving and in the process of being shaped, for more than 3 years. We have had excellent cooperation from the Department of Agriculture and from the Farmers Home Administration. I wish especially to thank Secretary Bob Bergland and FmHA Administrator, Gordon Cavanaugh, for this assistance to the committee. I believe that, equipped with this bill, the Farmers Home Administration and the Secretary of Agriculture will be able to greatly alleviate the plight of our farmers through seeing to it that their legislative needs for financing in their farm operations are met.

The entire Committee on Agriculture has worked diligently on this legislation. The staff of the committee has done an outstanding job in helping shape the legislation. I express my gratitude to the following members of the agriculture staff: Mr. James Giltmier, Mr. Reider White, Mr. Phillip Fraas, Mr. Stuart Hardy, Mr. Morgan Williams, Mr. Carl Rose, and Mr. Tom Kay of my staff.

I yield the floor.

Mr. TALMADGE. Will the Senator yield at that point?

Mr. ALLEN. Yes.

Mr. TALMADGE. I simply wish to express my appreciation as chairman of the full committee to the distinguished Senator from Alabama as chairman of the Subcommittee on Agricultural Credit for the outstanding job he has done, both in managing the bill on the floor and in preparing the bill for markup and reporting it to the full committee for its consideration.

Mr. ALLEN. I thank the distinguished chairman.

Mr. BELLMON. Mr. President, I would like to provide an explanation of section 117, and specifically, the portion of that section that requires that appropriations acts stipulate two program levels for loans—insured and guaranteed.

This particular section was sponsored by Senator DOLE and me at the subcommittee markup of S. 2146, and was originally part of a bill we cosponsored—S. 312. Under section 346, when a program level is provided in an appropriation act, it shall contain two amounts, one against which insured loans will be charged and the other against which guarantee loans will be charged.

This provision is designed to get away from the current situation in which loan levels in appropriations acts do not distinguish between insured (direct) and guaranteed loans. Right now, insured and guaranteed loans are both subtracted from the same amount. The combination of direct and guaranteed loans into one account does not recognize that guaranteed loans entail no Government expenditures except administrative costs or in cases where the loans are defaulted. In addition, guaranteed loans require less FmHA supervision.

In the past, FmHA has been reluctant to expand the guaranteed loan program, because doing so would reduce the direct loan program, which historically has been at levels well below the need. Our purpose in inserting this provision is to encourage FmHA to utilize guaranteed loans to a much greater extent than it has in the past. This would enable it to service more individuals, and perhaps could lessen the tremendous demand on the insured loan program which currently suffers from a very large backlog.

I might add that such a development would be beneficial to the taxpayer since guaranteed loans are made at negotiated interest rates by private institutions, and involve no interest subsidy. In addition, the credit needs of producers may be more adequately met in certain cases through guaranteed loans.

One final point with respect to this subject: This matter came to my attention after the 1978 agricultural appropriations bill was marked up by the Appropriations Committee. Consequently, I did not suggest the "dual" ceiling approach in last year's agricultural appropriation bill. In my subsequent discussion with the chairman of the Agriculture Appropriations Subcommittee he has indicated his strong support for a separate stipulation of insured and guaranteed loan levels. We intend to propose this at the subcommittee markup of this year's agriculture appropriations bill. We are very hopeful that this will provide additional help to farmers in obtaining credit assistance where needed.

Mr. DOLE. Will the Senator yield?

Mr. ALLEN. Yes.

Mr. DOLE. Let me add my commendation to the distinguished Senator from Alabama. I say to my colleagues on this side that I do not know of any opposition to this legislation. It is needed. As far as I know, there is not a single bit of controversy. I hope it will have the unanimous support of my colleagues. The farmers need it. It is in their interest and I think it is in the interest of the Nation.

The PRESIDING OFFICER. The Senator's 3 minutes have expired.

Mr. ALLEN. I am ready to vote.

The PRESIDING OFFICER. The question is shall the bill pass? The yeas and nays have been ordered. The clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Nevada (Mr. CANNON), the Senator from Arizona (Mr. DECONCINI), the Senator from Colorado (Mr. (Mr. HATFIELD), the Senator from Hawaii (Mr. INOUYE), and the Senator from West Virginia (Mr. RANDOLPH) are necessarily absent.

I further announce that, if present and voting, the Senator from Montana (Mr. HATFIELD) and the Senator from West Virginia (Mr. RANDOLPH) would each vote "yea."

Mr. STEVENS. I announce that the Senator from Oregon (Mr. HATFIELD) and the Senator from Kansas (Mr. PEARSON) are necessarily absent.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD) would vote "yea."

The result was announced—yeas 92, nays 0, as follows:

[Rollcall Vote No. 146 Leg.]

So the bill, as amended, was passed.

Mr. ALLEN. Mr. President, I call up my amendment to amend the title.

The PRESIDING OFFICER. The clerk will state the amendment.

The legislative clerk read as follows:

Amend the title of H.R. 11504 to read as follows:

"A bill to amend the Consolidated Farm and Rural Development Act, provide an economic emergency loan program for farmers and ranchers, extend the Emergency Livestock Credit Act of 1974, and for other purposes."

The PRESIDING OFFICER. The question is on agreeing to the amendment to amend the title.

The amendment was agreed to.

Mr. ALLEN. Mr. President, I ask unanimous consent that H.R. 11504 as passed by the Senate be printed and that the Secretary be authorized to make technical and clerical corrections in the engrossment of the Senate amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ALLEN. Mr. President, I move that the Senate insist on its amendments to H.R. 11504, that it request a conference with the House on the disagreeing votes between the two bodies, and that the Chair be authorized to name conferees on behalf of the Senate.

The motion was agreed to, and the Presiding Officer (Mr. RIEGLE) appointed Messrs. TALMADGE, MCGOVERN, ALLEN, HUDDLESTON, CLARK, DOLE, YOUNG, and HAYAKAWA conferees on the part of the Senate.

The PRESIDING OFFICER. Does the Senator from Alabama ask unanimous consent that S. 2146 be indefinitely postponed?

Mr. ALLEN. I thank the Chair.

Mr. President, I do ask unanimous consent that the companion bill which we worked on prior to bringing up the

House bill, it having served its purpose, be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

NAVIGATION DEVELOPMENT ACT

The Senate continued with the consideration of H.R. 8309.

UP AMENDMENT NO. 1265

Mr. BENTSEN. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The Chair advises that the amendment is not in order except by unanimous consent at this time.

Mr. GRAVEL. Mr. President, I ask unanimous consent that the amendment be in order.

The PRESIDING OFFICER. Is there objection?

Mr. CHAFEE. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment will be stated.

The legislative clerk read as follows:

The Senator from Texas (Mr. BENTSEN) proposes an unprinted amendment numbered 1265.

Mr. BENTSEN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 17, line 5 insert:

The project on Galveston Bay at Baytown, Texas authorized in Section 191 of the Water Resources Development Act of 1976, Public Law 94–587, is modified to provide for: (a) the price to be paid for property rendered uninhabitable due to encroachment of flood water caused by land subsidence in the project area will be based on an appraisal at fair market value disregarding damage caused by flood waters and vandals; (b) owners occupying their property at the time flooding rendered said property uninhabitable are eligible for all benefits under Section 203 of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (Public Law 91–646), without regard to any other occupancy requirements of that Section. Such owners shall also be considered displaced persons for the purposes of obtaining all other benefits of said Act.

Mr. CULVER. Mr. President, will the Senator yield?

Mr. BENTSEN. I yield.

Mr. CULVER. Mr. President, I ask unanimous consent that Mr. Peter Rosenberg, of my staff, have the privilege of the floor during the consideration of this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHAFEE. Mr. President, I ask unanimous consent that Mimi Feller, of my staff, have the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senate will be in order.

Mr. BARTLETT. Mr. President, I ask unanimous consent that Ed King, of my staff, have the privilege of the floor during the votes and consideration of this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BENTSEN. My amendment, Mr. President, is designed to correct an obvious inequity in the manner in which homeowners in the Brownwood area of Baytown, Tex., will be compensated for their homes.

Let me provide a little background.

The Brownwood extension of Baytown is located in an area which, due to an unusual confluence of natural factors, is steadily sinking into the upper reaches of Galveston Bay. The problem is essentially one of subsidence. As ground water is pumped out of the area, the region is sinking and is prone to flooding in times of high tides or high winds. The bay has already reclaimed parts of Brownwood. The process is irreversible.

The Water Resources Development Act of 1976 recognized the problems of Brownwood and took commendable steps to redress the situation. Under the terms of this legislation, the Corps of Engineers will relocate the homeowners out of the region and reclaim the area as parkland. As this project, still in the design phase, moves along, Brownwood homeowners will receive fair market value for their homes and a relocation allowance.

The problem, Mr. President, is that the waters of Galveston Bay are not prepared to wait for the Army Corps of Engineers to move forward on this project. Eight homes in the area have recently become uninhabitable due to subsidence and flooding. The corps estimates that an additional 12 homes will have to be abandoned before the project is completed and the owners are eligible for compensation.

Under the terms of the current legislation, the 20 homeowners who have either been forced out of their dwellings or face the prospect of abandonment in the near future will not be eligible to receive fair market value for their homes and relocation allowance provided for under the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970. They will instead, through no fault of their own, be compensated only for the salvage value of their dwellings. This amounts to only a few thousand dollars, but would spell economic disaster for the families affected.

My amendment, Mr. President, is designed to correct these inequities. It neither expands the scope of the Brownwood flood control program nor significantly affects the project cost-benefit ratio. Rather, it provides that homes necessarily abandoned due to the encroachment of floodwaters will be appraised without regard to damage caused by flooding and vandalism. It also stipulates that the approximately 20 owners who occupied their dwellings at the time of permanent flooding will be eligible for benefits under the Uniform Relocation Assistance and Real Property Acquisition Policies Act.

I recognize, Mr. President, that this may seem like a small matter in the context of such major legislation. But to the 20 families involved, it is clearly a matter of economic survival.

I understand that the committee staff has had an opportunity to look at this amendment, as has the manager of the bill. If I may have the attention of the manager of the bill, I ask favorable consideration of the amendment.

Mr. GRAVEL. The Senator has my attention. I have no objection to this amendment.

Mr. CHAFEE. There are no objections on this side.

Mr. GRAVEL. I yield back the remainder of my time.

Mr. BENTSEN. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. BENTSEN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GRAVEL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ZUNI INDIAN TRIBE OF NEW MEXICO

Mr. ABOUREZK. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 482.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 482) entitled "An Act to direct the Secretary of the Interior to purchase and hold certain lands in trust for the Zuni Indian Tribe of New Mexico; to confer jurisdiction on the Court of Claims with respect to land claims of such tribe; and to authorize such tribe to purchase and exchange lands in the States of New Mexico and Arizona", do pass with the following amendments:

Strike out all after the enacting clause, and insert: That (a) the Secretary of the Interior (hereinafter in this Act referred to as the "Secretary") shall acquire, through purchase or exchange, the lands described in subsection (b).

(b) The lands to be acquired under subsection (a) are lands in the State of New Mexico upon which the Zuni Salt Lake is located and which are more particularly described as follows: Lots 3 and 4, east half southwest quarter, west half southeast quarter, section 30, township 3 north, range 18 west, lots 1 and 2, east half northwest quarter, west half northeast quarter, section 31, township 3 north, range 18 west, southeast quarter southeast quarter, section 25, and east half northeast quarter, section 36, township 3 north, range 19 west, all of the New Mexico principal meridian, New Mexico, containing approximately 618.41 acres, more or less.

(c) Title to the lands to be acquired under subsection (a) shall be taken and held in trust in the name of the United States for the benefit of the Zuni Indian Tribe of New Mexico (hereinafter in the Act referred to as the "tribe"), and such lands shall be exempt from State and local taxation.

SEC. 2. (a) Notwithstanding sections 2401 and 2501 of title 28, United States Code, and section 12 of the Act of August 13, 1946 (60 Stat. 1052; 25 U.S.C. 70k), jurisdiction is hereby conferred upon the United States Court of Claims to hear, determine, and render judgment on any claims of the Zuni Indian Tribe of New Mexico against the United States with respect to any lands or interests therein in the State of New Mexico or the State of Arizona held by aboriginal title or otherwise which were acquired from the tribe without payment of adequate compensation by the United States: *Provided*, That jurisdiction is conferred only with respect to claims accruing on or before August 13, 1946, and all such claims must be filed within three years after approval of this

Act. Such jurisdiction is conferred notwithstanding any failure of the tribe to exhaust any available administrative remedies.

(b)(1) Any award made to any Indian tribe other than the Zuni Indian Tribe of New Mexico before, on, or after the date of the enactment of this Act, under any judgment of the Indian Claims Commission or any other authority, with respect to any lands that are the subject of a claim submitted by the tribe under subsection (a) shall not be considered as a defense, estoppel, or setoff to such claim, and shall not otherwise affect the entitlement to, or amount of, any relief with respect to such claim.

(b)(2) Any award made to the tribe pursuant to subsection (a) shall not be considered as a defense, estoppel, or setoff to the claims pending before the Indain Claims Commission on the date of the enactment of this Act in docket 196 (filed August 3, 1951) and docket 229 (filed August 8, 1951), and shall not otherwise affect the entitlement to, or amount of, any relief with respect to such claims.

Amend the title so as to read: "An Act to direct the Secretary of the Interior to purchase and hold certain lands in trust for the Zuni Indian Tribe of New Mexico, and to confer jurisdiction on the Court of Claims with respect to land claims of such tribe.".

Mr. ABOUREZK. Mr. President, the amendment of the House is in the nature of a substitute and revises S. 482 in several ways as follows:

The House amended subsection (a) of section 2 which now provides that the tribe must file its claim within 3 years; eliminates language which would have given the parties a right to appeal to the Supreme Court rather than appeal by writ of certiorari; and limits the land claims to those accruing on or before August 13, 1946.

Further, the House amendment eliminates all of section 3 of the bill. This section would have permitted the Zuni Indian Tribe, subject to approval of the Secretary of the Interior, to acquire lands in the States of New Mexico and Arizona which are contiguous to the existing reservation for addition to the reservation. Such lands would have been taken in trust by the United States for the benefit of the tribe.

Finally, the title was amended to reflect the purposes of the bill, as amended.

I have been informed by representatives of the Zuni Tribe that the bill as passed by the House of Representatives is acceptable to them.

Mr. President, this matter has been cleared on both sides. I move that the Senate concur in the House amendment to S. 482.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

FEDERAL RECOGNITION OF CERTAIN INDIAN TRIBES

Mr. ABOUREZK. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 661.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 661) entitled "An Act to restore Federal recognition of certain Indian tribes, and for other purposes", do pass with the following amendments:

Strike out all after the enacting clause, and insert:

That (a) Federal recognition is hereby extended or confirmed with respect to the Wyandotte Indian Tribe of Oklahoma, the Ottawa Indian Tribe of Oklahoma, and the Peoria Indian Tribe of Oklahoma, the provisions of the Acts repealed by subsection (b) of this section notwithstanding.

(b) The following Acts are hereby repealed:

(1) the Act of August 1, 1956 (70 Stat. 893; 25 U.S.C. 791–807), relating to the Wyandotte Tribe;

(2) the Act of August 2, 1956, (70 Stat. 937; 25 U.S.C. 821–826), relating to the Peoria Tribe; and

(3) the Act of August 3, 1956 (70 Stat. 963; 25 U.S.C. 841–853), relating to the Ottawa Tribe.

(c) There are hereby reinstated all rights and privileges of each of the tribes described in subsection (a) of this section and their members under Federal treaty, statute, or otherwise which may have been diminished or lost pursuant to the Act relating to them which is repealed by subsection (b) of this section. Nothing contained in this Act shall diminish any rights or privileges enjoyed by each of such tribes or their members now or prior to enactment of such Act, under Federal treaty, statute, or otherwise, which are not inconsistent with the provisions of this Act.

(d) Except as specifically provided in this Act, nothing contained in this Act shall alter any property rights or obligations, any contractual rights or obligations, including existing fishing rights, or any obligation for taxes already levied.

SEC. 2. (a)(1) The Modoc Indian Tribe of Oklahoma is hereby recognized as a tribe of Indians residing in Oklahoma and the provisions of the Act of June 26, 1936, as amended (49 Stat. 1967; 25 U.S.C. 501–509), are hereby extended to such tribe and its members. The Secretary of the Interior shall promptly offer the said Modoc Tribe assistance to aid them in organizing under section 3 of said Act of June 26, 1936 (25 U.S.C. 503).

(2) The provisions of the Act of August 13, 1954 (68 Stat. 718; 25 U.S.C. 564–564w), hereafter shall not apply to the Modoc Tribe of Oklahoma or its members except for any right to share in the proceeds of any claim against the United States as provided in sections 6(c) and 21 of said Act, as amended (25 U.S.C. 564e and 564t).

(3) The Modoc Indian Tribe of Oklahoma shall consist of those Modoc Indians who are direct lineal descendants of those Modocs removed to Indian territory (now Oklahoma) in November 1873, and who did not return to Klamath, Oregon, pursuant to the Act of March 9, 1909 (35 Stat. 751), as determined by the Secretary of the Interior, and the descendants of such Indians who otherwise meet the membership requirements adopted by the tribe.

(b) The Secretary of the Interior shall promptly offer the Ottawa Tribe of Oklahoma and the Peoria Tribe of Oklahoma assistance to aid them in reorganizing under section 3 of the Act of June 26, 1936 (49 Stat. 1967; 25 U.S.C. 503), which Act is re-extended to them and their members by this Act.

(c) The validity of the organization of the Wyandotte Indian Tribe of Oklahoma under section 3 of the Act of June 26, 1936 (49 Stat. 1967; 25 U.S.C. 503), and the continued application of said Act to such tribe and its members is hereby confirmed.

SEC. 3. (a) It is hereby declared that enactment of this Act fulfills the requirements of the first proviso in section 2 of the Act of January 2, 1975 (88 Stat. 1920, 1921), with respect to the Wyandotte Tribe of Oklahoma, the Ottawa Tribe of Oklahoma, and the Peoria Tribe of Oklahoma.

(b) It is hereby declared that the organization of the Modoc Tribe of Oklahoma as provided in section 3(a) of this Act shall fulfill the requirements of the second proviso in section 2 of the Act of January 2, 1975 (88 Stat. 1920, 1921).

(c) Promptly after organization of the Modoc Tribe of Oklahoma, the Secretary of the Interior shall publish a notice of such fact in the Federal Register including a statement that such organization completes fulfillment of the requirements of the provisos in section 2 of the Act of January 2, 1975 (88 Stat. 1920, 1921), and that the land described in section 1 of said Act is held in trust by the United States for the eight tribes named in said Act.

SEC. 4. The Wyandotte, Ottawa, Peoria, and Modoc Tribes of Oklahoma and their members shall be entitled to participate in the programs and services provided by the United States to Indians because of their status as Indians, including, but not limited to, those under the Act of November 2, 1921 (42 Stat. 208; 25 U.S.C. 13), and for purposes of the Act of August 16, 1957 (71 Stat. 370; 42 U.S.C. 2005–2005F). The members of such tribes shall be deemed to be Indians for which hospital and medical care was being provided by or at the expense of the Public Health Service on August 16, 1957.

Amend the title so as to read: "An Act to reinstate the Modoc, Wyandotte, Peoria, and Ottawa Indian Tribes of Oklahoma as federally supervised and recognized Indian tribes."

Mr. ABOUREZK. Mr. President, the House adopted an amendment in the nature of a substitute not substantially different from S. 661, as introduced, the difference being primarily one of technique. The substitute provides more simplified and technically correct procedures for restoration.

Mr. President, this matter has been cleared on both sides. I move that the Senate concur in the House amendment to S. 661.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

PASCUA YAQUI INDIANS OF ARIZONA

Mr. ABOUREZK. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 1633.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 1633) entitled "An Act to provide for the extension of certain Federal benefits, services, and assistance to the Pascua Yaqui Indians of Arizona, and for other purposes", do pass with the following amendment:

Strike out all after the enacting clause and insert: That (a) the Pascua Yaqui Tribe and its members, as determined pursuant to section 2 of this Act, are hereby recognized as eligible for the services and assistance provided to Indians because of their status as Indians by or through any department, agency, or instrumentality of the United States or under any statute of the United States. For purposes of section 2 of the Act of August 16, 1957 (71 Stat. 371; 42 U.S.C. 2005a), the Pascua Yaqui Indians are to be considered as if they were being provided hospital and medical care by or at the expense of the Public Health Service on August 16, 1957.

(b) Section 4 of the Act of October 8, 1964 (78 Stat. 1197), is hereby repealed.

SEC. 2. (a) For the purposes of section 1 of this Act, membership of the Pascua Yaqui Tribe shall consist of—

(A) the members of the Pascua Yaqui Association, Incorporation, an Arizona corpo-

ration, as of the date of the enactment of this Act;

(B) all those of Yaqui Indian blood who, within one year from the date of enactment of this Act, apply for, and are admitted to, membership in the Association pursuant to article VII of the articles of incorporation of the association; and

(C) direct lineal descendants of such persons, subject to any further qualifications as may be adopted by the association.

(b) Within eighteen months after the date of enactment of this Act, the Secretary of the Interior, in cooperation with the association, shall compile a membership roll pursuant to the terms of subsection (a) of this section and shall publish such roll in the Federal Register. Publication of such roll shall not affect or delay the immediate eligibility of the members of the association under section 1 of this Act.

SEC. 3. Solely for the purposes of this Act, the Pascua Yaqui Association shall be deemed an Indian tribe recognized by the United States and the lands conveyed to the association by the Act of October 8, 1964 (78 Stat. 1196), subject to a restriction against alienation imposed by the United States, shall be deemed a Federal Indian reservation.

Mr. ABOUREZK. Mr. President, I move that the Senate disagree to the amendment of the House and request a conference with the House on the disagreeing votes of the two Houses thereon, and that the Chair be authorized to appoint conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. ABOUREZK, Mr. METZENBAUM, Mr. MELCHER, Mr. BARTLETT, and Mr. MARK O. HATFIELD conferees on the part of the Senate.

NAVIGATION DEVELOPMENT ACT

The Senate resumed consideration of H.R. 8309.

UP AMENDMENT NO. 1266

Mr. BENTSEN. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. Is there objection to the consideration of the amendment? The Chair hears none, and the amendment will be stated.

The legislative clerk read as follows:

The Senator from Texas (Mr. BENTSEN) proposes an unprinted amendment numbered 1266.

Mr. BENTSEN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 17, line 5, insert the following:

Section 221 of the Flood Control Act of 1970 (P.L. 91–611), as amended, (42 U.S.C. 1962d–5b) is further amended as follows:

1 insert the following new sentence at the end of section 221(b)— ". . . Where the non-Federal interest is the State itself performance and payment of damages may be contingent upon the legislative appropriations process of the State." and

2. delete the period at the end of the sentence contained in section 221(f) and add the following words at the end of that sentence—"or to contract with non-Federal interests for water supply storage under the Water Supply Act of 1958 (P.L 85–500), as amended, (43 U.S.C. 390b) or for recreational development under the provisions of the Federal Water Project Recreation Act of 1965 (P.L. 89–72), as amended (16 U.S.C. 4601–12 et seq.)."

Mr. BENTSEN. Mr. President, I submit this amendment for myself and Senator EAGLETON.

This amendment is endorsed by the committee and is intended to resolve a problem in section 221 of the Flood Control Act. This section, as currently written, requires the Corps of Engineers to enter into contractual agreements with State or local sponsors of corps projects. These agreements established conditions for cost sharing and spell out other details of the cooperative arrangement.

Under the terms of the agreements between the corps and State or local sponsors, the sponsor must assume full liability for damages that result from the construction or operation of the project.

The problem, Mr. President, is that in some States it is illegal or unconstitutional for officers of the State to sign such agreements. In Texas, for example, the State constitution establishes a $400,000 ceiling on liability claims against the State. For the past 3 years Texas has been negotiating with the corps, seeking to reach an agreement under section 221 for the State to provide dredge disposal sites. Although neither the State nor the corps can foresee a circumstance under which liability damages would exceed the $400,000 limit imposed by the State constitution, the open-ended liability provisions of 221 prohibit the two parties from reaching an agreement.

In an effort to break this legal impasse, my amendment provides that in States where there is not sufficient authority to enter into an open-ended liability agreement, the extent of State liability will be limited to that provided for in the State law or constitution.

I am pleased that my colleague from Missouri, Senator EAGLETON, has joined me as a cosponsor of this amendment.

Mr. GRAVEL. Mr. President, I think it is a fine amendment, and I accept it.

Mr. CHAFEE. Mr. President, I ask this of the manager of the bill: Is there a series of amendments such as this coming up?

Mr. GRAVEL. To inform my colleague, we have about 50 amendments. I have had my staff go over them, and I am prepared to accept some and not to accept others. As to those I will not accept, I will give my reasons, and I hope the Senate will join me in those reasons. As to those I am prepared to accept, I will yield back the remainder of my time and have a voice vote.

I have not consulted with the minority on any of these amendments. The minority is well able to make up its own mind. If the minority objects, the only recourse we can have is a voice vote, and that will be determined by the fine ear of the Presiding Officer. In the absence of that, we can have a rollcall vote.

Mr. CHAFEE. I ask the sponsor of the amendment if there have been any hearings on this matter. The Senator has just offered the amendment. Is that correct?

Mr. BENTSEN. This matter has been discussed with members of the staff. It is a generic amendment that is applicable to a number of States.

For example, under the constitution of my own State, we have a $400,000 limitation on liability. What we have stated here is that the State can enter into these agreements and assume the full liability as under limitations of their constitution or as they may obtain it by appropriation through the State.

Mr. GRAVEL. Also, it would affect about 18 States, and it is something that will be in contract with the Corps of Engineers.

Mr. BENTSEN. We have had a legal impasse on this for some time, as these States have tried to negotiate with the Corps of Engineers.

In the particular instance I am thinking of, my State has been negotiating for 3 years with the corps to reach an agreement under section 221. We do not see a situation in which it would exceed the $400,000 limitation.

But the State attorney general cannot sign the agreement unless he has a limitation as this amendment provides.

This problem is shared by some 18 States, and that is one of the reasons that Senator EAGLETON is cosponsoring the amendment with me.

Mr. GRAVEL. I might add this will not cost anything. It is a question of making it a more efficient function for the Corps of Engineers.

Mr. CHAFEE. Let me see if I understand. That is a limitation in the State constitution as to what the liability of the State might be; is that correct?

Mr. BENTSEN. Yes.

Mr. CHAFEE. Say $400,000 in Texas.

Mr. BENTSEN. Right.

Mr. CHAFEE. So then who steps in and assumes the liability for the amount over that under this provision they have in Texas?

Mr. BENTSEN. It will have to be by State appropriations but one cannot bind the legislature in advance. It is not only my State; it is some 18 States that are facing this.

Mr. CHAFEE. So how do we resolve the legal impasse?

Mr. BENTSEN. The legal impasse can be resolved by stipulating the limitation will be whatever the State's limitation is now plus whatever they appropriate through the legislative process.

Mr. CHAFEE. Whatever the State appropriates?

Mr. BENTSEN. That is right.

Mr. CHAFEE. So it does not seem to me that it obligates the Federal Government at all, does it? It does not seem to.

Mr. GRAVEL. It does not.

Mr. BENTSEN. No; it does not obligate the Federal Government It is not the obligation of the Federal Government, but it puts a limit on the obligation of the State in this type of situation by whatever their constitution requires. It is not putting any more obligation back on the Federal Government.

Mr. CHAFEE. Yes; as I understand it the State can then by way of appropriation come in and take up the difference?

Mr. BENTSEN. If it is the will of the legislature.

Mr. CHAFEE. If the legislature is prepared to do so.

Mr. BENTSEN. Whoever the plaintiff might be in this situation.

Mr. CHAFEE. That is all right. I have no objection.

Mr. GRAVEL. I yield back the remainder of my time.

Mr. BENTSEN. I yield back the remainder of my time and ask favorable consideration of the amendment.

The amendment was agreed to.

Mr. GRAVEL. I move to reconsider the vote by which the amendment was agreed to.

Mr. BENTSEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1267

Mr. JOHNSTON. Mr. President, I ask unanimous consent that it be in order to consider an amendment that I have at the desk at this time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSTON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Louisiana (Mr. JOHNSTON) proposes an unprinted amendment numbered 1267.

Mr. JOHNSTON. I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page , line , insert the following:

The hurricane-flood protection project for Lake Pontchartrain, Louisiana, authorized by Section 204 of the Flood Control Act of 1965 (Public Law 89-298) is hereby modified to provide that where existing levees in Jefferson Parish includes pumping stations, originally constructed by local interests, which form an integral part of that levee protection, the Secretary of the Army, acting through the Chief of Engineers, is authorized to construct features, such as a flood wall with sluice gates or other means, to insure that the level of protection within Jefferson Parish provided by the hurricane-flood protection project will be unimpaired. Cost sharing for the additional work hereby authorized shall be on the basis of seventy-five percent Federal and twenty-five percent local interest funding, the same basis as levee improvements for hurricane-flood protection on this project.

Mr. JOHNSTON. Mr. President, for some time now I have been concerned about a portion of the Lake Pontchartrain and vicinity hurricane protection plan in Jefferson Parish, La. My amendment is designed to correct this potentially dangerous situation to the residents of Jefferson Parish.

This situation arises from the lack of integrity of the present levee system due to four parish pumping stations which are not protected by the plan and are a part of the levee system. Following the hurricane tides of 1947, the Corps of Engineers constructed protection levees along the shore of Lake Pontchartrain. The responsibility for drainage and the pumping stations that remove the water from interior collecting canals remained the responsibility of the parish.

The four parish pumping stations were built in 1926 and are of hollow tile and stucco construction on untreated pile foundations. When the Corps of Engineers constructed the earthen levees along the lakefront, the levees were simply butted against the stucco sidewalls of these 1926 structures and never provided integrity to the levee system.

The pumping stations today, in spite of all that the parish has been able to do in the way of improvement and rehabilitation, are suspect in terms of their structural integrity. Inasmuch as they form an integral part of the lakefront levee, a failure of any one of them would represent the failure of the Federal hurricane protection system. The consequences would be catastrophic to the 250,000 residents of the east bank of Jefferson Parish, I believe that the provision of measures, as an integral part of the Federal project to prevent a failure of that project, is right and proper. I trust Senators will agree with me.

The key points are:

This is a Federal project that uses a portion of local projects without any assurance that these projects meet the Federal requirements.

Expected Federal cost is about $2 million on a cost share of 75 percent Federal to 25 percent local—same basis as the rest of the project.

We have been assured that the House committee will support this amendment in conference.

About 250,000 people and millions of dollars of property will be protected.

Mr. President, this amendment is designed to correct an hiatus in section 204 of the Flood Control Act of 1965 which sets up what we call a Lake Pontchartrain Hurricane Protection District.

This Lake Pontchartrain hurricane protection district provides for a series of structures, levees, and other means to protect the city of New Orleans and environs from the dangers of a hurricane.

In a portion of that project in Jefferson Parish local interests have previously built levees and pumping stations.

What this amendment does is to provide that the Corps om Engineers is authorized to construct a flood wall with sluice gate or other means simply to provide that the level of hurricane protection provided by section 204 of that act be unimpaired, and it provides for the same cost sharing formula as is provided or levee improvements for hurricane protection on this project.

I have cleared this with staff. I do not think there is any objection. It is a simple amendment. It simply corrects this problem that was provided by failure to take this action in the original section of 204.

Mr. GRAVEL. If my colleague will take a look at the precise language of this amendment, will there be any difficulty in accepting a modification that will say four lines from the bottom reading "Jefferson Parish provided by the hurricane-flood protection project will be unimpaired 'by the most economical means'" just adding "by the most economical means"?

Mr. JOHNSTON. That will certainly be a reasonable amendment, and I move it.

I ask to modify my amendment in that respect.

Mr. GRAVEL. I have no objection to the amendment with that modification and yield to my colleague.

The PRESIDING OFFICER. Without objection modification——

Mr. CHAFEE. Wait a minute. We are first approving the amendment, is that correct, Mr. President, the modification?

The PRESIDING OFFICER. The Chair will advise we are first approving the Senator's right to modify his amendment.

Is there objection to the modification?

The Chair hears none. So the amendment is so modified.

The amendment, as modified, is as follows:

The hurricane-flood protection project for Lake Pontchartrain, Louisiana, authorized by Section 204 of the Flood Control Act of 1965 (Public Law 89-298) is hereby modified to provide that where the existing levees in Jefferson Parish includes pumping stations, originally constructed by local interests, which form an integral part of that levee protection, the Secretary of the Army, acting through the Chief of Engineers, is authorized to construct features, such as a flood wall with sluice gates, to insure that the level of protection within Jefferson Parish provided by the hurricane-flood protection project will be unimpaired by most economical means. Cost sharing for the additional work hereby authorized shall be on the same basis as levee improvements for hurricane-flood protection on this project.

Mr. GRAVEL. I yield to my colleague from Rhode Island.

Mr. CHAFEE. Mr. President, I wish to ask the sponsor of this amendment whether we are talking about floodwalls here, which I understand are $2.2 million, or are we talking about a new pumping station which is $16.4 million?

Mr. JOHNSTON. This is simply the floodwall.

Mr. CHAFEE. This is solely the floodwall.

I have no objections, Mr. President.

Mr. GRAVEL. Mr. President, I yield back the remainder of my time.

Mr. JOHNSTON. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time has been yielded back. The question is on agreeing to the amendment, as modified.

The amendment, as modified, was agreed to.

Mr. CULVER and Mr. CURTIS addressed the Chair.

The PRESIDING OFFICER. The question occurs on unprinted amendment No. 1260 offered by the Senator from California, Senator CRANSTON.

Mr. GRAVEL. I was under the impression, addressing the Chair, that we would tentatively vote at about this time, that it was not a firm time we set for a vote.

I wish to request, if that is the case, that the vote on the amendment of the Senator from California come up at 4:15. He asked me to secure that. Does the Chair wish me to place that in a unanimous-consent request. If so, I so ask unanimous consent.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request?

Mr. GRAVEL. Around 4:15. Make it 4:15, if that pleases the Chair.

The PRESIDING OFFICER. Without objection, the vote will occur at 4:15.

Mr. CURTIS addressed the Chair.

The PRESIDING OFFICER. The Chair will advise both Members who are seeking recognition that the Chair heard the Senator from Iowa first. I know the other Senator is seeking recognition. So I am inclined to——

Mr. CULVER. I am glad to yield to the distinguished Senator from Nebraska whatever time he needs.

Mr. CURTIS. I thank the Senator.

Mr. CULVER. I yield, unless it is unduly long. I know the Senator has been trying to get in, but I have two amendments.

Mr. CURTIS. I shall try to proceed with it rapidly. If it does not, I will withdraw.

I ask unanimous consent before I send an amendment to the desk that I may proceed for 2 minutes to tell what it is.

The PRESIDING OFFICER. Is there objection? The Chair hears none.

Without objection, it is so ordered. The Senator may proceed for 2 minutes.

Mr. CURTIS. Mr. President, if I may have the attention of the managers of the bill, this is not a new project. It was authorized 10 years ago. A restudy was made, and the Army Engineers brought in a recommendation for one dam instead of nine that were authorized. Even though that saves $19 million, it is a major modification and therefore must be reauthorized. So the amendment that I have sent to the desk is to reauthorize this project. In so doing we incidentally save $19 million, but it has to be reauthorized.

Mr. President, I ask unanimous consent that I may present the amendment at this time.

The PRESIDING OFFICER. Is there objection? The Chair hears none.

Mr. CURTIS. Mr. President, I shall not take very much time.

The Papillion Creek, often referred to as the Papio and the Tributaries Lakes project was originally authorized in 1968. It called for 11 dams. One has been built. Then there was a restudy ordered and where they had previously recommended nine dams they come in and recommend one dam.

This was in a report of the Army Engineers of last April—April 18, 1978. It is such a major reordering that it calls for reauthorization. But I want to repeat that this will lower the costs by $19 million, and I am wondering if those in charge of the bill would be favorably disposed toward it?

Mr. GRAVEL. Let me just state to my good friend from Nebraska, Senator CURTIS, that what the impact of his amendment is doing is to do away with the phase 1 and to go to direct authorization, and we think the project has great merit because we approved its phase 1.

We have this particular dilemma that we have in the last bill opposed many projects until they complete their phase 1 so they come back to Congress.

We have through preliminary investigation found out that the corps had not been terribly responsive in effecting the policies we had set out in phase 1, so I would ask my good friend from Nebraska to feel that we are sympathetic with what he wants to do, and if he will permit us to have hearings on this phase 1, we are going to bring to the floor another bill that is going to clean up that whole problem.

There are about 58 projects that have been authorized for phase 1 in the 1974 and 1976 water resources acts. Only four of them have been completed, and one has reached OMB. There will be several projects Members will be coming forth with today, and I have told them privately, and will be stating it as I am now publicly, that you have got to give the committee a chance to relook at this whole problem of phase 1.

We are just terribly chagrined and mortified that this whole policy did not fly, and we do not intend to sit around and let it linger or malinger to any degree. As soon as we are done with this work we are going to take it up and we are going to address ourselves to every one of those 58 projects, and those we can authorize, as the Senator is suggesting, undoubtedly this will be one of them, we will come back to the floor with an authorization to get it going.

Mr. CURTIS. It is not my understanding that this is waiving any phase 1. Here is a flood control plan that was approved and authorized 10 years ago in 1968. They have already built one dam. It has been under construction. Then they, in their wisdom, decided to restudy it, and they came back and found they could construct one dam and meet the need where otherwise they have nine dams. But in order to do that, even though it is a reduction in the authorization of $19 million, it is regarded as a major change and, therefore, Congress must approve it.

Mr. GRAVEL. Mr. President, will the Senator yield? The reason we had to reauthorize it was because of the amount of time that has expired, so that when we reauthorized it, we reauthorized it under the phase 1 and phase 2 concept.

Mr. CURTIS. Will the Senator explain that? What is phase 1 and phase 2?

Mr. GRAVEL. The old way of authorizing projects took so many years from authorization to construction that we felt it was the wrong way to approach the problem. After that period of time Congress ought to have another look at the project. Fifteen years is a long time.

So in an effort to accelerate the approach to that problem we said what we would do would be to go with phase 1, phase 1 being engineering and design, and when it was completed, it would come back to Congress. Then Congress would give the authorization for full construction.

What the Senator from Nebraska is suggesting that we do with this is to go to full construction right now.

Mr. CURTIS. No, this was done 10 years ago.

Mr. GRAVEL. No, it was not done 10 years ago, because that is why we had to reauthorize it. So what the Senator is doing, in effect he is avoiding an authorization of phase 1 and moving on to full construction.

What I am saying is the committee will undoubtedly be sympathetic with that, but we have 58 projects that are in that category right now, and what we want to do is go back and redo this whole concept of phase 1, because at this point in time it has failed. The Corps of Engineers has not responded to this. It has been misunderstood as a policy and it has been used to clog the pipeline and not get these projects approved when they should be approved.

Mr. CURTIS. Mr. President, I am going to withdraw my amendment.

Mr. GRAVEL. I thank my friend, because I want to make some representations to my friend from Nebraska that we are going to proceed in the committee to have immediate hearings and try to solve this, and his project will be at the top of the line that will be so treated.

Mr. CURTIS. I thank the Senator.

The PRESIDING OFFICER (Mr. ANDERSON). The Senator from Iowa (Mr. CULVER).

UP AMENDMENT NO. 1268

Mr. CULVER. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Iowa (Mr. CULVER) proposes an unprinted amendment numbered 1268.

Mr. CULVER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of title 4, insert the following:

The project for flood protection on the Mississippi River at Davenport, Iowa, authorized by section 201 of Public Law 91–611 (84 Stat. 1818 at 1826), is hereby modified to authorize the Secretary of the Army, acting through the Chief of Engineers, to provide for mitigation and enhancement measures at an estimated cost of $218,000, to include the acquisition of lands, to preserve and enhance certain wetlands known as Nahant Marsh.

Mr. CULVER. Mr. President, this amendment to the Inland Navigation Development Act authorizes $218,000 for the acquisition and enhancement of Nahant Marsh as part of any action taken by the U.S. Army Corps of Engineers in connection with the Davenport, Iowa, flood control program.

Davenport is one of the four cities comprising a major metropolitan area known as the Quad Cities. While its proximity to the Mississippi River has played a large role in its economic success, Davenport is also a victim when this great river overflows its banks. The Mississippi unleashed its full fury on Davenport in a devastating flood in 1965. Over $4 million in damages disrupted the lives of many citizens.

In the aftermath of this disaster, Congress authorized a flood control plan for Davenport in 1970. The Army Corps of Engineers moved rapidly to design a series of levees and a floodwall to protect the downtown area of Davenport. One of the major goals of the Davenport flood control project is the protection of the sewage treatment plant which is so important to the health and well-being of the community.

After the corps designs were formulated, I became concerned that not enough attention was given to the project's adverse impact on the scenic values of Davenport and Nahant Marsh, one of the outstanding ecological resources in the Quad Cities area.

Nahant Marsh is an outstanding example of a marsh sedge-meadow wetland. It takes decades to establish this unique vegetation, which provides a habitat for many varieties of fish and wildlife.

While its ecological values are reason enough to protect this resource, the importance of Nahant Marsh is enhanced by its location to the Quad Cities. It is one of the few remaining wildlife areas that is easily accessible to the citizens of the area. Nahant Marsh thus functions as a living laboratory to the hundreds of bird watchers, conservation and nature groups, and ordinary citizens who visit and enjoy its unique values each year.

As I have indicated, Mr. President, Nahant Marsh is a fragile natural resource which would be permanently destroyed by the project design. The flood protection provided by the Davenport measure would spur commercial and industrial development, and the resulting dredge and fill activities would damage the marsh.

It is clear that public opinion has rallied behind the need to protect the marsh, and Davenport officials and concerned citizens have worked with the corps to assure that no action be taken which would destroy this unique environmental resource.

As a result of this concern, the Corps of Engineers has recommended that Nahant Marsh and nearby lands be acquired and that certain mitigation and enhancement measures be taken to preserve the marsh. These measures include several water control structures to control the water elevation of the marsh during the dry season and the deposit of silt during spring runoff.

Mr. President, this plan to acquire and protect Nahant Marsh constitutes a post-authorization change which must be approved by Congress. My amendment authorizes $218,000 which is necessary to undertake the steps to protect nearly 163 acres and institute recommended enhancement measures.

I hope the Senate approves this amendment. We have the opportunity to demonstrate that natural resources and urban areas can exist together. We can assure that the significant benefits of Nahant Marsh remain available for the enjoyment and recreational pleasure of the citizens of Davenport.

Mr. GRAVEL. Mr. President, I have no problem with this amendment, and I yield to my colleague from Rhode Island.

Mr. CHAFEE. Mr. President, this seems like rather a good amendment, as a matter of fact, and so we not only support it but we support it enthusiastically.

Mr. GRAVEL. I yield back the remainder of my time.

Mr. CHAFEE. I yield back the remainder of my time.

Mr. CULVER. I thank the distinguished Senators from Alaska and Rhode Island.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Iowa.

The amendment was agreed to.

UP AMENDMENT NO. 1269

Mr. CULVER. I have another amendment which I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Iowa (Mr. CULVER) proposes an unprinted amendment numbered 1269.

Mr. CULVER. Mr. President, I ask unanimous consent that further reading of this amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of title 4, insert the following:

The Clinton, Iowa, local flood protection project authorized by section 203 of the Flood Control Act of 1968 (Public Law 90-483, 82 Stat. 739) in accordance with the recommendations of the Chief of Engineers in House Document Numbered 348, Ninetieth Congress, is hereby modified to authorize the Secretary of the Army, acting through the Chief of Engineers, to provide recreational development at the project site, at an estimated cost of $224,000 on lands that are acquired by the city of Clinton, Iowa, and held by the city for recreational use by the general public, and to permit the city to include the value of such lands as part of its required contribution toward the cost of such recreational development.

Mr. CULVER. Mr. President, this amendment to the Inland Navigation Development Act authorizes $224,000 for the creation of recreational features at the Clinton, Iowa, flood control project. It also permits the city of Clinton to include the value of the land to be donated for the recreational facilities as part of its share of the cost of this proposal.

I have a deep personal attachment to the flood protection measure currently being constructed by the U.S. Army Corps of Engineers along the banks of the Mississippi at Clinton. Clinton is one of the most dynamic, rapidly expanding communities in Iowa, and industrial investment there has grown over the last decade. It has, however, suffered from dangerous floods over the years, and this recurring threat has seriously hampered the economic and social growth of this major community. As a matter of fact, prior to initiation of work on the flood protection measures which are now under construction, average flood damage in Clinton was as high as $1 million annually. This threat clearly prevented the city from developing to its full potential.

In 1965, the Mississippi River unleashed its full fury on this thriving community in a record flood. The raging waters of the Mississippi River devastated the city and caused great sorrow for its residents. In purely economic terms, which do not measure the full magnitude of human agony, the 1965 flood caused over $5.5 million in damages at Clinton, including $1.6 million in lost earnings. Over 50 major businesses and industrial firms were temporarily closed, and 50 square blocks in the city's residential section were damaged.

As a Member of the House of Representatives from the district which includes Clinton, I conferred with local officials immediately following this disastrous flood. With the thoughtful and eager assistance of city officials and the Rock Island district office of the Corps of Engineers, we were able to expedite consideration of the necessary improvements to prevent further flood damages. The Rock Island district enthusiastically worked to submit the necessary report for congressional review, and subsequent testimony before the House and Senate committees on Public Works strongly supported the urgent need to approve and to commence work on these flood control facilities. Congress authorized a comprehensive project in the Flood Control Act of 1968 entailing construction of 8.1 miles of earthen levee and a concrete floodwall along the city's waterfront. Estimated Federal cost of this project, on which work began in 1974, is $30 million.

Mr. President, the amendment I am now offering is necessary to permit development of recreational facilities as part of this project and inclusion of the value of lands to be donated by the local project sponsor as a portion of its cost-sharing responsibility.

Recreational facilities were not a part of the original authorization for this project because they were precluded by law at that time as a function of such projects. Since 1965, however, that law has been changed, and it is now not unusual for local flood control measures to include recreational features. After that change in the law, the Corps of Engineers began plans to add recreational benefits to the Clinton flood control project. Consequently, these facilities constitute a post-authorization change, and Congress must specifically authorize $224,000 so that the corps may construct them.

Congress must also act to permit the city to include the value of land to be donated for the recreational amenities as part of its share of the overall project cost. Because of general regulations promulgated by the Corps of Engineers in 1977, the value of lands donated by local project sponsors cannot be used as partial fulfillment of their share of project costs. Before the new regulations were issued last year, the corps Rock Island district and Clinton city officials had already agreed to have the city to include the price of the land to be donated for recreation benefits at this project as part of its share of project costs. This amendment will let this agreement be implemented in this instance because it occurred before the regulations were promulgated; otherwise the Corps of Engineers will have to renegotiate these recreational features, a procedure which would result in costly delays.

The proposed recreational plan calls for the development of two elements: A bicycle path on top of the flood control levee, and a small park outside the levee with open playfields and equipment. The path would be located on the levee entirely within the public property required for the project, and additional easements will not be necessary. Approximately 6.5 acres of land will be

needed for the proposed Garfield Park recreational development.

The city and Federal Government will each pay half of the project cost of $224,000. The city will contribute about $70,000 along with the land for the park site.

The proposed recreational facilities have the strong support of the city of Clinton, and I personally know that city officials are quite anxious for the Corps of Engineers to begin constructing them. User benefits from these additional features are estimated to be $23,000 annually. The projected benefit/cost ratio is a favorable 2.7.

Mr. President, I am hopeful the Senate will approve this amendment to the Inland Navigation Development Act. It addresses the need to make the Clinton flood protection measure consistent with our general practice now of including recreational facilities in flood control projects, and it will enhance the benefits of this project.

Mr. GRAVEL. Mr. President, I have no problem with this.

I yield to my colleague.

Mr. CHAFEE. Mr. President, as I understand, the real essence of this amendment is that following the authorization of $220,000, I think it is, the chief part of the amendment is that the locals can contribute land in lieu of cash for their share of the local costs; is that correct?

Mr. CULVER. That is correct.

Mr. CHAFEE. I think it is a good amendment, Mr. President, and we certainly have no objection.

Mr. GRAVEL. I yield back the remainder of my time.

Mr. CHAFEE. I yield back the remainder of my time.

Mr. CULVER. I want to thank the Senators from Alaska and Rhode Island for their consideration of this amendment.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Iowa.

The amendment was agreed to.

UP AMENDMENT NO. 1270

Mr. GRAVEL. I yield to the Senator from Washington, Mr. President.

Mr. MAGNUSON. Mr. President, I send to the desk an amendment and ask unanimous consent that the reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will state the amendment by number.

The assistant legislative clerk read as follows:

The Senator from Washington, for himself and Mr. JACKSON, proposes an unprinted amendment numbered 1270.

The amendment is as follows:

At the end of title IV add the following:

That the Secretary of the Army, acting through the Chief of Engineers, is hereby authorized and directed to provide navigation improvements to the Blair and Sitcum Waterways, Tacoma Harbor, Washington, substantially in accordance with the report of the Chief of Engineers dated 8 February 1977 at an estimated cost of $18,400,000.

Mr. MAGNUSON. Mr. President, this amendment would authorize the U.S. Army Corps of Engineers to provide navigation improvements to the Blair and Sitcum Waterways in the Tacoma, Washington Harbor.

Last year, Senator JACKSON and I introduced legislation (S. 1186) to authorize those modifications required to permit the Harbor to receive modern deeper-draft vessels. The modifications authorized by S. 1186 are as follows:

First. Blair Waterway, which was constructed by the Federal Government, would be deepened from its current depth of 30 to 35 feet to between 41 to 45 feet;

Second. An existing bridge over the Blair Waterway, which provides vessels only 150 feet of horizontal clearance, would be removed and replaced with a new bridge providing 300 feet of horizontal clearance. It is important to note that three vessels have rammed the bridge during the past 3 years—putting it out of commission for periods up to several weeks; and

Third. The corps would assume maintenance responsibility for the Sitcum Waterway and maintain it at a depth of 35 to 40 feet.

Mr. President, when the Public Works Committee reported the River Basins Authorization bill last year, it provided for a Phase I study of the Blair and Sitcum project. A Phase I report on this project will be mostly a duplication of the feasibility report which was completed in 1975 and has been in the Office of Management and Budget since March 1977.

Furthermore, a Phase I report prior to construction authorization will delay this project by at least 2 years. Cost escalation during that 2 years will increase construction cost by approximately $4 million.

It is going to be done eventually. We should act now and avoid the risk of having the waterway tied up for weeks on end. I hope that the committee will accept the amendment.

Mr. GRAVEL. Mr. President, I have no objection to the Senator's proposal. I think, due to the unusual nature of the emergency involved, I would have no objection, and I yield to the minority.

Mr. CHAFEE. Mr. President, we are involved in a problem here, it seems to me, and I think we ought to get Senator CURTIS to come on back.

As I understand, what is proposed here is to go ahead with the authorization when the so-called Phase I has not been completed. Am I correct in that?

Mr. GRAVEL. Yes. I recognize that, but I think that we can either begin to start cleaning up right now, or wait, and I think we ought to start cleaning them up right now. So I am prepared to accept Senator PERCY's reoffer as well.

Mr. CHAFEE. I have some problems here. I suppose if we are going ahead with all of these, without Phase 1 concluded——

Mr. GRAVEL. We would not have a problem had the policy been properly understood by the Corps of Engineers, unfortunately. All we are doing is what we used to do. The question is, at what stages of the Phase I process are these projects? In this particular case, while we have some mitigating emergency circumstances that would probably be motivation enough to secure the project, certainly if you are placing it to a pointed degree, I think this is probably because of the emergency nature of the bridge situation, which probably has a degree higher motivation than otherwise.

Mr. CHAFEE. What is the amount of money involved?

Mr. GRAVEL. $18 million.

Mr. CHAFEE. I have no objection.

Mr. GRAVEL. I yield back the remainder of my time.

● Mr. JACKSON. Mr. President, I am in strong support of the amendment offered by Mr. MAGNUSON establishing construction authorization for the Blair and Sitcum waterways project. This project has already undergone extensive feasibility study and is ready for final design and construction stages. This project involves removing an old bridge, replacing it with a longer structure permitting a wider draw, and prepares the waterways for passage of deeper draft vessels. The project is absolutely essential for the continuing development of the Port of Tacoma.●

Mr. MAGNUSON. I yield back the remainder of my time.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

UP AMENDMENT NO. 1271

(Purpose: To modify the authorization of the Skagit River Levee and Channel Improvement Project)

Mr. MAGNUSON. Mr. President, I send to the desk an amendment, and ask that the reading be dispensed with.

The PRESIDING OFFICER. The amendment will be stated by number.

The assistant legislative clerk read as follows:

The Senator from Washington (Mr. MAGNUSON) offers an unprinted amendment numbered 1271.

The amendment is as follows:

At the end of title IV and the following:

That the flood control project for the Skagit River Basin, Washington, authorized by Section 203 of the Flood Control Act of 1966 (80 Stat. 1422) is hereby modified to authorize and direct the Secretary of the Army, acting through the Chief of Engineers, to construct such additional flood control measures as are needed to extend flood protection upstream to and including the community of Sedro Woolley, Washington, and to incorporate recreation facilities in the entire project, provided that in the view of the Chief of Engineers such additional measures are engineeringly feasible, environmentally acceptable, and economically justified. Construction of such additional flood control measures, at an estimated Federal cost of $12,000,000, shall be subject to the same conditions of local cooperation as required for the previously authorized project. Recreation facilities shall be cost shared consistent with the policy set forth in Public Law 89-72.

Mr. MAGNUSON. Mr. President, my colleague (Mr. JACKSON) and I offer this amendment to authorize the U.S. Army Corps of Engineers to provide levee extension protection for Burlington and Sedro Woolley, Wash., as part of the Skagit River levee and channel improvement project.

The corps is now involved in advanced engineering and design studies for the Skagit River levee and channel improvement project. Since authorization of the project in 1966, however, extensive development in the Burlington and Sedro Woolley area has occurred along with major flooding in 1975 and 1977. The flooding was of such a nature that it received nationwide attention. I am sure that the Senator from Alaska remembers the terrible floods we had on the Skagit River. We had to spend a lot of money there after declaring it a disaster area. Further flooding would be a catastrophe for these urban areas and would cause additional damage to homes, businesses, schools, and other developments that now exist. We had to spend more money on the last flood alone than this project would cost totally.

Mr. President, this amendment authorizes the following modifications to the project:

First, the Skagit River levee and channel improvement project, which was authorized in 1966 (P.L. 89–789), would be extended approximately 4 miles from Burlington to the vicinity of Sedro Woolley in the interest of flood control.

Second, the entire project including the levee extension to Sedro Woolley, would incorporate recreation as an additional project purpose.

The Federal cost for the modification would be $12 million and will be subject to the same conditions of local cooperation as required by Public Law 89–789. Likewise, the modification for recreation facilities would be cost-shared consistent with the policy set fourth in Public Law 89–72.

Mr. President, this is a matter of an emergency nature. I hope that the committee can accept the amendment.

Mr. GRAVEL. Mr. President, I have no problem with this proposal, and I will be happy to accept it. I yield to my friend from New Mexico.

Mr. DOMENICI. Mr. President, let me say to the chairman I am not going to insist that we vote on this amendment. I am willing to accept it. However, it does bother me that apparently our Phase I and Phase II approach is not working properly, and we are going ahead and approving construction before we have completed the Phase I work. It seems to me that we ought to be consistent.

I do understand the significance of this project as the Senator has described it, and my judgment tells me it would probably end up getting approval if it went through the process. But we do take any awful lot of time insisting that they get these qualified in the phased manner, and I really do not know why this one has not proceeded with the kind of dispatch through the Corps of Engineers that is necessary.

Having said that, I have no objection to taking the matter to conference, so I do not at this point object.

Mr. MAGNUSON. The problem is that there is such a lag between Phase I and when you get to Phase II. Many things happen along the way. Costs go up. You people deplore that yourselves. Remember, we take a close look at these projects in the Appropriations Committee. We do not appropriate every project that comes before us. The proof of the pudding is that there are many more authorizations than there are appropriations.

● Mr. JACKSON. Mr. President, I join with Mr. MAGNUSON in support of the amendment extending the Skagit River Levee and Channel Improvement project to protect the areas near Burlington and Sedro Wooley. In the 12 years since the original project was authorized, development in this area has made it necessary for increasing the project to provide flood control there. Considerable damage, at great expense to property owners and to the government, occurred during floods in 1975 and 1977. Incidently, I would like to add that this amendment adds recreation as a purpcse of the project. The Skagit is one of the most beautiful areas of the State and adding recreational uses to the project will greatly contribute to the project's value.●

Mr. GRAVEL. Mr. President, we accept the amendment. I yield back the remainder of my time.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

Mr. MAGNUSON. I have a third amendment which I am going to send to the desk.

Mr. GRAVEL. Will the Senator withhold that, and permit the Senator from Maryland (Mr. SARBANES) to offer his amendment, which we can handle very briefly?

Mr. MAGNUSON. Yes.

Mr. HODGES. Mr. President, will the Senator yield first?

Mr. SARBANES. Mr. President, I thank the distinguished Senator from Washington for his kindness in allowing me to offer my amendment at this time. I yield first to the Senator from Arkansas.

Mr. HODGES. Mr. President, I ask unanimous consent that Jon Abele of my staff have the privilege of the floor during the consideration of H.R. 8309 and any votes thereon.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 1742

(Purpose: To authorize navigation improvements)

Mr. SARBANES. Mr. President, I call up my printed amendment No. 1742.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Maryland (Mr. SARBANES), for himself and Mr. MATHIAS, offers an amendment numbered 1742:

Mr. SARBANES. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 17, line 6, insert the following:

SEC. 342. The project for improvements in the interest of navigation at Cambridge Harbor, Dorchester County Maryland is hereby adopted and authorized to be prosecuted by the Secretary of the Army acting through the Chief of Engineers substantially in accordance with the report of the Chief of Engineers dated November 8 1977, at an estimated cost of $379,000.

Mr. SARBANES. Mr. President, I offer this amendment on behalf of myself and my distinguished colleague from Maryland (Mr. MATHIAS). It authorizes the Army Corps of Engineers to proceed with deepening the channel of the Choptank River and the Cambridge Harbor Turning Basin in Dorchester County, Md., to a depth of 24 feet which would permit vessels carrying larger cargoes and with deeper drafts to call on the Port of Cambridge.

The dredging of the channel and the harbor is of vital importance to the economy of the city of Cambridge, Dorchester County, and indeed the entire surrounding Eastern Shore area. The port cannot accommodate fully loaded vessels in its present condition.

Cambridge has undertaken a special effort to export agricultural products from the Eastern Shore area and last year a vessel carrying locally grown corn departed from Cambridge for Nigeria. This was the largest vessel to use the harbor and it indicates the export potential of the port with concomitant benefits to the local farm economy.

In addition, the city of Cambridge is undertaking a vigorous economic development program by which it hopes to expand its economic base. Such expansion requires that the harbor and channel be deep enough to handle fully loaded cargo vessels.

The project has strong community support. Community leaders and county and city officials, particularly the mayor of Cambridge, Mayor Atkinson, and the State senator from that area, Senator Malkus, have been unstinting in their efforts to get this project underway. The project has been fully approved by the Corps of Engineers and the Department of the Army. It has a very good cost-benefit ratio. The local financial participation is assured.

It is important to move and move now because there is an environmental window for this dredging of October 1 until December 15. If we miss that environmental window this year for the purposes of the dredging we then have to carry over for another year. Therefore, it is extremely important to move forward on this very important economic development project to which there are no environmental objections. I would hope that the managers of the bill would see their way clear to accept the amendment.

Mr. DOMENICI. Mr. President, I yield to the senior Senator from Maryland on a matter that we have already approved. Then I shall be glad to yield the floor.

Mr. MATHIAS. Mr. President, I shall take only 1 minute.

The fact is, as this committee knows, that harbors wear out, like other facilities which are so critical and vital to our economic well-being. They wear out, because of bad management of farming practices and poor management of estuarine areas. That is why it is extremely necessary for the Senate to consider the

improvement of Cambridge Harbor in Maryland.

Mr. President, harbors, like other facilities wear out. For various reasons harbors need repair and maintenance. Years of farming on adjacent lands or construction projects in the vicinity can cause runoff and resulting silt. When the harbor is an ancient and historic one like the harbor in Cambridge, Md., the silting process has been going on for several centuries. The time has come to dredge and deepen the Cambridge Harbor.

Although the Chesapeake Bay is famous for recreational boating; this is no recreational project. The need is for a 25-foot channel and harbor, which is, of course, deeper than would be required by most pleasure craft.

On the contrary, this project is to supplement the extensive local efforts already made to revitalize the economy of Cambridge. Several industries have located there in anticipation of the development of port facilities. Grain shipments and other cargoes will be shipped through the Port of Cambridge when it is clear that ships may have safe passage through an adequate channel. This amendment will accomplish these purposes and it ought to be adopted.

We sometimes are reminded of the way in which "bread cast on the waters" will return to the donor. This is such a case. A relatively small investment here will bring a big return to the Government in terms of industry, corporate, and individual taxes and general economic activity.

Mr. GRAVEL. Mr. President, I am ready to accept the amendment. I yield to my colleague.

Mr. DOMENICI. We have no objection. This could await a report from OMB, but we see no objection to it in light of the circumstances described by the Senator. We will accept it.

Mr. GRAVEL. I yield back the remainder of my time.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

UP AMENDMENT NO. 1272

Mr. MAGNUSON. Mr. President, I send an amendment to the desk on behalf of myself, Mr. JACKSON, Mr. MARK HATFIELD, and Mr. PACKWOOD and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Washington (Mr. MAGNUSON) for himself, Mr. JACKSON, and Mr. HATFIELD of Oregon, proposes an unprinted amendment numbered 1272.

Mr. MAGNUSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

That the authorization for the Phase I design memorandum stage of advanced engineering and design of a second powerhouse at McNary Lock and Dam, Columbia River, Oregon and Washington provided in Section 101(a) of the Water Resources Development Act of 1976 (Public Law 94-587, 90 Stat. 2919) is hereby modified to authorize and direct the Secretary of the Army, acting through the Chief of Engineers to construct a second powerhouse at McNary Lock and Dam, Columbia River, Oregon and Washington, substantially in accordance with the report of the Chief of Engineers dated 29 June 1976 at a currently estimated cost of $548,000,000.

Mr. MAGNUSON. Mr. President, this is an amendment which requires a little more money than the other two I had proposed. It is a very important amendment. It authorizes the U.S. Army Corps of Engineers to construct the second powerhouse at McNary Dam. In these days of looking for energy, I know of no better place to get low-cost energy than to exercise immediately, where we can, our hydroelectric potential. This will mean many, many hundreds of thousands of kilowatt hours. It ought to be done now, as soon as possible.

The Senator from Alaska and I attended a meeting sometime ago in the White House when we were talking about energy problems. Remember, I asked the question of Dr. Schlesinger: "You talk about solar energy, the use of coal and nuclear energy. What about hydro? You never mention that."

They said, "Well, it is a small part of a big picture."

I said, "Well, it may be a small part of the big picture in some places but in the Pacific Northwest it is the biggest picture—hydroelectric power."

The President of the United States, in order to speed this hydropower development, asked the Army engineers to make a survey. They came back with their survey. They did it in all parts of the country.

We found that we have a great hydroelectric potential to which we should address ourselves right now. We should get it done. It is clean power. It is low-cost power. It relieves us from using oil. As a matter of fact, the Army engineers testified not long ago that the existing Federal hydroelectric dams were equal to 89 million barrels of oil.

Mr. JACKSON. Will the Senator yield?

Mr. MAGNUSON. Let me finish. We would have been using that oil had we not developed our hydro potential.

I yield.

Mr. JACKSON. Mr. President, my senior colleague is making a very important point here. The power is available. We are not building a new dam. We have provided the water, thanks to a treaty with Canada and the Libby Dam in Montana, which makes it possible to add 1.2 million kilowatts of installed power in an existing dam.

Mr. President, this affects a wide region. We have a direct current line that runs from The Dalles down to southern California. Subsequently there will be another line that will be running into Arizona to cover part of the Southwest when we have surpluses. During the oil embargo I would point out in 1974 we were able, because of a surplus in the Northwest, to send to the Southwest the equivalent in a 3-month period of about 50 million barrels of oil. We sent that in hydropower. Every dime, Mr. President, of this project is paid back with interest.

At a time when we are talking about cutting down imports on oil, as my senior colleague has pointed out, here is a classic example where we can save on imports by making this power available as fast as possible.

We cannot afford any delays in this project. A 2-year delay would increase costs as much as 40 percent.

I cannot think of a more prudent or a better investment that can be made at this time. I commend my colleague for his comments.

Mr. MAGNUSON. This is a loan. We pay it back with 5¾ percent interest. The Senator from New Mexico is making a great fight about user charges, and about getting money back into the Treasury. I say that the hydrodams in his part of the country pay the money back at 5¾ percent interest. And they are way ahead of schedule on all the dams, including McNary.

The construction cost, if we do not move on it now—will increase by $148 million based upon current forecasts.

The power benefits lost would amount to $51 million per year. The incremental study costs will be approximately $250,000. In total, it is estimated that the phase I requirement on McNary second powerhouse project could cost nearly $200 million in added costs and lost revenue. We want the cost as low as possible, because we are responsible for paying it back to the Treasury.

The best example is when we speeded ahead on the second and third powerhouse at Grand Coulee. As my colleague pointed out, some 50 million barrels of oil would have had to go into southern California had we not.

I see my friend from Alaska smiling at me. I think we ought to go ahead with some other hydroprojects, too. Up in Alaska, there is cheap power. We need to figure out a way to start the development and transport it.

All of this saves oil, That is what we are talking about. That is the name of the game now. We are all ready to go. Just give us a loan and we will pay you back. It is not going to cost the Government anything in the long run. But it is going to cost us about $200 million more to pay back if we do not do it now. I hope the committee will agree to this amendment.

Mr. GRAVEL. Mr. President, I, for one, have no problem with the expansion of hydro, particularly this one, where we already have the dam and are just adding the powerhouse. We have been in phase I for 18 months. I have difficulty understanding why it would take so much more time, particularly when you are aware of what hydropower has done for the Northwest. The lowest power cost in the United States is in the Northwest and the reason for that is their hydrodevelopment. I have no problem accepting this amendment.

I yield to the minority for their comments.

Mr. DOMENICI. I should say, Mr. President, that I was most impressed with that portion of the discussion of the distinguished Senator from Washington (Mr. MAGNUSON) in which he talked about paying it back. Tomorrow and the

next day, we shall give him an opportunity to be consistent. We shall let him sit here and listen to the debate on whether we should be paid back for what we do for the barges.

Mr. MAGNUSON. I shall be consistent. I did not particularly want to pay this back, but they made us pay it back. If I do not have to pay something back, I am not going to vote to pay it back. I am very consistent. We agreed to this. Down in the Senator's country. They pay back on irrigation projects without interest.

Mr. DOMENICI. Absolutely. That is why we are saying that that one kind is so peculiar. It gets it free. You have to pay back your hydro, we have to pay back our irrigation, but the barges do not pay anything back.

The Senator's argument on paying it back and its being in advance was just eloquent. Tomorrow or the next day, we shall remind everyone that the chairman of the Committee on Appropriations thinks that is an excellent American policy, that those who benefit ought to pay back.

Mr. GRAVEL. Will my colleague yield? He has been allotted 3 hours to make his case on that subject.

Mr. DOMENICI. I have a half-hour on this one.

In any event, we have no objection to the amendment presented by the distinguished Senator from Washington.

Mr. MAGNUSON. I thank the Senator.

Mr. DANFORTH. If the Senator will yield, we shall also raise tomorrow the question of the possibility of recovering costs for the use of the deep-draft harbors and ports.

Mr. DOMENICI. We shall be glad to consider that. If they have any domestic competition that is out of balance, because of that, we shall be glad to consider that on parity with it. I do not know of any, but we shall certainly consider it.

Mr. GRAVEL. Mr. President, I yield back the remainder of my time.

Mr. DOMENICI. I yield back my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. GRAVEL. I move to reconsider the vote by which the amendment was agreed to.

Mr. DOMENICI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BELLMON. Mr. President, I ask unanimous consent that Mr. Doug Jackson of my staff may have the privilege of the floor during consideration and votes on this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BELLMON. I thank the Senator.

AMENDMENT NO. 1797

(Purpose: To reauthorize a portion of Papillion Creek and Tributaries Lakes, Nebraska, project in accord with the plan of April 18, 1978)

The PRESIDING OFFICER. Does the Senator from Nebraska desire to be heard?

Mr. CURTIS. Mr. President, I call up my amendment No. 1797.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Nebraska (Mr. CURTIS), for himself and Mr. ZORINSKY, proposes an amendment numbered 1797.

Mr. CURTIS. I ask unanimous consent that further reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place, add a new section as follows:

SEC. —. The Secretary of the Army, acting through the Chief of Engineers, is authorized to construct the plan of improvements for the Papillion Creek and Tributaries Lakes, Nebraska, described in the report of the Chief of Engineers dated April 18, 1978, with such changes as may be desirable by the Chief of Engineers, at an estimated cost of $37,200,000.

Mr. CURTIS. Mr. President, I rise at this time to call up an amendment, No. 1797, to the bill now before us. My amendment would add a new section to H.R. 8309, the Inland Navigation Improvements Act of 1978.

The amendment would reauthorize part of the Papillion Creek and tributaries lakes project, which was originally authorized for construction in Public Law 90–483, the Flood Control Act of 1968.

That project originally provided for 11 dams to be built for flood protection along the Big Papio Creek in eastern Nebraska. However, since authorization of the project and construction of one of the major flood control dams, the Corps of Engineers has undertaken a reevaluation of the project.

The Chief of Engineers has just completed his review of the plan of improvements, and in his report of April 18, 1978, he recommends replacement of nine of the dams with a single dam. Earlier, the remaining dam of the original 11 was eliminated from the project plans.

Reauthorization of the project is sought in accord with the Senate Public Works Committee report on S. 3823, the Water Resources Development Act of 1976, Public Law 94–587. In that report, the committee recognized the corps' decision regarding a need for reauthorization since the change in the project design constituted a significant alteration of the project as originally authorized.

Mr. President, I point out that this single dam is needed to provide flood protection on the Big Papio fork against the type of serious flooding that occurred in 1964 and on several occasions prior to that date.

I also point out that this reauthorization involves a considerable refinement in the project as originally authorized. The replacement of nine dams with a single larger dam will provide more flood protection at much less cost. My amendment reauthorizes this portion of the project at a cost of $37,200,000. That is a reduction of about $19 million in the total estimated cost of construction of the nine remaining dams which were originally authorized.

This is not a new item before the Senate. It is a reauthorization of a project that was first approved 10 years ago. It is a refinement on a project that was identified and discussed before the Public Works Committee in 1976. It can provide substantial savings while providing a greater degree of flood protection than would have been achieved under completion of the project as originally authorized.

I reserve the remainder of my time.

Mr. GRAVEL. If the Senator will yield, I had hoped we could deal with this on a broader scope. We have already moved on it on the floor, when we discussed meritorious projects. Extending and stretching that a little bit, the Senator's project would fall into that category.

I am glad to accept his amendment and yield to the minority if they have any comment.

Mr. DOMENICI. We have no objection.

Mr. GRAVEL. I yield back the remainder of my time.

Mr. CURTIS. I yield back my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. CURTIS. I move to reconsider the vote by which the amendment was agreed to.

Mr. GRAVEL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. WALLOP. Mr. President, I ask unanimous consent that Mike Morgan be accorded the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 1766

(Purpose: To make it a Federal offense to assault or murder an employee of the Corps of Engineers)

Mr. WALLOP. Mr. President, I call up my amendment No. 1766 and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Wyoming (Mr. WALLOP) proposes an amendment numbered 1766.

Mr. WALLOP. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 17, after line 5, insert the following:

SEC. 401. Section 1114 of title 18, United States Code, is amended by inserting "or any civilian official or civilian employee of the Corps of Engineers of the Department of the Army assigned to perform investigations, inspections, or law or regulatory enforcement functions in connection with civil activities of the Department of the Army," immediately after "Foreign Service,".

Mr. WALLOP. Mr. President, I have checked with the managers of this bill and in essence, all this amendment is designed to do is to provide for the Corps

of Engineers rangers essentially the same protections under the law as park rangers have and as have BLM personnel engaged in policing the ranges of the United States.

Mr. President, this amendment makes a very small change in title 18 of the United States Code as it affects crimes against certain personnel of the Corps of Engineers while in the performance of their official duties. However, to the men and women who must perform these oftentimes dangerous duties, it represents a larger change, one which will hopefully make their professions both easier and safer.

The Corps of Engineers administers approximately 11.5 million acres of lands and waters throughout the United States which are used for recreation and fish and wildlife purposes. Visitation at these areas accounts for about 400 million visitor days annually. To manage these areas, the corps is authorized to develop and enforce regulations which are necessary to protect visitors and their property at these areas. As expected, the difficulties encountered by corps personnel in the enforcement of these regulations have substantially increased with the number of visitors.

Congress realized these difficulties when it enacted section 234 of the Flood Control Act of 1970 which makes violations of these regulations punishable by a fine of not more than $500 or imprisonment for not more than 6 months, or both. The section also provides for the Chief of Engineers to designate individuals who shall have the authority to issue citations for violations, and require the person charged to appear before a U.S. magistrate. The corps has subsequently responded by requiring and providing additional training of these personnel so that they can carry out these duties and protect the ever-increasing number of visitors in a professional manner.

Assaults directed against these Corps Rangers are, of course, punishable under the criminal laws of the various States where they may occur. However, these State statutory provisions are not uniform in their application and are often not commensurate with the gravity of an offense such as an assault on a Federal employee while in the performance of his duties.

During 1977 alone, there were two attempted murders and eight assaults with deadly weapons perpetrated upon Corps Rangers in the performance of their duties. There were a total of 23 serious assaults upon these personnel, yet none constituted a Federal offense.

Assaults against FBI agents, park rangers, U.S. marshals, and other Federal law enforcement personnel are now punishable as a Federal offense under 28 United States Code 1114, yet similar crimes against Corps of Engineers Rangers are not. Yet these Rangers may be charged with enforcing similar Federal regulations having criminal sanctions. This unwarranted distinction will be corrected when the new Criminal Code goes into effect. However, that will be no earlier than 2 years hence.

Mr. President, I offer this amendment so that this unwarranted disparity will be corrected from this point forward, and so that those Rangers who may be assaulted this year and the next will not be denied this protection.

Mr. DOMENICI. I have a question of the Senator.

The analogy with the other two kinds of Federal employees seems to me to be valid only if the Senator's amendment covers uniformed civilian corps employees. Am I right or wrong?

Are we not extending the coverage to the type of person in the other two agencies that, indeed, are identifiable by the uniform they wear, rather than just being civilian employees of the BLM or Interior?

Mr. WALLOP. Mr. President, the amendment is designed to protect, reading from the amendment:

Any civilian official or civilian employee of the Corps of Engineers of the Department of the Army assigned to perform investigations, inspections, or law or regulatory enforcement functions in connection with civil activities of the Department of the Army," immediately after "Foreign Service,".

Mr. President, this has already passed this body within the body of the Criminal Code. The only thing this will do is provide that interim protection for the 2 years that we now have to wait until the code is, if the code is, enacted.

Let me ask, does the Senator not think it would be more consistent to extend this protection to those employees if they are uniformed than in the broad language he is including for just any corps inspector or employee that is around?

Mr. WALLOP. I would be happy to ask unanimous consent to amend my amendment to include the language, "any uniformed civilian official or uniformed civilian employee of the Corps of Engineers."

Mr. DOMENICI. If the Senator would so modify it, I would have no objection to the amendment.

Mr. WALLOP. Mr. President, I ask unanimous consent that it be in order.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRAVEL. I have no objection.

The PRESIDING OFFICER. Will the Senator send the modification to the desk?

Mr. DOMENICI. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. WALLOP. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WALLOP. Mr. President, I send the modified amendment to the desk.

The PRESIDING OFFICER. The amendment is so modified.

The question is on agreeing to the amendment, as modified.

The amendment, as modified, was agreed to.

The amendment, as modified, is as follows:

SEC. 401. Section 1114 of title 18, United States Code, is amended by inserting "or any uniformed civilian official, or uniformed civilian employee of the Corps of Engineers of the Department of the Army assigned to perform investigations, inspections, or law or regulatory enforcement functions in connection with civil activities of the Department of the Army," immediately after "Foreign Service,".

Mr. WALLOP. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOMENICI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1680

(Purpose: To revise the Alaska Hydroelectric Power Development Act)

Mr. GRAVEL. Mr. President, I call up my amendment No. 1680.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. GRAVEL) proposes an amendment numbered 1680.

Mr. GRAVEL. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRAVEL. Mr. President, I modify my amendment to read "On page 17, after line 5: Insert the following."

The PRESIDING OFFICER. Without objection, the amendment is so modified.

The amendment, as modified, is as follows:

On page 17, after line 5, insert the following:

SEC. 203. (a)(1) The Congress finds that the expeditious development of hydroelectric power generating facilities that are environmentally sound to assist the Nation in meeting existing and future energy demands is in the national interest.

(2) The Congress therefore declares that the expertise of the Chief of Engineers can and should be utilized for the benefit of local public bodies in the development of projects when 90 per centum or more of the benefits of the project are attributable to hydroelectric power generation when the project is fully operational.

(b) To meet the goals of this section, there is hereby established in the Treasury of the United States a Hydroelectric Power Development Fund (hereafter referred to as the "fund") to be and remain available for use by the Secretary of the Army (hereinafter referred to as the "Secretary") to make expenditures authorized by this section. The fund shall consist of (1) all receipts and collections by the Secretary of payments in accordance with subsection (e) of this section and payments by non-Federal public authorities to the Secretary to finance the cost of construction of projects in accordance with subsection (f) of this section, and which the Secretary is hereby directed to deposit in the fund as they are received, and (2) any appropriations made by the Congress to the fund.

(c) There is authorized to be appropriated to the Secretary for deposit in the fund established by subsection (b) of this section the sum of $25,000,000.

(d)(1) If the Secretary determines that moneys in the fund are in excess of current needs, he may request the investment of such amounts as he deems advisable by the Secretary of the Treasury in direct, general obligations of, or obligations guaranteed as to both principal and interest by, the United States. Income on the moneys so invested shall be used to benefit the work and projects supported by the fund at the time of the

investment and in proportion to the respective payments in the fund for such works and projects at that time.

(2) With the approval of the Secretary of the Treausry, the Secretary may deposit moneys of the fund in any Federal Reserve bank or other depository for funds of the United States, or in such other banks and financial institutions and under such terms and conditions as the Secretary and the Secretary of the Treasury may mutually agree.

(e)(1) The Secretary is authorized, for any project that meets the requirements of subsection (a)(2) of this section, to obligate Federal funds deposited in the fund to reimburse expenditures for the phase I design memorandum made by a non-Federal public authority pursuant to this Act, or to make expenditures from Federal funds deposited in the fund for the phase I design memorandum, if appropriate non-Federal public authorities, approved by the Secretary, agree with the Secretary, in writing, to repay the Secretary for all the separable and joint costs of preparing such design memorandum (including reasonable amounts incurred for overhead, administration, and interest), (A) if such report is favorable and (B) if the appropriate non-Federal authorities are able to borrow money to pay construction costs of the project, including the costs of the phase I design memorandum, based on the security of the project or its revenues within three years of the completion of the phase I design memorandum. Following the completion of the phase I design memorandum stage of advanced engineering and design under this subsection, the Secretary shall not transmit any favorable report to Congress prior to being repaid in full by the appropriate non-Federal public authorities for the costs incurred during such phase I. The Secretary is also authorized to make expenditures from non-Federal funds deposited in the fund or held by the Secretary for costs incurred during such phase I if the Secretary agrees with the appropriate non-Federal public authorities to reimburse said costs (i) if the report is not favorable or (ii) if the appropriate non-Federal public authorities are not able to borrow money to pay construction costs of the project, including the costs of the phase I design memorandum, based on the security of the project or its revenues within three years of the completion of the phase I design memorandum: *Provided,* That payments by the Secretary of such costs shall be subject to appropriations Acts. Payments by the Secretary under this subsection for phase I reimbursement shall include reimbursement of any interest expense of the appropriate non-Federal public authorities resulting from bonds or notes such authorities have issued to finance the phase I design memorandum and for any other expenses normally associated with the issuance and administration of revenue bond and note financings. Failure to complete a phase I report being prepared in accordance with the provisions of this subsection within a reasonable time in accordance with the schedule fixed in the phase I design memorandum agreement entered into by the Secretary with the non-Federal public authority due to Federal actions or inactions not primarily occasioned by the actions or inactions of sponsoring non-Federal public authorities, including, but not limited to, Federal inaction in failing to appropriate at any time amounts necessary to reimburse such costs and expenses in accordance with the schedule fixed in the phase I design memorandum agreement, shall also constitute a determination that such report is unfavorable for purposes of this subsection. Payments by the Secretary shall be made from the fund to the extent of the amounts appropriated to the fund or from such other funds as such Acts may provide for this purpose. The Secretary shall agree to hold and apply any Federal funds deposited in the fund with respect to a particular project of a non-Federal public authority for which the Secretary has expended non-Federal funds, in accordance with the terms of a phase I design memorandum agreement entered into by the Secretary with the non-Federal public authority for the benefit of the holders of bonds or notes issued to provide the non-Federal funds. The Secretary shall transmit a copy of a completed phase I report, including a proposed agreement between the Corps of Engineers and the appropriate non-Federal public authority setting forth the terms and conditions for construction of the project, in accordance with the provisions of this section, to Congress and to the appropriate non-Federal public authority. If the proposed agreement for construction of the project is entered into and approved pursuant to subsection (g) within two years of completion of the favorable report, the project shall be constructed in accordance with subsection (g) if the non-Federal public authority is able to borrow money to pay construction costs of the project, including the costs of the phase I design memorandum, based on the agreement and the security of the project or its revenues within three years after completion of the favorable report. The Governor of the State and his designees may use the project report prepared in accordance with the provisions of this subsection as they determine to be necessary to undertake State construction of a project. The United States shall not be liable for the payment of any damages resulting from State use of the project report and the State construction of any project in connection therewith unless due to negligence of the United States.

(f) In connection with water resources development projects which meet the criteria established by subsection (a)(2) of this section and which are to be constructed by the Secretary, acting through the Chief of Engineers, in accordance with an authorization by Congress and a contract between the non-Federal public authorities and the Secretary, pursuant to subsection (g)(1) of this section occurring on or subsequent to the date of enactment of this Act, the Secretary, acting through the Chief of Engineers, is authorized to construct such projects including activities for engineering and design land acquisition, site development, and off-site improvements necessary for the authorized construction by making expenditures from (1) the fund established in subsection (b) of this section of funds deposited by non-Federal public authorities as payments for construction and (2) payments of non-Federal public authorities held by the Secretary as payment of construcion costs for a project authorized by this section.

(g)(1) Prior to initiating any construction work under the authorities of this section, the Secretary and the appropriate non-Federal public authorities shall agree in writing and submit such agreement to the Committees on Public Works and Appropriations of the Senate and House of Representatives for review and reporting to the Congress for its consideration and approval, that the appropriate non-Federal authorities will pay the full anticipated costs of constructing the project determined by the agreement as provided in this subsection at the time such costs are incurred, together with normal contingencies and related administrative expenses of the Secretary, and such payments shall be deposited in the fund or held by the Secretary for payment of obligations incurred by the Secretary on an authorized project under this section. The agreement shall provide for an initial determination of feasibility and compliance by the project with law. The total non-Federal obligation shall be paid on or prior to the date the Chief of Engineers has estimated by agreement, that the project concerned will be available for actual generation of all or a substantial portion of the authorized hydroelectric power of the project, as determined in the agreement between the Secretary and the non-Federal public authority.

(2)(A) In consideration of the obligations to be assumed by non-Federal public authorities under the provisions of this section and in recognition of the substantial investments which will be made by these authorities in reliance on the program established by this section, the United States shall assume the responsibility for paying for all costs over the anticipated costs fixed in the agreement with the non-Federal public authorities, if such costs are occasioned (i) by acts of God, (ii) failure on the part of the Secretary, acting through the Chief of Engineers, to adhere to the agreed schedule of work or a failure of design or (iii) are necessary to be paid by the United States to permit operation of the project in accordance with the initial determination of feasibility: *Provided,* That payments by the Secretary of such costs shall be subject to appropriations Acts.

(B) Any Federal funds required to complete the project pursuant to paragraph (2)(A)(iii) of this subsection shall be repaid to the Treasury with interest by the non-Federal public authorities from revenues received from the sale of power. Payments shall commence following retirement of all bonds issued by the non-Federal public authorities for the project. Interest payable under this subparagraph shall be at the rate the Federal Government must pay on such obligations at the time of payment pursuant to paragraph (2)(A)(iii).

(h) The Secretary is authorized and directed, pursuant to the agreement, to convey all title, rights, and interests of the United States to any project, its land and water areas, and appurtenant facilities to the non-Federal public authorities which have agreed to assume ownership of the project and responsibility for its performance, operation, and maintenance, as well as necessary replacements in accordance with this section upon full payment by such non-Federal public authorities as required under subsection (g) of this section or at the time of the election of the State to construct the project if made in accordance with subsection (e) of this section. Such conveyance shall occur at the time of the election, pursuant to agreement between the Secretary and the non-Federal public authority, or shall occur, pursuant to the agreement required by subsection (g) of this section, to the maximum extent possible, immediately upon the project's availability for generation of all or a substantial portion of the authorized hydroelectric power of the project. The conveyance pursuant to agreement under subsection (g)(1) shall include such Federal requirements, reservations, and provisions for access rights to the project and its records as the Secretary finds advisable to complete any portion of project construction remaining at the time of conveyance and to assure that the project will be operated and maintained in a responsible and safe manner to accomplish, as nearly as may be possible, all of the authorized purposes of the project including, but not restricted to, hydroelectric power generation.

(i) This section shall be cited as the "Hydroelectric Power Development Act".

Mr. GRAVEL. Mr. President, this amendment is clean-up language to legislation passed in the closing hours of the session in 1976. It was a pioneering and very new approach to the handling of hydropower.

As we just acted upon a hydropower amendment wherein the Federal Government would put up the moneys and the Federal Government would be paid

back by the sale of the power to the consumers in question, recognizing the amount of time that it has taken for projects like McNary, 15, 20, 30 years, we tried to devise a new way of handling hydropower in the State of Alaska.

That was, rather than merely ask the Federal Government to fund the whole project and then pay them back at the end of the project, we set in motion a new approach and a new criteria of judgment, that is, rather than have the Government fund it, we would have the project built by bonds that would be sold in the public marketplace.

The problem at that point in time was, How do we get ourselves in a position to sell those bonds in the public marketplace?

We had just gone into this phase I approach. So what we decided was that until we completed phase I, which is when we would really know if we were going forward with the project, that we would have the Federal Government cover that cost, and that is just the way the legislation is right now.

But in order to even accelerate that process, what we have now suggested is that the State of Alaska be permitted and the authority created to sell bonds to pay for phase I, and if the project is a "no go," that the Federal Government pay back the State of Alaska for that and pay interest on what was involved.

That is essentially what this legislation does.

We passed the legislation similar to this last year. It was "clean up" in nature. We even accommodated a criticism that was made, what if there is a cost overrun?

Well, we accommodated that to say that would be paid for by the State of Alaska.

After the initial financing had been paid for, because of difficulty in selling bonds, we need something terminal from a time point of view in order to sell these bonds.

So what this amendment does is take some language that adds more terminality to that first phase of financing than presently exists.

This is the language our bond council told us we needed in order to secure the possibility of selling the bonds.

If this language is not adopted then, of course, these bonds cannot be sold and we can go back to the law we have now, which is authorizing the project and letting the Federal Government appropriate the money for the project, rather than go forward with this.

I might say, Mr. President, if we are successful in bringing this about in Alaska, it is probably the way all hydroelectric projects will be financed in the United States.

We had a meeting just the other day at the White House briefing us on what is coming out in their new water package. They, too, like the Senator from New Mexico, want to see people pay as they go, pay their way.

There is no approach more "pay your way" than this, and it does not have to go through the test of OMB, but through the test of the public marketplace, their ability to sell the bonds or not sell the bonds.

So I hope to see this adopted.

Mr. DOMENICI addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, let me discuss this a bit with the Senator from Alaska.

It is with reluctance that I ask some questions. I do that because I have some concerns.

I would very much like not to have to oppose the amendment. The Senator knows I worked with him diligently to get the amendment in 1977 that seemed to set in motion the possibility that he had been working for for many years.

Let me state this and see if he agrees with me.

The 1977 amendments we passed expanded the idea which then said that the locals would be allowed to be reimbursed, or we would pay for "unexpected costs after their bonds are retired."

That language was considered in the committee, and it was approved on the floor.

In addition, the State agreed to repay all costs of the project except for those due to an act of God or occasioned by delays of the Corps of Engineers.

Now, I see a few changes in this version.

If the Senator will refer to page 3 on line 24, it appears that if the locals only have to repay the costs, if they are able to borrow the money to pay it, otherwise the Federal Government——

Mr. GRAVEL. What is the Senator reading from?

Mr. DOMENICI. Page 3, line 24, of the amendment.

Mr. GRAVEL. Yes.

I thank my colleague.

Mr. DOMENICI. The latest version then appears to go a little further.

Let me start again on page 3, beginning on line 24.

It appears as if the locals only have to repay the costs if they are able to borrow the money to pay it, otherwise, the Federal Government must absorb the loss.

I would then suggest that on page 4, lines 15 and 20, the same result occurs.

What I am talking about, we have just approved an addition to a hydro project on the west coast with the clear understanding that all of the moneys would be refunded and reimbursed. Now the Senator is trying to put into effect a better way of using local money to get these projects started. But it appears to me that he is also saying that if the locals are unable to borrow the money to pay it, then we have to pay it. Is that what the Senator is saying, and is that right?

Mr. GRAVEL. The interpretation I would rather see placed on it is that there now is a new criterion. Presently, when you have a hydro project, you have the criterion that the Corps of Engineers recommends to Congress; then you have a decision of Congress, and that is it. You go and build it.

With this particular project, you have the corps recommendation, you have the decision of Congress, and you have the public marketplace. So if the public marketplace does not want to give its decision and then you are back at square one, you have a project authorized and you have to appropriate the money if you want to go forward with it.

If you are talking about just phase I, if it is a no go, what is the decision? Who says it is a no go? Congress can say it is a no go. The corps can say it is a no go. If the private sector says it is a no go, it is a no go; and the only way you then can make it go is to appropriate the money to do it.

All we have set up is the criterion that it is not open-ended. If you cannot sell the bonds, then you do not have a commercially viable project; and if Congress wants to approve it, that is its business. But the people in Alaska who have put up the money should get their money back, because this criterion has not been met, and, therefore, the Federal Government should cover the cost. That is done for projects now, without being subject even to that criterion.

Mr. DOMENICI. Except that the Corps of Engineers has something to do about picking the projects early on; whereas, the Senator's procedure is to let the State do it. That is all right with us, but why should we pick up the bill?

Mr. GRAVEL. That is not the case at all. This project was handled like any other waterway project. It started with a corps survey and went to Congress and was authorized in Congress. It is not the State that moved first. It is the Federal Government that moved first on this project. Nothing is being done to this project that has not been done to any other power project in this country. The only thing that has been added is that we now have to go to the marketplace to sell our bonds.

Mr. DOMENICI. Will the Senator tell me what this language means on page 4, lines 15 through 22:

> If the appropriate non-Federal public authorities are not able to borrow money to pay construction costs of the project, including the costs of the phase I design memorandum, based on the security of the project or its revenues within three years of the completion of the phase I design memorandum: *Provided*, That payments by the Secretary of such costs shall be subject to appropriations Acts.

Does that not say that, under those conditions, the Federal Government will pay that tab?

Mr. GRAVEL. Exactly, and that is exactly what I intend the language to do.

Mr. DOMENICI. Does that make it similar to other projects we have in the country?

Mr. GRAVEL. It makes it so similar that it will catch up to other projects, because other projects are paid through the appropriations process.

What we have done is sell bonds to put up our money, Alaska's money, to pay for the projects; and if the projects are no go, now the Federal Government can put up the money.

It is the same with McNary. We have spent money on that project. If Congress decides to stop it right now, whatever money has been spent has been spent, and that is all there is to it.

In the State of Alaska, we sell bonds to accelerate the process; because every day the process is delayed—which is one of the frustrations we have around here—it costs more money.

We are trying to get this project and we are trying to save money. We are putting up our money to do it. If it is a no go, we turn to the Federal Government and say, "You pick up the cost, as you do in every other project; but if it is a go, we will finance it in the public marketplace."

I do not know of any other project that does that. I do not know how the Senator can find fault with that.

Mr. DOMENICI. It says that if you are not able to borrow money to pay construction costs of the project, including phase I, the Federal Government will pay it. There is no objection to our advancing that money. But it does not say that we get reimbursed, as we do on the one we just appropriated.

Mr. GRAVEL. There is no way to get reimbursed. We have not built the project.

Mr. DOMENICI. It says, "borrow money to pay construction costs of the project, including the costs of phase I." If you are unable to do that, it says we pay that for you.

Mr. GRAVEL. If the Senator will permit me, I will go back over it. I am trying to be as methodical as I can.

If you cannot sell the bonds, you cannot build the project. Therefore, you cannot charge the people for electricity that you have not provided, for a dam we have not built.

Look at locks and dam 26. The Senator is familiar with that. We have spent a lot of money on that. We are just completing a phase on it. If we do not build it, what do we do? Are we going to charge the people who go through the gate for the cost of a project that never took place? Are we going to charge them for the study?

Phase I is a study phase. If you do not go forward, the Federal Government does it. If you go forward, the State borrows the money and pays back the Federal Government—borrows the money to build the project but also to pay back for the study phase; so that the Government is not out a sou in the whole deal.

What the Senator is saying is that he wants a vehicle with which to continue to have the people of Alaska pay for phase I. There is no vehicle except the realization of the project.

Mr. DOMENICI. I think we worked out with the Senator the last time the problem of phase I, and we put in all the contingencies we could to cover it and make it bondable.

What I am worried about is that I do not understand how the Senator is expanding it when he says that if you are unable to borrow the money to pay construction costs of the project, including the costs of phase I, based upon the security of the project or its revenues within 3 years of the completion, the Federal Government will pay for the whole thing.

Are we talking about only phase I or or about something else?

Mr. GRAVEL. No; I am just talking about phase I. The Federal Government does not have to pay for the whole thing. The only thing you are permitted is what moneys are in the trust fund. You are not going to pay for the construction, the whole thing, and you only authorize phase I in Congress. So how can you think you would pay for the whole thing?

Mr. DOMENICI. The language says "construction."

Mr. GRAVEL. The language says, "If the appropriate non-Federal public authorities are not able to borrow money to pay the construction costs."

The corps has approved the project. Congress has approved the project. The State has approved the project. We go out, and nobody wants to buy the bonds. The marketplace does not approve the project. So, essentially, they have turned it down. You cannot sell the bonds.

What happens is that, based upon the security of the project, nobody wants to buy the bonds, and you cannot sell the bonds in 3 years. You have been trying, and you cannot sell them.

So the bonds that were now used in order to pay for phase I are not open-ended; so that the bond buyers know that at some point somebody is going to be responsible. If you cannot sell them in 3 years, the Federal Government takes the money from the trust fund that already has been appropriated and takes back these bonds.

Mr. DOMENICI. I ask the Senator if he will do this. It is really the complicated language that is bothering us.

Mr. GRAVEL. With the help we had the last time, we cannot sell any bonds today.

Mr. DOMENICI. I would like to do this: I would like to sit down with the Senator from Alaska for about 10 minutes and look at this matter with some staff people, and I think we can work it out. I will not suggest anything but some clarifying questions for the Senator, and then I will not object. If the Senator does not do this, I have four or five amendments to suggest, and I do not want to do that.

Mr. GRAVEL. I would be prepared to vote on every one of them and to have a rollcall vote, starting quickly.

This has been through the process of the committee. The Senator's staff has had ample opportunity to work with us. I do not mind constructively working toward a goal.

The degree of misunderstanding that I think is apparent here goes to the philosophy of it. I appreciate the Senator's statement that he helped us the last time, but that help was so effective that we cannot sell bonds today, and that is why we are back here today.

All we are talking about on page 4 is paying back the money of phase I. If the Senator reads in that English language that we are authorizing the construction of this project by Congress, I cannot see how he reads that; and I would be prepared to vote up or down on the first point he has raised.

Mr. DOMENICI. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. METZENBAUM). The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, having conferred with the Senator from Alaska, I understand that as to the language on page 4 found on line 17, including the cost of phase I, and the language preceding that, talking about construction costs, we are talking about nothing more than phase I at that point.

Mr. GRAVEL. Very much so.

Mr. DOMENICI. Is that correct?

Mr. GRAVEL. Yes.

Mr. DOMENICI. Likewise on page 5 there again on lines 12, 13, and 14 we are talking again about phase I.

Mr. GRAVEL. Yes.

Mr. DOMENICI. Has the Senator from Alaska completed his presentation of the amendment?

Mr. GRAVEL. Yes, I have.

Mr. DOMENICI. I will not object to the amendment, although I do believe we are talking about a very complicated matter, kind of a possibility, an iffy situation. I know of the genuine interest of the Senator from Alaska, and I would have hoped we could have gone through this in more detail, but I believe that we should accept it and go to conference with it and if we have any clarifying amendments we can take them up at that time.

Therefore, I have no objections, Mr. President.

Mr. GRAVEL. I thank my colleague.

Let me just state that it is complicated and the only reason why it is complicated is because we are for the first time moving into the private sector so that we can get these hydro projects built not with Federal money with money that is sold in the marketplace. If a dam is a good project, a good deal, then it should be able to be financed in that manner. If it is not, then we should bag it.

This approach, I think, will be the prototype as how it will be handled in the future.

I yield back the remainder of my time.

The PRESIDING OFFICER. Does the Senator from New Mexico yield back the remainder of his time?

Mr. DOMENICI. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment, as modified.

The amendment, as modified, was agreed to.

Mr. GRAVEL. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. EAGLETON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MOYNIHAN. Mr. President, the Senator from Alaska has been kind enough to suggest that I might speak for just a moment at this point in the proceedings, and I would like to take the opportunity, if I can, to ask him a number of very general questions. If the Senator from New Mexico has a moment he might want to respond, too.

It is my understanding, Mr. President, that in this very large and comprehensive and important legislation which, I believe, we will end by calling the Water Resources Development Act of 1978, that basically the water resources being developed are those of the great river basins and of the arid regions of the Nation, and in this instance, as in the instances of all the predecessors to this legislation, which go back a very long way in American history, that there will be no provisions for the support of urban water projects of the kind which have historically, to be sure, been held entirely the responsibility of great cities or of cities and States.

I am thinking particularly of my own city of New York, which is now engaged in a situation of the greatest economic difficulty with our budget, and building a third water tunnel, an enterprise that goes on 40 stories below the level of the Bronx and Manhattan, an enterprise which has already brought on the deaths of 19 sandhogs, and an enterprise which is quite as magnificent and demanding, and certainly as expensive, an enterprise, as any of the great projects of the arid regions of the Nation, and certainly as important to the Nation, but which receives no help.

I wondered if it is the case—if I could ask the distinguished manager of this bill—that there are no provisions for urban water projects in this legislation?

Mr. GRAVEL. That is correct.

Mr. MOYNIHAN. May I say I would like to give notice that tomorrow, or the next day, whenever is convenient to the managers of the bill, I would like to introduce a new title which would authorize at a very modest level the beginnings of such activities on the grounds that it is just no longer realistic to think that the city of New York on its own can build massive water projects with no support, save from the State, whereas the rest of the Nation routinely can look to Congress for what, after all, is in the end simply water.

Mr. GRAVEL. If the Senator is talking about urban drainage, he is correct, there is nothing in this bill about that. But if the Senator is talking about water supply, we are doing a lot of it in urban areas.

Mr. MOYNIHAN. I am talking about drainage, of course, but in particular I am talking about——

Mr. GRAVEL. Any drainage project in the United States, and an example of that is the TARP project in Chicago, and that was one on the order of $4 million or $5 million, and we broke new ground in that area, so we are not hesitant as a Congress to go forward if the community has a real crying need and can demonstrate it.

I can assure my colleague that I, for one, hold New York in such strong affection that it would not be hard to get me to vote for those things in New York.

Mr. MOYNIHAN. I thank the distinguished Senator.

I ask unanimous consent to insert in the RECORD at this point an article by Francis X. Clines in the New York Times of today, May 2, 1978, called "In the Darkness 40 Stories Beneath the City."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

IN THE DARKNESS 40 STORIES BENEATH THE CITY

(By Francis X. Clines)

The work down under the city seems as impressive as the deaths there, and as granite-penned and hollowed out and dark as the deaths.

Going down into the slick darkness, the visitors are told by Sailor Kaplin that 19 sandhog workers have been killed so far tunneling 40 stories under the city, digging 13 miles down from the Bronx under Manhattan and across, through the earth, under the river, to Queens.

All this work to help the millions of living above quench their thirst by way of an immense new subterranean water passage worthy of ancient Pharaohs but actually attributable to a string of 20th-century mid-level rulers named Wagner, Lindsay, Beame and Koch.

"We remember the men of Local 14, 15, 147 and Local 3 who sacrificed their life to this job," Sailor Kaplin says, citing fellow sandhogs in a voice that stabs at the dark like his flashlight as the visitors descend in the sandhogs' elevator cage, moving faster than the water trickling down the walls of the 400-foot shaft. The men have died mostly in separate accidents—falls, fires, rock falls—and so the sacrifices have gone unnoticed up above.

The visitors—10 men and a woman who, in their yellow coveralls and hard hats, resemble aberrant moths—are breaking the routine of their own work life, which is to write down and publish various labor-union newspapers. They are trying something new, putting aside typewriters and paste pots and going out as a group from their white-collar offices around the city to see what the actual work of union people can look like. These paid poets of labor are replenishing their senses, looking for the solidarity of labor back at the work site instead of the union hall.

It's all very interesting in a big labor town like this, where some union leaders can be seen lapsing far from the lunch pail into the three-martini lunch.

The visitors' spirits are high. One man donning his plastic outfit cannot resist singing, "Look for the union label." There are Taiwan tags in some of the apparel.

Descending 40 stories under Van Cortlandt Park in the Bronx, one visitor asks how the group, which is to visit various types of labor sites, will ever top this first one for danger.

"Oh, we're going to plan a really dangerous trip next, to a public school," replies Tony Ramirez, an editor with New York Teacher.

The laughter compensates for the lost daylight, and, as eerie as the tunnel is, the visitors are quickly taking serious note that the 300 sandhogs working there are accepting three-fourths scale in hours and pay, doing round-the-clock shifts of six hours each instead of the eight hours each that were usual before the city's fiscal crisis hit.

"We had 90 percent unemployment when the job was shut down because of the crisis," says Ed Cross, a union official, recalling dollar-rich days when 1,500 sandhogs worked in the water tunnel. "At least this way four men get a job instead of three."

Matt Doherty, an editor with the state's United Teachers who is president of the visiting Metropolitan Labor Press Council, is impressed. "I've been writing the fiscal crisis so long it's a series," he says, "and here's a big part of the story—the death of workers, the sacrifice in wages."

Chick Donahue, a big sandhog with a red mustache, welcomes the visitors below with the same spirit. "This is where I make my living," he says, standing in a hole 24 feet in diameter that worms off toward the dark under Manhattan.

In the immense cold sepulcher of the sandhogs, none of the visitors' questions and concern sounds trite. There seems no place for cynicism as a string of glowing bulbs lights a frightening granite path downtown. The word workers are quickly resorting to the likes of "awesome" in describing this deep place, which has its own two-locomotive railroad hauling cement that is poured down like an endless poultice into the earth.

The visitors' pads and pencils seem beside the point as they toil in a huge control room carved five stories high and two football fields long, lined with more than 60 openings eight feet wide to hold giant flow valves.

"I hate to ask, but where are the valves coming from?" Harry Avrutin of the Central Labor Council's Chronicle inquires.

"Japan and Austria," a sandhog replies.

"Yea, the foreign countries bid cheaper than the U.S.," someone says in the shadow, and there is no discussion of why.

To ride the tunnel railroad, its steamy red lights flashing off giant tinfoil strips holding back water leaks in the ceiling and walls, is to get addicted to a vision knifing blackly, perfectly ahead. You can fantasize about Peenemunde as the train bleats along, but then Sailor Kaplan, 40 years a sandhog, starts talking American history.

"Can you imagine all this going on down here and only 200 years ago there was nothing—absolutely nothing—up above," he says, speaking more or less directly beneath Lehman College. He leads the group, sloshing through puddles bow legged and as confident as Casey Stengel, and imploring "you dignitaries"—he says the word like a friendly, slow joke—to press Albany and Washington for subsidies to get the tunnel back to full-time labor.

The visitors reassure Sailor that they will not soon forget this place and the sandhogs when they ascend to their colleagues in such unions as the garment workers, the maritime workers, the paper makers, the Catholic and public-school teachers and State labor's political-action committee.

Cameras flash up at buttress-like concrete molds, and at a man working plain and hefty with a pickax.

The man from the paper makers searches the darkness for his local angle. "How many ways do you use paper in this tunnel?" he asks.

A sandhog eyes the alien worker and says, "Not much." Then he quickly adds, "But you need water, a hell of a lot of water, Pal, to make paper."

Mr. MOYNIHAN. Finally, I would just like to say I think it is generally understood that there is no aspect of municipal maintenance which is more in need of help in most eastern cities right now than water supply; that there is none that is likely to be a larger source of employment, and which could be used for a constructive purpose.

With the kind permission of the managers of the bill, tomorrow I will introduce a title and, perhaps, we can debate it a little bit and see if we cannot expand the scope of this legislation which will encourage me to support it even more than I do.

Mr. GRAVEL. Let me recall to my colleague that I can remember standing on this floor and fighting for a project that the Senator's predecessor was taking an opposite point of view about.

Mr. MOYNIHAN. With the greatest respect, that is one of the reasons why he has a successor.

The PRESIDING OFFICER. The hour of 4:15 having arrived, the amendment

of the Senator from California (Mr. CRANSTON) to the amendment of the Senator from Alaska is now before the Senate. The yeas and nays have been ordered.

Mr. DOMENICI. Mr. President, I ask unanimous consent that I may have 1 minute to answer the Senator from New York before the vote.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and it is so ordered.

Mr. DOMENICI. Was the Senator's question with respect to water supply or drainage?

Mr. MOYNIHAN. It basically was obviously drainage which is the most appropriate matter.

Mr. DOMENICI. Drainage, does the Senator mean sewers?

Mr. MOYNIHAN. Yes.

Mr. DOMENICI. The Senator's concern is they are not presently eligible in the Northeastern part of the United States or that the Senator does not have any projects in this bill?

Mr. MOYNIHAN. More the latter, perhaps.

Mr. DOMENICI. I would say to the Senator there is authority, and I would also say with reference to the Corps of Engineers, the interesting thing is that the only part of the country wherein they have water supply jurisdiction is in Northeastern America.

Mr. MOYNIHAN. The Senator is quite correct.

Mr. DOMENICI. This bill would extend that nationally, but that is the only part of the country wherein they have singular jurisdiction to involve themselves in water supply.

Mr. MOYNIHAN. That is entirely correct.

Mr. DOMENICI. I yield back the remainder of my time.

AMENDMENT NO. 1260

The PRESIDING OFFICER. The question is on agreeing to amendment No. 1260.

The Senator from Missouri.

Mr. DANFORTH. Is it my understanding that a vote has been ordered at this time?

The PRESIDING OFFICER. The Senator is correct.

Mr. DANFORTH. I ask unanimous consent that after the completion of the vote I may be recognized to call up amendment No. 1836.

The PRESIDING OFFICER. Is the Senator from Missouri aware of the fact that the amendment we are voting on is an amendment in the second degree to the amendment of the Senator from Alaska that ordinarily would be before the Senate; that is, the amendment of the Senator from Alaska, as amended, would be before the Senate? Is the Senator from Missouri indicating that he desires recognition at the conclusion of the matter pertaining to the amendment of the Senator from Alaska, as amended by the amendment of the Senator from California?

Mr. DANFORTH. The Chair has stated my unanimous-consent request better than I could state it myself.

The PRESIDING OFFICER. Without objection, the Senator from Missouri will be recognized, as the Chair had already intended to do, upon the disposition of this matter.

Mr. DANFORTH. I thank the Chair.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from California. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Nevada (Mr. CANNON), the Senator from Colorado (Mr. HASKELL), the Senator from Montana (Mr. HATFIELD), the Senator from Hawaii (Mr. INOUYE), the Senator from West Virginia (Mr. RANDOLPH), and the Senator from Florida (Mr. STONE) are necessarily absent.

I further announce that, if present and voting, the Senator from West Virginia (Mr. RANDOLPH) would vote "nay."

Mr. STEVENS. I announce that the Senator from Nebraska (Mr. CURTIS), the Senator from Oregon (Mr. HATFIELD), the Senator from Kansas (Mr. PEARSON), and the Senator from North Dakota (Mr. YOUNG) are necessarily absent.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD) would vote "yea."

The result was announced—yeas 52, nays—37, as follows:

[Rollcall Vote No. 147 Leg.]

YEAS—52

Anderson	Glenn	Morgan
Bayh	Hart	Moynihan
Bentsen	Hathaway	Muskie
Biden	Hollings	Nelson
Brooke	Huddleston	Nunn
Bumpers	Humphrey	Pell
Burdick	Jackson	Percy
Byrd, Harry F., Jr.	Javits	Proxmire
Byrd, Robert C.	Johnston	Ribicoff
Case	Kennedy	Riegle
Church	Leahy	Sarbanes
Clark	Long	Sasser
Cranston	Magnuson	Sparkman
Culver	Matsunaga	Stennis
Durkin	McGovern	Stevenson
Eagleton	McIntyre	Talmadge
Ford	Melcher	Weicker
	Metzenbaum	

NAYS—37

Allen	Gravel	Roth
Baker	Griffin	Schmitt
Bartlett	Hansen	Schweiker
Bellmon	Hatch	Scott
Chafee	Hayakawa	Stafford
Chiles	Heinz	Stevens
Danforth	Helms	Thurmond
DeConcini	Hodges	Tower
Dole	Laxalt	Wallop
Domenici	Lugar	Williams
Eastland	Mathias	Zorinsky
Garn	McClure	
Goldwater	Packwood	

NOT VOTING—11

Abourezk	Hatfield, Mark O.	Inouye
Cannon	Hatfield, Paul G.	Pearson
Curtis		Randolph
Haskell		Stone

So Mr. CRANSTON's amendment No. 1260 was agreed to.

Mr. CRANSTON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GRAVEL. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. CRANSTON. Mr. President, if I may have the attention of Senators just on a matter of scheduling, there will be no more rollcall votes tonight. Rollcall votes can be stacked up for tomorrow on those amendments where such votes are requested.

Mr. GRAVEL. Mr. President, if the whip will yield on that point, if we could, we would like to receive those amendments where we can consider them on a voice vote today, getting to as many of the noncontroversial amendments as possible.

The PRESIDING OFFICER. The question recurs on the amendment of the Senator from Alaska on which there remains 58 minutes of time. Who yields time?

Mr. CHILES. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. On whose time?

Mr. CHILES. Mr. President, I withdraw the suggestion.

I send to the desk an amendment for myself and the Senator from——

The PRESIDING OFFICER. Is this an amendment to the amendment of the Senator from Alaska (Mr. GRAVEL)?

Mr. GRAVEL. Mr. President, may we vote on my amendment and that way, nobody will have to ask unanimous consent?

The PRESIDING OFFICER. This amendment is not in order except by unanimous consent.

AMENDMENT NO. 1831

Mr. GRAVEL. May we vote now on my amendment?

The PRESIDING OFFICER. Do the Senators yield back their time?

Mr. GRAVEL. I yield back the remainder of my time.

Mr. DOMENICI. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. DOMENICI. Is this the amendment of the Senator from Alaska that he and I debated?

Mr. GRAVEL. No, this is the amendment with regard to the projects that we agreed to in committee.

Mr. DOMENICI. I have no objection. I yield back my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment.

The amendment was agreed to.

● Mr. MELCHER. Mr. President, I am pleased that the Senator from Alaska (Mr. GRAVEL) and the Public Works Committee, has added my Inland Freight Transportation Study proposal as title VI in his amendment—the study proposal was previously approved by the Senate.

This title is a portion of the Commerce Committee's work and is not one that has been attacked or doubted in any way.

It provides a study that the Department of Transportation has cleared, and is in favor of, for within an 18-month

period various modes of freight transportation systems would be studied to see whether or not the public funds that are involved are equitable and whether or not they contribute to competition.

It requires an authorization of $1 million, and it is hopeful that within that period the study will come up hard, cold facts as developed by the Department of Transportation to determine what are truly the needs for a balanced freight system within the country.

The railroads, the truckers and the freight forwarderes are all for it, and Secretary Adams endorses it.●

Mr. CHILES addressed the Chair.

The PRESIDING OFFICER. I believe there is a standing order for the Senator from Missouri to present his amendment.

Mr. GRAVEL. The Senator is correct.

The PRESIDING OFFICER. I advise the Senator from Florida that the Senator from Missouri had previously requested that, immediately after the disposition of the amendment of the Senator from Alaska, he be recognized. It is on that basis that the Chair is recognizing him at this time.

Mr. CHILES. Will the Senator from Missouri yield?

Mr. STEVENS. Will the Senator from Missouri yield for just one item?

The PRESIDING OFFICER. The Senator from Florida is asking him to yield.

Mr. STEVENS. If the Senator will yield, I would like to set up some sort of order, if we could. There are three or four amendments that are going to be accepted, as I understand it. If the Senator from Missouri is going next and the Senator from Florida wants to go then, fine.

Mr. EAGLETON. I have been here for an hour. My amendment, under a gentleman's understanding, was to follow the Danforth-Eagleton amendment with an Eagleton-Danforth amendment.

Mr. STEVENS. I should like to get in next after that.

Mr. EAGLETON. That of the Senator from Florida will take 30 seconds if the Senator from Missouri will yield him 30 seconds.

Mr. DANFORTH. I am happy to yield 30 seconds.

Mr. DOMENICI. I understood that the Senator from Tennessee was going to follow the Senator from Missouri. We did not agree on that formally.

Where are we now?

The PRESIDING OFFICER. The only order pending at the desk is that the Senator from Missouri (Mr. DANFORTH) has the floor pursuant to the unanimous consent request that he made.

Mr. DOMENICI. How much time is the junior Senator from Missouri going to take?

Mr. DANFORTH. I shall take just 3 minutes.

Mr. BAKER. Mr. President, I have no desire to get in front of anybody else. I understand that the distinguished junior Senator from Missouri intends to take but 3 minutes. The distinguished senior Senator from Missouri has an amendment that will follow logically after that that will take 1 minute. I have one amendment which should not take long, so I shall be glad to flip a coin with the Senator from Florida as to which of us goes next. If it will be no inconvenience to him, I had planned to go right after the Missouri amendments. I promise it will not be more than a minute or so.

Mr. CHILES. All of them seem short enough, so I shall not object.

Mr. STEVENS. If the Senator will yield, I should like unanimous consent to go in some sort of order. I shall be happy to follow after the Senator from Florida.

Mr. DOMENICI. Will the Senator from Missouri yield for a unanimous-consent request?

Mr. DANFORTH. Yes.

Mr. DOMENICI. On behalf of Senator HUMPHREY, I ask unanimous consent that Mr. Tom Cator and Mr. Gene Graves be granted privileges of the floor during consideration and votes on H.R. 8309.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DANFORTH. Mr. President, I ask unanimous consent that Marc Steinberg of Senator GRIFFIN's staff, be granted the privileges of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 1836

(Purpose: To authorize construction of improvement for flood control at the St. Johns Bayou and New Madrid Floodway, Missouri)

Mr. DANFORTH. I call up my amendment 1836.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Missouri (Mr. DANFORTH), for himself and Mr. EAGLETON, proposes an amendment numbered 1836.

Mr. DANFORTH. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the proper place in the bill insert a new section as follows:

SEC.—. The project for flood control and other purposes for St. Johns Bayou and New Madrid Floodway, Missouri, authorized for phase I of advanced engineering and design in section 101(a) of Public Law 94–587 approved October 22, 1976, is hereby modified to authorize the Secretary of the Army, acting through the Chief of Engineers, to construct the project for flood protection and other purposes for St. Johns Bayou and New Madrid Floodway, Missouri, in accordance with Senate Document 95–87 at an estimated Federal first cost of $23,700,000.

The PRESIDING OFFICER. Will the Senator advise the Chair whether or not this is the amendment on which there is to be 3 hours of debate?

Mr. DANFORTH. It is not. There will be about 3 minutes of debate on this issue.

The PRESIDING OFFICER. I thank the Senator.

Mr. DANFORTH. Mr. President, this amendment is offered on behalf of myself and Senator EAGLETON. The basis for the amendment is, I think, pretty thoroughly set forth in yesterday's edition of the RECORD.

This is a project which has been in the works since about 1954, when there was the original authorization and appropriation for a project to close a gap in the levee at New Madrid, Mo. It was agreed, I think, by everybody at that time that the levee gap should be closed. However, the only plan which was established by the Corps of Engineers was defective because it did not provide for a pumping system to pump water that had been trapped between the two levees back into the Mississippi River. Therefore, in 1975, a new plan was arrived at which included a pumping system for the water to take it back into the Mississippi River.

That proposal was presented to the Congress, but by that time, the phase I-phase II method of authorizing such projects was being utilized. Therefore, phase I and phase I alone, at that point, was agreed to.

Phase I is now well underway. It is my understanding that it should be completed in fiscal year 1979. The problem is that further delay on phase I is very undesirable for a couple of reasons: One, this is a project that has been, I think, pretty well recognized as being necessary since 1954. Two, one of the remaining problems with the project is that the Fish and Wildlife Service and the Missouri Department of Conservation have both agreed that the acquisition of mitigating lands is a necessary part of the project. There is only one area of mitigating lands which have been agreed to by everybody as taking care of the environmental problems created by this project. That area of mitigating lands has recently experienced a very substantial increase in price due to land speculation in the area by certain German investors. In 1975, it was estimated that the value of the land to be acquired was $766,000. By 1978, that price had risen to $3,705,000.

It is for that reason that Senator EAGLETON and I believe that it is appropriate now to proceed directly with the authorizing of phase II for a total cost of $23.7 million.

Mr. EAGLETON. Mr. President, I rise to support the amendment offered by my distinguished colleague and myself.

The Corps of Engineers is currently proceeding with the phase I design memorandum study for the St. John's Bayou-New Madrid Floodway project as authorized by the Flood Control Act of 1976. This amendment would authorize construction of the project even though the phase I study will not be completed until October 1979.

I realize that to authorize construction prior to completion of the phase I study is a departure from established procedure, but I think the circumstances in this case warrant exceptional action. The proposed project would add increased flood protection to some 125,000 acres of prime farmland by modifying existing flood control structures. An important feature of the project is the addition of a 2,500-acre fish and wildlife mitigation area which has been developed in cooperation with both Federal and State conservationists. As I said, this is prime agricultural land; prices have jumped from $400 an acre to $1,200. Because land slated to be included in the

mitigation area is being bought up and developed, local sponsors are extremely concerned that any procedural delays will result in prohibitive land costs and that encroachment by developers will render the land unsuitable for mitigation purposes. Construction authorization would permit the corps to go ahead with land acquisition now before it is too late.

There is probably no more popular project in Missouri than this one for flood control in St. John's Bayou Basin and New Madrid Floodway. Local sponsors have worked with environmentalists well to be sure the proper steps are taken to avoid any adverse impact on fish and wildlife. When this is considered along with a favorable cost/benefit ratio of 2.2, I can see little reason not to approve the construction authorization.

The PRESIDING OFFICER. Who yields time?

Mr. GRAVEL. Mr. President, I want to speak with respect to this project.

The Senator from Missouri (Mr. EAGLETON) talked about this a couple of weeks ago. I wish that were the only time he had talked about this because he has been talking to me about it for a number of years.

I am happy to accommodate him, at least from the majority side, in this respect.

Mr. EAGLETON. I thank my colleague from Alaska.

I did raise this matter with him originally, I think, 2 or 3 years ago, more recently 2 weeks ago, and he expressed his interest in it.

I am delighted that he will consent to the amendment as proposed by Senator DANFORTH and myself.

Mr. DOMENICI. I just say to my good friends, both Senators from Missouri, that since we do not know any more about this project than we do about six or seven others, or eight, that we have accepted today, it seems to me we ought to treat them all alike and accept them.

On that basis, I have no objection. I compliment the Senator for bringing it to the flood today.

Mr. GRAVEL. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. Does the Senator from Missouri yield back the remainder of his time?

Mr. DANFORTH. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Missouri.

The amendment was agreed to.

Mr. EAGLETON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DANFORTH. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1273

(Purpose: To modify the project for the City of St. Joseph, Missouri, for recreational purposes)

Mr. EAGLETON. Mr. President, I have an amendment. It will be brief, and I ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Missouri (Mr. EAGLETON) proposes an unprinted amendment numbered 1273.

Mr. EAGLETON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the proper place in the bill insert a new section as follows:

SEC. —. The project for the City of St. Joseph, Missouri, as authorized by the River and Harbor Act of March 2, 1945 (59 Stat. 10 P.L. 79–14), is hereby modified to authorize the Secretary of the Army, acting through the Chief of Engineers, and in cooperation with the City of St. Joseph, Missouri, to construct public park and recreational facilities with improved access thereto in accordance with the requirements of section 4 of the Flood Control Act of 1944, as amended (16 U.S.C. 460d), on lands adjacent to the project that are acquired and held by the City of St. Joseph for recreational use by the general public, and to permit the City of St. Joseph to include the value of such lands as part of its contribution toward the development of such facilities

Mr. EAGLETON. Mr. President, this amendment is offered by myself and my colleague (Mr. DANFORTH).

Mr. President, city officials in St. Joseph, Mo., have negotiated with the Corps of Engineers over the past 2 years for development of a park-marina under the authority of section 209 of the Flood Control Act of 1962. Since the 1962 act, the corps has undertaken recreational development on a 50–50 cost-sharing basis with a local sponsor at completed water resource projects where recreation was not originally authorized. The value of land contributed by the local sponsor has always been eligible to be counted toward the local share until the corps' general counsel ruled on October 3, 1977, that land costs could no longer be credited toward the local matching share. Without the exemption from this ruling as I propose in this amendment, the city of St. Joseph will have to come up with an additional $65,350.

I think it is unfair to the people of St. Joseph to change the rules governing cost-sharing agreements of this sort in midstream. The city negotiated with the corps in good faith. I do not think the general counsel's ruling reflects congressional intent. The corps currently has four contracts where land costs were allowed as part of the local share and for which we have spent some $2.4 million. The corps does not plan to go back to all these project sponsors to collect for the land costs. I firmly believe that the city of St. Joseph, Mo., should be treated no differently and therefore, urge adoption of my amendment to correct this inequity.

Mr. President, I ask unanimous consent that supplemental information for St. Joseph amendment to be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Supplemental information for St. Joseph amendment

Other contracts where land costs were reimbursed:

Project:	*Land cost reimbursement*
Ohio River-City of Huntington, W. Va.	$46,000
Lake Washington-Seattle, Wash.	279,000
Tarpon Lake, Pinellas County, Fla	2,050,000
Carlion Canyon, Orange County, Calif	109,000
Total	2,484,000

Mr. EAGLETON. Mr. President, perhaps my colleague from Missouri may wish to comment.

Mr. DANFORTH. Mr. President, I simply want to join in the position taken by my senior colleague and thank him and express my appreciation to him for his leadership on this matter and to express my total agreement and support for this amendment.

Mr. GRAVEL. Mr. President, I have no objection to this amendment and will yield to my colleague.

Mr. DOMENICI. Mr. President, I have no objection to it.

Mr. GRAVEL. I yield back the remainder of my time.

Mr. EAGLETON. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Missouri.

The amendment was agreed to.

Mr. EAGLETON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GRAVEL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1274

Mr. BAKER. Mr. President, I send to the desk an amendment and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER) proposes an unprinted amendment numbered 1274.

Mr. BAKER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 6, line 8, of the Committee Amendment after subsection 401(g) add the following new subsection:

"(h) There is further authorized to be expended up to $1 million from construction general funds appropriated to the U.S. Army Corps of Engineers for the development of the Tennessee-Tombigbee Waterway Project in order that the Corps can provide facilities and training to increase skilled personnel in the crafts required for the construction of the Tennessee-Tombigbee Waterway Project. None of these funds should be charged against the economic costs of the project."

Mr. BAKER. Mr. President, this amendment creates a human resources center to promote minority employment in the Tennessee-Tombigbee Waterway.

Before I proceed further, Mr. President, I ask unanimous consent that my colleague (Mr. SASSER) be added as a cosponsor to this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the provisions of the committee's amendment be amended by adding a subsection at the end thereof which enables the corps to participate in efforts to train personnel for this project.

Mr. President, I have cleared this amendment with managers of the bill.

Funds utilized in this effort up to $1 million would come from already appropriated construction general funds to the corps and would not be charged against the cost of the Tennessee-Tombigbee project.

Mr. President, in July of this year the Corps of Engineers filed a report pursuant to the provisions of section 185 of the Water Resources Development Act of 1976 regarding the participation of minorities in the construction of the Tennessee-Tombigbee Waterway project. This report indicates that while the corps has undertaken to improve the utilization of minority resources on this project, their efforts have so far fallen short of their goals. Specifically, while minority employment has increased on the project, minority employees are heavily concentrated in the lowest-pay, lowest-skill jobs and minority contracts awarded on the project account for substantially less than 1 percent of project expenditures.

As you know, this project, located in the States of Tennessee, Mississippi and Alabama, is surrounded by a substantial minority population. I believe that it is imperative that the Congress act to bolster efforts to provide for minority participation in the planning and construction of this project.

Toward that end I have drafted a proposal for the establishment of a Human Resources Center which will oversee minority employment, assist in the coordination of Federal training programs to establish adequate minority skills, provide information to minorities regarding the availability of employment and construction opportunities and report annually to Congress regarding the status of minority employment on the project and the impact of project planning upon the distribution of project benefits among the communities affected by it. The center will be under the direction of an Advisory Committee composed of representatives of the States, the Corps of Engineers, other involved Federal agencies and organizations representing minority interests.

The proposal has been incorporated in the committee amendment to H.R. 8309, a bill authorizing certain water resource projects including Alton Locks and Dam 26.

The center will consist of a Board of Directors with seven members as follows:

A representative to be selected jointly by the Governors of Tennessee, Alabama and Mississippi;

A representative of the Tennessee-Tombigbee Waterway Authority;

A representative of the Corps of Engineers;

A representative of the Department of Labor;

A representative of the Department of Commerce, Office of Minority Business Enterprise;

A representative of the Minority Peoples Council, a local organization with an office in Gainesville, Ala., which has been actively working to enhance minority participation in the Tenn-Tom project; and

A representative of the NAACP.

The center will also have an executive staff to compile information, to assist in the preparation of an annual report, and to disseminate information to minorities regarding the availability of employment and construction opportunities.

In addition to its minority information function, the center will assist in the coordination of training programs for minority and exercise an oversight function in three areas:

First, to assure that minorities are employed in representative numbers, and at representative levels of skill and pay;

Second, to assure that the minority set-aside programs and minority subcontract programs are effective; and

Third, to assure that planning for the location, design, and operation of project facilities will provide for an equitable distribution of project benefits among the various communities along the project.

The purpose of this amendment is to assure the full participation of minorities living within the project area in the principal benefits of the project, including the development of industrial and commercial centers and other similar benefits which will arise as a result of the construction of the waterway. This is also intended to include any ongoing studies which relate to the project, such as the corridor study. It is recognized that the waterway itself is to be built substantially in accordance with Public Law 79–525, as more fully described in House Document 486, 79th Congress, 2d session. It is not the intention of this amendment to effect an annual review of the design of the project as previously authorized by Congress.

The center will submit an annual report to the Secretary of the Army and Congress, containing an inventory of progress in minority involvement in the construction and planning of the Tenn-Tom project, an evaluation of efforts to enhance minority participation, and the recommendations of the Board of Directors with regard to modifications of the programs and policies affecting minority participation.

This annual report will provide valuable information and data regarding the quality of minority involvement and will focus efforts to overcome impediments to full utilization of minority resources. It will be a valuable tool to the Secretary in developing policies for project construction and planning and in the coordination of interagency programs. The recommendations of the Board will provide guidance for congressional oversight and action.

The center will provide a broad based and independent council to assist minorities to obtain an equitable opportunity to participate in te Tenn-Tom project. It will help draw together diverse responsibilities and viewpoints, so that traditional impediments to minority participation can be more expeditiously overcome. It will, I hope, foster an atmosphere of cooperation so that minority hiring goals will be achieved as a joint undertaking.

The center will afford a valuable resource also to the Corps of Engineers which has initially undertaken the minority resource planning, but which as an engineering and construction organization, is not suited by its basic mission to manage this complex social task.

The minority peoples council was created by the Federation of Southern Cooperatives in an effort to overcome the impediments to minority hiring on the Tennessee-Tombigbee Waterway project. The council has worked actively to increase awareness of the magnitude of the problem and to bring public and private resources to bear on it.

The membership of this organization on the board of directors will assure continuity in the effort already begun to increase minority participation in this project.

The National Association for the Advancement of Colored People has long been recognized among the leaders of civil rights organizations. Its membership on the board of directors will greatly broaden the resources and perspective of the board.

But the NAACP will additionally afford the black community the opportunity to make the center a model for future action. Minority employment programs have frequently fallen short of their goals in rural areas especially where major public works projects are involved. The problems of coordinating Federal efforts to provide training and to focus on specific impediments to minority hire are compounded in rural areas. The center concept may offer a method of supplying the coordination and focus needed to meet this problem.

The proposal I have drafted calls for consultation by the center with several organizations which have played a vital role in the advancement of minorities in the Southeast region. It is my hope that the board of directors of the center will utilize the knowledge and expertise of these groups to advance the purposes of the center.
